Silver/ Smoke black	**3294H-A00123 70**	2CHH940123A4070	5

Rotary dimmer insert, LED, 2–400 W

LED dimmer With rotary control.
Two-way switch and soft-catch.
With N-terminal.
2- or 3-wire connection (neutral conductor not required).
Neutral conductor optionally connectable (recommended for the connection of low loads < 10 W/VA).
Very low installation depth: < 20 mm Without claws.
Optimised for dimming of retrofit LED lamps (LEDi).
For dimmable Retrofit-LEDs (LEDi).
For dimmable Retrofit-LEDs (LEDi) with conventional or electronic transformers.
For incandescent lamps, 230 V tungsten halogen lamps, low-voltage halogen lamps with conventional or electronic transformers and dimmable energy-saving halogen lamps.
Mix operaton of LEDi with conventional loads possible.
With manually adjustable operating mode: trailing / leading edge control.
With adjustable minimum/maximum brightness.
Low-noise level by MOSFET transistors.
With electronic short-circuit protection. With electronic overload protection.
Without cover plate.
Rated voltage: 230 V~, + 10% / - 10% Rated frequency: 50 Hz/60 Hz.
Nominal power (L): 2 - 100 W/VA (leading-edge control).
Nominal power (R, C): 10 - 360 W/VA (trailing-edge control).
Nominal power (LEDi): 2 - 100 W/VA (leading-edge control).
Nominal power (LEDi): 2 - 200 W/VA (trailing-edge control).

Levit®
Dimmers

Rotary dimmer, DALI, TW

Busch-Jaeger insert
Compatible with Levit cover plates
Art. No. 3294H-A00123 ..
For broadcast service (via central telegram).
For switching and dimming up to 37 DALI devices according to IEC 62386 (such as electronic ballasts and transformers with DALI-interface).
With rotary knob and ON/OFF push operation.
Protection against incorrect polarity.
For changing the color temperature of lamps “tunable white”, which meet DALI Standard IEC 62386-209 (Device Type 8). Color temperature can then be set between 2,700 K - 6,500 K.
Brightness power-on level and background brightness level adjustable, buffered. With integrated LED illumination for orientation. Up to 5 devices are connectable in parallel in passive mode.
Max. power consumption: 15 mA. Not suitable for combining with other DALI sensors or central units of other manufacturers. For the generation of the DALI voltage a power supply according to IEC 62386 is required; e.g. from Tridonic, Philips, Helvar or BJE, Art. No. 2116/11 U. Max. DALI cable length: 300 m (diameter 1,5–2,5 mm²). Protection class: IP 20
Operating temperature: 0 °C to 35 °C

Colour	Type	Order code	Pack/Qty.
	2116 U	2CKA006599A3025	1

Rotary dimmer DALI

Busch-Jaeger insert
Compatible with Levit cover plates
Art. No. 3294H-A00123 ..
For broadcast service (via central telegram).
For switching and dimming up to 37 DALI devices according to IEC 62386 (such as electronic ballasts and transformers with DALI-interface).
With rotary knob and ON/OFF push operation.
Protection against incorrect polarity.
Brightness power-on level and background brightness level adjustable, buffered.
With integrated LED illumination for orientation.
Up to 5 devices are connectable in parallel in passive mode
Max. power consumption: 15 mA.
Not suitable for combining with other DALI sensors or central units of other manufacturers.
For the generation of the DALI voltage a power supply according to IEC 62386 is required; e.g. from Tridonic, Philips, Helvar or BJE, Art. No. 2117/11 U.
Max. DALI cable length: 300 m (diameter 1,5–2,5 mm²).
Protection class: IP 20
Operating temperature: 0 °C to 35 °C

Rotary dimmer, DALI, Power

Busch-Jaeger insert
Compatible with Levit cover plates
Art. No. 3294H-A00123 ..
For broadcast service (via central telegram). With integrated DALI power adapter. For switching and dimming up to 37. DALI devices according to IEC 62386 (such as electronic ballasts and transformers with DALI-interface). With rotary knob and ON/OFF push operation. With short-circuit and overload protection (electronic fuse). Brightness power-on level and background brightness level adjustable, buffered. With integrated LED illumination for orientation. Up to 5 devices are connectable in parallel in passive mode. Connectable in parallel up to 3 devices in active mode. Not suitable for combining with other DALI sensors or central units of other manufacturers. Voltage DALI: 15.5 V =
Max. output current: 75 mA
Power consumption: < 2.5 W
Max. number of DALI-units:
- in the case of one active DALI potentiometer: 37
- in the case of 3 active DALI potentiometers in parallel connection: 111
Active mode: the potentiometer supplies the power to other DALI-devices and the control units.
Passive mode, without mains power:
a potentiometer in a DALI cable is suitable as an additional control point.
Max. DALI cable length: 300 m (diameter 1,5–2,5 mm²).
Nominal voltage: 230 V~, +10 % / -10 %
Rated frequency: 50 Hz - 60 Hz
Protection class: IP 20
Operating temperature: 0 °C to 35 °C

Colour	Type	Order code	Pack/Qty.

Levit®
Dimmers

Universal thermostat with rotary knob, 16A

Can be used for heating systems and for underfloor heating (gas, water, electricity)
Linear temperature setting (1 to 5 scale)
Indication of output status by two-color LED.
Two push buttons on the panel (with light ndication):
- power On/Off
- manual temperature reduction
As room temperature controller:
- temperature range: +13 ° C to +27 ° C
- adjustable manual temperature reduction from 2 °C to 8 °C
- hysteresis: +/- 0,25 °C
As floor thermostat:
- external temperature sensor required (heated floor sensor), Art. No. 3292U-A90100
- temperature range +15 °C to +48 °C
- adjustable manual temperature reduction from 4 °C to 16 °C
- hysteresis: +/- 0,5 °C
Nominal current: 16 A
Nominal voltage: 230 V ~

Mech. switching unit insert for thermostats or timers

For Programmable universal thermostat (Art. No. 3292H-A10301 ..)
Optional connection of external temperature sensor Art. No. 3292U-A90100 for floor heating.
In the event of power failure the control unit display goes off.
Operating temperature: 0 ° C to + 50 ° C
Output: potential free NO relay contact with safety galvanic isolation
Nominal current: 16 A (cos ϕ = 1)
3-wire connection
Nominal voltage: 230 V ~

Colour	Type	Order code	Pack/Qty.
	3292U-A00003	2CHU910003A4000	1

Universal thermostat, control unit

For use only in conjunction with switching unit insert for thermostats or timers (Art. No. 3292U-A00003)
Option to choose regulation of room temperature or heated floor temperature, as well as combined
Regulated temperature: 0 °C to +50 °C
Operation mode: manual, automatic, holiday, 3 time programs (each 70 marks each – min. interval 5 min; days of week 1, 2..., 7, 1-5, 6-7, 1-7)
Prediction function
Software switch-off
Choice of heating or cooling mode
Min. and max. floor temperature
Limits for adjustable temperature
Temperature offset
Optional response to control by external contact
Anti-freeze protection
Valves protection
Inversion of output function
Operating hours counter
Automatic summer/winter time change
Push-buttons lock
Adaptive control
Display brightness and contrast adjustment
Temperature selection sensor
Language selection: Russian, English, Czech
Power reserve: approx. 90 days (rechargeable Li cell)
The display is lit only when supplied with 230 V ~
Operating temperature: 0 °C to +50 °C
Floor temperature sensor (Art. No. 3292U-A90100) must be ordered separately

Levit®
Thermostats

Floor heating temperature sensor

For universal thermostat with rotary knob and programmable thermostat
Sensor element: PTC thermistor,
Resistance: 2 kOhm at 25 °C
Cable: PVC, 4 m
Conductors: 2 × 0,352
Cable head: metal, ø 6 × 18 mm
IP54

Colour	Type	Order code	Pack/Qty.
	3292U-A90100	2CHU919010A4000	1

Cover plate for thermostat

For insert: 2TKA00004033
If installing into a separate 1gang frame, please use the specialized frames with a 55 × 55 internal window
(Art. No. 3901H-A05510 ..)
If installing into a multigang frame, use standard frames with the corresponding number of gangs (Art. No. 3901H-A050..) along
with specialized cover plates with a 55 × 55 internal window (Art. No. 3901H-A00..55..):
external or internal depending on the position of the insert in the frame.
Also available: 2gang frames with a 55 × 55 internal window (Art. No. 3901H-A05520 ..)

Timers

Relay switch for timers

For programmable time switch
(Art. No. 3292H-A20301 ..)
Option to connect voltage free contact
for remote control.
In the event of power failure the control unit
display goes off.
Operating temperature: 0 °C to + 50 °C
Output: with galvanic isolation dry relay contact
2,300 W for resistive load (AC-1),
750 W for incandescent lamps
350 V for ballast units with control 1-10 V
(for example, incandescent lamps or LEDs)
3-wire connection
Nominal voltage: 230 V ~

Short-time timer insert

Busch-Jaeger insert
Countdown timer. For use with Levit cover plate Art.
No. 3299H-A40100 ..
For time-programmed switching off. of electrical
consumers. With push-buttons. Min. switch-off
delay: 1 second. Max. switch-off delay: 9:59:59 hours
Nominal voltage: 230 V~, +10 % / -10 %
Rated frequency: 50 Hz
Outputs: 1 Normally open contact
Nominal current: 10 A / cos ϕ 1. Nominal power: 2300 VA
Operating temperature: 0 °C to 35 °C

	6465 U-101-500	2CKA006410A0393	1

CO_2 Busch Raumluftsensor® room sensor

Busch-Jaeger insert
For controlling the incoming fresh air in rooms
by means of opening or switching of windows/fans.
For use with Levit cover plate Art. No. 3299H-A40100 ..
With display for carbon dioxide, humidity,
temperature and air pressure.
Setting values: carbon dioxide 800 ppm ...
1500 ppm, humidity 40% – 95%.
With two zero-potential relay contacts.
Nominal voltage: 230 V~
Nominal current 6 A cos ϕ = 1
Without claw fixation

Colour	Type	Order code	Pack/Qty.
	1091 U-500	2CKA001032A0518	1

Cover plate for Short-time timer / CO_2 sensor

For Busch-Jaeger inserts:
- Comfort timer control element 2CKA006410A0399
- Short-time timer insert 2CKA006410A0393
- CO_2 Busch Raumluftsensor® room sensor
  2CKA001032A0518

If installing into a separate 1gang frame, please use
the specialized frames with a 55 × 55 internal window
(Art. No. 3901H-A05510 ..)
If installing into a multigang frame, use standard
frames with the corresponding number of gangs
(Art. No. 3901H-A050..) along with specialized
cover plates with internal window 55 × 55
(Art. No. 3901H-A00..55..): external or internal
depending on the position of the insert in the frame.
Also available: 2gang frames with a 55 × 55 internal
window (Art. No. 3901H-A05520 ..)

Levit®
Movement detectors

Relay switch for movement detector insert

For motion detectors Art. No. 3299H-A02182 ..
Operating temperature: -10 °C to +55 °C
2,300 V for incandescent lamps, 1,750 V for low-voltage halogen lamps with conventional or electronic transformers.
500 VA / 64 mFd for fluorescent lamps
3-wire connection
Nominal voltage: 230 V ~

Colour	Type	Order code	Pack/Qty.
	3299U-A00006	2CHU700006A4000	1

2-channel relay switch for movement detector

For motion detectors Art. No. 3299H-A02182 ..
Contact 2 is closed approx.
3 min after contact
1 is closed when movement is detected
Contact 2 opens approx.
5 min after contact 1 is opened
Operating temperature: -10 °C to +55 °C
Nominal current: 3 A (cos ϕ > 0.8)
For compact fluorescent lamps (energy saving lamps) and LED lights
4-wire connection
Nominal voltage: 230 V ~

Colour	Type	Order code	Pack/Qty.
	3299U-A00007	2CHU700007A4000	1

TRIAC movement detector insert

For motion detectors Art. No. 3299H-A02182 ..
Brightness is dimmed 5 seconds before switch-off
(only when switch-off delay is set to > 30 seconds)
Operating temperature: -10 °C to +55 °C
40 – 300 W for incandescent lamps
No parallel connection possible
2-wire connection
Nominal voltage: 230 V ~

Colour	Type	Order code	Pack/Qty.
	3299U-A00001	2CHU700001A4000	1

Movement detector

For the following inserts:
- relay switch for motion detector 2CHU700006A4000
- 2-channel relay switch for motion detector 2CHU700007A4000
- TRIAC for motion detector 2CHU700001A4000

Detection range: 180°
Adjustable setting on the back of the cover panel: illuminance (1-1000 Lx), sensitivity, switch-off delay
(5 seconds - 10 minutes, or 15/30/45/60 minutes after pressing in-built button)

1gang frame, 55×55

Only for the following
Busch-Jaeger inserts:
- Short-time timer or comfort timer control element
- CO_2 room sensor
- Busch Btconnect Radio
- Busch-DigitalRadio
- Busch iNet Radio
- Loudspeaker

Standard Levit frames with internal window 50×50 are not compatible with the inserts listed above

2gang frame, 55×55

For use when
two Busch-Jaeger inserts (any of the following) need to be installed in a 2gang frame:
- Short-time timer or comfort timer control element
- CO_2 room sensor
- Busch Btconnect Radio
- Busch-DigitalRadio
- Busch iNet Radio
- Loudspeaker

Standard Levit frames with internal window 50×50 are not compatible with the inserts listed above

Levit®

Frames and blind covers

Cover plate for 55×55 frame, external

Used to expand the internal window of a standard multigang Levit frame to 55×55. When of the inserts in a multigang installation is a Busch-Jaeger insert:
- Short-time timer or comfort timer control element
- CO_2 room sensor
- Busch Btconnect Radio
- Busch-DigitalRadio
- Busch iNet Radio
- Loudspeaker

This product is for cases where the Busch-Jaeger insert is on the outside edge.

Swing®L
Understated beauty

A modest combination of colours and white. A modern square design. A compelling offer of light switches and socket outlets for your daring reconstruction plans. Easy fitting thanks to their flat installation depth. Find fun in the functional.

01 white / white
02 white / light grey
03 white / creamy
04 white / mocca
05 white / brick colour

Ideal for blocks of flats and refurbishment projects, due to the small installation depth

Swing®L

Rocker switches / push switches

Busch-rotary dimmer [1] [2] [3] [4] [5] [6] [7]
Flush-mounted, LED, 2-100 W

With rotary control, two-way switch and soft-catch.
2-wire connection (neutral conductor not required)
Optimised for dimming of retrofit LED lamps (LEDi).
For dimmable Retrofit-LEDs (LEDi). For dimmable Retrofit-LEDs (LEDi) with conventional or electronic transformers. For incandescent lamps, 230 V tungsten halogen lamps, low-voltage halogen lamps with conventional or electronic transformers and dimmable energy-saving halogen lamps.
Mix operaton of LEDi with conventional loads possible.
Via mode switch adjustable between leading edge control and trailing edge control.
Low-noise level by MOSFET transistors.
With electronic short-circuit protection.
With electronic overload protection.
With adjustable minimum brightness.
Without cover plate.
Rated voltage: 230 V~, + 10% / - 10%
Rated frequency: 50 Hz/60 Hz
Nominal power: 2 - 100 W/VA (retrofit LED loads).
Nominal power: 10 - 250 W/VA (non-LED loads).
Protection class (Device): IP 20
Temperature range (Device): 0 °C to 35 °CIEC 60669-2-1, British Standard EN 60669-2-1

Colour	Type	Order code	Pack/Qty.
	6523 U-102-500	2CKA006512A0335	1/10

Busch-rotary dimmer [1] [2] [3] [4] [5] [6] [7]
UP, LED, 2-400 W

Very small installation depth: < 20 mm.
With rotary control, two-way switch and soft-catch.
2-wire connection (neutral conductor not required)
Optimised for dimming of retrofit LED lamps (LEDi).
For dimmable Retrofit-LEDs (LEDi).
For dimmable Retrofit-LEDs (LEDi) with conventional or electronic transformers.
For incandescent lamps, 230 V tungsten halogen lamps, low-voltage halogen lamps with conventional or electronic transformers and dimmable energy-saving halogen lamps.
Mix operaton of LEDi with conventional loads possible.
With manually adjustable operating mode: trailing / leading edge control.
With adjustable minimum/maximum brightness.
Low-noise level by MOSFET transistors.
With electronic short-circuit protection.
With electronic overload protection.
Without cover plate.
Rated voltage: 230 V~, + 10% / - 10%.
Rated frequency: 50 Hz/60 Hz.
Nominal power: 2 - 100 W/VA (leading edge control).
Nominal power: 2 - 400 W/VA (trailing edge control).

Colour	Type	Order code	Pack/Qty.
	6523 UR-104-500	2CKA006512A0354	1/10

[1] Illuminable with neon lamp. Neon lamp included in delivery with cover plate.
[2] In the case of conventional transformers, take ~20% transformer loss into account.
[3] In case of electronic transformers, 5 % transformer losses.
[4] Also applicable for 1gang 2way installations.
[5] Provided with terminal for net disconnection devices.
[6] Only in conjunction with standard flush-mounting boxes according to DIN 49073, Part 1, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete)
[7] Recommendation: Please use loads and types of one producer.

Swing®L
Dimmers

Electronic potentiometer insert for 1 -10 V electronics ballasts, for rotary control and switch-on at minimal brightness level

For ⊣▭⊢ or for LED control via electronic ballast with 1 - 10 V interface.
Max. control current: 50 mA DC
Potential-free contact for switching the ballast power supply. It is recommended to use a relay for more than 5 ballasts.
4 A (cos ϕ = 0.9), 3 A (cos ϕ = 0.5)
700 W/V·A, 230 V AC, 50/60 Hz

Colour	Type	Order code	Pack/Qty.
	2112 U-101	6599-0-2035	1

DALI Power-potentiometer insert, with rotary control and ON/OFF push operation

For central switching and dimming up to 64 DALI devices in accordance with EN 62386. Increased brightness sensitivity setting at slow rotation.
Integrated orientation LED illumination (18 colour presets or OFF).
Short-circuit and overload electronic protection.
DALI cable length: max. 300 m (cores' cross section 1.5 to 2.5 mm²).
The brightness level when switched on by brief pressing: the same as it was when last used or pre-selectable. The brightness level when the power supply is restored after power failure: switched off status or pre-selectable (if supported by the DALI device).
In active mode the insert serves as a DALI power supply (15.5 V DC / 75 mA) for up to 37 DALI devices (or for up to 111 DALI devices with 3 power-potentiometers in parallel connection).
In passive mode the insert behaves as an additional control unit.
Parallel interconnection of power-potentiometers: up to 3 pcs in active mode or up to 5 pcs in passive mode.
The insert is not suitable for combination with other DALI sensors.
Power consumption: max. 2.5 W
4-wire connection in active mode, 2-wire connection in passive mode 230 V AC, 50/60 Hz

Colour	Type	Order code	Pack/Qty.
	2117/11 U-500	6599-0-2988	1

DALI potentiometer insert, with rotary control and ON/OFF push operation

For central switching and dimming up to 64 DALI devices in accordance with EN 62386.
Increased brightness sensitivity setting at slow rotation. Integrated orientation LED illumination (18 colour presets or OFF). An additional DALI power supply is needed (e.g. by Tridonic, Philips, Helvar, or the DALI power-potentiometer 6599-0-2988).
Current consumption: 7 - 15 mA
The insert is polarity-reversal proof.
DALI cable length: max. 300 m
(cores' cross section 1.5 to 2.5 mm²)
The brightness level when switched on by brief pressing: the same as it was when last used or pre-selectable.
The brightness level when the power supply is restored after power failure: switched off status or pre-selectable (if supported by the DALI device).
Up to fi ve potentiometers may be connected in parallel.
The insert is not suitable for combination with other DALI sensors.
2-wire connection

Colour	Type	Order code	Pack/Qty.
	2117 U-500	6599-0-2987	1

Cover plate for rotary dimmer [16)]

With fastening nut.
With two types of button
(for 6514-0-0111 and other devices).

Colour	Type	Order code	Pack/Qty.
white		3294G-A00125 B1	5

[16)] Cover illumination with neon lamp or LED is not possible.

Swing®L

Movement detectors

Switch insert for movement detector

Switching element: relay
Operating temperature: –10 °C to +55 °C
2 300 W for ☼, 1 750 V·A for ⊥⊥⊗ ⊥⊥⊗,
500 V·A / 64 µF pro ⊏⊐ [44]
For easy connection, terminal N is doubled.
3-wire connection, 230 VAC

Colour	Type	Order code	Pack/Qty.
		3299U-A00006	1

[44] Also for example, for compact 230 V AC lamps (so-called CFL bulbs) or luminaires with LED.

Switch insert for movement detector

Switching element: 2 relays (relay 2 switches on about 3 min after relay 1 switches on, independently of external lighting; relay 2 switches off about 5 min after relay 1)
Operating temperature: –10 °C to +55 °C
Max. 3 A (cos ϕ > 0,8) [44]
One spare fuse is inserted in the fuse box.
4-wire connection, 230 VAC

Colour	Type	Order code	Pack/Qty.
		3299U-A00005	1

[44] Also for example, for compact 230 V AC lamps (so-called CFL bulbs) or luminaires with LED.

Switch insert for movement detector

Switching element: triac
5 s before switching off the brightness is reduced
Operating temperature: –10 °C to +55 °C
40 - 300 W pro ☼
One spare fuse is inserted in the fuse box.
2-wire connection, 230 V AC

Colour	Type	Order code	Pack/Qty.
		3299U-A00001	1

[36] Parallel connection of devices is not allowed. Can not be used for non-ohmic loads (control coils, fluorescent relays, LEDs, etc.).

Movement detector

Detection angle: approx. 180°
Adjustable values (on the back of the cover): lighting threshold (1 - 1000 lx); sensitivity; switch-off delay (5 sec - 10 min, or 15 / 30 / 45 / 60 min by pressing integrated button)
Operating temperature: –10 °C to +55 °C
Need to be used together with a switch insert for movement detector.

Colour	Type	Order code	Pack/Qty.
white		3299G-A02180 B1	1

Blind control

Blind Shutter switch with central plate [3]

2-gang 1-way switch
10 AX, 250 V AC
Screwless terminals.
Fixation via screws or claws.

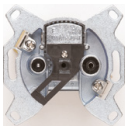
Socket outlet 45×45 with earthing pin

Only for 2× 1.5 mm² or 2× 2.5 mm² conductors.
16 A, 250 V AC

Colour	Type	Order code	Pack/Qty.
white (RAL 9010)		5525N-C02347 B	20
carmine (RAL 3003)		5525N-C02347 R1	20

Data connection

Radio/TV socket outlet insert



– terminal type (article number **EU 3503**)
– loop-through type with 7 dB tap loss (article number **EU 3607**)
– loop-through type with 10 dB tap loss (article number **EU 3610**)
– loop-through type with 14 dB tap loss (article number **EU 3614**)
Nominal impedance of inputs and outputs: 75 Ω
For coaxial cables with a diameter of 3.6 to 6.8 mm.
Fixation via screws or claws.

Colour	Type	Order code	Pack/Qty.
	EU 3503	5011-A3503	1
	EU 3610	5011-A3610	1
	EU 3614	5011-A3614	1

Radio/TV/SAT socket outlet insert

– terminal type (article number **EU 3303**)
Allows passage of a current of 500 mA DC and 22 kHz tone signal for LNB power supply and control.
Nominal impedance of inputs and outputs: 75 Ω
For coaxial cables with a diameter of 3.6 to 6.8 mm.
Fixation via screws or claws.

Colour	Type	Order code	Pack/Qty.
	EU 3303	5011-A3303	1

Cover plate for Radio/TV/SAT socket outlet

Colour	Type	Order code	Pack/Qty.
white		5011G-A00300 B1	10

Loudspeaker terminal

– black differentiation ring
Cross section of connecting wires: max. 4 mm²

Colour	Type	Order code	Pack/Qty.

Thermostats, timers

Switching unit insert for thermostats or time switch

Optional connection of external temperature sensor 3292U-A90100 for floor heating. Optional connection of potential free remote control contact (only for programmable control units 3292.-A10301, 3292.-A20301).
Note: In the event of power failure the control unit display goes off.
Operating temperature: 0 °C to +50 °C
Output: potential free NO relay contact with safety galvanic isolation
16 A (cos ϕ = 1), 230 V AC, 3-wire connection

Colour	Type	Order code	Pack/Qty.
		3292U-A00003	1

Universal thermostat with rotary temperature setting

Control unit (must be used with switching unit).
Selectable room or fl oor function of the thermostat.
Linear temperature setting. Indication of output status by two-colour LED. Push buttons for regulation ON/OFF and for manual temperature reduction (with LED indication).
Operating temperature: 0 °C to +55 °C
Room thermostat with thermal feedback:
Temperature range: approx. +13 °C to +27 °C
Adjustable manual temperature reduction:
approx. 2 K to 8 K
Hysteresis: approx. ±0.25 K
Floor thermostat:
Temperature setting range: approx. +15 °C to +48 °C
Manual temperature reduction: approx. 4 K to 16 K
Hysteresis: approx. ±0.5 K
The external temperature sensor 3292U-A90100 (not included) must be connected to terminals 1 and 2 of the switching unit.

Colour	Type	Order code	Pack/Qty.
white		3292G-A10101 B1	1

Floor heating temperature sensor

For thermostat with rotary temperature setting 3292.-A10101, for programmable thermostat 3292.-A10301.
Sensor element: PTC thermistor, 2 kΩ at 25 °C
Cable: PVC, 4 m length
Conductors: 2× 0.35 mm²
Cable head: metal, Ø 6 × 18 mm
Degree of protection: IP 54

Colour	Type	Order code	Pack/Qty.
grey		3292U-A90100	1

Swing®L
LED light

Accessories

Indication and orientation LED illumination insert

Installation depth: 25 mm
Screw-type terminals.
Fixation via screws only.
10 mA, 230 V AC

Indication and orientation LED illumination insert with infrapasive senzor

Installation depth: 25 mm
Screw-type terminals.
Fixation via screws only.
Switch-off delay: 1min
Threshold lighting : 10lx
12 mA, 230 V AC

Colour	Type	Order code	Pack/Qty.
white light	**3299U-A52500**	2CHU705250A4000	1

Cover plate for straight LED illumination or for Profi l 45 adapter

For LED illumination insert.
For Profi l 45 insert adapter.

Colour	Type	Order code	Pack/Qty.
white		5016G-A00070 B1	5/1

Cover plate for thermostat

For insert: 2CHG704010A4520.

Colour	Type	Order code	Pack/Qty.
white		2CHG704010A4520	1

Combination thermostat

Thermostat with low insert (20 mm mounting depth) meeting the Ecodesign requirements. The thermostat is pre-programmed. Rated voltage 230 V AC ± 10% 50 Hz
Output 1 no and connectors 1.5 mm² to 4 mm²
Switching current 250 V AC / 16 (2) A, protection class II and protection class IP21. Operating temperature 0 ° C to 35 ° C and storage temperature -20 ° C to 70 ° C
Clock Accuracy (at 20 ° C) <+/- 0.5 sec / min
Power consumption (standby) <0.05 W
Floor sensor NTC 10kΩ @ 25˚C and external control (EXT connector) 230V AC / 10µA (same phase).

Colour	Type	Order code	Pack/Qty.
		2TKA00004033	1

Compensator

1. Prevents the self-ignition/fl ickering of energy-saving lamps (CFL, LED) in OFF state when orientation illumination is used. This effect is caused by features of built-in ballasts, occures if the illumination is connected between phase and the lamp. The compensator is applicable in the circuits with switches 1g1w, 1g2w, intermediate. (To be connected in parallel to the lamp).
2. Prevents after-glow of extra-low-voltage halogen or LED lamps in the deactivated state due to possible ripple voltage or activation via touch-dimmer without neutral conductor connection. (To be connected in parallel to the primary transformer side or to the lamp).
3. Removes noise generation on electronic transformers in the switched-off state during activation via touch dimmer without neutral conductor connection. (To be connected in parallel to the primary transformer side).
4. Removes ripple voltages on the control line in blind control/group controls with Busch-Jalousiecontrol® II devices. (To be connected between control wire “UP” and N conductor, and between “Down” and N conductor).

Dimensions: Ø 22 × 25 mm. Length of wires: approx. 235 mm 250 V AC, 50 Hz

Notes

Zenit
Limitless subtlety

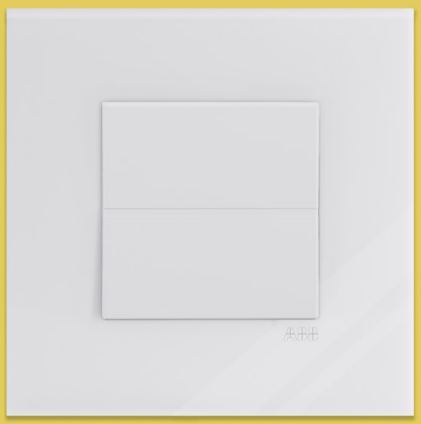
For its inexhaustible finishes, its infinite features and the simplicity of its installation. Zenit stands out and represents the highest level in functionality and design. Zenit reaches the pinnacle of design, diversity, versatility, performance and, of course, comfort by presenting all the facilities in its installation. Present in different spaces; home, offices, places of leisure, etc., Zenit represents the most intelligent option to provide an extra in comfort and decoration. Furthermore, value and functionality can also be sustainable. Zenit has been the first series certified with Ecodesign for a reason.

Renew your spaces.
Integration and perfection
in all its aspects.

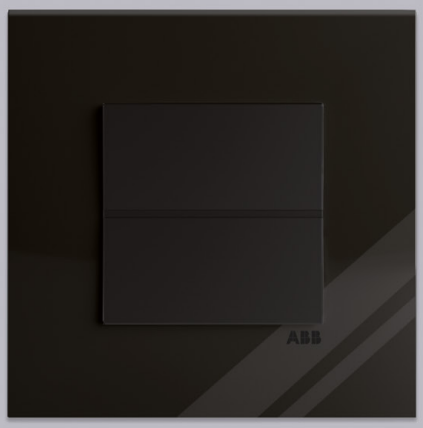
Zenit S **Zenit R**

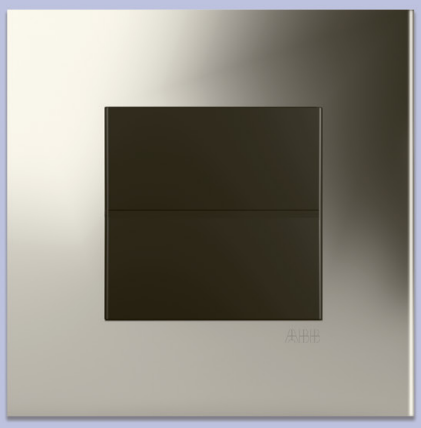
ZENIT S

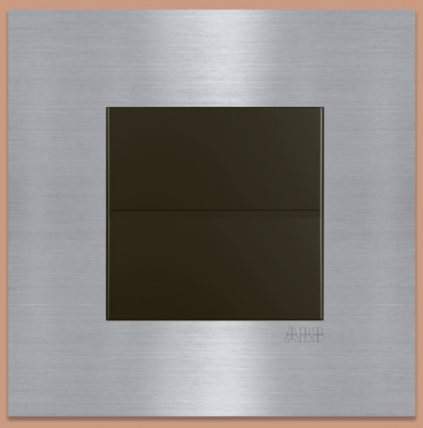
Introducing Zenit S: Elevate Your Spaces with Elegance and Sustainability.

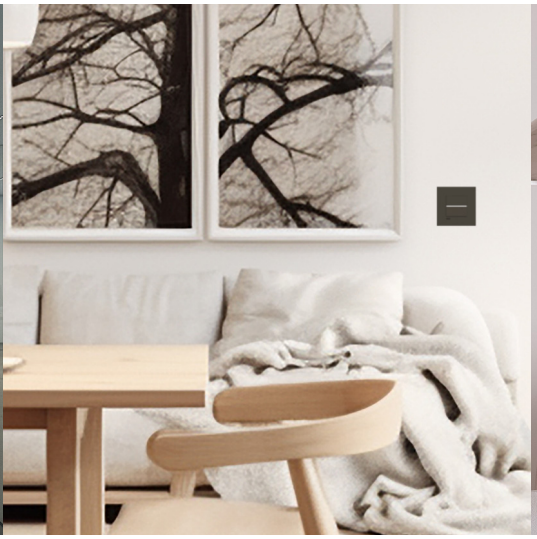


Welcome to the world of Zenit S, where sophistication meets innovation.
Our latest range redefines modern living, offering slimline designs that set new standards of elegance. With the slimmest, Zenit S seamlessly integrates into any interior, adding a touch of refinement to every space. Choose from a diverse palette of finishes, including Matt Black, Total Anthracite, and Stainless Steel, to suit your unique style.
With over one hundred and fifty available functions and new materials, Zenit S offers endless possibilities for customization. Plus, our commitment to sustainability means you can enjoy eco-friendly solutions without compromising on quality or performance.
Experience Zenit S and transform your spaces today.









Zenit
The essence of design

The most subtle frame on the market. Simple, elegant, with a first class design. Zenit S frame was born to further elevate the elegance of the environments in which it is found. Only 3.9 mm separate its surface from the wall, presenting an aspect never seen before in design and decoration.

Updating modularity
The flexibility of the series is based on an enormous combination of functionalities, finishes, colors and configurations. An almost infinite system of mechanisms. With the incorporation of the Zenit S frames we expand the proposal even more, multiplying its solutions. Zenit updates modularity.

The modernity of a classic
The balanced design of Zenit series is a synthesis between the simplicity of its rectilinear shapes and the technical advances incorporated inside. Its details complement each piece, raising the personality of each room. Its search for simplicity and converted geometry have allowed us to create the Zenit S frames, a milestone that makes the Zenit series a classic at the forefront of design.

Combinable and versatile
The incorporation of the Zenit S frames renews the solutions for a greater number of spaces. In addition to the traditional finishes such as White, Anthracite, Silver and Champagne, there are four new metallic finishes aimed at combining with current trends in decoration: Anti-fingerprint Stainless Steel, Silk Black, Mocha and Matte Gold. Finishes that increase the aesthetic value of the series and the spaces in which they are mounted. Zenit completes its offer with three new painted finishes that take their colors from nature and their shapes. Dune, Taupe and Commodore come to join a complete range of solutions that now shines with an even more natural light.

Even slimmer, even more unforgettable

A new style, smart and sustainable features

Endless possibilities
Transform your spaces with a wide choice of finishes, more than one hundred and fifty available functions and new materials.

Sustainable since 2008
First modular series designed according to Eco-Design ISO 14006. Since then it has continued to reduce its impact year after year.

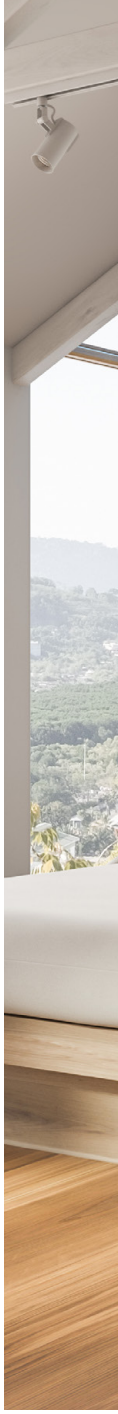
Simple installation
A series born from the suggestions of the professional users, which make it quick and easy to install.

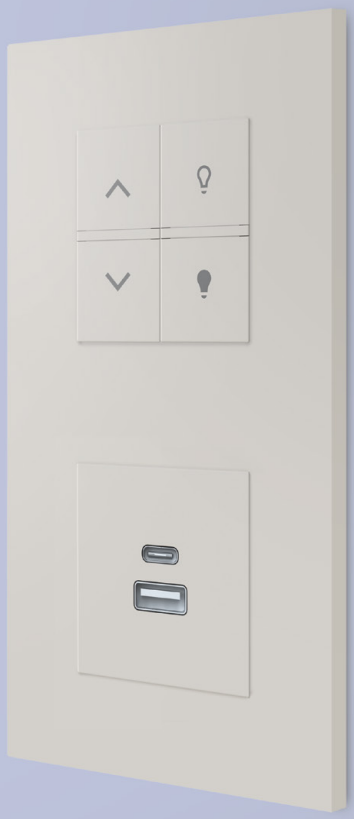
Quality materials
Switches with capacity for 200W LED (16AX), aesthetic parts in polycarbonate and metal frames make the life of Zenit longer than usual in its segment.

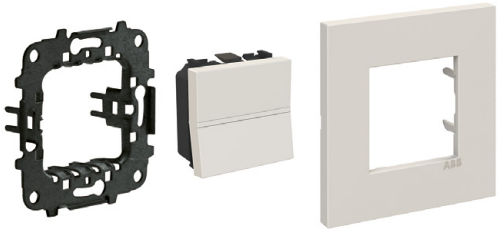
Style details
Choose rockers with integrated white LED lighting, or with a matching decorative profile.

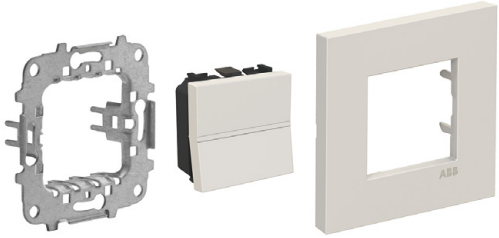
Flexible design
Add value to your projects with a subtle and elegant solution, suitable for any environment.

Square frame: 4,9 mm
Rectangular frame: 3,9 mm









—

Zenit S

Slim fit frames for spaces that require subtle elements to highlight their decoration. Frames that are the essence of design, the soul of Zenit.

—

Zenit R

Regular fit frames for installations demanding extra wiring space or wall coverage, but without living aside a high decorative level.

A reliable and circular ecosystem

Ecodesign: sustainability is assured from design to end of life

ABB
Eco
Solutions™

PEP ecoPASSPORT®

Zenit is part of ABB Ecosolutions portfolio.
This label is an assurance that, where relevant, the product they are buying is:

- Designed to last and manufactured with the maximum amount of sustainably sourced raw materials;
- Made with processes that are designed to avoid waste and maximize the use of sustainable packaging materials;
- Designed to increase resource and process efficiency while in use, be upgradable and optimize the lifetime of equipment and facilities;
- Supported by take-back services leading to refurbishment, re-use or recycling of products and components, and is accompanied by instructions for responsible end-of-life treatment.
- Zenit users can now access the environmental product declaration or lifecycle assessment of all ABB products that carry the EcoSolutions label and may use them as external validation to confirm the product's environmental impact.

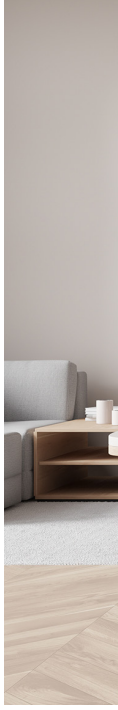
AENOR
ECODISEÑO
ISO 14006

Zenit is designed in accordance with Eco-Design ISO 14006 standards in line with the sustainability values promoted by ABB, which are based on three pillars: reducing CO_2 emissions, preserving resources and promoting social progress.

Since its design, Zenit has been incorporating new elements in its desire to reduce the impact it generates:

- New packaging made from 100% recycled and recyclable materials with low water consumption.
- Packaging optimized to make the best possible use of space.
- Manufactured in an ABB's Niessen factory using 100 per cent renewable energy and partially own produced with its photovoltaic panels as part of Mission to Zero, ABB's commitment to sustainable future.
- Use of recycled plastic and recovery for reuse of all excess plastic in the injection.
- The use of halogenated flame retardants is avoided by using halogen-free raw materials.
- The paints are water-based, thus avoiding the use of environmentally harmful solvents.
- Use of switch indicator lights with LED technology for energy savings of 25%.

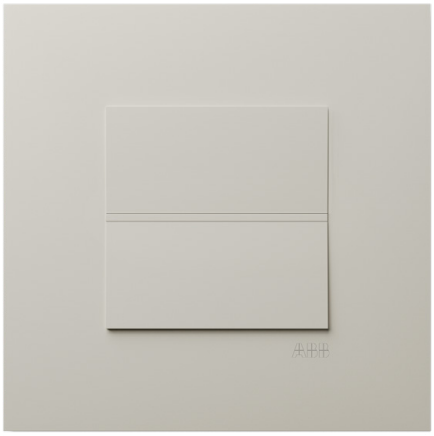


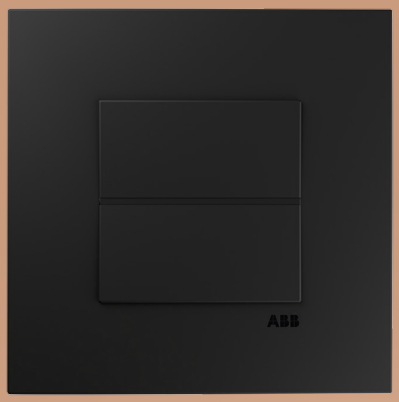
Modern living, eco-conscious elegance

New Dune and Matt Black finishings accompanied by the new Tacteo and metal frames

Refinement through Innovation

When perfection is attained, the journey to improvement begins. That's why Zenit introduces new finishes to its entire portfolio, enhancing its timeless style with two fresh painted options: Dune and Matt Black. These additions, alongside the existing five, expand design possibilities to perfectly suit any style.





Dune: endless beauty
Memories of sand, of clean land... is what Dune offers us. Dune embodies clarity and classic charm. Ideal for creating open, inviting spaces that exude timeless elegance.

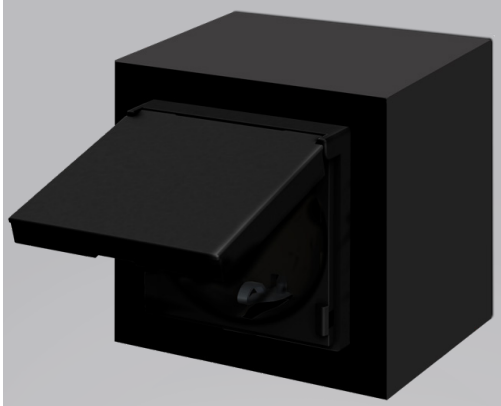
Matt Black: Unparalleled Sophistication
A deep, rich black that adds a touch of refinement to any room. Symbolizing elegance, sophistication, and understated luxury, Matt Black elevates the ambiance and inspires creative expression.

Tacteo and metal frames
Two new finishes complemented by four new frames in two materials: metal and Tacteo effect. Along with the valuable Stainless Steel, we add the Nickel, a metal that epitomizes a blend of timeless beauty and functional elegance.
For the most sophisticated projects we offer the possibility of combining all Zenit solutions with ABB Tacteo solutions through two frame finishes such as Tacteo White and Tacteo Black.

New IP40 boxes

Compact and Cutting-Edge

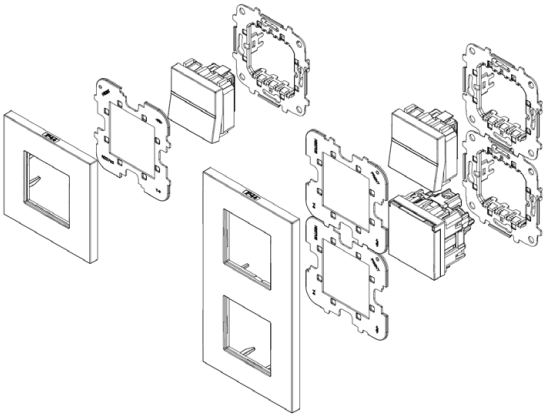
Now, all Zenit functions can also be surface-mounted, ensuring both decorative appeal and safety.
Available in all Zenit finishes, its new surface boxes reduce the volume compared to other solutions by 50%.
Zenit brings design to surface installations, maintaining its ease of installation and adding IP40 protection for switches, pushbuttons and Schuko socket outlets with lid.
This solution is perfect not only for interior spaces with high decorative demands but also for demanding interior environments such as parking areas, warehouses, and more.



IP44 frames

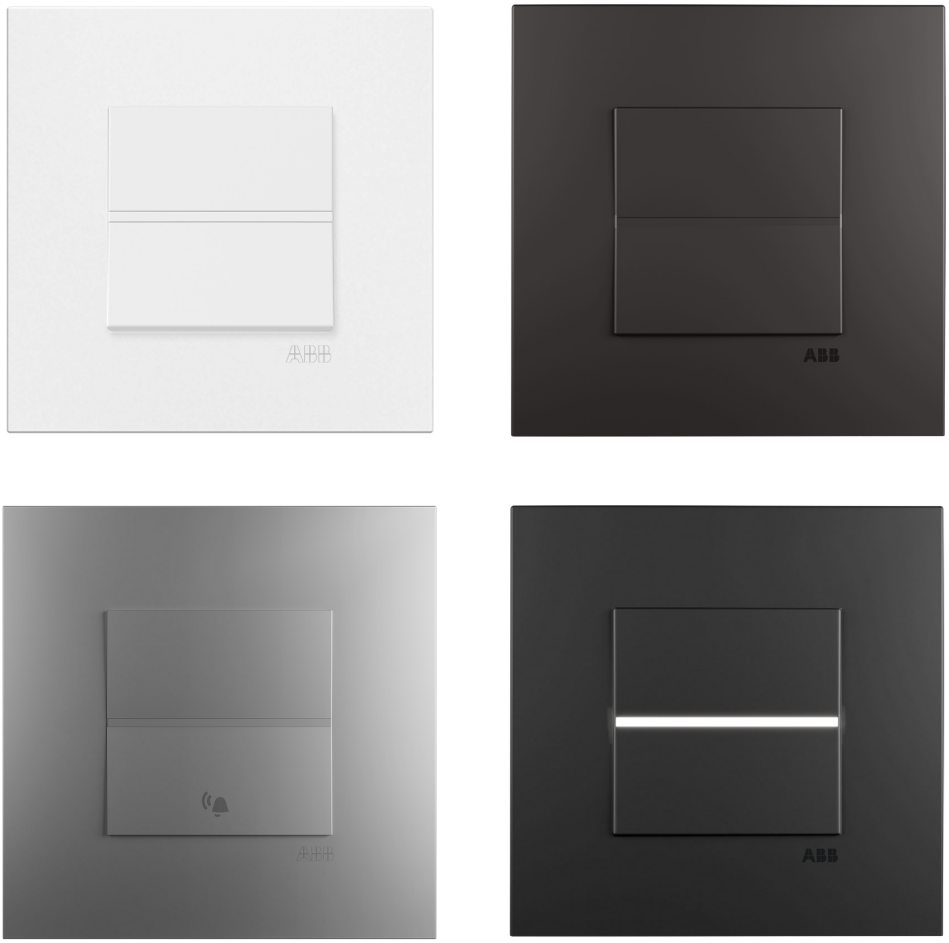
Safer style

Why compromise on safety or style in wet spaces like kitchens or bathrooms? Zenit's new IP44 frames are the answer for rooms in which we need to have a high degree of protection but at the same time maintain aesthetic coherence with the decoration of the rest of the space.
Available in 1, 2 and 3-gang frames and in all Zenit finishes, in combination with standard switches, pushbuttons, Schuko socket outlets with covers and mounting plates (Zenit Regular), the decision to provide IP44 protection to the devices can be made at the last moment or even in the future, since it is enough to replace the regular frame with the new IP44 frame from Zenit to increase the protection of the installation against the water.



Improving an extraordinary design

New trims, symbols and white light



Zenit is a series that is constantly evolving and creating trends. Its new features are not only limited to the design, finishes, materials or functions, but also to small details such as the lighting of the locator and indicator lamps, the decorative trims and the symbols of the pushbuttons:

- New white LED lighting for the locator and indicator lamps.
- Switches and pushbuttons in White and Anthracite with decorative trims in the same color.
- Pushbuttons with new bell and light symbols engraved on the rocker.

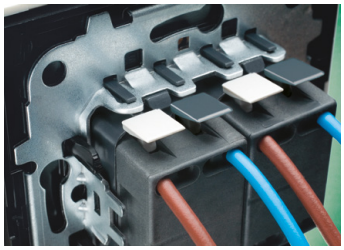
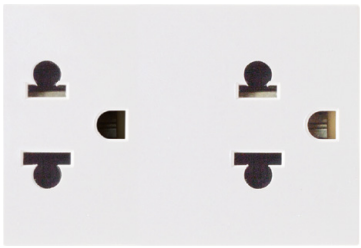
Zenit

Functions for all spaces. Zenit can be installed everywhere, in spaces that require new solutions, with new applications and all installation facilities.



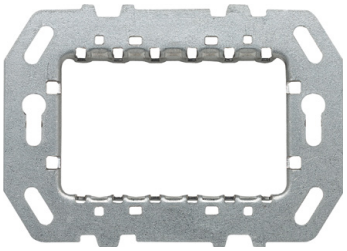


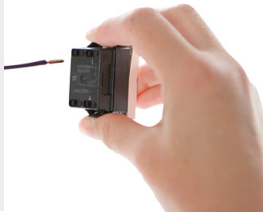
Rapid cabling - Up to 40% savings

- Contacts with automatic connection terminals simplifying the cabling and saving up to a 40% in installation time. Large and smooth press clamps to make the automatic connection more comfortable and safer.
- 16AX switches for up to 200W (100W at 127Vac) LED loads, according to the latest IEC requirements.
- Robust and compact mechanisms. Insertion and extraction from the front.
- Designed to hold the switches firmly avoiding balancing problems.
- Only 21 mm depth, which allows more connection space for wires.
- Manufactured with high quality and recyclable material.

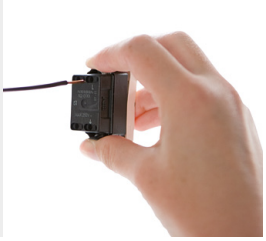
More protection

Children are really curious and get excited with any dangerous device available at home, especially those that are at the height of socket outlets. All Zenit socket outlets are equipped with shutters for child protection, protecting the live parts from electric shock.





1. Strip the cable about 14 mm and introduce it into the terminal.



2. Press the push button and insert the cable.

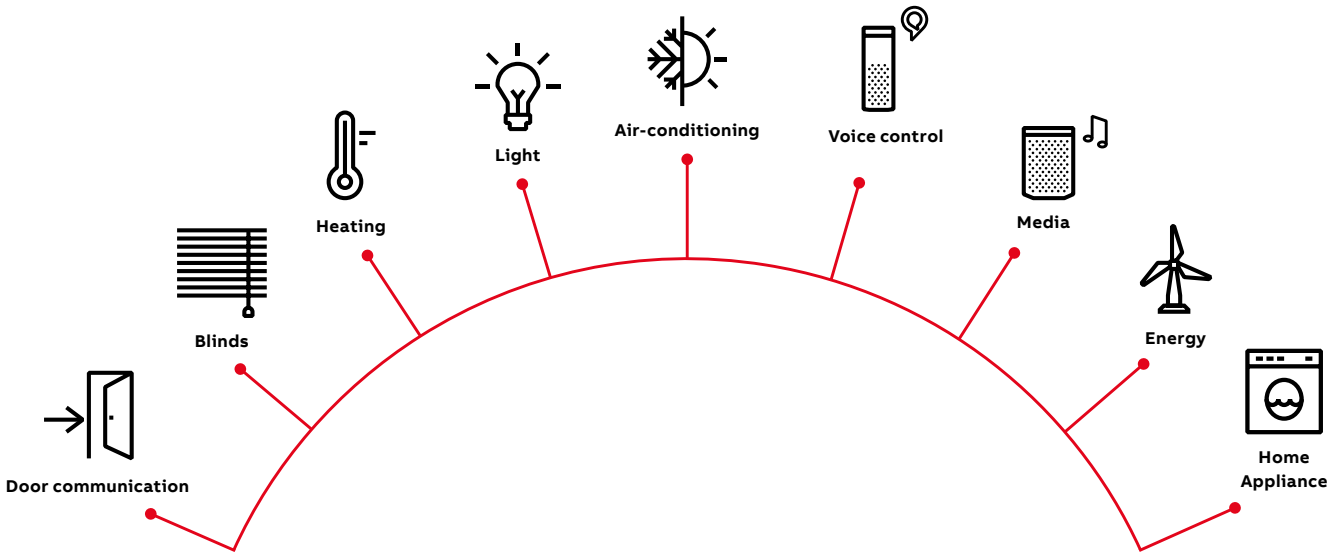
3. Release the push button and check fixation. To disconnect the cord, press again the push button on top and bottom.

More benefits

- Galvanized steel mounting plates with unique anticorrosion treatment with top and bottom nerves for a rigid positioning of the mechanism.
- Locator and indicator lights can be easily be mounted or changed from the front side without dismounting the switch.
- Low consumption LED lamps.
- Low consumption in stand-by and high efficiency USB chargers.
- Schuko socket outlets with the three screws in the same side to to facilitate their wiring.

Zenit

ABB-free@home - Home becomes smart



The pleasure of simplicity
ABB-free@home® makes daily life easier. You can manage blinds, lights, heating, air-conditioning and door communication using just one system. The smartphone becomes the remote control in the house. It allows you to raise the blinds and switch on the radio in the kitchen with the touch of a button while you are still in bed – or to deactivate all lights and devices via a switch when leaving the house. Very convenient. Extremely comfortable. Very energy efficient. The setting of these scenes is as easy as can be – to suit the mood or situation.

ABB i-bus KNX - Details and solutions for intelligent building control

Combinable concept with sensors and sensor/actuators
Creating a comprehensive range, is suitable for all needs. Optimizing comfort, safety and efficiency in homes and buildings. Providing comfort solutions to satisfy all types of needs and projects. Ensuring safety and protection of persons and goods. Saving energy by using only the amount of energy required.

Easy and intuitive installation system, providing maximum values in performance, comfort and functionality in any market

LED lamp kit for screwless switches / push-buttons

LED color: white.
N2191 BB: Suitable for 1-way SP switches and SP NO push-buttons. LED lamp.
N2192 BB and N2192.2 BB: Suitable for 1-way DP switches,
2-way SP switches and intermediate switches.
N2191 BB and N2192 BB: 230Vac / 0,2mA
N2192.2 BB: 24V / 2mA
Tooless front connection.
Includes diffusers for 1 and 2 module rocker covers.
Rated current: <0,2 mA. Specially designed for CFL and LED lamps.

Motion sensor

Rated voltage: 230 Vac ± 10% / 50 - 60 Hz
Outputs: 1 Normally Open (NO). Potential free.
Zero crossing.
Max. power:
- Incandescent and halogen: 800W.
- Halogen with electronic o ferromagnetic transformer: 500VA.
- Fluorescent lamps and CFL: 200VA.
- LED: 200 VA.

Switch-off delay: 5 sec (test) and 30 sec to 15 min (adjustable from the front side).
Detection range: 7 m radious (at 20° C).
Light set point level for activation: 5 to 100 lux (adjustable from the front side).
Detection angle: 110° (at 20° C).
Note: to be installed in boxes with 50mm depth or more.

Housing for data outlets - Keystone type

Housing for connectors with multiple type clipping system:
- 2018: Keystone, 3M and AMP type.
- 2018.8: Systimax type.
To be installed with N2118.1, N2218.1 and N2218.2 cover plates.

Colour	Type	Order code	Size	Qty.*
–	**2018**	2CLA201800A1001	–	10
–	**2018.8**	2CLA201880A1001	–	10

Telephone outlet RJ12

RJ12 type connector.
6 contacts.
Suitable for 2 (6P2C), 4 (6P4C) or 6 (6P6C) RJ11 and RJ12 jacks. Screw terminals.
To be installed with N2118.1, N2218.1 and N2218.2 cover plates.

Colour	Type	Order code	Size	Qty.*
–	**2017.2**	2CLA201720A1001	–	10

Data outlet RJ45 Cat.5e UTP

RJ45 type connector.
Cat.5e UTP.
In compliance with ANSI/TIA/EIA 568B.2, ISO/IEC11801 & EN50173. Universal TIA/EIA 568A and 568B labeling. Housing: ABS UL-94-0.
Durability: 750 cycles min. (ISO/IEC 11801, IEC 60603-7-4).
IDC: PC UL94V-0, Accept 22-26AWG solid wire.
Contact: RJ45 8P8C, 3~50 micro-inch gold plating over nickel plated on contact area.
Tool-less wiring. To be installed with N2118.1, N2218.1 and N2218.2 cover plates.

Colour	Type	Order code	Size	Qty.*
–	**2018.5**	2CLA201850A1001	–	10

Data outlet RJ45 Cat.6 UTP

RJ45 type connector.
Cat.6 UTP.
In compliance with ANSI/TIA/EIA 568B.2, ISO/IEC11801 & EN50173. Universal TIA/EIA 568A and 568B labeling. Housing: ABS UL-94-0.
Durability: 750 cycles min. (ISO/IEC 11801, IEC 60603-7-4).
IDC: PC UL94V-0, Accept 22-26AWG solid wire.
Contact: RJ45 8P8C, 3~50 micro-inch gold plating over nickel plated on contact area.
Tool-less wiring. To be installed with N2118.1, N2218.1 and N2218.2 cover plates.

Data outlet RJ45 Cat.6A STP

RJ45 type connector. Cat.6A STP. Toolless wiring.
T568A & T568B wiring sticker.
1 0Gb/S. Transmission performance is in compliance with the ANAI/TIA/EIA 568 B.2 standard
Insertion force: 20N max. (IEC60603-7-4).
Retention Strength: 7.7kg between jack and plug.
Insertion life: minimum 750 cycles (ISO/IEC 1 1 801, IEC 60603-7-4)
Housing: Zinc die-casting design for optimal EMI protection
IDC: PC UL94V-0.
Accept 22-26AWG solid wire.
Contact: RJ45 8P8C, 3~50 microinch gold plating over nickel plated on contact area.
Cover plate code: N2216.1, N2216.2, N2216.3, N2216.4, N2216.5, N2216.6, N2216.7 and N2216.8.

–	**2016.65**	2CLA201665N1001	–	10

Data outlet Fiber Optic SC adapter

Optical fiber SC simplex connector
Insertion Loss (IL) <=0.3dB for SM and MM.
Durability(500 Mating): 0.2dB max. increase.
Withdrawal force (g/f): 100300.
Operating temperature: -40° C to +85° C.
Meet JIS C5974 and Bellcore GR-326 standard.
Compliant with IEC874-14 & IEC874-19.
All parts compliant with ROHS.
Cover plate code: N2216.1, N2216.2, N2216.3, N2216.4, N2216.5, N2216.6, N2216.7 and N2216.8.

Zenit

Multimedia modules

Bluetooth sound module

Rated voltage: 110-230 Vac ± 15%; 50-60 Hz
Max. consumption: 7W
Stand-by consumption: 0,2W
Amplifier power: 2+2 W; <1% distortion (16 Ω)
Speaker impedance: 16 Ω (2+2 W audio)
Audio inputs:
- Bluetooth: stereo Bluetooth® 4 version receiver with A2DP-SINK profile and memory for 8 links.
- Front input (AUX): 1x mini-jack stereo 3,5 mm.
- Rear input (TV): screw type terminal with 3 contacts (stereo).

Loudspeakers

HiFi built-in ceiling loudspeaker - 5”

2-way system. For mounting in hollow walls/ceilings. With spring brackets.
In corrosion-resistant metal design.
With integrated loudspeaker grid.
Nominal power: 30 W. Frequency response: 50 - 20.000 Hz
Impedance: 8 Ohm. Drilling measurements: 165 mm.
Mounting depth: 72 mm.

Colour	Type	Order code	Size	Qty.*
-	**8226/10 EB**	2CKA008200A0202	-	1

Built-in ceiling loudspeaker - 5”

With broadband characteristics.
For mounting in hollow walls ceilings. With spring brackets. In corrosion-resistant metal design.
With integrated loudspeaker grid.
Nominal power: 30 W. Frequency response: 50 - 20.000 Hz. Impedance: 8 Ohm.
Drilling measurements: 165 mm
Mounting depth: 72 mm

Colour	Type	Order code	Size	Qty.*
-	**8226 EB**	2CKA008200A0201	-	1

Built-in ceiling loudspeaker - 3”

For mounting in hollow walls/ceilings. With spring brackets. In corrosion-resistant metal design.
With integrated loudspeaker grid.
Nominal power: 10 W. Frequency response: 90 - 20.000 Hz. Impedance: 8 Ohm Drilling measurements: 90 mm
Mounting depth: 38 mm

Colour	Type	Order code	Size	Qty.*
-	**8225 EB**	2CKA008200A0200	-	1

Zenit - ABB-free@home

Sensors

Sensor unit 1-gang

For sending switching, dimming and blind commands to an ABB-free@home® actuator.
To be used with ABB-free home® 2 fold push buttons.
Control element: Switch contacts top/ bottom.
Display elements: LED as light for orientation or display of switching state.
Protection class of device: IP 20.
Mounting depth: 14,1 mm.
To be installed with SR-2-N2 cover plates.

Colour	Type	Order code	Size	Qty.*
-	**SU-F-1.0.PB.1**	2CKA006220A0222	2M	1

Sensor unit 2-gang

For sending switching, dimming and blind commands. to an ABB-free@home® actuator.
To be used with ABB-free home® 4 fold push buttons.
Control element: Switch contacts top/ bottom.
Display elements: LED as light for orientation or display of switching state.
Protection class of device: IP 20.
Mounting depth: 14,1 mm.
To be installed with SR-4-N2 cover plates.

Colour	Type	Order code	Size	Qty.*
-	**SU-F-2.0.PB.1**	2CKA006220A0223	2M	1

Sensor & switch actuators

Sensor/Switch actuator 1/1-gang

For switching 127/230 V~ devices. With 1 integrated switch actuator. Switching function is available pre-configured.
Use with ABB-free@home® 2 fold push buttons.
Outputs: 1× normally open contact, potential free.
Suitable for: resistive. Rated current: 10 A.
Rated power: 2300 W. Suitable for: capacitive.
Rated current: 10 AX. Protection class of device: IP 20.
Mounting depth: 31,5 mm.
To be installed with SR-2-N2 cover plates.

Colour	Type	Order code	Size	Qty.*
-	**SSA-F-1.1.PB.1**	2CKA006220A0232	2M	1

Sensor/Switch actuator 2/1-gang

For switching 127/230 V~ devices. With 1 integrated switch actuator.
Switching function is available pre-configured.
Use with ABB-free@home® 4 fold push buttons.
Outputs: 1× normally open contact, potential free.
Suitable for: resistive. Rated current: 10 A.
Rated power: 2300 W. Suitable for: capacitive.
Rated current: 10 AX. Protection class of device: IP 20.
Mounting depth: 31,5 mm.
To be installed with SR-4-N2 cover plates.

Colour	Type	Order code	Size	Qty.*
-	**SSA-F-2.1.PB.1**	2CKA006220A0233	2M	1

Sensor & switch actuators

Sensor/Switch actuator 2/2-gang

For switching 127/230 V~ devices. With 1 integrated switch actuator. Switching function is available preconfigured. Use with ABB-free@ home® 4 fold push buttons.
Outputs: 2× normally open contact, potential free.
Suitable for: resistive. Rated current: 10 A.
Rated power: 2 x 1200 W. Suitable for: capacitive.
Rated current: 10 AX. Protection class of device: IP 20.
Mounting depth: 31,5 mm.
To be installed with SR-4-N2 cover plates.

Colour	Type	Order code	Size	Qty.*
-	**SSA-F-2.2.PB.1**	2CKA006220A0234	2M	1

Sensor & dimmer actuators

Sensor/Dimmer actuator 1/1-gang

For dimming 127/230 V~ loads.
With integrated universal dimming.
Actuator for controlling different lamps. The dimming function.
Is available pre-configured. Use with ABB-free@home® 2 fold.
Push buttons.
Outputs: 1× dimming channel.
Suitable for: 230 V incandescent lamps and low-voltage.
Halogen lamps with conventional transformers or electronic.
Transformers.
Rated power: 10–180 W/VA.
Suitable for: LEDi and energy-saving bulbs.
Rated power: 2–80 W/VA.
Protection class of device: IP 20.
Mounting depth: 31,5 mm.
To be installed with SR-2-N2 cover plates.

Colour	Type	Order code	Size	Qty.*
-	**SDA-F-1.1.PB.1**	2CKA006220A0235	2M	1

Sensor/Dimmer actuator 2/1-gang

FFor dimming 230 V~ loads. With integrated universal dimming actuator for controlling different lamps. The dimming function is available pre-configured. Use with ABB-free@home® 4 fold push buttons.
Outputs: 1× dimming channel.
Suitable for: 230 V incandescent lamps and low-voltage halogen lamps with conventional transformers or electronic transformers.
Rated power: 10–180 W/VA.
Suitable for: LEDi and energy-saving bulbs.
Rated power: 2–80 W/VA.
Protection class of device: IP 20.
Mounting depth: 31,5 mm.
To be installed with SR-4-N2 cover plates.

Colour	Type	Order code	Size	Qty.*
-	**SDA-F-2.1.PB.1**	2CKA006220A0236	2M	1

Zenit - ABB-free@home

Sensor & blind actuators

Sensor/Blind actuator 1/1-gang

For controlling blind and awning motors.
With integrated blind actuator. Blind function is available pre-configured.
To be used with ABB-free home® 2 fold push buttons.
Outputs: 1× Change-over contacts/normally open contact, potential-bound. Rated power: 920 VA.
Rated current: 4 A. Suitable for: Operating mode blind. Protection class of device: IP 20.
Mounting depth: 31,5 mm.
To be installed with SR-2-N2 cover plates.

Colour	Type	Order code	Size	Qty.*
-	**SBA-F-1.1.PB.1**	2CKA006220A0237	2M	1

Sensor/Blind actuator 2/1-gang

For controlling blind and awning motors.
With integrated blind actuator. Blind function is available pre-configured.
To be used with ABB-free home® 4 fold push buttons.
Outputs: 1× Change-over contacts/normally open contact, potential-bound.
Rated power: 920 VA.
Rated current: 4 A.
Suitable for: Operating mode blind.
Protection class of device: IP 20.
Mounting depth: 31,5 mm.
To be installed with SR-4-N2 cover plates.

Colour	Type	Order code	Size	Qty.*
-	**SBA-F-2.1.PB.1**	2CKA006220A0238	2M	1

Room temperature controller

Room temperature controller

Room temperature control function for controlling commercially available valve drives or analogue valve drives (continuous controllers).
With display of set-value temperature.
Only to be used with ABB-free@home® Zenit cover plates for room thermostat.
Display elements: LCD Display showing operation modes.
Protection class of device: IP 20.
Mounting depth: 17,9 mm.
To be installed with CP-RTC-N2 or CP-RTC-FC-N2 cover plates.

Colour	Type	Order code	Size	Qty.*
-	**RTC-F-1.PB**	2CKA006220A0276	2M	1

Motion sensor & actuators

Motion sensor

With select lens for detection with animal access. For automatic switching of ABB-free@home® actuators dependent on movement and brightness. To be used with ABB-free@home® Zenit cover plates for movement detector.
Detection range: frontal 6 m, lateral 3 m.
Detection angle: 180°.
Brightness limit value: 1 – 500 lux.
Protection class of device: IP 20.
Mounting depth: 14.1 mm.
To be installed with CP-MD-N2 cover plates.

Colour	Type	Order code	Size	Qty.*
-	**SBA-F-1.1.PB.1**	2CKA006220A0237	2M	1

Motion sensor/actuator

With select lens for detection with animal access.
Including an integrated actuator for switching 230 V~ devices. To be used with ABB-free@home® Zenit cover plates for movement detector.
Outputs: 1× normally open contact, potential free.
Suitable for: resistive.
Rated current: 10 A.
Rated power: 2300 W.
Suitable for: capacitive.
Rated current: 10 AX.
Detection range: frontal 6 m, lateral 3 m.
Detection angle: 180°.
Brightness limit value: 1 – 500 lux.
Protection class of device: IP 20.
Mounting depth: 31.5 mm.
To be installed with CP-MD-N2 cover plates.

Room temperature controllers - Wireless

Wireless room temperature controller

Wireless communication with the system.
Room temperature control function for controlling commercially available valve drives or analogue valve drives (continuous controllers).
With display of set-value temperature.
Display elements: LCD Display showing operation modes.
Mounting depth: 17,9 mm. To be installed with CP-RTC-N2 or CP-RTC-FC-N2 cover plates.

Colour	Type	Order code	Size	Qty.*
-	**RTC-F-1.PB-WL**	2CKA006200A0115	2M	1

Wireless RTC / Heating actuator

Wireless communication with the system.
Heating/cooling operation.
Control element with room temperature controller function. With display of set-value temperature.
With integrated switch actuator, e.g. for controlling thermoelectric actuating drives in heating/cooling systems or electric floor heating systems.
RTC function is available also without prior programming (pre-configured). 3 wire connection (neutral conductor required). Control element: Floating rocker for the selection of set values and operating modes
Display elements: LCD showing operation modes
Rated voltage: 230 V~ / 50-60 Hz
Outputs: 1 Normally open contact, potential-bound
Suitable for: ohmic. Rated current: 16 A
Output voltage: 230 V~. Rated power: 3680 W
Mounting depth: 32 mm.
To be installed with CP-RTC-N2 cover plates.

Colour	Type	Order code	Size	Qty.*
-	**RTC-F-2.1-1.PB-WL**	2CKA006200A0116	2M	1

Motion sensor & actuator - Wireless

Wireless motion sensor/ actuator

Wireless communication with the system.
With select lens for detection with animal access.
Including an integrated actuator for switching 230 V~ devices. To be used with ABB-free@home® Zenit cover plates for movement detector.
Outputs: 1× normally open contact, potential free.
Suitable for: resistive.
Rated current: 10 A.
Rated power: 2300 W.
Suitable for: capacitive.
Rated current: 10 AX.
Detection range: frontal 6 m, lateral 3 m.
Detection angle: 180°.
Brightness limit value: 1 – 500 lux.
Protection class of device: IP 20.
Mounting depth: 31.5 mm.
To be installed with CP-MD-N2 cover plates.

Zenit - ABB-free@home

Smart Switch

Free@home smart switch

Wireless remote control of ABB-free@home actuators, groups and scenes.
2 / 4 channel.
Requires ABB SysAP/S.3 and ABB-free@next App
Energy harvesting technology: without battery and maintenance-free.
Compatible with N2225.1x and N2225.2 rockers.

Installation	Type	Order code	Size	Qty.*
Flush mounted	**N2225.2**	2CLA222520N1001	2M	1

Rocker cover for smart switch - 2-gang

Rocker cover without symbol for smart switch sensor.
Suitable for codes: N2225, N2225.1 and N2225.2.
Rocker cover for 2-gang control (4 channels).

Zenit - ABB i-bus® KNX

Room temperature controller

KNX room temperature controller

For triggering the heating, ventilation and fan-coil actuators. Thermostat for fan-coil units in 2 and 4 pipe systems and conventional heating or cooling systems. Fan stage can be switched manually or in automatic mode. Switch contacts for operating mode selection and dial for setpoint or fan speed adjustment. Display elements: LCD showing operation modes. To be installed with N2240.4 cover plates.

Transponder reader

KNX transponder reader

The “transponder holder” is designed to realize access control systems through KNX bus.
Output: one relay (4A @24V AC/DC). 3 working modes:
- “Linked to access control”, receiving switching commands from the device itself (according to card insertion/removal).
- Being a standard KNX switch actuator, controlled by every KNX-standard devices.
- “Linked to card-holder”, that means that the relay is switched according to closing/opening internal input contact available on transponder reader.
Input: one input to be used for connecting external conventional card-holder.
The bicolor (red-green) LED on the front of the device allows monitoring the device operation. Can be switched ON/OFF in the proper color according to KNX.
The transponder reader can be configured with ABB control software to behave as transponder programming device.
The transponder reader requires a 12...24 V AC/DC external power supply to ensure its operation even with bus voltage failure.
Cover plate included.

Transponder holder

KNX transponder holder

The “transponder holder” is designed to realize access control systems through KNX bus.
Output: one relay (4A @24V AC/DC). 2 working modes:
-“Linked to access control”, receiving switching commands from the device itself (according to card insertion/removal).
- Being a standard KNX switch actuator, controlled by every KNX-standard devices.
Input: one binary input to be used for connecting external conventional push-button, or for example for connecting window contact or similar.
The white blinking LED on the front of the device allows monitoring the device operation. Can be switched ON/OFF in the proper color according to KNX.
The transponder reader requires a 12...24 V AC/DC power supply to ensure its operation even with bus voltage fail.
Cover plate included.

24

25

1 to 3 module cover frames for 3 module or 4“x2“ box vertical installation habits (American)
09 Frame blank for 3 modules box
10 Frame 1 module vertical for 3 modules box
11 Frame 1 module for 3 modules box
12 Frame 1 + 1 modules for 3 modules box
13 Frame 2 modules for 3 modules box
14 Frame 3 modules in 3 modules box

1 to 7 module cover frames for 3, 4 and 7 module box horizontal installation habit (Italian)
15 Frame 1 module for 3 modules box
16 Frame 1 + 1 modules for 3 modules box
17 Frame 2 modules for 3 modules box
18 Frame 3 modules in 3 modules box
19 Frame 4 modules for 4 modules box
20 Frame 7 modules in 7 modules box

3+3 module cover frames for 4”x4” box installation habit (American and Eastern Asia)
21 Frame blank for 4“ x 4“ box
22 Frame 1 + 1 modules for 4“ x 4“ box
23 Frame 2 + 2 modules for 4“ x 4“ box
24 Frame 1 + 1 + 1 + 1 modules for 4“ x 4“ box
25 Frame 3 + 3 modules for 4“ x 4“ box

Zenit R Float

Frames for European square and round boxes

Frames 1 to 4-gang - Glass

Material: 4mm thickness glass
Size (height x width):
- 1-gang: 90 x 90 mm.
- 2-gang: 90 x 161 mm.
- 3-gang: 90 x 232 mm.
- 4-gang: 90 x 303 mm.

Mounting grid code suitable for 60 mm screw distance boxes: N2271.9, N2271.9G, N2272.9 and N2273.9 (N2272.9 and N2273.9 only for horizontal installation).
Flush mounting boxes code: 1099, 1999 & 1999.2.
Surface mounting boxes code: 8591, 8592 & 8593.

Zenit R Float

Frames for rectangular 3M (4"×2"), 4M and 7M boxes

Frames - 3, 4 and 7 modules - Noble

Material: 4mm thickness slate, wenge wood or stainless steel
Size (width x height):
- 3M: 122 x 90 mm.
- 4M: 142 x 90 mm.
- 7M: 208 x 90 mm.

Mounting plate codes:
- For 3M box (83,5 mm screw distance): N2371.9 and N2473.9 (N2371.9 only for vertical installation with frames N2371.1 and N2372.1).
- For 4M box (107 mm screw distance): N2474.9.
- For 7M box (100 mm screw distance): N2777.9.

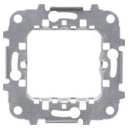
Zenit R

Mounting plates for Zenit R Solid, Zenit R Float and Zenit IP44 frames

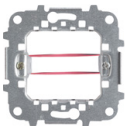
Mounting plate for European box



For horizontal and vertical installation.
To be installed with frames code: N2171, N227X, N227X.1 and N227X.44. Mounting plate suitable for 60 mm screw distance boxes.
With aligning flaps for multigang frames.
Optional: elastic claws N2071.9.

Type	Size	Modules	Order code	Qty.*
N2271.9	1-gang	2 modules	2CLA227190N1001	20

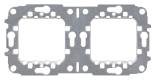
Mounting plate for European box with clamps



For horizontal and vertical installation.
To be installed with frames code: N2171, N227X, N227X.1 and N227X.44. Mounting plate suitable for 60 mm screw distance boxes.
With aligning flaps for multigang frames.
Included: fixing claws.

Type	Size	Modules	Order code	Qty.*
N2271.9 G	1-gang	2 modules	2CLA227191N1001	20

Mounting plate for European box

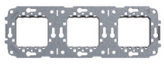


For horizontal installation.
To be installed with frames code:
- N2272: 1x N2272.9.
- N2273: 1x N2272.9 + 1x N2271.9.
- N2274: 2x N2272.9.
- N2275: 2x N2272.9 + 1x N2271.9.

Mounting plate suitable for 60 mm screw distance boxes.
With aligning flaps for multigang frames.

Type	Size	Modules	Order code	Qty.*
N2272.9	2-gang	2+2 modules	2CLA227290N1001	20

Mounting plate for European box



For horizontal installation.
To be installed with frames code:

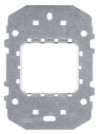
Zenit R

Mounting plates for Zenit R Solid and Zenit R Float frames

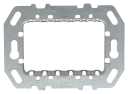
Mounting plate for 3 module box - Vertical



Mounting plate that facilitates the assembly of 1 and 2 module devices in vertical installations.
To be installed with frames code: N2472, N2371.1V and N2372.1.
Mounting plate suitable for 83,5 mm screw distance boxes.

Type	Size	Modules	Order code	Qty.*
N2371.9V	3M	2 modules	2CLA237190N1002	20

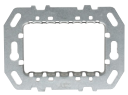
Mounting plate for 3 module box



For horizontal and vertical installation of 1, 2 or 3 module devices.
To be installed with frames code: N2471, N2471.1, N2472, N2472.1, N2472.2,N
N2472.3, N2473, N2473.1,
N2370.1, N2371.1, N2372.1, N2372.2 and N2373.1.
Mounting plate suitable for 83,5 mm screw distance boxes.

Type	Size	Modules	Order code	Qty.*
N2473.9	3M	3 modules	2CLA247390N1001	20

Mounting plate for 3 module box with screws



For horizontal and vertical installation of 1, 2 or 3 module devices.
To be installed with frames code: N2471, N2471.1, N2472, N2472.1, N2472.2,N
N2472.3, N2473, N2473.1,
N2370.1, N2371.1, N2372.1, N2372.2 and N2373.1.
Mounting plate suitable for 83,5 mm screw distance boxes.
Included: 2 screws to fix the mounting plate.

Type	Size	Modules	Order code	Qty.*
N2473.91	3M	3 modules	2CLA247391N1001	20

Mounting plate for 4 module box

For horizontal and vertical installation of 1, 2 or 3 module devices.
To be installed with frames code: N2474 and N2374.1.
Mounting plate suitable for 107 mm screw distance boxes.

Type	Size	Modules	Order code	Qty.*
N2474.9	4M	4 modules	2CLA247391N1001	20

Mounting plate for 4 module box with screws

For horizontal and vertical installation of 1, 2 or 3 module devices. To be installed with frames code: N2474 and N2374.1.
Mounting plate suitable for 107 mm screw distance boxes. Included: 2 screws to fix the mounting plate.

Type	Size	Modules	Order code	Qty.*
N2474.91	4M	4 modules	2CLA247491N1001	20

Mounting plate for 7 module box

For horizontal and vertical installation of 1, 2 or 3 module devices.
To be installed with frames code: N2777 and N2777.1.
Mounting plate suitable for 100 mm screw distance boxes.

Type	Size	Modules	Order code	Qty.*
N2777.9	7M	7 modules	2CLA277790N1001	20

Mounting plate for 7 module box with screws

For horizontal and vertical installation of 1, 2 or 3 module devices. To be installed with frames code: N2777 and N2777.1.
Mounting plate suitable for 100 mm screw distance boxes. Included: 4 screws to fix the mounting plate.

Solutions for all type of installations

Zenit boxes and frames for flush and surface mounting.
Seven options that cover any need in flush, surface, narrow, enclousure and/or all weather installations.

IP20 surface mounting boxes:
- 1 and 2-gang frame and boxes with 1, 1+1 and 2 modules space.
- Protection degree: IP20.
- Color: White, Dune, Silver, Anthracite and Matt Black.
- Perfect solution for reduced dimensions surfaces as plastic and metallic profiles or screens.

IP40 surface mounting boxes:
- 1-gang boxes with 2, 3, 4 and 6 modules space.
- Protection degree: IP40.
- Color: White, Dune, Silver, Anthracite and Matt Black.
- Perfect solution for indoor surface installations integrated with the decoration of the room like lofts or restaurants or requiring a higher level of protection like parkings, stadiums, etc.

IP55 surface mounting boxes:
- 1, 2 and 3-gang boxes with 2, 3, 2+2 and 2+2+2 modules space.
- Protection degree: IP55.
- Color: Gray RAL 7035.
- The box has a cover with a transparent elastic membrane that allows direct control of the switch and a comfortable opening angle of 120°.

IP55 flush mounting frames:
- 1 and 2-gang boxes with 2, 3 and 2+2 modules space.
- Protection degree: IP55
- Color: White, Gray RAL 7035 and Anthracite
- The frame has a cover with a transparent elastic membrane that allows direct control of the switch and a comfortable opening angle of 120°.

Zenit

IP44 frames for flush mounting

Frame for flush mounting - IP44

Frames for IP44 flush mounted installations.
For 1 o r 2 module devices.
Size (height x width):
- N2271.44: 85 x 85 mm.
- N2272.44: 85 x 1 56 mm.
- N2273.44: 85 x 227 mm.

Protection degree: IP44 in combination with N2101.x, N2102.x, N211 0.x, N2201.x, N2202.x, N2210.x switches, N2104.x, N2204.x pushbuttons and N2288.1 socket outlets.
IP44 certificate valid for:
- Mounting on smooth walls.
- Socket outlet with lid closed.

Mounting plate code suitable for 60mm screw distance boxes: N2271.9x.

IP55 surface mounting boxes

Surface mounting box - IP55

Box for IP55 surface mounted installations.
For 1 or 2 module devices.
Size (height x width x depth):
- N3291: 80 x 65 x 63 mm
- N3292: 80 x 130 x 63 mm.
- N3293: 80 x 195 x 63 mm.
- N3391: 80 x 104 x 63 mm.

Color: gray RAL 7035
Protection degree: IP55 (with lid closed).
Opening angle of the lid: 120°.
The lid allows operating the switch in closed position.
Incoming with multi-diameter cone for tubes/cables max. Ø20.
The box includes the clipping system to clasp inserts (no mounting plate, nor frame are necessary).
N3291, N3292 and N3293 suitable for 1 or 2 module devices. N3391 suitable for 1,2 or 3 module devices.

Zenit

Frames for metallic and plastic profiles

Frame for metallic and plastic profiles

Frames suitable to be installed in reduced dimensions surfaces as plastic and metallic profiles or screens.
For 1 module devices:
- N2671:
- Size (width x height): 32 x 68 mm.
- Shaft size (width x height): 26 x 50 mm.
- N2671.2:
- Size (width x height): 32 x 126 mm.
- Shaft size (width x height): 26 x 108 mm.
For 1 and 2 module devices:
- N2672:
- Size (width x height): 54 x 68 mm.
- Shaft size (width x height): 49 x 50 mm.

Zenit centralizations and workstations

Cutting-edge connectivity

Zenit centralizations and workstations is a complete range of electrical and multimedia connectivity systems that allow the electrification of both, spaces and furniture, with solutions for flush or surface installations. With all the guarantee and care design that you can expect from our brand, and with important advances to facilitate and make this type of installations more comfortable.

Systems for centralized controls

The systems for centralized control of Zenit are oriented to respond to the needs generated in facilities of the tertiary sector (offices, shops, hotels, auditoriums, etc.).
This system serves to centralize the control of different lights, blinds or equipment in a single box, in a single control point.

Better aesthetics outside, more comfort inside
The Zenit control centralizations can be installed in both, surface and flush mounted boxes.

Plates with four finishes that perfectly combine with all the functionalities offered by Zenit:
- **BL:** White plate and trim.
- **BP:** White plate / Silver trim.
- **PL:** Silver plate and trim.
- **AN:** Anthracite plate and trim.

Also the surface boxes are available in the finishes White, Silver and Anthracite.

In most of the tertiary installations, a place to centralize the control of the various lights shutters, boilers, etc. is always required.

The systems for centralized control of Zenit allows to group all these functions in a single box using the covers and inserts of **most complete modular range of the market: Zenit.**
With Zenit centralization systems **you can cover all the installation needs** that can arise in this type of premises, from the simplest up to the KNX functions (motion detection, thermostat, lighting control, blinds, etc.), as well as electronic functions as sound systems, dimming, door bell, room temperature control, timer, etc.

—
Surface mounted box

—
Flush mounted box

Better aesthetics outside and greater comfort inside

Zenit systems for centralized controls allow you to integrate in a single system all functions that an installation may need. All this thanks to having the most complete modular range. A range of appreciated design and beautiful finishes that add value to the installations, with advanced functions that bring greater comfort and level of performance. With 1 module (N2100) or 2 module (N2200) inserts, you can distribute freely with 3 size options:

- **2-gang:** for 12 one module inserts or 6 two module inserts.
- **3-gang:** for 18 one module inserts or 9 two module inserts.
- **4-gang:** for 24 one module inserts or 12 two module inserts.

The Zenit systems for centralized controls, as wel as Zenit Workstations, incorporate the renowned tilting system that simplifies the installation work to professionals. Allows each window to be tilted, opening it to the right or left. This greatly facilitates the work of connecting or exchanging the inserts, as it does not force you to work inside the box, but comfortably out of it. Once the connections have been made, with all the facilities offered by the Zenit modular inserts, it will be enough to replace the tilted window in its place by simply pressing on the end until you hear a “click”. The tilting supports are made of metal to give to the centralization the maximum strength and resistance, and thus guarantee its durability over time regardless of the number of times times it is necessary to change its configuration.

Each window includes a comfortable and functional labeling area in its upper part that will allow the end user to identify the function associated to the insert on which it is located. In addition, Zenit Centralizations offer all kinds of advantages to make the installation simpler and easier (adaptable to any type of wall, flush-mounted boxes with independent frames, systems of comfortable bonding, plates that are mounted by cliping).

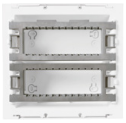
Zenit - centralizations

Surface mounting boxes

Surface mounting box - 12 modules



Zenit centralization box for surface mounted installations.
2-gang - 6+6 modules.
For 1, 2 or 3 module devices.
Size (height x width x depth): 204 x 212 x 55 mm.
Included:
- Metallic mounting plates (horizontally folding for easy installation).
- Screws.
- Plugs.
Suitable for frames code: T1272.

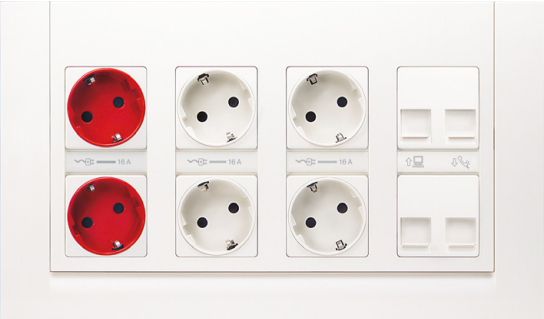
Systems for workstations

In an office the number of workplaces that require being connected to computers and multimedia equipment is increasing. This system makes it possible to group all together the needs of a working place (electrical outlets, telephone, data, protection and multimedia) in a single box.

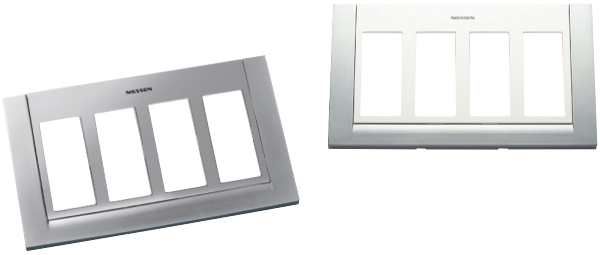
Solutions to simplify your work
Standard configuration including 4 double modules consisting of:
- 4 stadard duplex Schuko socket outlets,
- 2 UPS duplex Schuko socket outlets,
- 1 quadruple adapter for telephone or data connectors

Finishes suiting to each workspace
The Zenit workstations are available in three finishes:
- **BL:** White plate and trim
- **PL:** Silver plate and trim
- **TT:** White plate / Titanium metallic trim

Also the surface boxes are available in the finishes White and Silver.



—
Special kit that incorporates standard mechanisms



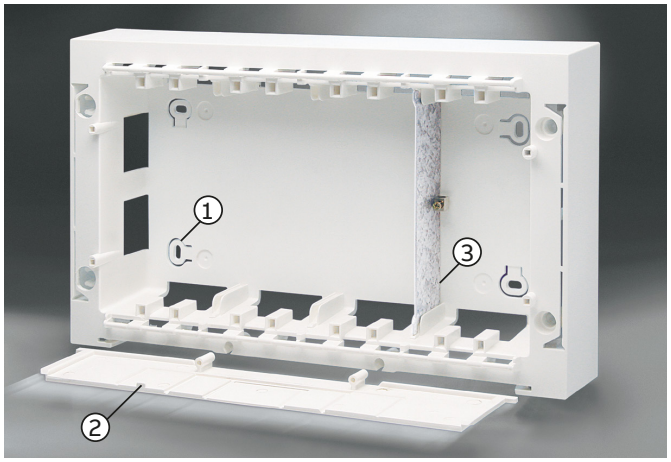
Professional solutions, solutions as a whole
The Zenit systems for workstations allow to group all the needs of a job in a single box, that can be:
- **Surface mounted box,** to be installed with pipe or trunking inlet.
- **Flush mounted box,** for brick walls or drywalls.
- **Floor box,** for traditional or concrete floors, as well as raised or technical floors.

With different options of measurement and capacity, **in order to provide the necessary flexibility in each workstation. And the duplex inserts, for sockets, voice and data,** specially designed for these boxes, being the most used insert type in this kind of installations.

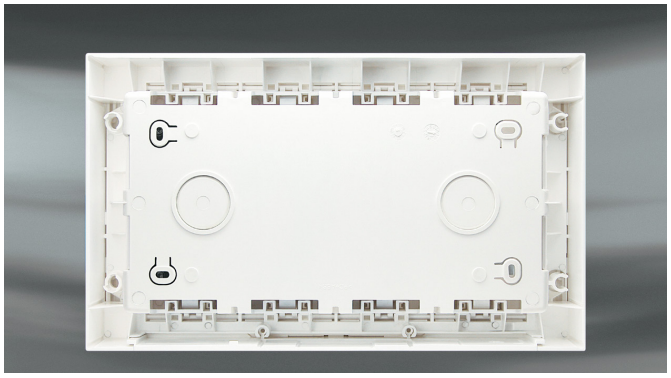
The maximum simplicity and comfort in the installation

The Zenit workstations have been meticulously designed with innovative breakthroughs, devised to solve in the most comfortable, quick and easy way any installation.

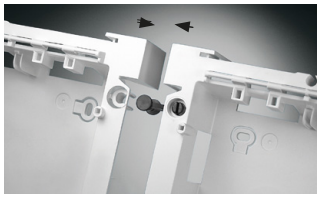
- **1** In addition to the usual cutouts for the drill, the base has flexible flaps for a correct adaptation to non homogeneous, rough or imperfect walls. It is also equiped with holes arranged horizontally and vertically, to be able to level the box in both directions.
- **2** The bottom has a removable lid with several cutouts for different trunking dimensions.
- **3** Guides at the upper and lower ends facilitate the placement of a metal separator to avoid interferences between power and voice/data lines.



- At the rear the box has a large peripheral space to guide the cables comfortably.
- With multiple cable entries on all sides for easy access to all inserts.



The boxes are linked in a very simple way: the side is cut with scissors, the connection pieces that the box has inside are rotated and these are joined to the other box by simple pressure. This provides a perfect connection that does not alter the design of the box. (Figure 1).

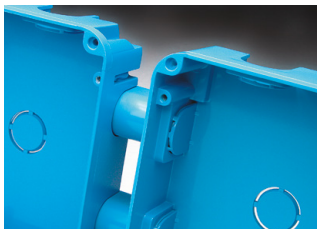


—
Figure 1

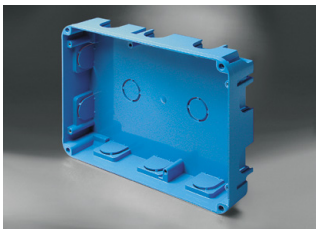
—
Figure 2

- To facilitate the alignment of the mounting plates, we include an accessory that joins and pairs the ends of the plates while screwing them. (Figure 2).

The boxes are linked very simply with two pieces that serve for the passage of the wiring and to keep them well aligned. (Figure 3).



—
Figure 3



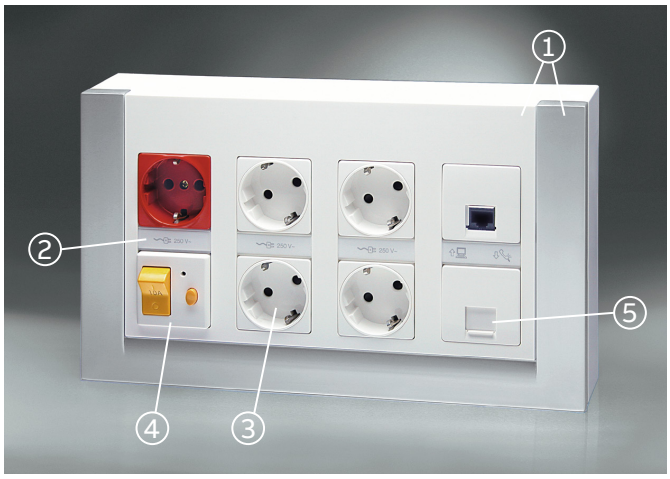
—
Figure 4

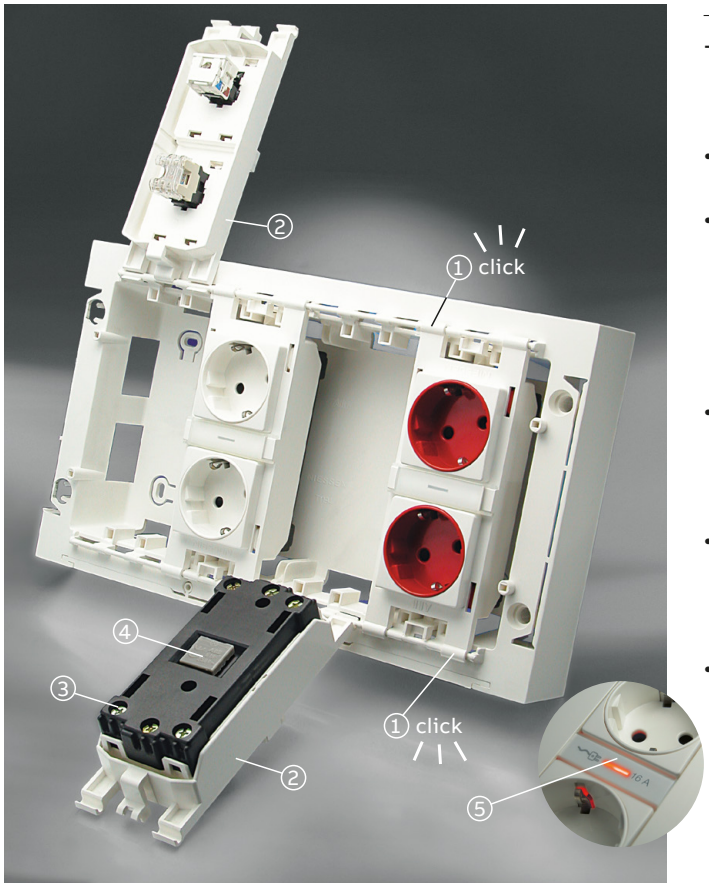
- The flush mounted box offers multiple tube or pipe inlets on all sides.
- It also has tabs that allow its correct adjustment in plasterboard partitions or drywalls. (Figure 4)

The mounting plate that holds the inserts is independent of the box. This offers two clear advantages to get a good finish without any problem:

- When screwing the mounting plate into the flush mounted box, the screw holes allow the frame to be rotated so that the frame is always straight, even if the flush-mounted box is not.
- In addition, the independent mounting plate rests on the wall and not on the box, which ensures that the outer bezel always fits well, even if the box is not perfectly scratched.

- **1** The embellishing cover and the frame (white or colored) are fixed by pressure, both to the mounting plate and to the box, without using any tool.
- **2** The frame offer easily removable slide-in tags that allow you to insert the labels included with the frame or any necessary description.
- **3** The socket outlets are positioned tilted to facilitate the use ofbulky plugs or chargers.
- **4** In addition to the duplex inserts created especially for the workstations, the system has a double adapter that allows to incorporate any modular 1 or 2 module insert of the Zenit range.
- **5** The voice and data connectors are hidden behind a protective shutter that prevents dirt from entering them.





Thus, work is much easier

- **1** The inserts are installed by clipping, simply by pressing on the top and bottom of them.
- **2** The great advantage for the installation is that, in order to facilitate its connection as much as possible, the inserts swing very easily in both directions (up and down). This allows you to work comfortably outside the box and, once the connections have been finished, reposition them in place by clicking on the bracket.
- **3** The screws of the socket outlets are located at the rear for easier tightening. In addition in the duplex socket outlets it is only necessary to connect on one side, which reduces the time of wiring in half.
- **4** Thanks to this innovative tilting system, the voltage indicator lamp can also be easily replaced by pressure and without the need for additional cables or connections at the rear of the inserts.
- **5** When placing the lamp on a duplex Schuko socket outlet or a duplex French/earth-pin socket outlet the sign is illuminated, which allows to easily identify if there is power supply at that point.

Zenit systems for workstations

Surface mounted workstations for walls and furniture

- Size (height x width x depth): 176 x 235 x 45 mm.
- Suitable for frames code: T1173.
- 4 columns:
- 2+2+2+2+2+2+2+2 modules.
- Size (height x width x depth): 176 x 295 x 45 mm.
- Suitable for frames code: T1174.
- 5 columns:
- 2+2+2+2+2+2+2+2+2+2 modules.
- Size (height x width x depth): 176 x 355 x 45 mm
- Suitable for frames code: T1175.

For 1 or 2 module devices. Also suitable for T10XX devices.
Included:
- Mounting plates (vertically folding devices for easy installation)
- Multi-box linking accessories
- Screws
- Plugs
- Side cover for trunking system incoming and isolating metallic plate to divide power from VDI.

Duplex socket outlets

Duplex Schuko socket outlet

Rated voltage: 250 Vac.
Rated current: 16A.
Type F: 2P + E.
Shuttered for child safety.
Screw terminals (common terminal for both outlets).
Folding system for easy installation.
With labeling space.
Optional: power indicator LED lamp code: 6192.
Suitable for boxes code T1193, T1194, T1195, T1093 and T1094 and mounting plates code T1373.
Colors RJ and RP are suitable to identify special circuits.

Adapter plate for Zenit devices

1-column adapter plate for Zenit devices.
2+2 modules.
For 1 or 2 module devices.
With labeling space.
Suitable for boxes code T1193, T1194, T1195, T1093 and T1094 and mounting plates code T1373.

Colour	Type	Order code	Size	Qty.*
Silver	**T1000**	2CLA100000T1001	-	10

Zenit - workstations

Adapters

2-gang plain outlet without shutter

1-column plain outlet without shutter. 2-gang.
With labeling space.
Without shutters.
Suitable for boxes code T1193, T1194, T1195, T1093 and T1094 and mounting plates code T1373.
To be used with 2016, 2016.1, 2016.2 or 2016.3 connector adapters.
Included: 2x 2016 connector adapters.

Colour	Type	Order code	Size	Qty.*
White	**T1016.1 BL**	2CLA101610T1101	-	10
Silver	**T1016.1 PL**	2CLA101610T1301	-	10

4-gang plain outlet without shutter

1-column plain outlet without shutter. 4-gang.
With labeling space.
Without shutters.
Suitable for boxes code T1193, T1194, T1195, T1093 and T1094 and mounting plates code T1373.
To be used with 2016, 2016.1, 2016.2 or 2016.3 connector adapters.
Included: 4x 2016 connector adapters.

Colour	Type	Order code	Size	Qty.*

Zenit - workstations

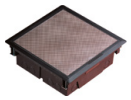
Floor boxes

Floor box - 3 columns - 5 mm. hollow lid

Floor box with 5 mm. deep hollow lid for carpet, linoleum, etc.
Protection degree:
- IP52 between the box and the floor ensured by loss-proof seal.
- IP4x at the rim of the lid.
- IP2x at the cable inlet.
Resistance of the lid: 1500 N according to DIN VDE 0364.
Resistance to chemicals present in the main detergents.
Direct installation in technical or raised floor.
Installation in tradiotional floors using the flush mounting metal box code T1393.9.
Color: dark gray RAL 7021.
Size (height x width x depth): 235 x 300 x 100 mm.
Slot size (height x width): 211 x 275 mm.
Suitable mounting plates code: T1373 and T1371.4.

Colour	Type	Order code	Size	Qty.*
Dark gray	**T1393**	M109020000	-	1

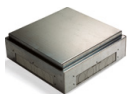
Floor box - 3 columns - Stainless steel lid



Floor box with anti-slip square patterned lid with stainless steel finish.
Protection degree:
- IP52 between the box and the floor ensured by loss-proof seal.
- IP4x at the rim of the lid.
- IP2x at the cable inlet.
Resistance of the lid: 1500 N according to DIN VDE 0364.
Resistance to chemicals present in the main detergents.
Direct installation in technical or raised floor.
Installation in tradiotional floors using the flush mounting metal box code T1393.9.
Color: dark gray RAL 7021.
Size (height x width x depth): 235 x 300 x 100 mm.
Slot size (height x width): 211 x 275 mm.
Suitable mounting plates code: T1373 and T1371.4.

Colour	Type	Order code	Size	Qty.*
Dark gray	**T1393.1**	M109030000	-	1

Flush mounting metal box



Accessory for the installation of the floor boxes code T1393 and T1393.1 in tradiotional/concrete floors.
Supplied with protection semi-lid and bunkheads for trunkings of 70x30 mm. and of 95x30 mm. and for ø 25 mm and 32 mm. conduits.
Size (height x width x depth): 230 x 305 x 105 mm.

Colour	Type	Order code	Size	Qty.*
-	**T1393.9**	M109300000	-	1

Mounting plates for floor box

Mounting plate for floor box - 3 columns

3-column adapter for the installation of Zenit devices and/or T10XX devices in floor boxes code: T1393 and T1393.1. 3-columns - 2+2+2+2+2+2 modules.
For 1 or 2 module devices. Also suitable for T10XX devices.
Included:
- Mounting plates.
- Frame.
- Screws.

Colour	Type	Order code	Size	Qty.*
White	**T1373**	2CLA137300T1101	-	20

Adapter plate for floor box - 4 modules

4 module adapter plate for the installation of Zenit devices in floor boxes code: T1393 and T1393.1.
To be combined with Zenit 4-module mounting plates code N1374.9 and frames code N2374.1.
For 1, 2 or 3 module devices.
Included: screws.

Colour	Type	Order code	Size	Qty.*
Dark gray	**T1371.4**	M109190000	-	6

Chiara
All the voices of nature

Experiences are more intense when senses are fully engaged. Chiara range focuses on the visual sense with a colour palette inspired by nature, the fruits of the land and by its elements. All this give born to distinct and unique finishes, ideal to be integrated into a variety of environments and to welcome people who live there.

Chiara
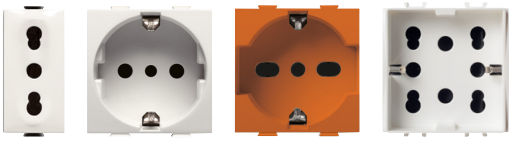
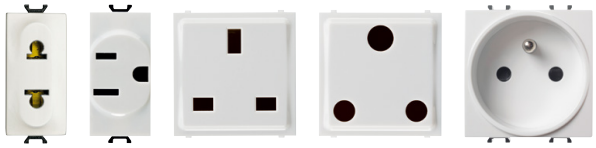
Selected functions

Command devices.
Circuit-breakers, push-buttons, switches, inverters, relays and commutator devices in different versions for configuring functions and control points in the most flexible and suitable manner for any home or office environment. All command devices, except for relays and switches, can be illuminated.

Protection devices.
These devices trigger in case of overloads, short-circuits and other phenomena that pose a risk to the safety of people and which impair the proper functioning of connected loads; their role is a direct downstream protection without interfering with the power supply of other points of the electrical installation.



Socket outlets.
10-16A 2P+T socket outlets for 250V lines compliant with Italian and German standards, with safety shutters and side/central ground. P17/11, P30 and P30/17 socket outlets are available also in coloured version for privileged circuits. The Side innovative socket outlet is also available, combining a German standard-based and two Italian bivalent socket outlets.

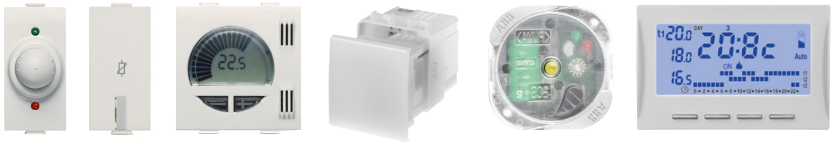


The range also includes the main socket outlets based on other different standards: EUR-American and American with grounding, for 127V lines; 13A e 16A English and 2P+T French for 250V lines.

Special socket outlets
Shaver socket outlet, 2.1A USB charger and connectors for telephony applications and data transmission, available in different versions that meet the most used and advanced wiring international standards.

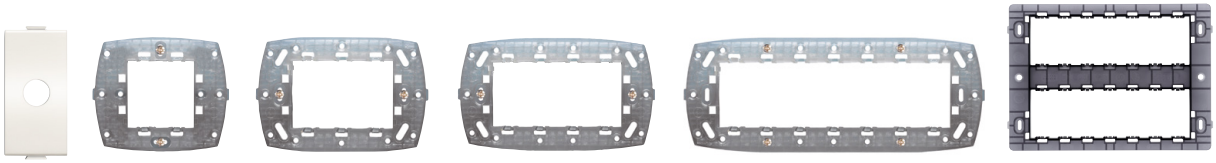
Signalling devices.
Warning lights to indicate the operating status of the connected devices, bells and buzzers.

Chiara
Selected functions



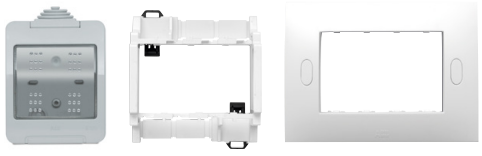
—

Safety and comfort equipment.
To optimize the operation of the electrical devices and make the rooms more liveable, the range includes devices for programming, adjustment and timing, such as Chrono thermostats, electronic thermostats, dimmers and IR presence detectors with twilight threshold. Extractable anti-blackout lamps and emergency lamps are available with wide operating autonomy.



—

Components for installation.
Blank cover for unused modules and 2, 3, 4, 7 and 7+7 module mounting grids for the installation of Equipment and components inside flush-mounting round and rectangular boxes.

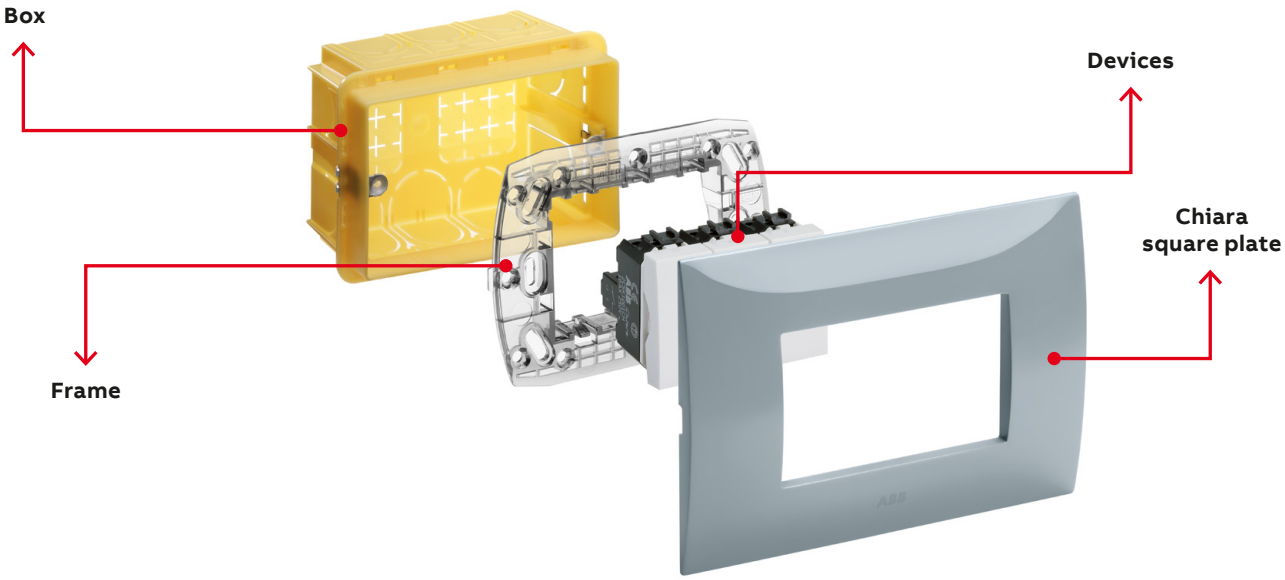


—

Other installation solutions.
Products and solutions for secure installation (IP55 covers and IP40/IP55 boxes) are available, as well as adapters for installation on DIN rail or Undernet retractable turret. The self-supporting frames are convenient and flexible solutions for any specific installation solution.

Chiara

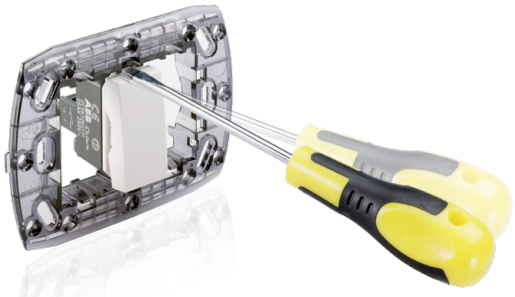
Installation overview.



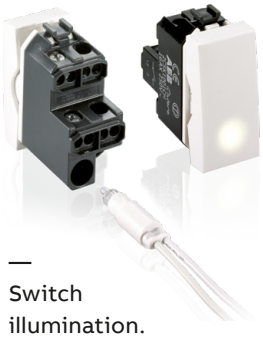
Flexibility is a feature of Chiara.
The composition of the devices is particularly simple: the mounting greed is made of semi-transparent plastic material for easy mounting in the flush-mounted boxes.
On the same mounting greed you can choose either to mount Chiara or Chiara Xite plates.

Quick installation of devices.

Specifications of screws and terminals. The composition of the devices is particularly simple: the frame is made from semi-transparent plastic material for easy mounting in the flush-mounted boxes.



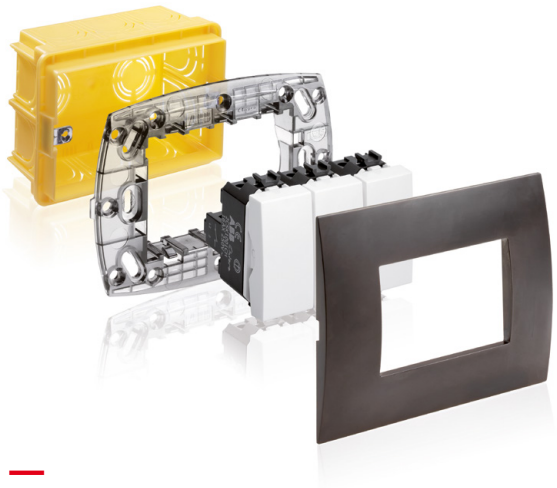
- Frontal installation of the switches on the frame
- Modularity of the switches: 22 mm



Switch illumination.

Chiara

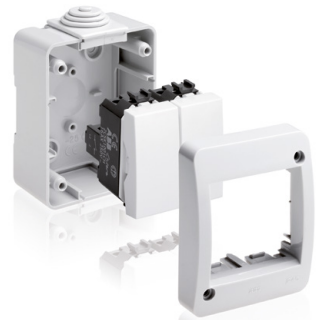
Installation on concrete walls.



No. Modules	Screw distance	Compatible box
2 (with claws)	-	ABB 00 050
2 (with screws)	60 mm	ABB 00 050
3	83.5 mm	ABB 1SL006A00
4	108 mm	ABB 00 053
7	100 mm	ABB 1SL0064A00

Note: For further information on ABB boxes for concrete walls please refer to the catalog 1SLC001001D0905 - Insulating Enclosures and Installation Materials.

Protected installation with IP55 wall-mounted enclosures.



IP40 wall-mounted enclosure

IP55 wall-mounted enclosure

No. Modules	IP40 enclosure	IP55 enclosure
1 (on 2-module enclosure)	2CSK2140CH	2CSK2155CH
2	2CSK2240CH	2CSK2255CH
3	2CSK2340CH	2CSK2355CH
4	2CSK2440CH	2CSK2455CH

The IP55 cover enclosures allow the direct assembly of devices without the aid of mounting grids.
The devices are inserted from the rear. See technical details on page 5/57. For further information on IP40/IP55 wall-mounted enclosures, please refer to the catalog 1SLC001001D0905 - Insulating Enclosures and Installation Materials.

Protected installation with IP55 cover.

IP55 wall-mounted cover

No. Modules	IP55 cover
2 (on a square or round box with screws, center distance 60mm)	2CSK3255CH
3	2CSK3355CH

Note: The IP55 covers provide a self-supporting solution that allows direct assembly of devices without the aid of mounting grids.
The devices are inserted from the rear.

Chiara – Signalling devices, Safety and comfort devices

Emergency lighting

Removable anti-blackout light, 230V~

Charge reserve 4.5 h and recharge time 10-20h. To be combined with 230V~ socket outlets; particularly recommended for codes 2CSK1108CH and 2CSK1109CH

Colour	Type	Order code	Pack/Qty.
White	**2CSK1214CH**	2CSK203205R1214	1

LED light for emergency lighting or steplight

Charge reserve up to 2h and recharge time 48h.
Power supply 230V~ - 50/60Hz.

Colour	Type	Order code	Pack/Qty.
White	**2CSK1235CH**	2CSk218932R1235	1

2-module pluggable blackout lamp

Charge reserve up to 2h and recharge time 48h.
Power supply 230V~ - 50/60Hz.
It turns on to enlightening areas where it is installed if a blackout occurs.
The lamp can be unplugged and used as a portable torch.

Colour	Type	Order code	Pack/Qty.
White	**2CSK1236CH**	2CSK218782R1236	1

Universal badge switch with location light

Relay output with NO contact 10A (AC1).
Power supply 230V~ 50/60Hz

Colour	Type	Order code	Pack/Qty.
White	**2CSK1426CH**	2CSK223155R1426	12

IR motion detector

with twilight sensor for control and adjustment of the operation time of lighting devices.
Relay output NO 5A (AC1)/2A (AC15) - 250V~.
Power supply 230V~ - 50/60Hz

Chiara

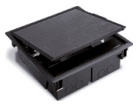
Undernet towers and adapters

Floor box - 3 columns - 5 mm. hollow lid



Floor box with 5 mm. deep hollow lid for carpet, linoleum, etc.
Protection degree:
- IP52 between the box and the floor ensured by loss-proof seal.
- IP4x at the rim of the lid.
- IP2x at the cable inlet.

Resistance of the lid: 1500 N according to DIN VDE 0364.
Resistance to chemicals present in the main detergents.
Direct installation in technical or raised floor. Installation in tradiotional floors using the flush mounting metal box code M109300000

IP40 surface mounting boxes

Surface mounting box - IP40 - 1 module

Box for surface installation. 1-gang - 2 modules.
For 1 module devices. Size (height x width x depth): 80 x 65 x 55 mm. Color: gray - RAL 7035.
Protection degree: IP40 / IK06. Incoming with multi-diameter cone for tubes/cables max. Ø20.
The box includes the clipping system to clasp inserts (no mounting plate, nor frame are necessary).

Colour	Type	Order code	Pack/Qty.
Grey	**2CSK2140CH**	2CSK203215R2140	10/40

Surface mounting box - IP40 - 2 modules

Box for surface installation. 1-gang - 2 modules.
For 1 or 2 modules devices. Size (height x width x depth): 80 x 65 x 55 mm. Color: gray - RAL 7035.
Protection degree: IP40 / IK06. Incoming with multi-diameter cone for tubes/cables max. Ø20.
The box includes the clipping system to clasp inserts (no mounting plate, nor frame are necessary).

Colour	Type	Order code	Pack/Qty.
Grey	**2CSK2240CH**	2CSK200855R2240	10/40

Surface mounting box - IP40 - 3 modules

Box for surface installation. 1-gang - 3 modules.
For 1, 2 or 3 modules devices. Size (height x width x depth): 80 x 104 x 55 mm. Color: gray - RAL 7035.
Protection degree: IP40 / IK06. Incoming with multi-diameter cone for tubes/cables max. Ø20.
The box includes the clipping system to clasp inserts (no mounting plate, nor frame are necessary).

Chiara Antibacterial

The new solution for healthcare environments

Hospitals, clinics, laboratories and healthcare environments must guarantee maximum hygiene with a high level of safety and protection against bacterial growth for patients, visitors and medical staff. To enhance cleaner healthcare environments, ABB introduces Chiara Antibacterial, a sub-range of conventional wiring accessories of the Chiara switch assortment with antibacterial additive and technopolymer material (ABS/PC)

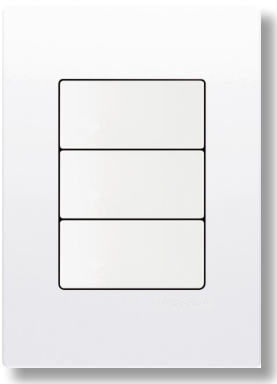
Unno
The perfect combination

It will be hard for you to decide. From the elegant Soft Black, to the versatile White, through the daring Mandarin, Mint, Mustard... The wide variety of colors in the Unno series is the key when it comes to set up a vital home, full of light and harmony. Design, technology, respect for the environment, versatility and beauty. Unno makes its way through an extensive range of tones capable of fully personalizing any space or environment. Thinking of meeting your expectations in decoration and style, Unno is your winning bet.



Unno
Dare with color!

Unno's new Black Soft finish allows it to adapt to a wide range of decorative styles.
From the most transgressive trends that combine black with colors such as lilac or mustard, to the most contemporary interior design that is increasingly present in new constructions and renovation works, both in residential and commercial spaces.

Quality and design within everyone’s reach

The Unno range with its colours, straight lines and its simple design brings personality to your home, while offering a unique and contemporary look.

Unno is versatility that matches your style.

We offer an elegant range, incorporating high technology while respecting the environment. We now know it is possible to align beauty, functionality, quality and sustainability, while placing great design within reach of all.

Unno is design

Its straight lines and simplicity provide an elegant and contemporary look; added to the colours that adapt to all the latest trends. With different side finishes, Unno is the perfect combination, bringing life to covers and switches, and ultimately, to your home.

Unno is technology

ABB's experience over the years can now be seen in the new mechanisms: manufactured using raw materials within the guidelines proposed by international environmental protection organisations such as (RoHS, IEC, INMETRO), the Unno switches are the most ideal for new energy saving light bulbs, incorporating childproofing in the 2P + T connections in all their products.

Unno is versatile

Only ABB has been able to create a range that comes with all the benefits of the highest quality, adapted to market needs in relation to both design as well as ease of installation and safety. Unno is versatility that matches your style.

Unno is Ecodesign

Unno reduces the impact on the environment in each of the processes of design, production, logistics, sale, use and recycling. Niessen was the first brand to offer an eco-designed series of plates and dampers.
Always concerned about social welfare through the use of new technologies, he is present in the construction of a better world for future generations.

AENOR
ECODISEÑO
ISO 14006

These are some of the improvements in the environment that Unno presents:

- Unno's signal lights, based on LED technology, represent savings in energy consumption of 80%, and their life is extended up to ten years.
- Recyclable packaging, and optimized to make the most of your space.
- The materials used in the Unno series are recyclable and reusable.
- Optimization of raw materials and consequent energy savings in manufacturing processes.
- The Unno series has been designed according to the requirements of the Environmental Management Standard ISO14006.

Peace of mind at home
Quality in technical design

Innovating for the well-being of people. It is not supported for the experience that Niessen has acquired after more than 100 years, during which it has built a great prestige around the development of new products, technology, improvement of electrical installations, user safety and high quality materials.
The colors that this series offers give life and exclusivity to the home.
Being Unno a series of minimalist aesthetics, with straight and simple lines, the combination of colors in its plates makes each piece have its own personality, thus creating fully customized environments.

Unno is versatility and adaptability

Because it offers a wide variety of colors

Mounting plates finishes in:

BL White
NG Black
GP Gray
MS Mustard
CT Chocolate
MD Tangerine
AR Blueberry
LL Lilac
MN Mint
CM Caramel
AZ Blue

Device finishes in:

BL White
BN White/Black
NS Soft Black

Frame finishes in:

BL White
NS Soft Black
MS Mustard
CT Chocolate
MD Tangerine
AR Blueberry
LL Lilac
MN Mint
CM Caramel
AZ Blue

For tastes, the colors. Unno offers more than 300 combinations of possible finishes to adapt to any space, decorative style or preference.
Frames in 10 finishes, aesthetic mounting plates with 11 finishes and devices in three finishes.
Unno offers versatility and adaptability without forgetting about design.

All its uses
Maximum quality and guarantee

New mechanism design

Now with capacity for currents up to 16A. Switches that also comply with the latest revision of the international standard IEC 60669-1, which requires supporting LED loads of up to 200 W. All this while maintaining all the benefits that Unno switches have offered since their launch: functionality and simplicity that allows connections to be made safely with the usual uses of the market, avoiding in all cases direct and indirect contacts. 46mm key. x 22mm. and the height of the mechanism of 27 mm.

Robust mechanism design

Contact function via indirect swaying and forced shut-off. This system offers robustness and durability, increasing its useful life.

Advanced connection

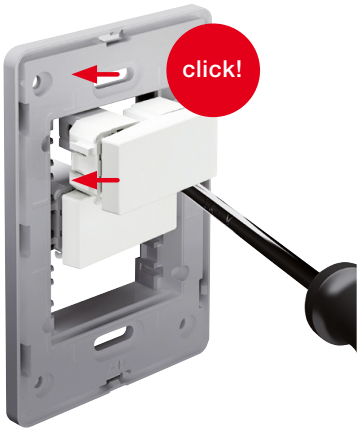
The direct contact connection system prevents the cable from moving, keeping it in place despite the temperature, movement or passing of time affecting the connection.

Safety

All the products in the Unno range come with childproofing measures ensuring everybody's safety, including children under the most adverse conditions, complying with ABNT NBR 60884-1:2004 + decree 085 regulations: 03-04-2006 and NBR 14136:2002.

Reinforced mounting

With exclusive mounting system that prevents it from becoming displaced or sunken. Manufactured from polycarbonate, a hard wearing and rigid material.



Rapid connection

Extraction and front setting mechanism. Two installation options that ensure mechanisms are perfectly aligned:
1. Mounting assembly and subsequent connection
2. Connection and subsequent mounting assembly

Visibility

White LED lighting offer higher luminosity. Energy savings.
Up to 80% longer lasting.

Wide range of functions

Solutions for any type of project: multiple types of socket outlets, USB chargers, dimmers, voice, data and image sockets, etc.

Segurança

Origen

Innovation and elegance within everyone's reach

Light is an essential element for the design of our living spaces: the foundation of Comfort. It's important to magnify it and make it the main character in every living space. Origen is a new series of light switches for any home or commercial building.

Discover its new range of innovative, integrated functions, for guaranteed quick, fool-proof installation and increased well-being and comfort.

ABB's roots lie more than 100 years in the innovation of materials and the aesthetic research for increasingly performing light switches.

Personal safety, damage prevention for connected appliances and protection for your home and loved ones: **Origen stands for innovation, our mission since our origins.**

Origen.
Elegance and functionality for our living spaces

Design and performance from our origins
Efficacy and reliability in a lightweight design

Simple and flexible - the essentials of design. A range of finishes, with stylishly curved lines and surfaces. Origen satisfies your requirements for beauty, reliability and ease of installation.

03

—
01. 6 frames color

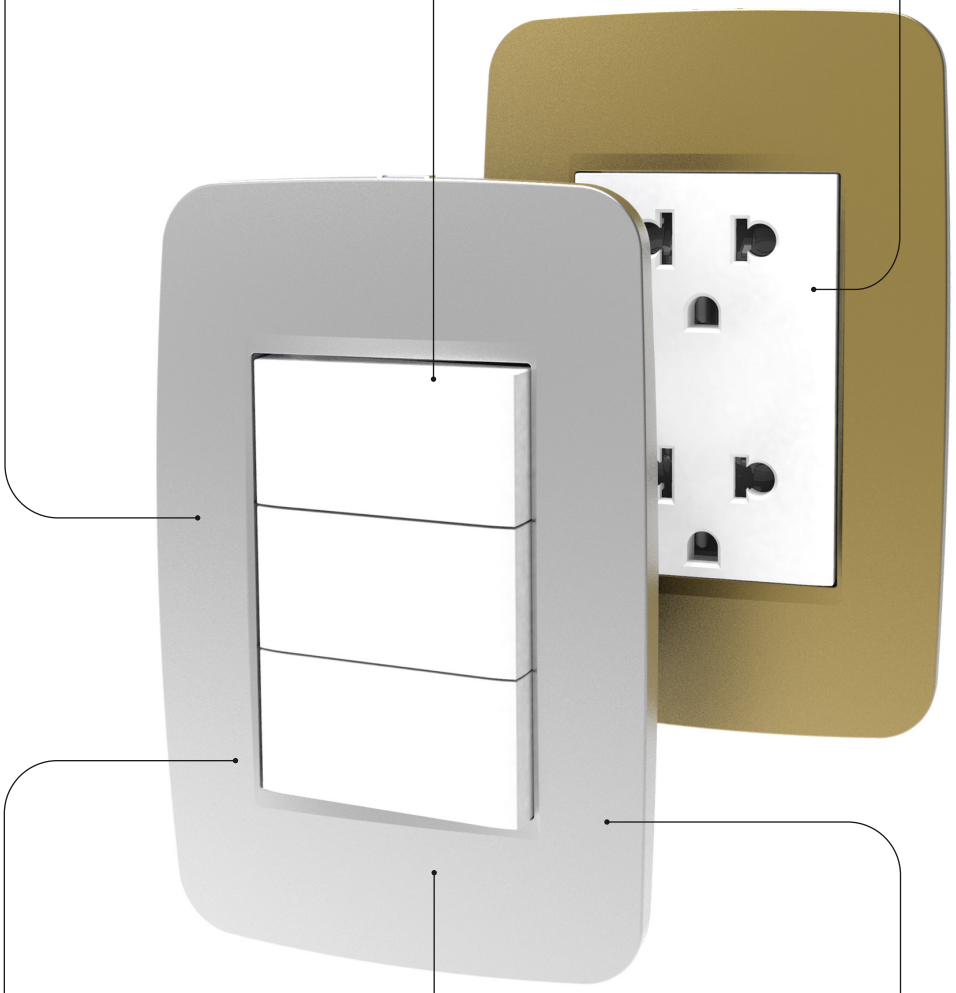
—
02. Origen is just 8.5 mm deep

—
03. Multiple color combinations

Timeless design
Origen's 8.5 mm deep profile, curved surface and soft border give the frame a lightweight, floating look.

Simplicity with quality
High quality, durable frame finishes in 6 colour options.

Modern texture
Enhancing elegance within a room with modern, textured rockers, available in white and black.



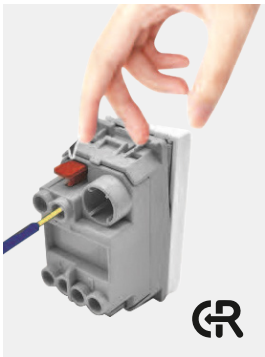
Easy installation
Front and rear installation with screwless and screw/nut type terminals.

Suitable for any need
Residential and commercial buildings. Multiple frame types, including IP55 protection degree. Innovative dimmers and USB chargers.
More than 70 functions.

Multi-standard
4" x 2" and 4" x 4" boxes. Socket outlets for multiple plug types. Devices for 127 V and 230 V rated voltage. 50 and 60 Hz frequency.

Functional for any space

Specially designed for easy installation, damage prevention and long life



—

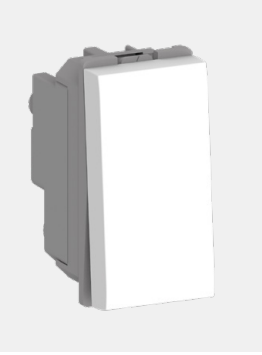
Optional wiring method

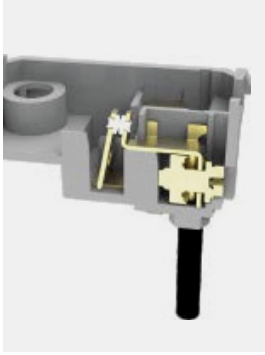
- 16AX switches with screw terminals.
- 10AX switches with rapid cabling terminals.
- Screw/nut cabling: the exclusive design of the contact, nut and housing holds the cable securely throughout the unit's service life.
- Rapid cabling: contacts with automatic terminals assure easy cabling and up to 40% faster installation. This system allows the installer to use both hand to cable or disconnect switches, since no tools are needed (e.g. screwdrivers).

—

More protection

- Children are famously curious and love to experiment with household appliances - especially dangerous when they are located for easy access like power outlets.
- All Origen outlets are equipped with child protective shutters compliant with IEC 60884-1 to protect against electric shock when an object is inserted (e.g. a fork).

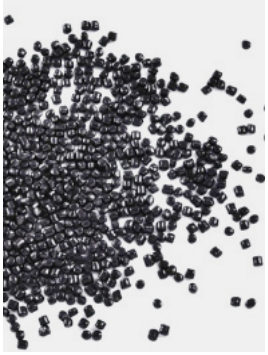




—

Switch mechanism

- Our switches assure reduced sparking, lower temperatures and a longer life when used with LED loads.
- Tested pursuant to IEC 60669-1:2017 (up to 200W LED loads for 16AX switches).



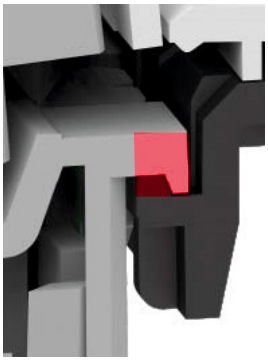
—

High quality, durable materials

- Manufactured with high quality recyclable materials.
- Completely ABS free. Made with robust, fire-resistant polycarbonate to guarantee excellent installation and safety in use.

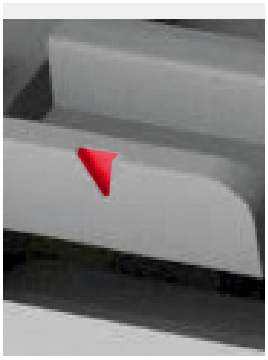
—

Front and rear extraction system
The mechanisms can easily be extracted from the front and rear for easier installation even after the frame has been mounted to the enclosure.



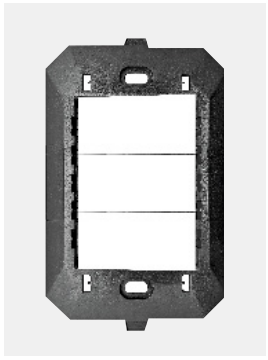
—

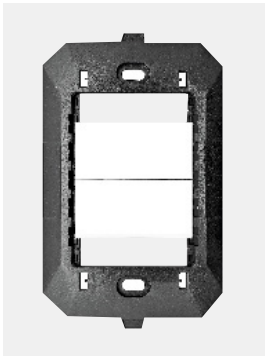
Three point snap mounting system
Origen includes an exclusive snap mounting system to prevent the modules moving around, coming loose or being pushed into the wall.



—

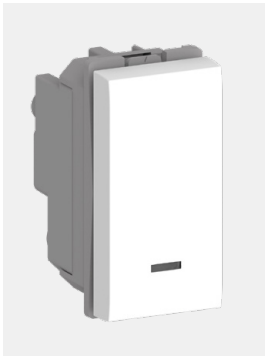
Marked for faster installation
The clearly marked frame and modules make installation a snap.

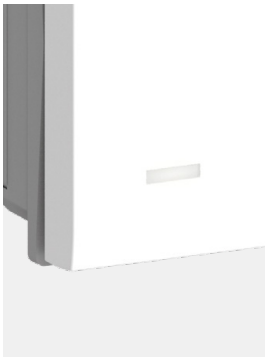




—

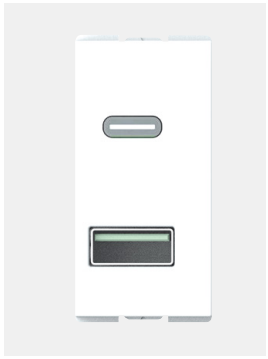
Half module snap mounting system
The half-module snap point assures universal mounting, as well as improving product inventory management

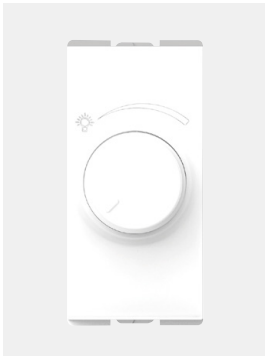




—

LED backlighting
Our optional highly efficient, energy-saving LED backlighting is bright, easy to install and lasts up to 80% longer.





—

Innovative functions
- USB A+C chargers up to 20 W including Power Delivery and Quick Charge protocols.
- Universal and 1-10 V dimmers to control any kind of light load type.

For any type of installation
Compatible with any market

Our simple, foolproof installation system assures unbeatable performance, comfort and function in any market

To make your work easier, we've created these to support you

IVIE
Switch to the future.

Stylish design in three delightful colours which perfectly matches any interior. A comprehensive offer of premium modular wiring accessories provides advanced functions like dimming, USB charging, automatic switching based on movement, home automation. A clever combination of style, quality, safety and energy savings.

Different finishes and combinations:
01 Anthracite grey mechanisms in Silver plate
02 Silver mechanisms in Anthracite Grey plate
03 Anthracite grey mechanisms in White plate

Materials
Cover: thermoplastic cover (PC), impact-proof and fracture-resistant, UV-resistant, free of PVC and halogen.

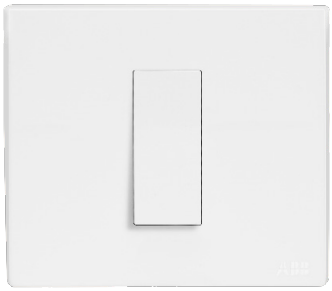
ABB Tvisha
Key features

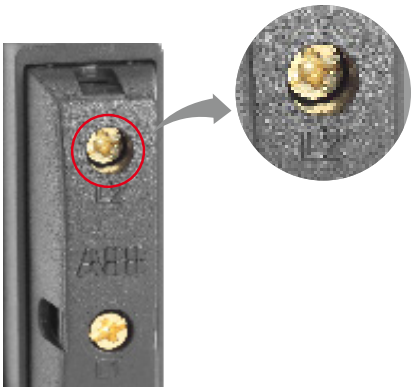
Introducing the ABB Tvisha range, a collection of wiring accessories designed with a sleek, flat surface that adds a touch of elegance to any wall with its sophisticated Euro white finish.
This versatile range offers a wide array of functionalities, extending beyond standard switching to include USB chargers, HDMI ports, communication sockets, foot lamps, and dimmers.
Perfectly suited for both residential and commercial applications, ABB Tvisha meets all your wiring needs with style and efficiency.



- Plastic parts which holds current carrying parts are made of PA6 20% glass filled rating upto 16A
- All switches are marked with IS 3854:1997
- Terminals are designed in such a way that wire is tightened without damage
- Bi-metal silver contact tips for less spark and longer life
- 6A & 6/16A marked with IS 1293, up to 16A
- Non-flammable thermoplastic resin parts and a very high insulating resistance after humidity test

ABB Tvisha
Features and benefits

Internal arc shield provided in switch mechanism



Terminal screws with Combihead for star /flat screw drivers.

Top entry

Easy terminal accessibility by top entry to load connection.

ISI marking on switch socket and fan regulator and laser marked.

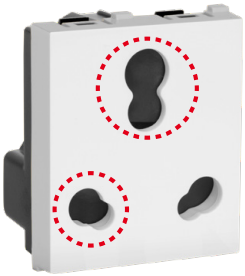
Laser marking and arrow showing the correct orientation of the mechanism.

20A DP switch in one module (space optimisation)

ABB Tvisha
Features and benefits

Large variety of sockets, equipped with shutters for increased safety.

Universal regulator with 360 degree rotation.



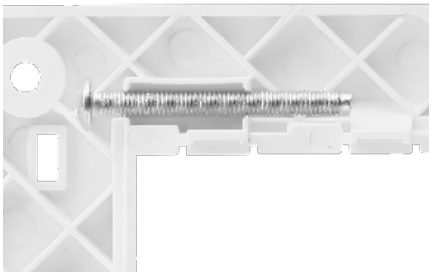
6/16A sockets are equipped with dual shutters which can take two pin plugs.

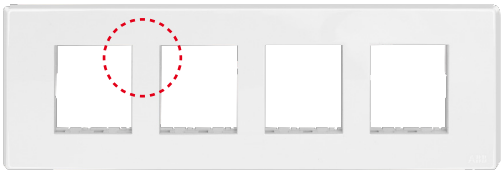
HDMI moduler ports equipped with female connector for easy termination.

USB charger current rating 1A and 2A, visible LED indication, Dual color LED indication for on load & without load operation.

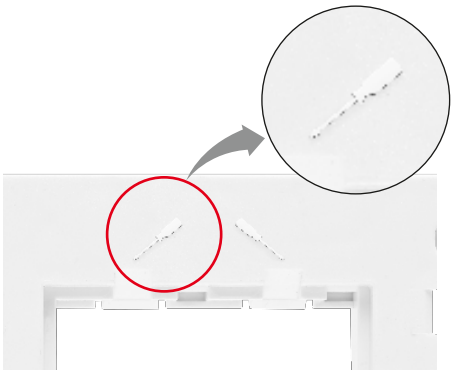
Communication mechanisms – RJ-11, RJ-45 cat6. Self-moving shutter to screen the jack when it is not in use.

ABB Tvisha
Features and benefits

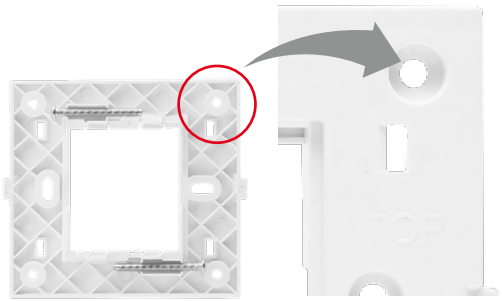




Two module partition is provided for sturdiness with extra ribs to ensure better strength of the frame and overlap of plugs.



Visual signs provided in inner grids to guide proper fitment for easy installation and easy removal during fitment of mechanism with inner grid.



Resin frame with extra ribs provides better mechanical strength, insulation resistance and corrosion proof.

ABB warranty policy for Tvisha range

- 10 years for mechanical switches and sockets
- Two year for electronic devices

Notes

Millenium
Distinct sophistication.

Cool. Conspicuous. Clever. Striking metal light switches in square and ultra slim designs. Millenium surprises with its complexity and functional solutions designed for any interior, any building. A wide range of KNX sensors meet the highest of customer demands. Engineered to offer maximum comfort and happiness.

Features and benefits

Full range of ABB i-bus® KNX, ABB-free@home® sensors, innovative, intuitive and visually elegant. Millenium gives answer to the future by providing comfort, safety, and energy saving.

Millenium collection is a grid type system enabling combination of colours and products of different dimension and functionality. The three type of switch dimensions together with the ABB i-bus® KNX, ABB-free@home® sensors and other functions, have to be composed with the required frame in order to have the right assortment of functionality and design. In ABB i-bus® KNX sensors we have the possibility to adjoin to the frame the special metal mounting plate that allows to reduce the height so as to maintain the ultra slim line for KNX functionalities.

—
Mounting Plate

—
Premium rocker switch

—
Frame

—
01 Earth Pin Child safety shutter system. Designed to inhibit access to electricity supply
—
02 Double pole switching
—
03 Four high quality finishes combinable to reach sixteen combinations in Stainless Steel material AISI 304
—
04 Styling slim-line design frontplate profile only 4 mm
—
05 Adaptable to the market wallboxes
—
06 Load indicator in blue LED. Less energy consumption, more durability and stylish signaling
—
07 Pure Stainless Steel AISI 304 with highest corrosion protection

All articles in this chapter are supplied with all the necessary parts to complete the installation of the functions.

Each article includes:
- Functional module (e.g., switch, socket outlet)
- Frame / Front plate and mounting support

1 Gang switches - Standard rocker

Millenium - Modular System (AMD)

The modular system of Millenium (AMD) is a clever solution to allow users to combine different functions, frames and colors.

The functions can be combined with specific frames in order to complete the installation.

The table showing the full set of frames can be found at the end of the chapter.

Mounting Plate

Premium rocker switch

Frame

Standard rocker switch

ABB-free@home®

Product	Article-No.	Order-No.	Pack/Qty
	**For switching 230 V~ consumers.** **With integrated switch actuator.** **Switching function is available also without prior programming (pre-configured).** **Only to be used in combination with ABB-free@home® 1/2-Fold sensor cover plate.** 44 mm. × 44 mm. ×45 mm. Outputs: 1× normally open contact, potential free. Suitable for: ohmic. Rated current: 10 A. Rated power: 2300 W. Suitable for: capacitive. Rated current: 10 AX. Protection class of device: IP 20. Mounting depth: 32 mm.		
	SSA-F-1.1.PB.1	2CKA006220A0232	1
Wireless	**SSA-F-1.1.PB.1-WL**	2CKA006200A0108	1
	**For dimming 230 V~ loads.** **With integrated universal dimming actuator for controlling different lamps.** **The dimming function is available also without prior programming (pre-configured).** **Only to be used in combination with ABB-free@home® 1/2-Fold sensor cover plate.** 44 mm. × 44 mm. × 45 mm. Outputs: 1× dimming channel. Suitable for: 230 V incandescent lamps and low-voltage halogen lamps with conventional transformers or electronic transformers. Rated power: 10 – 180 W / VA. Suitable for: LEDi and energy-saving bulbs; typical. Rated power: 2 – 80 W / VA. Protection class of device: IP 20. Mounting depth: 32 mm.		
	SDA-F-1.1.PB.1	2CKA006220A0235	1
Wireless	**SDA-F-1.1.PB.1-WL**	2CKA006200A0111	1
	**For controlling blind and awning motors. With integrated blind actuator.** **Blind function is available also without prior programming (pre-configured).** **Only to be used in combination with ABB-free@home® 1/2-Fold sensor cover plate.** 44 mm. × 44 mm. × 45 mm. Outputs: 1× Change-over contacts/ normally open contact, potential bound. Rated power: 920 VA. Rated current: 4 A. Suitable for: Operating mode blind. Protection class of device: IP 20. Mounting depth: 32 mm.		
	SBA-F-1.1.PB.1	2CKA006220A0237	1
Wireless	**SBA-F-1.1.PB.1-WL**	2CKA006200A0113	1

Product	Article-No.	Order-No.	Pack/Qty
	**For sending switching, dimming and blind commands to an ABB-free@home® actuator.** **Only to be used in combination with ABB-free@home® 1/2-Fold sensor cover plate.** 44 mm. × 44 mm. × 45 mm. Control: Push buttons up/down. LEDS: Used as orientation light or as switching status. Protection class of device: IP 20. Mounting depth: 9 mm.		
	SU-F-1.0.PB.1	2CKA006220A0222	1
Wireless	**SU-F-1.0.PB.1-WL**	2CKA006200A0106	1
	**1/2-Fold sensor cover plate** Cover plate ABB-free@home® 1/2-Fold sensor for the SSA-F-1.1.PB.1, SDAF-1.1.PB.1, SBA-F-1.1.PB.1 and SU-F-1.0.PB.1 sensors. Combination with frames AMD5144-XX, AMD5244-XX, AMD5344-XX & AMD5444-XX.		
Anthracite P	**SR-2-AMAN**	2CLA622620N1801	5

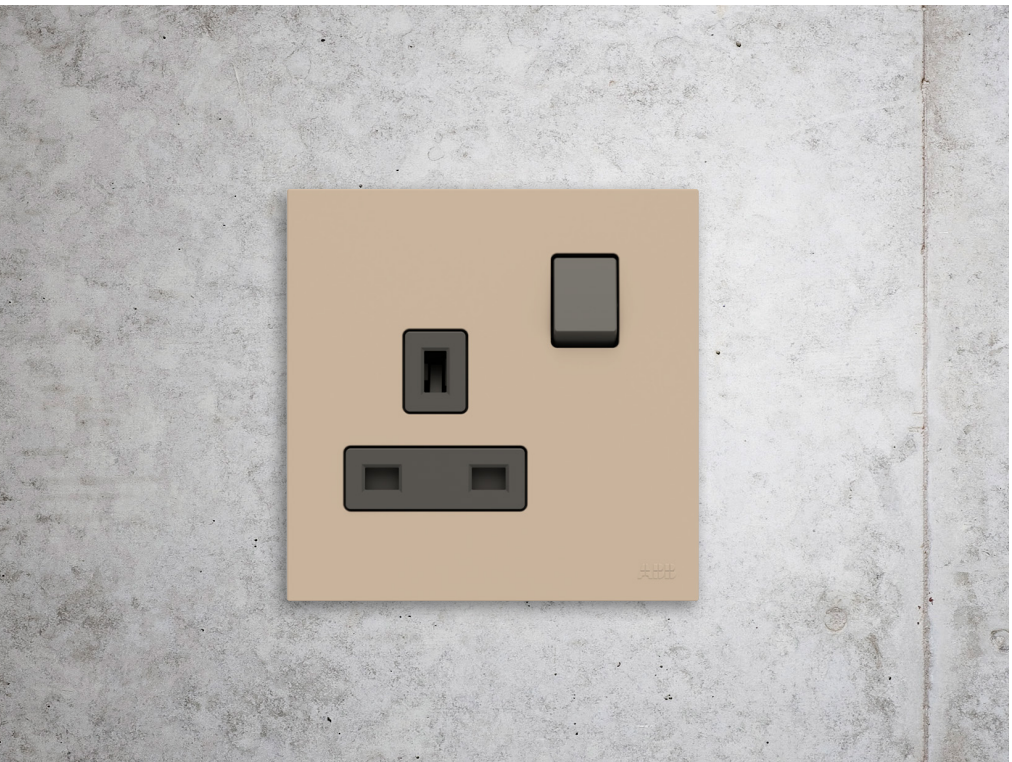
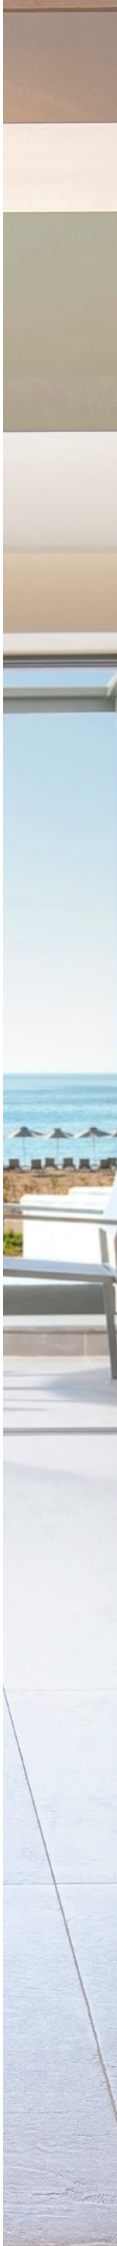
Zenit British Standard
A global solution for the British Standard market

Zenit is the most comprehensive modular range in ABB's wiring accessories portfolio. Renowned for its design and reliability, Zenit has been featured in residential and commercial buildings across the world. ABB has now added key functions to extend the range to the British Standard market.

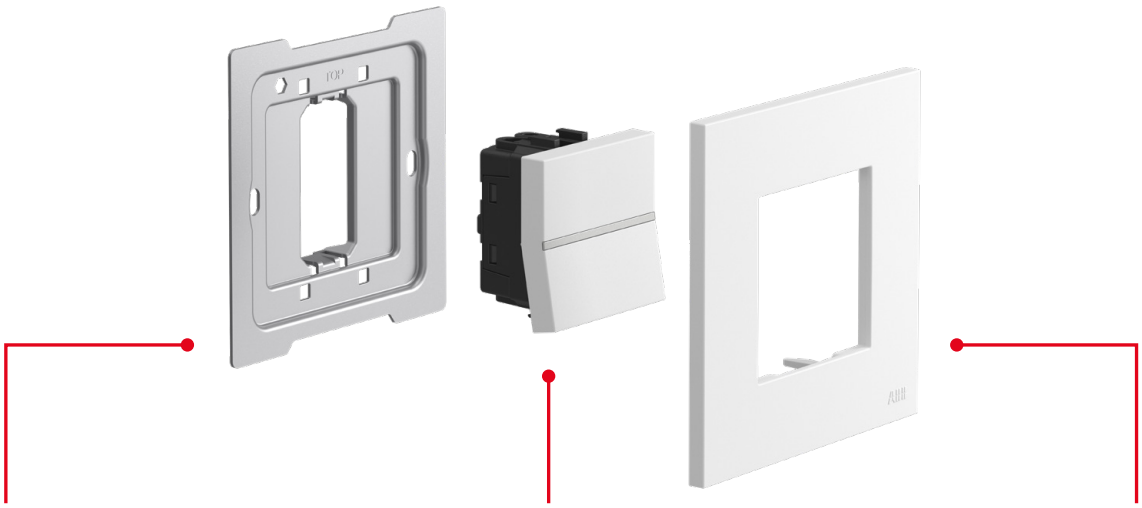
Take advantage of years of development and stay up-to-date with the latest technologies. More than 120 functions are ready to cater to every customer need. All this encompassed in a beautiful design and with the guarantee of a brand renowned for its quality such as ABB.





Uncompromised quality
From material selection to the safety features

ABB stands for quality products. Excellence is a top priority throughout the design and manufacturing process. In Zenit, this translates into specific product features that make this range a reliable and safe product for every application.



Steel support
for robust fixing

20AX light switch options
for heavy duty installations

High durability
polycarbonate material

Robust materials
Metal supports for the switches and socket outlets guarantee a strong bond to the wall.

A blend of certified (1) ABS and polycarbonate materials is used for the inner functional components.

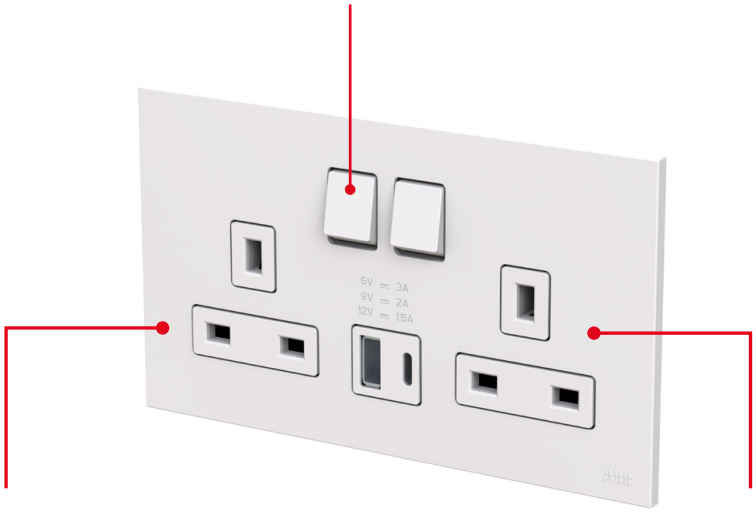
High durability polycarbonate is used for rockers or frames to produce a wear-proof product with outstanding aesthetics.

Safety first

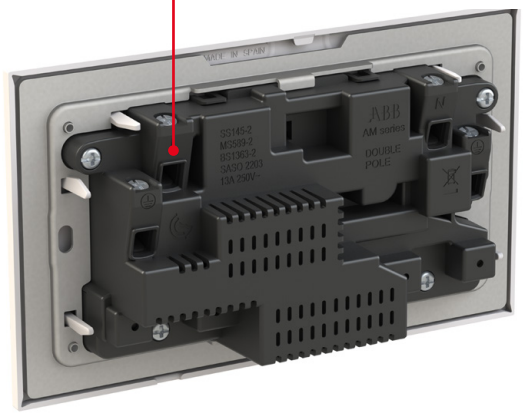
Products are fitted with safety features

- **All our socket outlets include a double-pole switch** to ensure that power is disconnected from L and N terminals.
- **Safety+ automatic shutters** are integrated in all ZENIT socket outlets.
- **Twin earth terminals** guarantee optimal earthing of sockets and switches

Double Pole switched, by default



Double screw-in Earth protections



Safety+ automatic shutters in every socket outlet

Advanced USB charging featuring PD and QC protocols

Compliant with latest safety standards (1)

MADE IN EUROPE

Made in Europe
Zenit is made in the ABB wiring accessories factory in Oiartzun (Spain).

GUARANTEE POLICY 10 YEARS

10-year guarantee
ABB's commitment to the quality of our products allow us to offer a 10-year guarantee policy (2).

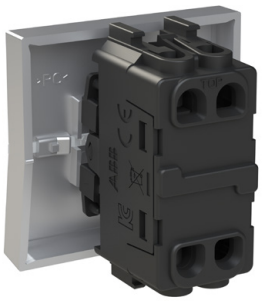
(1) See page 122 for the full list of standards

(2) 10 years for mechanical switches and socket outlets. 2 years for electronic devices. Terms and conditions apply. See full document at **abb.com**

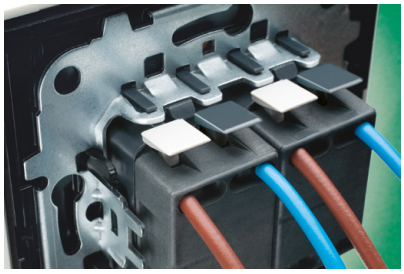
Thought-out design from ordering to installation and usage

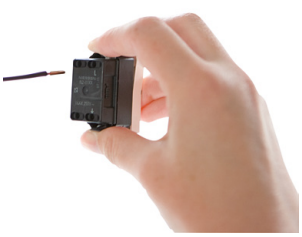
Complete sets vs. Modular system
Zenit functions can be ordered as a **Complete Set** (BL color only) or in a **Modular System** format (all colors). This clever format allows users to combine different functions in a single frame, ordering only what's really required.

Screw connection
The **standard Zenit** switches include steel-made screws. Depending on the rated current, the screws can secure up to 6 mm² cables in the same pit-hole.

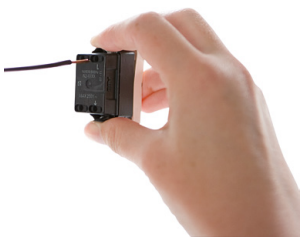


Screw-less connection
The signature **Niessen® Zenit®** light-switches are equipped with state-of-art automatic connections compatible with pairs of 1.5 and 2.5 mm² wires. Installers can **save up to 40% of the installation time** with three simple steps:

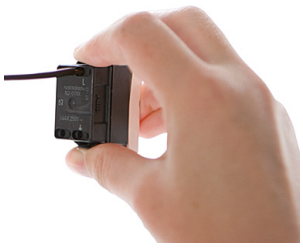




1. Strip the cable about 14 mm and introduce it into the terminal.

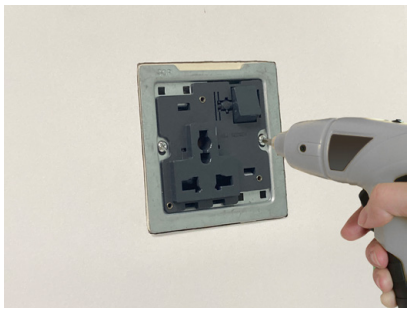


2. Press the push button and insert the cable.

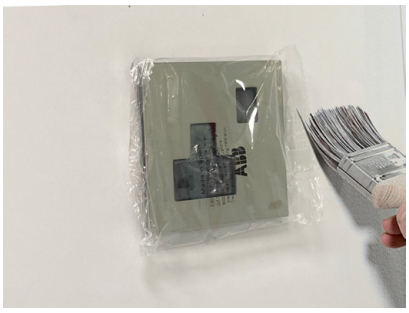


3. Release the push button and check fixation. To disconnect the cord, press the push button on top again.

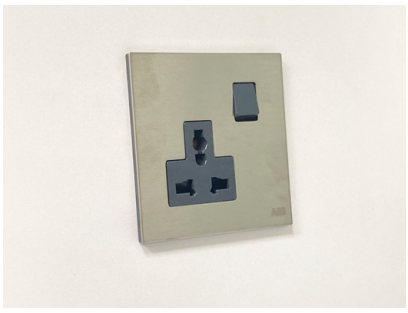
Protective cover
Plastic wrapping of cover plates serve a double purpose. They prevent scratches during transportation, and they protect the functions from dust or paint during the works. No need for extra material. Lower cost, less hassle, less installation time, less waste.



1. Install insert onto the wall.

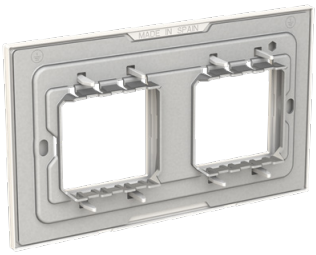


2. Position the cover with the protective bag.



3. After works are completed, remove plastic and adjust cover plate.

Wallpaper compensation
Frames are fitted with progressive bridles designed to compensate 1-3 mm irregularities on the wall (i.e. plaster or wallpaper defects).



Twin-earth terminals
Special frame options are available including two earth terminals in the mounting frame. This is an easy and quick solution for installations where high amperage devices (i.e.32A, 45A DP switches) require more room to connect high-section earth wires.

Upgrade-friendly
The proprietary modular design of Zenit makes the range future-proof. Need the latest USB Quick Charger? Simply remove the frame and replace the old charger with a new one. No unnecessary purchasing of frames, no waste.

1-click data
Need the user manual?
Simply scan the QR code on the product label or search the order code in ABB.com to access all the product details.

Create your own space
A balanced palette of colors

Zenit is available in four colors: White (BL), Silver (PL), Anthracite Grey (AN) and Champagne (CV). Whether it is a warm living space or a productive office area, the palette of colors will fit the needs of any interior design. Furthermore, functions and frames can be combined freely to create your own design.

Zenit British Standard
Modular system

All articles in this chapter need to be combined with others to complete the installation of the function. For instance, switches can be combined with different types of frames (1, 2, 3 or 4 gangs) and different colors. Simply check the function size to match the right frame for the function.

Product ID	Model	Color option	Switches and push buttons	Function size (mm)
2CLA210100B****	AMD21010	BL, PL, AN, CV	Switch 1-gang, 1-way, SP 10AX, small size	22x44

Frame 1-gang –Window 44 x 44 – Twin-Earth Large size

Frame dimensions: 86 x 147 mm
Window size: 44 x 44 mm
Includes metal support with twin-earth terminals and screws.

Colour	Type	Order code	Pack/Qty.
White	**AMD22716 BL**	2CLA227160B1101	10
Silver	**AMD22716 PL**	2CLA227160B1301	10
Anthracite	**AMD22716 AN**	2CLA227160B1801	10
Champagne	**AMD22716 CV**	2CLA227160B1901	10

Pro tip: Twin-earth terminals
Special frames are available including two earth terminals in the mounting frame.This is an easy and quick solution for installations where high amperage devices (32A, 45A) might require more room to connect earth wires.

Electronic Card switch 16AX w/RFID

250 Vac 50-60 HN. / 16A
Rated voltage: 110 ... 230 V AC, ±10 %,
RFID card-only option:Yes
4 programming modes:
ECO, STANDARD, EXTENDED, CUSTOM
Status backlight: Yes
Dim-out deactivation: Yes
Adjustable time-out: 0-240 seg.
Output: 2*NO cotact
Electronic relay: Yes
Load compatibility (min. / max load):
-LEDi: 250 W/VA.
-LV LEDi with transformer type C: 4 / 250 W/VA.
-LV LEDi with transformer type LC: 4 / 60 W/VA.*
-LV halogen with transformer type C: 4 / 250 W/VA.
-LV halogen with transformer type LC: 4 / 250 W/VA.
-Incandescent lamps: 4 / 250 W/VA.
-Halogen lamps: 4 / 250 W / VA.
-Blind control (M-type) max. 2 Aem

Combine with frame window 44 x 44 – Multi.

Notes

Framia

Frameless elegance, harmony in every touch

The pursuit of beauty is a journey without end. The Framia series of frameless switches and sockets is ABB's profound understanding and respect for modern aesthetics. With its elegant design, smooth curves, and slim appearance, it skillfully combines simplicity with elegance and texture with aesthetics, creating a product that is both practical and beautiful. Integrating minimalist aesthetics into your daily life, it becomes an art piece on the wall.

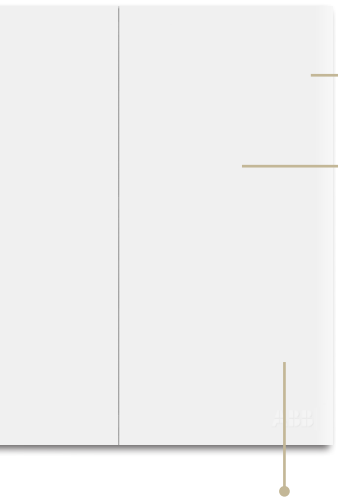
Commercial building

The Framia series not only strives for perfection in design but also in material and craftsmanship. Made with high-quality plastics, copper and silver alloy materials, it ensures the safety and durability of the product perfect for high-traffic commercial spaces. Every touch conveys the delicacy and strength that comes from the material itself.

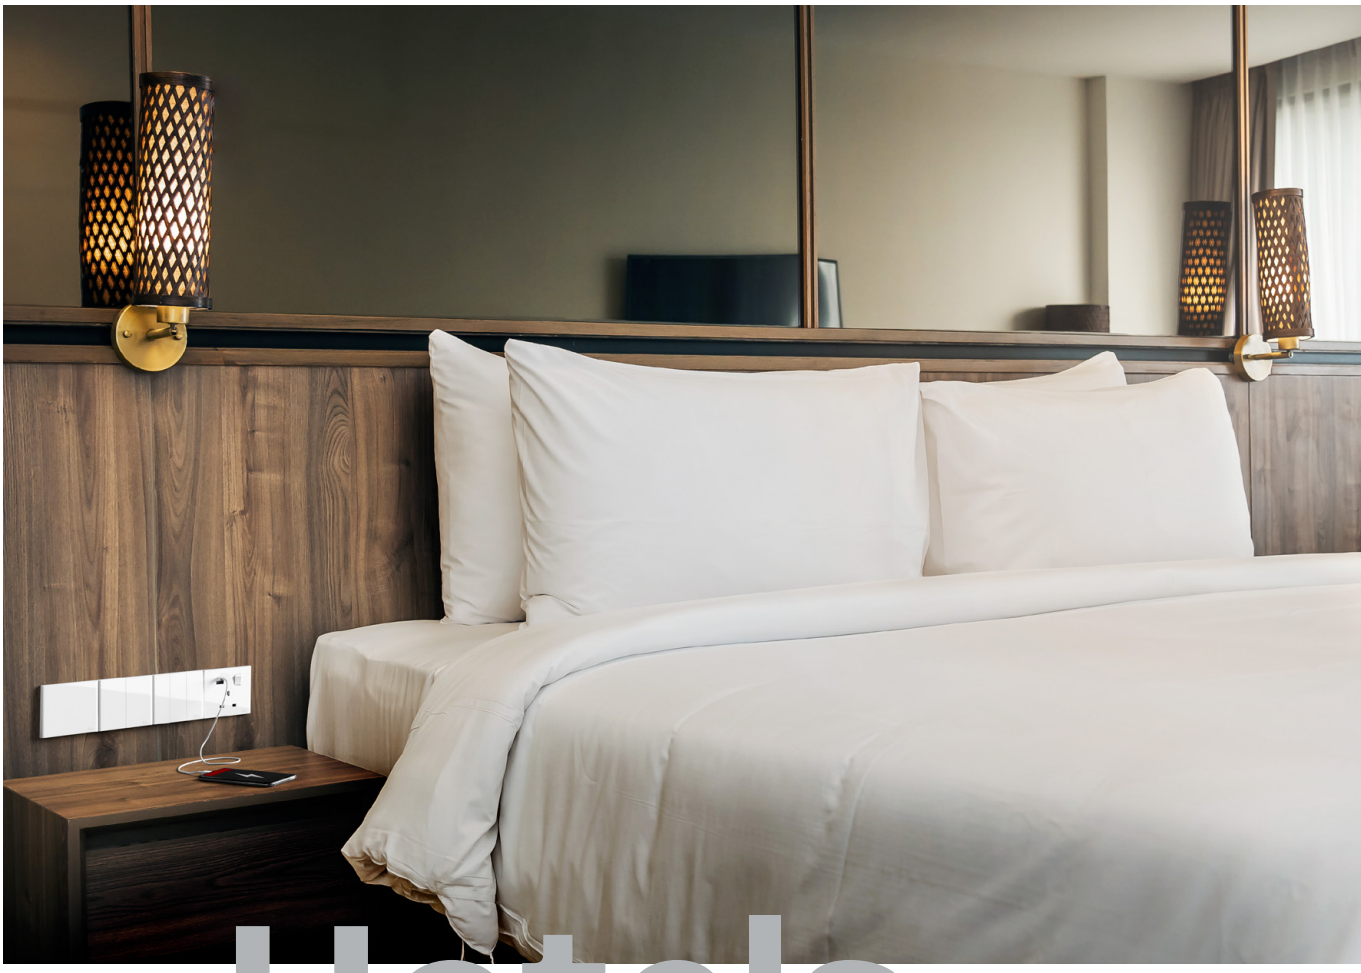
Homes



Framia is not just a light switch or a socket, but also a reflection of an attitude towards life. At ABB, we believe that good design can enhance the quality of life, and the Framia series with five colors is a manifestation of our commitment.

—
Electronic card switch, 16A

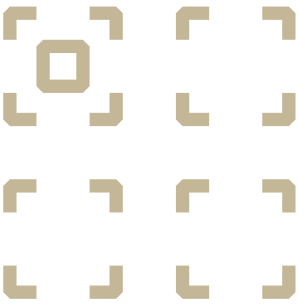
In the world of hospitality, the essence of comfort and convenience lies in the details. Framia is not merely a switch or socket, it is a statement of sophistication and a promise of exceptional guest experience. Framia refined aesthetics and intuitive functionality, is designed to meet the high standards of the hospitality industry. It's more than just a device to control lighting or power; it's an element that contributes to a seamless and luxurious guest environment.



Hotels

Features & benefits

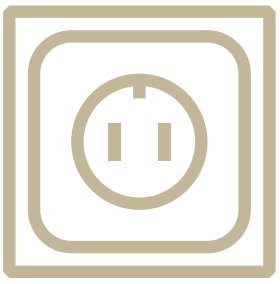
Comprehensive functionality, meeting diverse need



Excellent performance for durability
High quality PC material with improved flame retardents and UV stabilisers used to reduce possibilities of deformation and colour change due to exposure to sunlight.

High quality copper and silver alloy materials for metal parts to optimize life cycle performance.

All LED light indicators combine the attribute of low electricity consumption.



Wide variety of socket outlets
All sockets are equipped with shutters for increased safety. Switched and unswitched versions with and without LED indicator. 13A and 15A British standard, Multi-functional, Schuko and Euro American socket outlets.

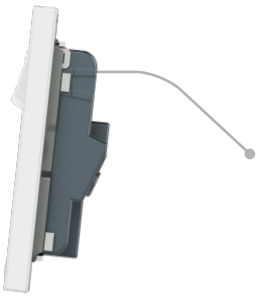
USB Type-A+C integrated into BS and Multi-functional sockets, as well as the individual USB charger max output up to 65W.

Hospitality functions
Offers a wide range of products such as shaver socket outlet, electronic key card switch with time delay, bell switch (both indoor and outdoor) with "Do Not Disturb", "Make Up Room" with and indicators.

Safety first
Protecting every moment

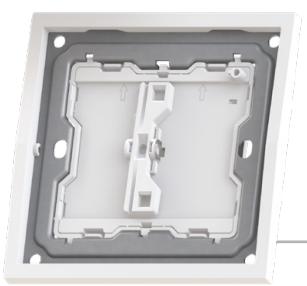
The Framia series is British standard-certified, made with high-quality plastics copper and silver alloy materials, ensuring safety and reliability with every use. The 16 AX switch ratings suitable for LED loads.

Easy installation
Saving time and effort



–
The limited insertion depth of the mounting box saves space and improves installation efficiency.

–
The 1.2 mm resin coated metal mounting plate enhances installation stability.



–
Framia make your installation easier, just remove the front cover with one step.

Notes

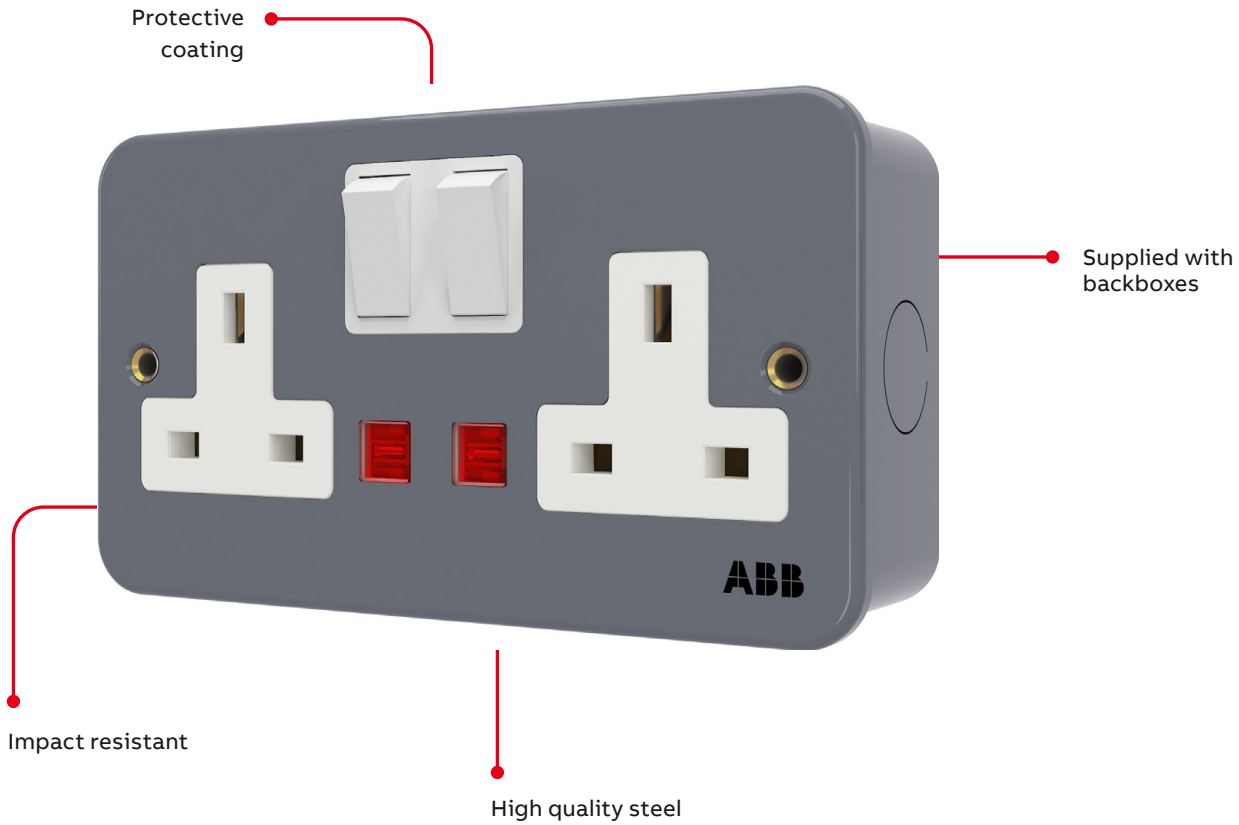
Metal clad
Surface mounted wiring devices

The Metal clad range of surface mounted wiring devices is designed to be robust and resistant thanks to the high-quality coated metal plate. Capable of meeting wiring requirements in all commercial and light industrial applications.
It is ideal for use in service areas, parking areas, workshops, factories, warehouses, laboratories, hospitals, and as well as domestic application in lofts and garages.

Benefits & features

- Manufactured from high quality steel with good aesthetics
- Designed to withstand everyday knocks and scrapes
- The durable and tough finish is further enhanced by a superb protective coating to stand up to arduous duty and environment
- Designed for easy mounting and installations

2 Gang 13A switched
socket DP with Neon



WARRANTY POLICY 10 YEARS

10 years for mechanical switches and socket outlets.

Weatherproof Switches and Socket Outlets

The Weatherproof Switches and Socket outlets could provide all-weather protection,prevent dust and powerful water jets, thanks to the good design and high-quality PC materials with the high temperature insulation,resistance to Ultra Violet (UV) radiation and anti-corrosion, capable of meeting electrical safety requirements in varius applications.

Notes

BS Thermostat
Product overview

The BR series Room Temperature Controller (RTC) family can be connected to fan coil units in residential, hotel and commercial buildings. The RTCs can control 2-pipe installations using ON/OFF valve systems or 0-10Vdc modulating valves.
The device fits in flush-mounted boxes with a 60.3 screw distance (BS 4662).
The BR series thermostats feature a large display with touch control buttons for easy operation. The frameless design, along with its large display ensures easy viewing and adds an elegant touch to complement its surroundings.

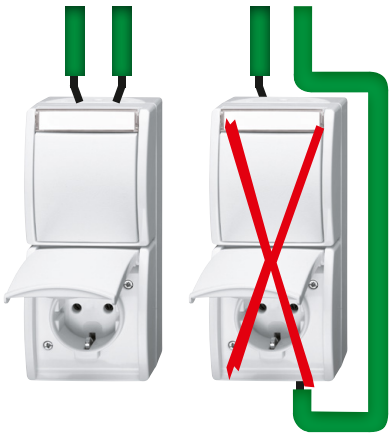
Water protected ranges IP 44.

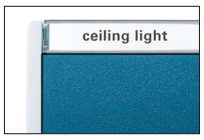
Combination possibility
Using the cable entry, various inserts are freely combinable. In addition to data communication products, other special inserts like key switches, rocker switches, or twilight switches can be fully integrated.

The combination that acts like a single component.
Article-No. 2601/6/20 EW-54
Article-No. 2138 W-54
Article-No. 2661 W-54 with 2863-13-53

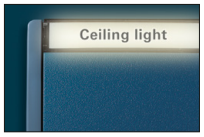
Double cable entry from the top



Due to the large connecting space the power cord for the socket outlet, which is connected to a different electric circuit, can be fed through the shielding up to the socket outlet.

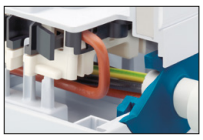


Clear assignment of the consumers
Uniform labelling field for switches and socket outlets (optional).



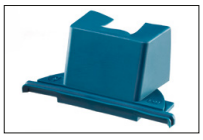
Visible in the dark
Large-area lighting of the labelling field by LED for all switches and push-switches (optional).

Fast mounting using the PoziDriv screw (+/–), PZ 1 (with triple-pitch fast release stainless steel thread). Same mounting dimensions as the WS range.



Easy connection
Large connection area even for 5 x 2.5 mm² conductors. Easy through--connections underneath the base.

Safe feed-through
Feed-through of earth wire via terminal block.



Colour-matching duct entry
Available in both colours for use in cable ducts.

Notes

Movement detector
For the pleasant feeling of safety.

These innovative and high-quality optical detection systems by Busch-Jaeger simply make life more comfortable. They are alert, helpful, efficient. And they automatically manage many tasks in every sector of the building. Inside and outdoors. When it comes to safety, they know precisely when the light is needed. And other functions such as heating, blinds and air-conditioning are precisely, intelligently and reliably controlled.

The Watchdog. For everyone.
Planning

Three axis pivot

Consistently adapted to any installation situation: Featuring three pivots, the Busch-Watchdog PRO can be rotated in any direction for a precisely adjustable detection range. Go with a round or square base to blend in with the architecture, mount it on the wall or ceiling - as you see, it is a truly path-breaking design.

Variable design

Square or round? Surface or corner? The surroundings decide which design will do the best job. The new Busch-Watchdog PRO harmoniously blends into the architecture in any situation, with easy installation and efficient operation.

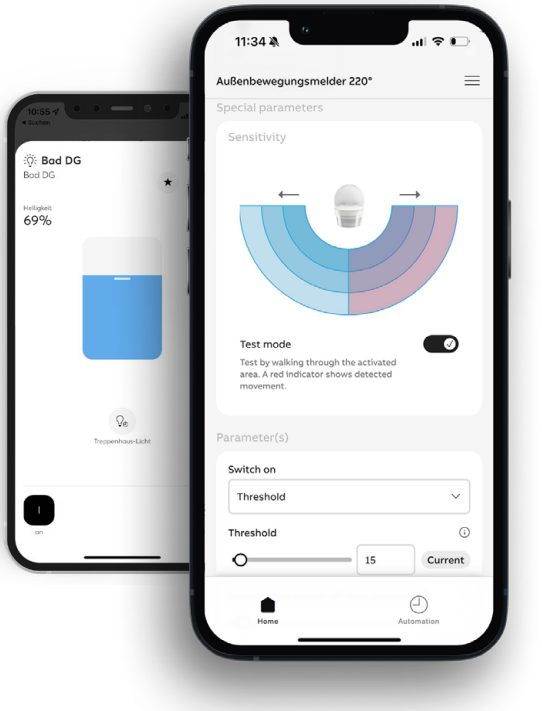
The Watchdog. For everyone.
Factors

Potentiometer setting

Practical potentiometers on the underside of the Busch-Watchdog PRO are ready for making quick settings during standard commissioning.

App configuration

The Busch-Watchdog PRO can be set even more precisely using the app: Test mode, detection field, sensitivity, switch-on threshold and run-on time.



Conventional 90°, 220°, select
The three variants are suited for classic installation. They can also be operated remotely via an app.

Busch-free@home® 280°
Smart integration enables the use of several lighting circuits – providing flexibility for different situations and times of day.

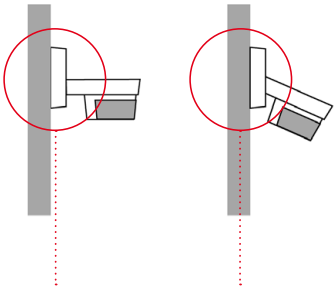
Wireless/Bluetooth 280°
If the Busch-Watchdog is located at a point suitable for detection, e.g. the garage, it can control the lighting in another area, such as the entryway to the house.

KNX 280° **Available in Q1 2025**
In functional buildings and top-quality residential buildings, the Busch-Watchdog can optimize motion detection by precisely setting brightness, temperature and twilight values.

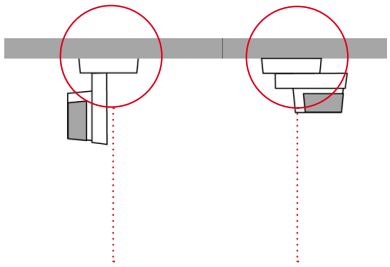
The Watchdog. For everyone.
Perspectives

Three mounting options create maximum freedom for any architecture: Single-point mount, ceiling mount, corner mount. The stable design ensures precisely defined detection ranges and consistently clean switching in the long term.

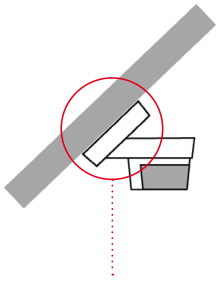
Single-point mounting



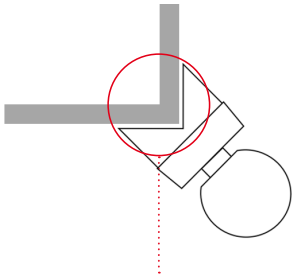
Balanced wall mounting.
If a building is located on a hill or a slope, you can easily optimize the coverage area: The Busch-Watchdog PRO is mounted using a stylish matching bracket which you can precisely adjust to the topography.



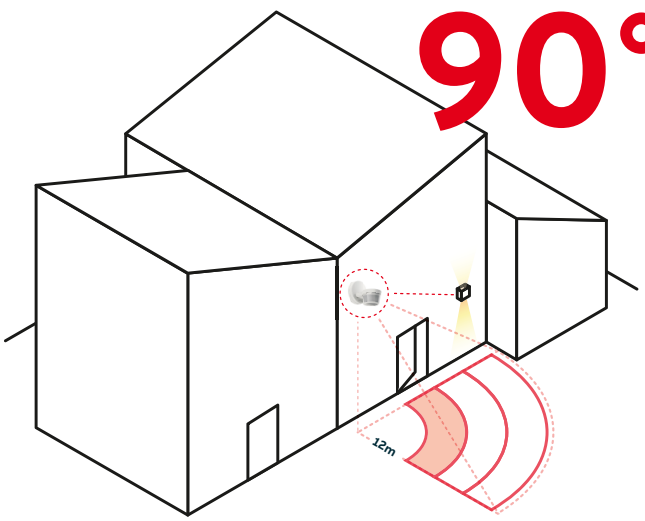
Simplified ceiling installation.
The Busch-Watchdog PRO can be mounted directly on the ceiling without the need for any additional components. The pivot enables precise adjustment to accommodate a wide range of installation options: from the small canopy over a front door to a large warehouse.



Flexible angled mounting.
Certain types of architecture come with special requirements. The Busch-Watchdog can also be mounted on diagonal surfaces and still be precisely aligned: it provides variability for all types of pitched roofs.

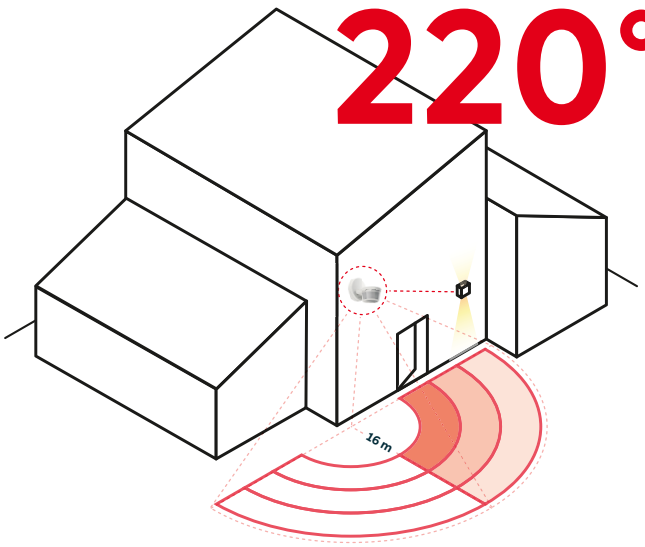


Comprehensive corner mounting.
The Busch-Watchdog PRO 280° detects surfaces in two directions, providing detail for two façade areas and for surrounding areas. The perfectly fitting corner bracket is seamlessly integrated into the design: aesthetically appealing technology for seamless sensitivity.



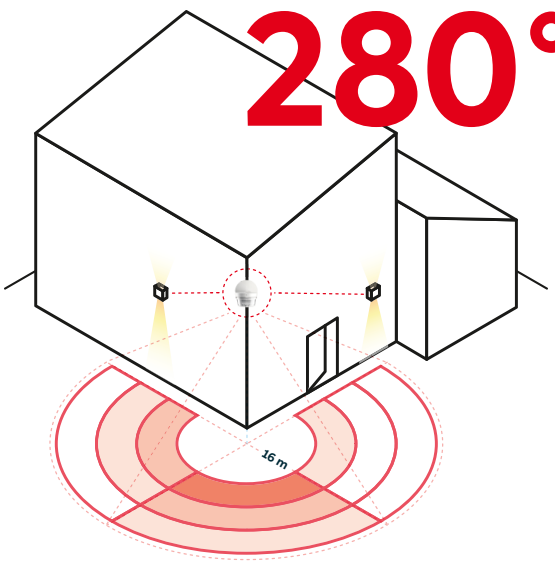
Busch-Watchdog PRO

Precise, definable, appropriate - the perfect solution for townhouses.
Versatile coverage zone:
- ✔ frontal up to 16 m
- ✔ can be reduced horizontally to 8.5m
- ✔ can be reduced by changing the angle or via the app
- ✔ with clear coverage indication
- ✔ with fast switching relay



Busch-Watchdog PRO 220° BT

Far-sighted, precise, responsive - the ideal solution for larger buildings.
Versatile coverage zone:
- ✔ radial up to 16 m
- ✔ horizontal up to 32 m
- ✔ plus sensitive rear field coverage
- ✔ with clear coverage indication
- ✔ with fast switching relay



Busch-Watchdog PRO WI/f@h/KNX

Around corners, wide-ranging, clear-sighted - a first-class solution for angled architecture.
Versatile coverage zone:
- ✔ center up to 16 m
- ✔ in any direction up to 32 m
- ✔ plus sensitive rear field coverage
- ✔ with clear coverage indication
- ✔ with fast switching relay

The Watchdog. For everyone.
Styles

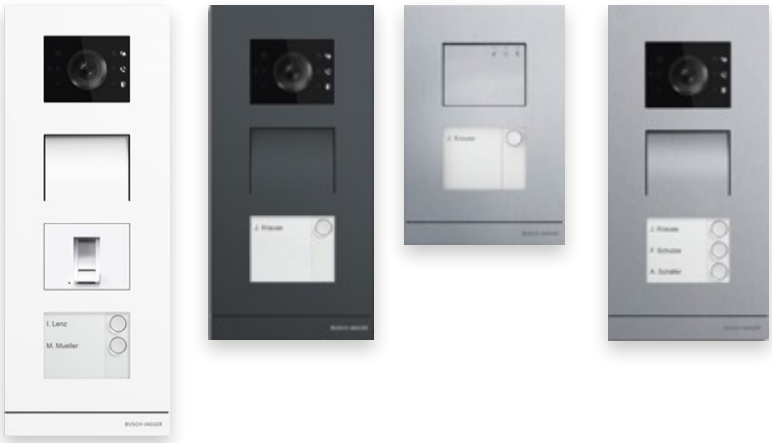
Consistently adapted to any installation situation: Featuring three pivots, the Busch-Watchdog PRO can be rotated in any direction for a precisely adjustable detection range. Go with a round or square base to blend in with the architecture, mount it on the wall or ceiling - as you see, it is a truly path-breaking design.

Up-to-date in line with architectural trends.

The Busch-Watchdog PRO simply suits any style: 19th century architecture, white modernist façades, even the rediscovered brutalism style, light glass architecture as well as solid clinker brick façades or any type of timber construction.

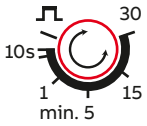
Shaping the style for the future.

A façade has many details, and this includes the Busch-Watchdog PRO. The color tones have been adapted to the Busch-Jaeger product range: The brown tone is now darker to keep with the times, while the silver is lighter. Everything is matched to the door communication system with Busch-Welcome®. Good style is something that especially stands out at the entryway to the house. The Busch-Watchdog PRO is a fitting example.

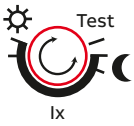


System according to plan
Perfect detection for different applications

The new Busch-Watchdog 180 flex movement detectors combine design, detection quality and flexibility in use.



Setting the switch-off delay pulse operation



Setting the brightness-value threshold/test mode

180-degree lenses
The 180-degree lenses provide perfect detection for different applications. The new Busch-Watchdog sensors are compact and flat. As a result, the movement detectors blend in with the general appearance more discreetly.

Comfort and multi-sensors
The comfort and multi-sensors can also be operated manually above and below the detection lens to switch the light on and off manually if required or to change the intensity of the light in conjunction with a dimmer insert. The operation is familiar and intuitive as with a switch/button operation.

Greater comfort
In addition to an increased selection, the combinable inserts have been technically further developed and offer many new features for reliable and installation-friendly use.

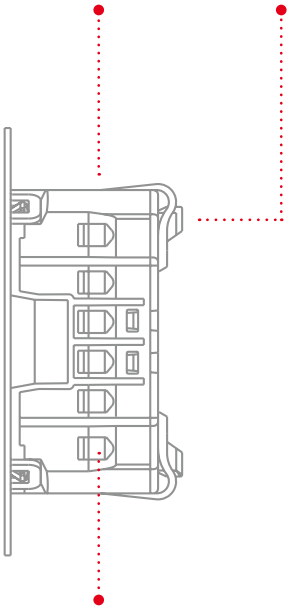
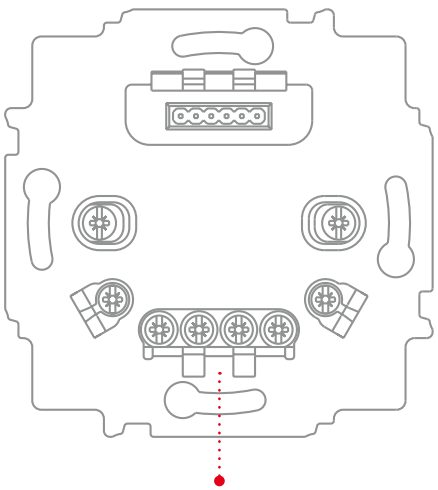
Extension unit insert flex

Flat construction type
25.5 mm

Claw protection
for greater safety



Open clamps also for flexible busbars
for quick mounting



Measuring points accessible from the front
Quick inspection in case of service

Features at a glance

- Fine wire protection: Safe and fast connection of flexible and rigid wires
- Wallpaper compensation: Evens out small unevenness during mounting
- Uniform interface: Many flexible combinations are possible between sensor and actuator
- Extension unit: For operation via conventional push-buttons or connection of the extension unit insert flex

Movement detector

Perfect detection for different applications

Bathroom
Friendly and light in the morning, the atmosphere subdued in the evening and during the night - the demands on the light conditions could barely be more versatile. The Busch-Watchdog 180 flex comfort sensor with the select lense creates an individual light atmosphere with the combination of movement detector and dimmer, and so supports the natural biorhythm.

Stairway
It is the connecting link to our apartments. Although one only spends a brief period of time here, uncomplicated lighting is especially important in the stairway.The hands are full of shopping, in your mind you are aleady on the next floor - but thanks to the Busch-Watchdog 180 flex multi-sensor, there is no irritating switching of the light.

—

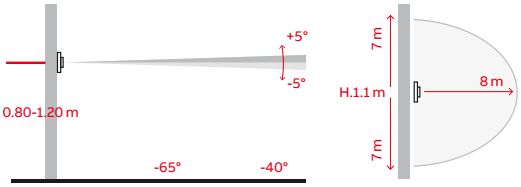
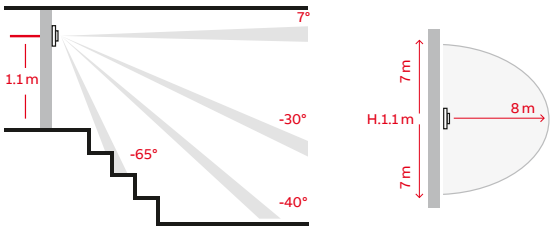
03 Busch-Watchdog 180 flex, standard with select lens

—
01

—
02

- Personalised light settings, adjusted to the time of day and the situation
- Dimming function supports the natural biorhythm and cares for sustainable power consumption
- Two detection lenses respond exclusively to movements that are created by people and not by inquisitive pets.





Detection range of multi-lense

- Individual light settings including dimming function
- Four detection levels cover the entire stairway
- Energy-saving effect due to automatic switch-on and switch-off.

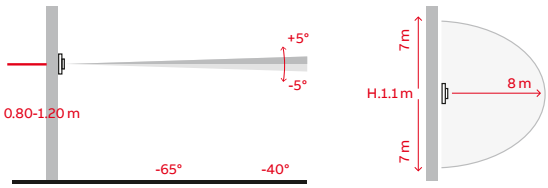
Movement detector

Perfect detection for different applications

Corridor

The first impression counts! That is why it is especially difficult to create a welcoming light atmosphere in a rather small corridor. In addition, the switched-on light can be quickly forgotten and turn into a power guzzler. The Busch-Watchdog 180 flex standard with select lense detects the entire corridor area and reacts with a combination of movement detector and lighting.

—
03



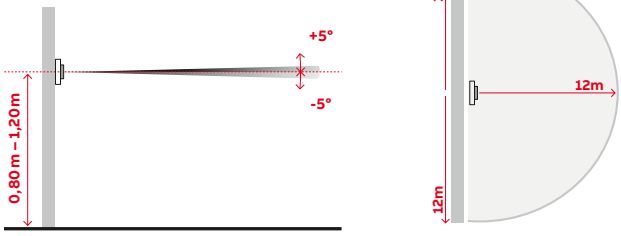
Detection range of select lense

- The horizontal detection level reacts exclusively to persons and not four-footed family members
- Inviting and individual light conditions that can be personalized in the corridor area with dimming function
- Reduction of energy consuption due to automatic switch-on and switch-off

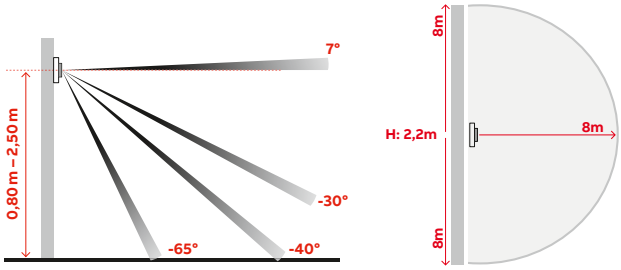
Movement detector

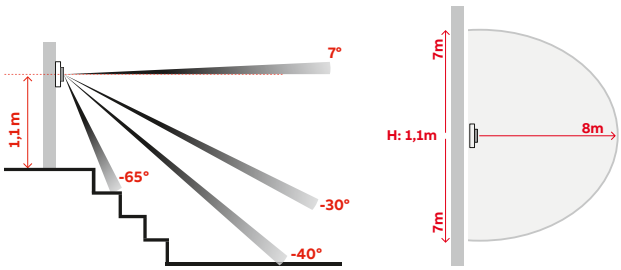
What kinds of detection are available?

The Busch-Watchdog 180 flex is available with two detection lenses. The **select lens** is suitable for corridors or rooms such as tea kitchens where horizontal detection is sufficient or desired, for example, because of pets. It is usually mounted at switch height.



The **multi-lens** offers further areas of application thanks to its four detection levels. For example, this lens can also be used in stairwells. Mounted in the hallway area at 2.2 m, this lens is even better protected from damage and vandalism.





Versatile combination possibilities!

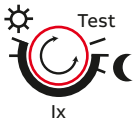
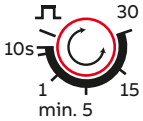
Movement detector

Reliable and uninterrupted surveillance.

Simple and uniform setting of the desired parameters on all Busch-Watchdog lenses on the rear side using two setting potentiometers.

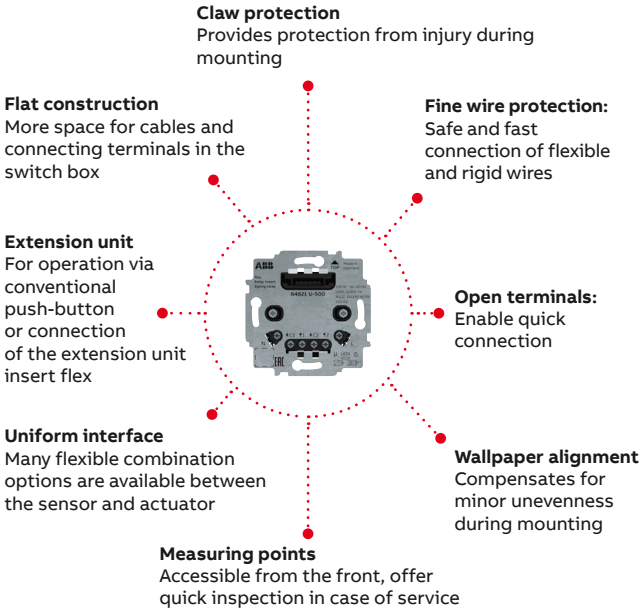


Switching threshold or test mode



Switch-off delay or pulse operation

In addition to the increased selection of combinable inserts, these inserts have been technically further developed and offer many new features for reliable and installation-friendly use.



How flexible should YOUR home be?

The new Busch-Watchdog 180 flex movement detectors combine design, detection quality and flexibility in use. The 180-degree lenses provide perfect detection for different applications. The construction size of the new Busch-Watchdog is compact and flat. As a result, the movement detectors blend in with the general appearance more discreetly.

Busch-Watchdog 180 flex, basic sensor

Busch-Watchdog 180 flex, comfort sensor

Busch-Watchdog 180 flex, multi sensor

The **comfort and multi sensors** can also be operated manually above and below the detection lens to switch the light on and off manually if required or to dim it in conjunction with a dimmer. The operation is familiar and intuitive as with a switch/button operation.

Busch-Watchdog Presence tech BasicLINE [1)]

Electronic movement detector for detecting thermal motion.
With ground surveillance.
Continuously variable detection sensitivity.
Additional possibility for switch-on via normally open push-button switch.
Switch-off delay: 1 to 10 min., adjustable.
With brightness-independent test mode for evaluating the detection zone.
Rated voltage: 230 V~, +10 % / -10 %.
Rated frequency: 50 Hz.
Outputs: 1x Normally open contact, potential-bound.
Suitable for: 230 V- LEDi, typical.
Rated power: 300 W.
Suitable for: 230 V incandescent lamps.
Rated power: 2000 W.
Suitable for: 230 V halogen lamps.
Rated power: 2000 W.
Detection range: frontal: 12 m, lateral: 12 m.
Detection angle: 240°.
Brightness limit value: 10 Lux - 200 Lux, Daytime operation.
Mounting height: 2.5 m
Protection class (Device): IP 55.
Temperature range (Device): -20 °C to 40 °C.
Dimensions: (L x W x D): 95 mm x 76 mm x 118 mm.
LEDi

Movement detector

Presence detector

Busch-Watchdog Presence tech BasicLINE mini [1] [2]

END OF LIFE

For switching lighting systems that depend on brightness and movement.
Detection range (installation height 3m, up to 6m in diameter).
Low mounting height due to separate sensor/actuator concept.
Continuously variable detection sensitivity.
With brightness-independent test mode for evaluating the detection zone.
With detection display in test mode.
Ceiling installation using integrated spring bracket.
Surveillance density: 19 sectors with 76 switching segments.
Switch-off delay: approx. 1 sec - 15 min or short-time pulse adjustable.
Rated voltage: 230 V~, +10 % / -10 %
Rated frequency: 50 Hz
Outputs: 1x Normally open contact, potential-bound
Suitable for: 230 V incandescent lamps
Rated power: 2000 W
Suitable for: Energy-saving bulbs
Rated power: 7 - 400 W
Suitable for: Fluorescent lamps
Rated current: 4 AX, cos ϕ 0.5
Rated power: 1000 W/VA
Detection angle: 360 °
Brightness limit value: 10 Lux - 1000 Lux , Daytime operation
Mounting height: 2 m - 5 m
Protection class (Device): IP 20
Protection class (Sensor): IP 40
Temperature range (Device): 0 °C to 45 °C
Mounting depth: 77 mmIEC 60669-2-1

Colour	Type	Order code	Pack/Qty.
alpine white	**6811 EB-500**	2CKA006800A2517	1

[1] When mounting the actuator through the drilled hole of the sensor an installation depth of ≥ 205 mm is to be taken into account.
[2] In combination with a relay/contactor, an RC suppressor 6899 has to be used.

Busch-Watchdog Presence tech BasicLINE [1] [2]

END OF LIFE

For switching lighting systems that depend on brightness and movement.
Detection range (for installation height of 3 m), circular, up to 8 m in diameter.
For semiautomatic and fully automatic operation.
Additional activation/deactivation possibility through pushbutton input.
Adaptation of the detection range possible using the included masking elements.
With brightness-independent test mode for evaluating the detection zone.
With detection display in test mode.
Mounting possibility in combination with built-in installation boxes and device sockets.
Ceiling installation using integrated spring bracket.
Adjustment elements accessible on the front side.
Low mounting height (31 mm)
Surveillance density: 32 sectors with 128 switching segments.
Switch-off delay: approx. 5 sec - 30 min or short-time pulse adjustable.
Rated voltage: 230 V~, +10 % / -10 %
Rated frequency: 50 Hz - 60 Hz
Outputs: 1x Normally open contact, potential-bound
Suitable for: 230 V incandescent lamps
Rated power: 2000 W
Suitable for: Energy-saving bulbs
Rated power: 7 - 400 W
Suitable for: Fluorescent lamps
Rated current: 4 AX, cos ϕ 0.5
Rated power: 1000 W/VA
Detection angle: 360 °
Brightness limit value: 10 Lux - 2000 Lux
Mounting height: 2 m - 4 m
Protection class (Device): IP 40
Temperature range (Device): 0 °C to 45 °C
Dimensions: (L x W x D): 111 mm x 111 mm x 59 mm
Mounting depth: 41 mm60669-2-1

Colour	Type	Order code	Pack/Qty.
alpine white	**6814 U-500**	2CKA006800A2518	1/24

[1] The detection range with a central approach is reduced.
[2] In combination with a relay/contactor, an RC suppressor 6899 has to be used.

Movement detector

Presence detector

Busch-Watchdog Presence tech BasicLINE Corridor [1] [2] [3]

END OF LIFE

For switching lighting systems that depend on brightness and movement.
Detection range (for installation height of 2.5 m, circular, up to 24 m in diameter).
Additional activation/deactivation possibility through pushbutton input.
Adaptation of the detection range possible using the included masking elements.
With brightness-independent test mode for evaluating the detection zone.
With detection display in test mode.
With automatic motion detection.
With automatic sensitivity adaptation.
Mounting possibility in combination with built-in installation boxes and device sockets.
Ceiling installation using included dust protection socket.
Adjustment elements accessible on the front side.
Surveillance density: 215 sectors with 860 switching segments.
Switch-off delay: approx. 10 sec - 30 min or short-time pulse adjustable.
Remote control possible via IR service remote control 6843.
Use outdoors possible due to combination with surface-mounted housing 6888.
Rated voltage: 230 V~, +10 % / -10 %
Rated frequency: 50 Hz - 60 Hz
Outputs: 1x Normally open contact, potential-bound
Suitable for: 230 V incandescent lamps
Rated power: 2000 W
Suitable for: Energy-saving bulbs
Rated power: 7 - 400 W
Suitable for: Fluorescent lamps
Rated current: 4 AX, cos ϕ 0.5
Rated power: 1000 W/VA
Detection angle: 360 °
Brightness limit value: 10 Lux - 2000 Lux
Mounting height: 2 m - 3 m
Protection class (Device): IP 40
Temperature range (Device): -20 °C to 45 °C
Dimensions: (L x W x D): 110 mm x 110 mm x 70 mm
Mounting depth: 48 mmIEC 60669-2-1

Colour	Type	Order code	Pack/Qty.

IR service remote control [1]

For Busch-Watchdog Presence tech BasicLINE Corridor 6818 U. The following functions/settings can be implemented. Continuous light on/off (8 h).
Setting of the brightness limit value.
Setting of the current ambient light value as the brightness limit value. Setting of switch-off delay or short-time pulse.
Saving and duplication of the saved values.
Activate test mode. Reset to factory default settings.
Activation/deactivation of the button lock.
Power supply: lithium button cell battery Type CR2032.
Range: frontal 3 m. Battery included in delivery.

[1] Battery included in delivery.

Movement detector

Presence detector

Busch-Presence detector Compact, relay [1] [2] [3]
8 metres

END OF LIFE

Master presence detector with mixed light measurement.
For switching lighting systems that depend on brightness and movement.
With power relays for LED operation.
Detection range (for installation height of 3 m): circular
Seated persons: up to Ø 6.5 m, walking persons: up to Ø 8 m.
Extension of the detection range by means of master/slave combination.
Visible height 23 mm.
For semiautomatic and fully automatic operation.
Additional activation/deactivation possibility through pushbutton input.
With continuous light/continuous off function (8 hours), activation via intelligent extension unit input possible.
With brightness-independent test mode for evaluating the detection zone.
With teach-in function of the brightness switching threshold, IR service remote control required.
With detection display in test mode.
Ceiling installation using integrated spring bracket.
Twist protection via additional quick tensioning.
Adjustment elements accessible on the front side.
Surveillance density: 48 sectors with 496 switching segments.
Switch-off delay: approx. 1 min. - 30 min. or short-time pulse adjustable.
Remote control possible via IR service remote control 6843.
Suitable for false ceilings with a board thickness from 9 to 25 mm.
Hole size: Ø 68 mm.
Control element: 2 controllers for setting the brightness switching threshold and switch-off delay.
Display elements: LED detection and status indication.
Rated voltage: 110 - 230 V~, +10 % / -10 %
Rated frequency: 50 Hz - 60 Hz
Outputs: 1x Normally open contact, potential-bound
Suitable for: 230 V incandescent lamps
Rated power: 2300 W
Suitable for: 230 V~ LEDi
Rated power: 200 W/VA
Suitable for: Fluorescent lamps
Rated current: 10 AX, cos ϕ 0.9
Detection angle: 360 °
Brightness limit value: 5 Lux - 2000 Lux
Mounting height: 2 m - 4 m
Protection class (Device): IP 40

[1] The detection range with a central approach is reduced.
[2] Free app for iOS and Android available in the App Store or Play Store.
[3] Recommendation: HaloX-O flush-mounted box from Kaiser (article no. 1290-40) with corresponding cover (1290-47 or 1290-85 for exposed concrete) or IBTronic H120-68 from Spelsberg

Busch-Presence detector Universal BT, e-contact with sealing ring [1] [2] [3] 12 meters

END OF LIFE

Master presence detector with mixed light measurement.
For switching lighting systems that depend on brightness and movement.
With Bluetooth interface for parameterization and operation.
Adjustment of all setting options via smartphone or tablet.
Light control via smartphone or tablet app.
With electronic switch contact for LED operation.
With selectable soft ON/OFF function.
Detection range (for installation height of 3 m): circular
Seated persons: up to Ø 10 m, walking persons: up to Ø 12 m.
Extension of the detection range by means of master/slave combination. Visible height 23 mm.
For semi-automatic, comfort and fully automatic operation. Additional activation/deactivation possibility through pushbutton input. With continuous light/continuous off function (8 hours), activation via intelligent extension unit input possible.
With selectable presence simulation in case of non-presence. With integrated storage of ON period (energy monitor). With brightness-independent test mode for evaluating the detection zone. With detection display in test mode. Ceiling installation using integrated spring bracket. Twist protection via additional quick tensioning. Adjustment elements accessible on the front side. Surveillance density: 72 sectors with 640 switching segments.
Individual deactivation and adjustment of sensitivity of individual sensors possible.
Switch-off delay: approx. 1 min. - 30 min. or short-time pulse adjustable.
With selectable dynamic switch-off delay.
Suitable for false ceilings with a board thickness from 9 to 25 mm.
Hole size: Ø 68 mm.
Control element: 2 controllers for setting the brightness switching threshold and switch-off delay.
Display elements: LED detection and status indication.
Rated voltage: 110 - 230 V~, +10 % / -10 %
Rated frequency: 50 Hz - 60 Hz
Outputs: 1x Normally open contact, potential-bound
Suitable for: 230 V incandescent lamps
Rated power: 3 - 200 W
Suitable for: 230 V~ LEDi
Rated power: 3 - 200 W/VA
Detection angle: 360 °
Brightness limit value: 5 Lux - 2000 Lux
Mounting height: 2 m - 4 m
Protection class (Device): IP 41
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 94 mm x 94 mm x 59 mm
Mounting depth: 36 mm60669-2-1

Movement detector

Presence detector

Busch-Presence detector Corridor BT, relay [1] [2] [3]
30 metres

END OF LIFE

Master presence detector with mixed light measurement. For switching lighting systems that depend on brightness and movement.
With Bluetooth interface for parameterization and operation. Adjustment of all setting options via smartphone or tablet. Light control via smartphone or tablet app. With power relays for LED operation.
Detection range (for installation height of 3 m): rectangular
Walking persons: crosswise to the detector 30 m x 3 m, frontal 20 m x 3 m.
Extension of the detection range by means of master/slave combination.
Mounting height 27 mm.
For semi-automatic, comfort and fully automatic operation.
Additional activation/deactivation possibility through pushbutton input.
With continuous light/continuous off function (8 hours), activation via intelligent extension unit input possible.
With selectable presence simulation in case of non-presence.
With integrated storage of ON period (energy monitor).
With brightness-independent test mode for evaluating the detection zone.
With detection display in test mode.
Ceiling installation using integrated spring bracket.
Twist protection via additional quick tensioning.
Adjustment elements accessible on the front side.
Surveillance density: 92 sectors with 368 switching segments. Individual deactivation and adjustment of sensitivity of individual sensors possible.
Switch-off delay: approx. 1 min. - 30 min. or short-time pulse adjustable.
With selectable dynamic switch-off delay.
Suitable for false ceilings with a board thickness from 9 to 25 mm.
Hole size: Ø 68 mm.
Control element: 2 controllers for setting the brightness switching threshold and switch-off delay.
Display elements: LED detection and status indication.
Rated voltage: 110 - 230 V~, +10 % / -10 %
Rated frequency: 50 Hz - 60 Hz
Outputs: 1x Normally open contact, potential-bound
Suitable for: 230 V incandescent lamps
Rated power: 2300 W
Suitable for: 230 V~ LEDi
Rated power: 200 W/VA
Suitable for: Fluorescent lamps
Rated current: 10 AX, cos ϕ 0.9
Detection angle: 360 °
Brightness limit value: 5 Lux - 2000 Lux
Mounting height: 2 m - 4 m
Protection class (Device): IP 40
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 94 mm x 94 mm x 76 mm
Mounting depth: 49 mm60669-2-1

Busch-Presence detector Universal BT, DALI [1] [2] [3] [4]
12 meters

END OF LIFE

Master presence detector with mixed light measurement.
For regulating and switching of DALI operating devices that depend on brightness and movement.
For DALI broadcast operation (central telegram).
Supplies the required voltage for additional DALI operating units and controllers. Suitable for up to 45 DALI operating devices. For changing the colour temperature of "tunable white" lamps, which meet DALI Standard IEC 62386-209 (Device Type 8).
Colour temperature can then be set between 2,700 K - 6,500 K.
With additional switching output for the activation of heating, air conditioning and ventilation or for switching additional loads (e.g. panel light). Configuration possible up to the complete deactivation of the DALI operating devices. With Bluetooth interface for parameterization and operation. Adjustment of all setting options via smartphone or tablet.
Light control via smartphone or tablet app.
Detection range (for installation height of 3 m): circular
Seated persons: up to Ø 10 m, walking persons: up to Ø 12 m.
Extension of the detection range by means of master/slave combination.
Visible height 23 mm.
For semi-automatic, comfort and fully automatic operation.
Additional activation/deactivation possibility through pushbutton input.
With continuous light/continuous off function (8 hours), activation via intelligent extension unit input possible.
With time-controlled basic illumination function.
With selectable warm-up function for fluorescent lamps.
With 2-step automatic switch-off (according to EnEV / EN 15232).
With time-controlled night anti-glare function.
With selectable presence simulation in case of non-presence.
With integrated storage of ON period (energy monitor).
With brightness-independent test mode for evaluating the detection zone. With teach-in function of the brightness switching threshold, IR service remote control required. With detection display in test mode.
Ceiling installation using integrated spring bracket.
Twist protection via additional quick tensioning.
Adjustment elements accessible on the front side.
Surveillance density: 72 sectors with 640 switching segments.
Individual deactivation and adjustment of sensitivity of individual sensors possible.
Switch-off delay: approx. 1 min. - 30 min. adjustable.
With selectable dynamic switch-off delay.
Suitable for false ceilings with a board thickness from 9 to 25 mm.
Hole size: Ø 68 mm.
Control element: 2 controllers for setting the brightness switching threshold and switch-off delay.
Display elements: LED detection and status indication.
Rated voltage: 110 - 230 V~, +10 % / -10 %
Rated frequency: 50 Hz - 60 Hz
Outputs: 1x Normally open contact, potential-bound
Suitable for: 230 V incandescent lamps
Rated power: 1380 W
Suitable for: 230 V~ LEDi
Rated power: 200 W/VA
Suitable for: Fluorescent lamps
Rated current: 6 AX, cos ϕ 0.9
Control/Signal outputs: 1, DALI channels, independent
Rated current: 100 mA
Output voltage: 16 V-
Detection angle: 360 °
Brightness limit value: 5 Lux - 2000 Lux
Mounting height: 2 m - 4 m
Protection class (Device): IP 40
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 94 mm x 94 mm x 83 mm
Mounting depth: 60 mm60669-2-1

Busch-Presence detector Universal, slave, DALI [1] [2] 12 meters

END OF LIFE

DALI slave presence detector for extension of the detection range of DALI master presence detectors.
For the supply of operating voltage via the DALI master.
Power consumption on the DALI bus: max. 10 mA, corresponds to approx. 5 DALI operating devices.
The communication with the DALI master is carried out via the DALI interface. Detection range (for installation height of 3 m): circular. Seated persons: up to Ø 10 m, walking persons: up to Ø 12 m. Visible height 23 mm.
Ceiling installation using integrated spring bracket. Twist protection via additional quick tensioning. Surveillance density: 72 sectors with 640 switching segments. Suitable for false ceilings with a board thickness from 9 to 25 mm. Hole size: Ø 68 mm.
Rated voltage: 95 - 22.5 V-
Detection angle: 360 °
Mounting height: 2 m - 4 m
Protection class (Device): IP 40
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 94 mm x 94 mm x 72 mm
Mounting depth: 49 mm

Busch extension unit coupling [1]

END OF LIFE

For transmitting different control commands via a single conductor wire.
For devices with intelligent extension input.
For operation via conventional push-buttons 2020 US and 2021/6 U.
For operation via conventional 2gang push-buttons 2020 US-205 and 2021/6/6 U.
For universal attachment or installation.
For installation in (deep) flush-mounted boxes to German Standard DIN 49073.
Including compact connecting terminal for cable connection.
Cable length: approx. 80 mm.
Rated voltage: 110 - 230 V~, +10 % / -10 %
Rated frequency: 50 Hz - 60 Hz
Inputs: 2
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 33 mm x 45 mm x 8.5 mm

	6494-500	2CKA006499A0002	1

[1] To be mounted only in connection with commercially available flush-mounted installation boxes according to DIN 49073 > 40 mm depth gauge or Busch-Jaeger art. no. 3040, 3050 or 3060.

Movement detector

Presence detector

ABB flexTronics, presence detector

ABB flexTronic presence detector, universal Sensor [1] [2] [3] 12 meters

Presence detector sensor with mixed light measurement.
For switching lighting systems that depend on brightness and movement.
Detection range at mounting height of 3 m: circular.
Seated persons up to Ø 10 m, walking persons up to Ø 12 m.
Extension of the detection range by main unit/ extension unit combination.
On wall / on ceiling height: 35 mm.
For semiautomatic and fully automatic operation.
Additional activation/deactivation possibility through pushbutton input.
With continuous light/duration-off function (8 hrs), IR service remote control necessary.
With teach-in function of the brightness switching threshold, IR service remote control required.
With brightness-independent test mode for evaluating the detection zone.
With detection LED at test mode.
Remote control possible via IR service remote control 6843.
Adjustment elements accessible on the front side.
Surveillance density: 72 sectors with 640 switching segments.
Switch-off delay: approx. 1 min. - 30 min. or short-time pulse.
Compatible with all Busch-flexTronics inserts.
For relay insert flex, 1gang, 64811 U-500.
For series relay insert flex, 2gang, 64821 U-500.
For e-contact insert flex, 1gang, 64814 U-500.
For LED touch dimmer insert flex, 1gang, 64851 U-500.
The detection range specifications refer to an ambient temperature of 21°C.

Colour	Type	Order code	Pack/Qty.
studio white matt	**64753-24-500**	2CKA006800A3027	1

[1] The detection range with a central approach is reduced.
[2] The range specifications refer only to an ambient temperature of 21°C.
[3] Please order the respective flush-mounted insert separately.

ABB flexTronic presence detector flex set with universal sensor and relay insert

Modular presence detector with universal lens (set packaging).
Detection range at mounting height of 3 m: circular.
Seated persons up to Ø 10 m, walking persons up to Ø 12 m.
Consisting of ABB presence detector flex universal sensor, 64753-24-500.
Consisting of relay insert flex, 1-way 64811 U-500.

Colour	Type	Order code	Pack/Qty.
	64753 U-24-500	2CKA006800A3038	1

ABB flexTronic presence detector, sky sensor

Presence detector sensor with mixed light measurement.
For switching lighting systems that depend on brightness and movement.
Detection range at mounting height 6 m: circular.
Walking persons Ø: max. 18 m.
Detection range at mounting height 12 m: circular.
Walking persons Ø: max. 24 m.
Extension of the detection range by main unit/ extension unit combination.
On wall / on ceiling height: 35 mm.
For semiautomatic and fully automatic operation.
Additional activation/deactivation possibility through pushbutton input.
With brightness-independent test mode for evaluating the detection zone.
With detection LED at test mode.
Adjustment elements accessible on the front side.
Surveillance density: 72 sectors with 640 switching segments.
Switch-off delay: approx. 1 min. - 30 min. or short-time pulse.
Compatible with all Busch-flexTronics inserts.
For relay insert flex, 1gang, 64811 U-500.
For series relay insert flex, 2gang, 64821 U-500.
For e-contact insert flex, 1gang, 64814 U-500.
For LED touch dimmer insert flex, 1gang, 64851 U-500.
The detection range specifications refer to an ambient temperature of 21°C.

Movement detector

ABB flexTronics, presence detector

ABB flexTronic presence detector, corridor sensor

Presence detector sensor with mixed light measurement.
For switching lighting systems that depend on brightness and movement.
Detection range at mounting height of 3 m: rectangular.
Walking persons: crosswise to the detector 24 m x 3 m, frontal/lengthways to the detector 14 m x 3 m.
Extension of the detection range by main unit/ extension unit combination.
On wall / on ceiling height: 39 mm.
For semiautomatic and fully automatic operation.
Additional activation/deactivation possibility through pushbutton input.
With continuous light/duration-off function (8 hrs), IR service remote control necessary.
With teach-in function of the brightness switching threshold, IR service remote control required.
With brightness-independent test mode for evaluating the detection zone.
With detection LED at test mode.
Remote control possible via IR service remote control 6843.
Adjustment elements accessible on the front side.
Surveillance density: 92 sectors with 368 switching segments.
Switch-off delay: approx. 1 min. - 30 min. or short-time pulse.
Compatible with all Busch-flexTronics inserts.
For relay insert flex, 1gang, 64811 U-500.
For series relay insert flex, 2gang, 64821 U-500.
For e-contact insert flex, 1gang, 64814 U-500.
For LED touch dimmer insert flex, 1gang, 64851 U-500.
The detection range specifications refer to an ambient temperature of 21°C.

ABB flexTronic presence detector flex set with corridor sensor and relay insert

Modular presence detector with corridor lens (set packaging).
Detection range at mounting height of 3 m: rectangular.
walking persons crosswise to the detector up to 24 m x 3 m / frontal/lengthways to the detector up to 14 m x 3 m.
Consisting of ABB presence detector flex corridor sensor, 64755-24-500.
Consisting of relay insert flex, 1-way 64811 U-500.

Colour	Type	Order code	Pack/Qty.
	64755 U-24-500	2CKA006800A3040	1

Busch-Presence detector Universal, decor frame [1])

Paintable decor frame for individual design.
For presence detectors with Compact and Universal lens.
For ABB flexTronic presence detector sensors with universal and sky lens.
For latching onto the presence detector.
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 94 mm x 94 mm x 23 mm

Colour	Type	Order code	Pack/Qty.
studio white matt	**6889/30-24-500**	2CKA006800A2765	10

[1]) The decor frame included in the scope of delivery of the presence detector must be removed before mounting.

Busch movement detector Corridor, decor frame [1])

Paintable decor frame for individual design.
For presence detector with Corridor lens.
For ABB flexTronic presence detector sensor with corridor lens.
For latching onto the presence detector.
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 94 mm x 94 mm x 27 mm

Colour	Type	Order code	Pack/Qty.
studio white matt	**6889/50-24-500**	2CKA006800A2801	10

[1]) The decor frame included in the scope of delivery of the presence detector must be removed before mounting.

Presence detector surface-mounting housing

For installing a ABB flexTronic insert in combination with the ABB flexTronic presence detector sensor.
Compatible with all flexTronic inserts.
For ABB flexTronic presence detector sensors 6853-...-500, 6854-...-500 and 6855-...-500.
For relay insert flex, 1gang, 64811 U.
For series relay insert flex, 2gang, 64821 U.
For e-contact insert flex, 1gang, 64814 U.
For extension insert flex, 64891 U.
For LED touch dimmer insert flex, 1gang, 64851 U.

Colour	Type	Order code	Pack/Qty.
studio white matt	**6883-24-500**	2CKA006899A2369	1
aluminium silver	**6883-183-500**	2CKA006899A2371	1

Movement detector

ABB flexTronics inserts

Relay insert flex, 1gang [1]

3 wire connection (neutral conductor required).
For switching lighting systems.
Operation in 1gang 2way installations via push switch-unit for combination with flush-mounted units.
Operation also possible via conventional push buttons (2020 US, 2021/6 UK). Without control cover.
For control element flex, 1gang, wireless, 62711-WL.
For control element flex, 2gang, wireless, 62721-WL.
For Busch-Comfort switch flex control element 64765-500. For Busch-Watchdog 180 flex sensors 6476x-500.
For Busch-Watchdog 180 flex sensors, wireless, 6276x-...-WL-500. Combinable with extension insert, 64891 U.
Rated voltage: 230 V~
Rated frequency: 50 Hz
Inputs: 1. Outputs: 1x Normally open contact, potential-bound. Suitable for: 230 V- LEDi, typical, rated power: 300 VA.
Suitable for: 230 V incandescent lamps/230 V halogen lamps, rated power: 2300 W.
Suitable for: Low voltage halogen lamps that are operated via transformers,rated power: 2300 VA.
Temperature range (Device): -25 °C to 55 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 30 mm
Mounting depth: 25 mm

Colour	Type	Order code	Pack/Qty.
	64811 U-500	2CKA006800A3042	1/10

[1] Only in conjunction with standard flush-mounting boxes according to DIN 49073, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete)

Relay insert flex, 2gang [1]

3 wire connection (neutral conductor required).
For switching lighting systems.
For switching two independent load circuits.
For controlling light and ventilation systems.
Operation in 1gang 2way installations via push switch-unit for combination with flush-mounted units.
Operation also possible via conventional push buttons (2020 US, 2021/6 UK). Without control cover.
For control element flex, 1gang, wireless, 62711-WL.
For control element flex, 2gang, wireless, 62721-WL.
For Busch-Comfort switch flex control element 64765-... .
For Busch-Watchdog 180 flex sensors 6476x-... .
For Busch-Watchdog 180 flex sensors, wireless, 6276x-...-WL. Combinable with extension insert, 64891 U.
Rated voltage: 230 V~, +10 % / -10 %
Rated frequency: 50 Hz. Inputs: 2
Outputs: 2x Normally open contact, potential-bound
Suitable for: 230 V- LEDi, typical.
Rated power: 300 VA
Suitable for: 230 V incandescent lamps/230 V halogen lamps. Rated power: 1840 W
Suitable for: Low voltage halogen lamps that are operated via transformers. Rated power: 1150 VA
Temperature range (Device): -25 °C to 55 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 30 mm
Mounting depth: 25 mm

Colour	Type	Order code	Pack/Qty.
	64821 U-500	2CKA006800A3045	1

[1] Only in conjunction with standard flush-mounting boxes according to DIN 49073, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete)

Relay insert flex, 1gang [1]

e-contact insert flex, 1gang [1] [2]
2-wire connection (neutral conductor not required) Neutral conductor optionally connectable (recommended for the connection of low loads < 10 W/VA). For switching lighting systems. Operation in 1gang 2way installations via push switch-unit for combination with flush-mounted units.
Operation also possible via conventional push buttons (2020 US, 2021/6 UK). Without control cover.
For control element flex, 1gang, wireless, 62711-WL.
For control element flex, 2gang, wireless, 62721-WL.
For Busch-Watchdog 180 flex sensors 6476x-... .
For Busch-Watchdog 180 flex sensors, wireless, 6276x-...-WL. Combinable with extension insert, 64891 U. Rated voltage: 230 V~, +10 % / -10 %. Rated frequency: 50 Hz
Inputs: 1. Outputs: 1x Normally open contact, potential-bound. Suitable for: 230 V- LEDi, typical.
Rated power: 3 - 240 VA
Suitable for: 230 V incandescent lamps/230 V halogen lamps. Rated power: 10 - 240 W
Suitable for: Low voltage halogen lamps that are operated via transformers.
Rated power: 3 - 240 VA
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 30 mm
Mounting depth: 25 mm

Colour	Type	Order code	Pack/Qty.
	64814 U-500	2CKA006800A3048	1

[1] Use only dimmable high-voltage LEDs.
[2] Only in conjunction with standard flush-mounting boxes according to DIN 49073, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete)

Movement detector

ABB flexTronics inserts

LED dimmer insert flex, 1gang [1] [2] [3] [4] [5] [6]
FM, LED, 3-240 VA

2-wire connection (neutral conductor not required)
Neutral conductor optionally connectable (recommended for the connection of low loads < 10 W/VA).
Touch dimmer for switching lighting systems.
Operation in 1gang 2way installations via push switch-unit for combination with flush-mounted units.
Operation also possible via conventional push buttons (2020 US, 2021/6 UK).
Optimised for dimming of retrofit LED lamps (LEDi).
For dimmable Retrofit-LEDs (LEDi).
For dimmable Retrofit-LEDs (LEDi) with conventional or electronic transformers.
For incandescent lamps, 230 V tungsten halogen lamps, low-voltage halogen lamps with conventional or electronic transformers and dimmable energy-saving halogen lamps.
Mix operaton of LEDi with conventional loads possible.
With manually adjustable operating mode: trailing / leading edge control.
With adjustable minimum brightness.
With light-level memory and minimum brightness memory.
Low-noise level by MOSFET transistors.
With electronic short-circuit protection.
With electronic overload protection.
Without control cover.
For control element flex, 1gang, 64711.
For control element flex, 2gang, 64721.
For control element flex, 1gang, wireless, 62711-WL.
For control element flex, 2gang, wireless, 62721-WL.
For Busch-Watchdog 180 flex sensors, wireless, 6276x-...-WL.
Rated power: 3-240 VA (LEDi)
Rated voltage: 230 V~, +10 % / -10 %
Rated frequency: 50 Hz
Inputs: 1
Outputs: 1x dimming channel
Suitable for: 230 V LEDi, typical (leading edge control)
Rated power: 3 - 100 VA
Suitable for: 230 V LEDi, typical (trailing edge control)
Rated power: 3 - 240 W
Suitable for: 230 V incandescent lamps, 230 V halogen lamps and low-voltage halogen lamps with conventional transformers or Busch Electronic Transformer.
Rated power: 10 - 240 VA
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 30 mm
Mounting depth: 25 mmIEC 60669-2-1, British Standard EN 60669-2-1

Colour	Type	Order code	Pack/Qty.
	64851 U-500	2CKA006500A0013	1

[1] In the case of conventional transformers, take ~20% transformer loss into account.
[2] In case of electronic transformers, 5 % transformer losses.
[3] Only in conjunction with standard flush-mounting boxes according to DIN 49073, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete)
[4] Recommendation: Please use loads and types of one producer.
[5] The dimmer interface is not standardised, it is the responsibility of the lamp manufacturers to list compatible products in their manufacturing information. Different installation situations can lead to different results. To clear up the problem, for example, it is recommended to carry out a local test of the selected lamps and dimmers. Please consult the lamp manufacturer for the LED dimmer recommended.
[6] A liability on the part of Busch-Jaeger for the compatibility of the allocated lamps and dimmers is therefore excluded.

Extension insert flex [1]

3 wire connection (neutral conductor required).
For the extension of the Busch-Comfort switch or presence detector installations.
For group control of flex inserts via extension unit communication.
Operation in 1gang 2way installations via push switch-unit for combination with flush-mounted units.
Without control cover.
For control element flex, 1gang, wireless, 62711-WL.
For control element flex, 2gang, wireless, 62721-WL.
For Busch-Watchdog 180 flex sensors 6476x-... .
For Busch-Watchdog 180 flex sensors, wireless, 6276x-...-WL.
Combinable with all flex inserts.
Rated voltage: 230 V~, +10 % / -10 %
Rated frequency: 50 Hz
Control/Signal outputs: 1, electronic output, potential-bound
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 30 mm
Mounting depth: 25 mm

Colour	Type	Order code	Pack/Qty.
	64891 U-500	2CKA006800A3051	1

[1] Only in conjunction with standard flush-mounting boxes according to DIN 49073, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete)

Movement detector

KNK Presence detector

Busch-Presence detector mini KNX [1]) 8 meters

Detection range (for mounting height 2.5 m, 3 m and 4 m): circular.
Seated persons Ø: max. 5 m, max. 6.5 m and max. 9 m.
Walking persons Ø: max. 6.5 m, max. 8 m and max. 10.5 m.
Visible height 16 mm.
With 2 channels.
Targeted for connection and disconnection of lights bands depending on the room brightness.
Regulation in response to the movement possible.
Using the device as presence and/or movement detectors.
Detectors application with 2 power off stages.
Detectors application with integrated monitoring function.
Constant light switch with up to two independent channels.
Constant light switch with max. 2 outputs for brightness-dependent switching of two light bands in the area.
With integrated KNX bus coupler.
Suitable for false ceilings with a board thickness from 9 to 25 mm.
Hole size: Ø 68 mm.
Suitable for surface mounting installation.
Cannot be installed in British Standard or VDE flushmounted box.
Recommendation: Installation housing from Kaiser HaloX-O (Art.no. 1290-40) with corresponding cover plates (1290-47 or 1290-85 for fair faced concrete) or IBTronic H120-68 from Spelsberg.
Connections:
KNX-line: Bus connection terminal
Brightness limit value: 1 Lux - 1000 Lux
Mounting height: 2 m - 4 m
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 80 mm x 80 mm x 45 mm
Mounting depth: 29 mm

Colour	Type	Order code	Pack/Qty.
aluminium silver	**6131/20-183-500**	2CKA006132A0343	1
studio white matt	**6131/20-24-500**	2CKA006132A0342	1

[1]) For software and description please check the current Online-Catalogue.

Busch-Presence detector mini premium KNX [1]) [2]) 8 meters

Detection range (for mounting height 2.5 m, 3 m and 4 m): circular.
Seated persons Ø: max. 5 m, max. 6.5 m and max. 9 m.
Walking persons Ø: max. 6.5 m, max. 8 m and max. 10.5 m.
Visible height 16 mm.
With 4 channels.
For dimming/brightness of the rules to a defined value in a designated collection area.
HVAC function for controlling heating and/or cooling systems and ventilation systems in the designated collection area.
Detectors application with 2 power off stages.
Detectors application with integrated monitoring function.
Constant light controller with up to two independent channels.
Constant light controller with max. 2 outputs for dimming daylight control/rules of two rooflights in the room.
Integrated object room temperature controller.
10 freely programmable IR channels (blue and/or white)
Incl. 5 logic channels (logic gates, gates, delay and staircase lighting)
Evaluation via internal brightness sensor.
Weighting of up to 2 external brightness values and the internal brightness sensor possible.
The programming button can be activated with the IR transmitter 6010-25 (-500).
With integrated KNX bus coupler.
Suitable for false ceilings with a board thickness from 9 to 25 mm.
Hole size: Ø 68 mm.
Suitable for surface mounting installation.
Cannot be installed in British Standard or VDE flushmounted box.
Recommendation: Installation housing from Kaiser HaloX-O (Art.no. 1290-40) with corresponding cover plates (1290-47 or 1290-85 for fair faced concrete) or IBTronic H120-68 from Spelsberg.
Connections:
KNX-line: Bus connection terminal
Brightness limit value: 1 Lux - 1000 Lux
Mounting height: 2 m - 4 m
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 80 mm x 80 mm x 45 mm

Movement detector

KNK Presence detector

Busch-Presence detector Corridor KNX [1]) 30 meters

Detection range: rectangular.
For mounting height of 3 m: frontal toward the detector at a max. of 20 m x 3 m (at a max. of 10 m x 3 m per side). Crosswise toward the detector at a max. of 30 m x 3 m (max. of 15 m x 3m per side).
With integrated KNX bus coupler.
Mounting height 27 mm.
With 2 channels.
Targeted for connection and disconnection of lights bands depending on the room brightness.
Regulation in response to the movement possible.
Using the device as presence and/or movement detectors.
Detectors application with 2 power off stages.
Detectors application with integrated monitoring function.
Constant light switch with up to two independent channels.
Constant light switch with max. 2 outputs for brightness-dependent switching of two light bands in the area.
Ceiling mounting on suspended ceilings with spring clamps, on solid ceilings in surface-mounting boxes 6131/39-xxx(-500) or on VDE flush-mounted boxes with intermediate ring for VDE flush-mounted boxes 6131/38-xxx(-500).
Suitable for false ceilings with a board thickness from 9 to 25 mm.
Hole size: Ø 68 mm.
Cannot be installed in British Standard or VDE flushmounted box.
Recommendation: Installation housing from Kaiser HaloX-O (Art.no. 1290-40) with corresponding cover plates (1290-47 or 1290-85 for fair faced concrete) or IBTronic H120-68 from Spelsberg.

Suitable for surface mounting installation.
Cannot be installed in British Standard or VDE flushmounted box.
Recommendation: Installation housing from Kaiser HaloX-O (Art.no. 1290-40) with corresponding cover plates (1290-47 or 1290-85 for fair faced concrete) or IBTronic H120-68 from Spelsberg.
Connections:
KNX-line: Bus connection terminal
Brightness limit value: 1 Lux - 1000 Lux
Mounting height: 4 m - 12 m
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 91 mm x 91 mm x 45 mm
Mounting depth: 22 mm

Colour	Type	Order code	Pack/Qty.
studio white matt	**6131/40-24-500**	2CKA006132A0350	1

[1]) For software and description please check the current Online-Catalogue.

Surface-mounting box
For Busch-Presence detector mini KNX

END OF LIFE

For installing a Busch-Presence detector mini KNX 6131/20-xxx(-500) or a Busch-Presence detector mini premium KNX 6131/21-xxx(-500).
Protection class (Device): IP 20
Dimensions: (L x W x D): 80 mm x 80 mm x 35 mm

Colour	Type	Order code	Pack/Qty.
aluminium silver	**6131/29-183-500**	2CKA006132A0352	1
studio white matt	**6131/29-24-500**	2CKA006132A0351	1

Surface-mounting box
For Busch-Presence detector KNX, Busch-Watchdog Sky KNX and Busch-Presence detector Corridor KNX

For mounting a Busch-Presence detector KNX 6131/30-xxx(-500), a Busch-Presence detector Premium KNX 6131/31-xxx(-500), a Busch-Presence detector Corridor KNX 6131/50-xxx(-500), a Busch-Presence detector Corridor premium KNX 6131/51-xxx(-500) or a Busch-Watchdog Sky KNX 6131/40-24(-500).
Protection class (Device): IP 20
Dimensions: (L x W x D): 91 mm x 91 mm x 33 mm

Movement detector

ABB flexTronics, comfort switch

Busch-Comfort switch flex sensor [1) 2)]

Movement detector push-button switch combination.
For switching lighting systems that depend on brightness and movement.
With select lens, prevents detection of smaller animal.
Push switch function possible at all times.
With notice LED when manual operation is necessary.
Extension of the detection range by main unit/ extension unit combination.
Control element: 2 controllers for setting the brightness switching threshold and switch-off delay.
Additional activation/deactivation option via push-button input on the flush-mounted insert.
Adjustable operating mode: automatic mode, automatic (motion-controlled) switch-on and switch-off.
Adjustable operating mode: semiautomatic, manual switch-on, automatic (timer and movement-controlled) switch-off.
Adjustable operating mode: automatic mode, automatic switch-on, manual switch-off.
With continuous light/continuous Off function.
Adjusting elements on rear side. Surveillance density: 9 sectors with 28 switching segments.
Switch off delay: 1 to 10 min., adjustable.
Compatible with all ABB flexTronics inserts.
For relay insert flex, 1gang, 64811 U-500.
For relay insert flex, 2gang, 64821 U-500.
For e-contact insert flex, 1gang, 64814 U-500.
For LED touch dimmer insert flex, 1gang, 64851 U-500.
For extension insert flex, 64891 U-500.
Display elements: LED for status display.
Control element: 2 controllers for setting the brightness switching threshold and switch-off delay.
Brightness limit value: 5 Lux - daytime operation.
Hight above the wall: 21 mm.
The detection range specifications refer to an ambient temperature of 21°C.

Movement detector

ABB flexTronics, motion detector

	Busch-Comfort switch flex [1] [2] Complete set with comfort switch sensor and relay insert		
	Ready-to-install movement detector push-button switch combination (set packaging). Consisting of Busch-Comfort switch flex sensor, 64765-84-500. Consisting of relay insert flex, 1gang, 64811 U-500. Consisting of future® linear cover frames, 1gang 1721-184K-500. Control element: 2 controllers for setting the brightness switching threshold and switch-off delay. Display elements: LED for status display. Rated voltage: 230 V~. Rated frequency: 50 Hz. Power dissipation: 0,3 W. Outputs: 1x normally open contact, potential-bound. Suitable for: 230 V- LEDi, typical, rated power: 300 VA. Suitable for: 230 V incandescent lamps / 230 V halogen lamps, rated power: 2300 W. Suitable for: Low voltage halogen lamps that are operated via transformers, rated power: 2300 VA. Suitable for: Fluorescent lamps, Rated output: 2300 VA. Rated current: 10 AX, cos ϕ0.9. Detection range: frontal: 5 m, lateral: 3 m, at mounting height: 1.1 m. Detection angle: 170°. Brightness limit value: 5 Lux - daytime operation. Operation mounting height: 0.8 m - 1.2 m. Temperature range (Device): -5 °C to 45 °C. Dimensions: (L x W x D): 85 mm x 85 mm x 46 mm. Mounting depth: 25 mm.

Movement detector

ABB flexTronics, motion detector

Busch-Watchdog 180 flex, basic sensor [1] [2]
with select-lens

Movement detector sensor with with measurement of ambient light. For automatic switching of devices dependent on motion and brightness. Compatible with all ABB-flexTronics® inserts.Adjusting elements on rear side. Extension of the detection range by main unit/ extension unit combination. Additional activation/ deactivation option via push-button input on the flush-mounted insert. With detection display in test mode. Surveillance density: 14 sectors with 56 switching segments. Switch-off delay: approx. 10 sec - 30 min or short-time pulse 1 sec adjustable.
For relay insert flex, 1gang, 64811 U-500.
For e-contact insert flex, 1gang, 64814 U-500.
For series relay insert flex, 2gang, 64821 U-500.
For LED touch dimmer insert flex, 1gang, 64851 U-500.
For extension insert flex, 64891 U-500.
Hight above the wall: 22 mm. Control element: 2 controllers for setting the brightness switching threshold and switch-off delay. Detection range at mounting height 1.1 m: frontal: 12 m, lateral: 12 m. Detection angle: 180°. Brightness limit value: 5 Lux - 500 Lux, up to daytime operation. Mounting height: 0.8 m - 1.2 m.
Temperature range (Device): -5 °C to 45 °C.
Dimensions: (L x W x D): 63 mm x 63 mm x 35 mm
The detection range specifications refer to an ambient temperature of 21°C.

Busch-Watchdog 180 flex [1] [2]
Complete set with Basic sensor select-lens and relay insert

Ready-to-install movement detector for flush-mounted installation (set packaged).
Consisting of Busch-Watchdog 180 flex, basic sensor 64761-84-500.
Consisting of relay insert flex, 1gang, 64811 U-500.
Consisting of future® linear cover frames, 1gang 1721-184K-500.
Rated voltage: 230 V~
Rated frequency: 50 Hz. Inputs: 1
Outputs: 1x Normally open contact, potential-bound
Suitable for: 230 V- LEDi, typical., rated power: 300 VA.
Suitable for: 230 V incandescent lamps/230 V halogen lamps, rated power: 2300 W.
Suitable for: Low voltage halogen lamps that are operated via
transformers, rated power: 2300 VA.
Detection range: frontal: 12 m, lateral: 12 m, Mounting height: 1.1 m.
Detection angle: 180°.
Brightness limit value: 5 Lux - 500 Lux Up to daytime operation.
Mounting height: 0.8 m - 1.2 m
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 80 mm x 80 mm x 48 mm
Mounting depth: 25 mm.
The detection range specifications refer to an ambient temperature of 21°C.

Movement detector

ABB flexTronics, motion detector

Busch-Watchdog 180 flex, comfort sensor wireless [1] [2] with select-lens

For automatic switching of devices dependent on motion and brightness.
Push switch function possible at all times.
In combination with dimmer insert flex: dimming function of lighting and selectable light value storage.
With time-controlled basic illumination function.
With time-controlled night anti-glare function.
With enabling of pre-warning of switch-off for stairwell operation.
Compatible with all ABB-flexTronics® inserts.
Works with free@home wireless.
Remote operation via the Bluetooth and smartphone/ tablet app.
Programming via Bluetooth with the ABB-free@home® Next app or via the web interface of the System Access Point.
Extension of the detection range by main unit/ extension unit combination.
Additional activation option via pushbutton input on the flush-mounted insert.
Timer with Astro function.
Automatic switchover from summer time to winter time (switch-off function).
With continuous light/continuous Off function.
With brightness-independent test mode for evaluating the detection zone.
With detection LED at test mode.
Surveillance density: 14 sectors with 56 switching segments.
Switch-off delay: approx. 10 sec - 30 min or short-time pulse 1 sec adjustable.
For relay insert flex, 1gang, 64811 U-500.
For e-contact insert flex, 1gang, 64814 U-500.
For relay insert flex, 2gang, 64821 U-500.
For LED touch dimmer insert flex, 1gang, 64851 U-500.
For extension insert flex, 64891 U-500.
Hight above the wall: 22 mm.
Temperature range (device): -5 °C - 45 °C.
Detection range: frontal at mounting height1.1 m: 12 m, lateral: 12 m.
Brightness limit value: 5 Lux - up to daytime operation.
Detection angle: 180°.
Dimensions: (L x W x D): 55 mm x 55 mm x 35 m.
Mounting height: 0.8 m - 1.2 m.
The detection range specifications refer to an ambient temperature of 21°C.

Busch-Watchdog 180 flex wireless [1] [2] Complete set with Comfort sensor select lens and relay insert

Consisting of Busch-Watchdog 180 flex comfort sensor with select lens, 62762-84-WL-500. Consisting of relay insert flex, 1gang, 64811 U-500. Consisting of future® linear cover frame, 1gang 1721-184K-500. Rated voltage: 230 V~
Rated frequency: 50 Hz. Inputs: 1
Outputs: 1x Normally open contact, potential-bound
Suitable for: 230 V- LEDi, typical., rated power: 300 VA.
Suitable for: 230 V incandescent lamps/230 V halogen lamps, rated power: 2300 W. Suitable for: Low voltage halogen lamps that are operated via transformers, rated power: 2300 VA. Detection range: frontal: 12 m, lateral: 12 m, Mounting height: 1.1 m. Detection angle: 180°.
Brightness limit value: 5 Lux - 500 Lux, up to daytime operation. Mounting height: 0.8 m - 1.2 m
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 80 mm x 80 mm x 48 mm
Mounting depth: 25 mm.

Colour	Type	Order code	Pack/Qty.
studio white	**62762 UJ-84-WL-500**	2CKA006200A0196	1

[1] The range specifications refer only to an ambient temperature of 21°C.
[2] Only in conjunction with standard flush-mounting boxes according to DIN 49073, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete)

Movement detector

ABB flexTronics, motion detector

Busch-Watchdog 180 flex, comfort sensor [1] [2] with multi-lens

Movement detector sensor with measurement of ambient light.
For automatic switching of devices dependent on motion and brightness.
With 4 detection levels.
In combination with dimmer insert flex: dimming function of lighting and selectable light value storage.
Compatible with all ABBflexTronics® inserts.
Adjusting elements on rear side.
Multi-lens: suitable also for mounting heights of 2.20 m.
Extension of the detection range by main unit/extension unit combination.
Additional activation/deactivation option via push-button input on the flush-mounted insert.
With continuous light/continuous Off function.
With detection display in test mode.
Surveillance density: 54 sectors with 224 switching segments. Switch-off delay: approx. 10 sec - 30 min or short-time pulse 1 sec adjustable.
For relay insert flex, 1gang, 64811 U-500.
For e-contact insert flex, 1gang, 64814 U-500.
For series relay insert flex, 2gang, 64821 U-500.
For LED touch dimmer insert flex, 1gang, 64851 U-500.
For extension insert flex, 64891 U-500.
Hight above the wall: 31 mm.
Control element: 2 controllers for setting the brightness switching threshold and switch-off delay.
Detection range at mounting height 1.1 m: frontal: 8 m, lateral: 7 m.
Detection rang at mounting height: 2.2 m: frontal: 8 m, lateral: 8 m.
Detection angle: 180 °.
Brightness limit value: 5 Lux - 500 Lux. up to daytime operation.
Mounting height: 0.8 m - 1.2 m, alternative: 2.2 m.
Temperature range (Device): -5 °C to 45 °C.
Dimensions: (L x W x D): 63 mm x 63 mm x 45 mm.
The detection range specifications refer to an ambient temperature of 21°C.

Busch-Watchdog 180 flex, comfort sensor wireless 1) 2) with multi-lens

For automatic switching of devices dependent on motion and brightness. Push switch function possible at all times. For detection down to the floor. For detection in stairwells. With 4 detection levels. In combination with dimmer insert flex: dimming function of lighting and selectable light value storage. With time-controlled basic illumination function. With time-controlled night antiglare function. With enabling of pre-warning of switch-off for stairwell operation. Compatible with all ABB-flexTronics® inserts. Remote operation via the Bluetooth and smartphone/tablet app. Multi-lens: suitable also for mounting heights of 2.20 m. Extension of the detection range by main unit/extension unit combination. Additional activation option via push-button input on the flush-mounted insert. Timer with Astro function. Automatic switchover from summer time to winter time (switch-off function). With continuous light/continuous Off function. With brightness independent test mode for evaluating the detection zone. With detection LED at test mode. Surveillance density: 54 sectors with 224 switching segments. Switch-off delay: approx. 10 sec - 30 min or short-time pulse 1 sec adjustable. For relay insert flex, 1gang, 64811 U-500. ABB flexTronics inserts

	Relay insert flex, 1gang [1]
	3 wire connection (neutral conductor required). For switching lighting systems. Operation in 1gang 2way installations via push switch unit for combination with flush-mounted units. Operation also possible via conventional push buttons (2020 US, 2021/6 UK). Without control cover. For control element flex, 1gang, wireless, 62711-WL. For control element flex, 2gang, wireless, 62721-WL. For Busch-Comfort switch flex control element 64765-...-500. For Busch-Watchdog 180 flex sensors 6476x-...-500. For Busch-Watchdog 180 flex sensors, wireless, 276x-...-WL-500. Combinable with extension insert, 64891 U. Rated voltage: 230 V~ Rated frequency: 50 Hz Inputs: 1. Outputs: 1x Normally open contact, potential bound. Suitable for: 230 V- LEDi, typical, rated power: 300 VA. Suitable for: 230 V incandescent lamps/230 V halogen lamps, rated power: 2300 W. Suitable for: Low voltage halogen lamps that are operated via transformers,rated power: 2300 VA. Temperature range (Device): -25 °C to 55 °C Dimensions: (L x W x D): 71 mm x 71 mm x 30 mm Mounting depth: 25 mm 
Colour	Type	Order code	Pack/Qty.
	64811 U-500	2CKA006800A3042	1/10

[1] Only in conjunction with standard flush-mounting boxes according to DIN 49073, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete)

Accesories

	RC suppressor
	For protection against the damage or destruction of electronic devices due to overvoltages. For wiring network-interconnected inductivities (e.g.. relay, protection, fluorescent lamps, transformers, etc.). Eliminates functional disturbances on electronic devices, e.g. automatic circuit reclosure (clocking) of a movement detector. Dimensions: diameter 25 mm, length 35 mm, length of the connecting cable approx. 100 mm. Rated voltage: 230 V~, +10 % / -10 % Rated frequency: 50 Hz

Colour	Type	Order code	Pack/Qty.
	6899	2CKA006899A0231	10

Movement detector

ABB flexTronics inserts

Relay insert flex, 2gang [1]

3 wire connection (neutral conductor required).
For switching lighting systems.
For switching two independent load circuits.
For controlling light and ventilation systems.
Operation in 1gang 2way installations via push switch-unit for combination with flush-mounted units.
Operation also possible via conventional push buttons (2020 US, 2021/6 UK).
Without control cover.
For control element flex, 1gang, wireless, 62711-WL.
For control element flex, 2gang, wireless, 62721-WL.
For Busch-Comfort switch flex control element 64765-... .
For Busch-Watchdog 180 flex sensors 6476x-... .
For Busch-Watchdog 180 flex sensors, wireless, 6276x-...-WL.
Combinable with extension insert, 64891 U.
Rated voltage: 230 V~, +10 % / -10 %
Rated frequency: 50 Hz
Inputs: 2
Outputs: 2x Normally open contact, potential-bound
Suitable for: 230 V- LEDi, typical.
Rated power: 300 VA
Suitable for: 230 V incandescent lamps/230 V halogen lamps
Rated power: 1840 W
Suitable for: Low voltage halogen lamps that are operated via transformers.
Rated power: 1150 VA
Temperature range (Device): -25 °C to 55 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 30 mm
Mounting depth: 25 mm

e-contact insert flex, 1gang [1] [2]

2-wire connection (neutral conductor not required)
Neutral conductor optionally connectable (recommended for the connection of low loads < 10 W/VA).
For switching lighting systems.
Operation in 1gang 2way installations via push switch-unit for combination with flush-mounted units.
Operation also possible via conventional push buttons (2020 US, 2021/6 UK).
Without control cover.
For control element flex, 1gang, wireless, 62711-WL.
For control element flex, 2gang, wireless, 62721-WL.
For Busch-Watchdog 180 flex sensors 6476x-... .
For Busch-Watchdog 180 flex sensors, wireless, 6276x-...-WL.
Combinable with extension insert, 64891 U.
Rated voltage: 230 V~, +10 % / -10 %
Rated frequency: 50 Hz
Inputs: 1
Outputs: 1x Normally open contact, potential-bound
Suitable for: 230 V- LEDi, typical.
Rated power: 3 - 240 VA
Suitable for: 230 V incandescent lamps/230 V halogen lamps
Rated power: 10 - 240 W
Suitable for: Low voltage halogen lamps that are operated via transformers.
Rated power: 3 - 240 VA
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 30 mm
Mounting depth: 25 mm

Colour	Type	Order code	Pack/Qty.
	64814 U-500	2CKA006800A3048	1

[1] Use only dimmable high-voltage LEDs.
[2] Only in conjunction with standard flush-mounting boxes according to DIN 49073, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete)

Movement detector

ABB flexTronics inserts

LED dimmer insert flex, 1gang [1] [2] [3] [4] [5] [6]
FM, LED, 3-240 VA

2-wire connection (neutral conductor not required)
Neutral conductor optionally connectable (recommended for the connection of low loads < 10 W/VA).
Touch dimmer for switching lighting systems.
Operation in 1gang 2way installations via push switch-unit for combination with flush-mounted units.
Operation also possible via conventional push buttons (2020 US, 2021/6 UK).
Optimised for dimming of retrofit LED lamps (LEDi).
For dimmable Retrofit-LEDs (LEDi).
For dimmable Retrofit-LEDs (LEDi) with conventional or electronic transformers.
For incandescent lamps, 230 V tungsten halogen lamps, low-voltage halogen lamps with conventional or electronic transformers and dimmable energy-saving halogen lamps.
Mix operaton of LEDi with conventional loads possible.
With manually adjustable operating mode: trailing / leading edge control.
With adjustable minimum brightness.
With light-level memory and minimum brightness memory.
Low-noise level by MOSFET transistors.
With electronic short-circuit protection.
With electronic overload protection.
Without control cover.
For control element flex, 1gang, 64711.
For control element flex, 2gang, 64721.
For control element flex, 1gang, wireless, 62711-WL.
For control element flex, 2gang, wireless, 62721-WL.
For Busch-Watchdog 180 flex sensors, wireless, 6276x-...-WL.
Rated power: 3-240 VA (LEDi)
Rated voltage: 230 V~, +10 % / -10 %
Rated frequency: 50 Hz
Inputs: 1
Outputs: 1x dimming channel
Suitable for: 230 V LEDi, typical (leading edge control)
Rated power: 3 - 100 VA
Suitable for: 230 V LEDi, typical (trailing edge control)
Rated power: 3 - 240 W
Suitable for: 230 V incandescent lamps, 230 V halogen lamps and low-voltage halogen lamps with conventional transformers or Busch Electronic Transformer.
Rated power: 10 - 240 VA
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 30 mm
Mounting depth: 25 mmIEC 60669-2-1, British Standard EN 60669-2-1

Colour	Type	Order code	Pack/Qty.
	64851 U-500	2CKA006500A0013	1

[1] In the case of conventional transformers, take ~20% transformer loss into account.
[2] In case of electronic transformers, 5 % transformer losses.
[3] Only in conjunction with standard flush-mounting boxes according to DIN 49073, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete)
[4] Recommendation: Please use loads and types of one producer.
[5] The dimmer interface is not standardised, it is the responsibility of the lamp manufacturers to list compatible products in their manufacturing information. Different installation situations can lead to different results. To clear up the problem, for example, it is recommended to carry out a local test of the selected lamps and dimmers. Please consult the lamp manufacturer for the LED dimmer recommended.
[6] A liability on the part of Busch-Jaeger for the compatibility of the allocated lamps and dimmers is therefore excluded.

Extension insert flex [1]

3 wire connection (neutral conductor required).
For the extension of the Busch-Comfort switch or presence detector installations.
For group control of flex inserts via extension unit communication.
Operation in 1gang 2way installations via push switch-unit for combination with flush-mounted units.
Without control cover.
For control element flex, 1gang, wireless, 62711-WL.
For control element flex, 2gang, wireless, 62721-WL.
For Busch-Watchdog 180 flex sensors 6476x-... .
For Busch-Watchdog 180 flex sensors, wireless, 6276x-...-WL.
Combinable with all flex inserts.
Rated voltage: 230 V~, +10 % / -10 %
Rated frequency: 50 Hz
Control/Signal outputs: 1, electronic output, potential-bound
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 30 mm
Mounting depth: 25 mm

Colour	Type	Order code	Pack/Qty.
	64891 U-500	2CKA006800A3051	1

[1] Only in conjunction with standard flush-mounting boxes according to DIN 49073, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete)

Movement detector

Proximity switch

Proximity switch

3 wire connection (neutral conductor required).
Relay insert with proximity sensor.
For contactless ON/OFF switching of electric loads, e.g. lights.
For switching incandescent lamps, 230 V tungsten halogen lamps, fluorescent lamps and low-voltage halogen lamps, that are actuated via transformers.
Switches when detecting an approach at < approx. 5 cm.
Operation also possible via conventional push buttons (2020 US, 2021/6 UK).
Rated voltage: 230 V~, +10 % / -10 %
Rated frequency: 50 Hz - 60 Hz
Outputs: 1x Normally open contact, potential-bound
Suitable for: 230 V incandescent lamps, 230 V halogen lamps, fluorescent lamps and low-voltage halogen lamps, that are operated via transformers.
Rated current: 10 AX
Rated power: 2300 W/VA
Temperature range (Device): -25 °C to 55 °CBritish Standard EN 60669-2-1

Installation materials

ABB installation materials are continuously developed in cooperation with installers, paying close attention to easy and quick installation, high quality and reliability. They are designed to be compatible with each other and suitable for different installation situations and building methods.

ABB installation materials are:

- **Future oriented.**
  Offering customized solutions, following trends and future requirements for building constructions like prefabrication and modularity, supported by BIM models.

- **Environmentally friendly.**
  Choosing the materials with minimal environmental impact, minimizing waste and managing product environmental data in a transparent way.

- **Well documented.**
  The right information always easily available for each customer. Products are fully documented including ETIM data supporting digital sales.

Advantages of ABB installation materials:

- **Wide choice** of installation materials, meeting different worldwide requirements and installation habits.
- **Efficient, easy and fast installation.** Products are easy and fast to install and they enable efficient installation of wiring accessories and KNX products. Effective project execution brings overall cost-efficiency.
- **Reliable connections** in hollow, concrete and stone structures. Faulty installations are expensive and difficult to fix. Therefore we put effort in ensuring that the connections are reliable.
- **Quality material with specific properties used.** Material properties are selected to withstand demanding environments like fire, high temperature variations, frost, rain, etc.
- **Environmentally friendly.** Products are halogen free.
- **Safety.** Installation materials are designed to meet the highest requirements in regard to health and safe operation.
- **Special applications available.** Special applications to fire retardant walls and exterior walls (airtight solutions) are available.
- **Innovation based on cooperation with a customers and their needs**

Installation materials
A comprehensive offering

Conduits and accessories

Piping materials and accessories are developed to work as a system with ABB installation boxes and are easy to adapt to different installations. The piping materials ensure a safe and cost-efficient installation. Product range offers great variety of products as conduit extensions and adaptors, conduit bends, conduit end pieces and sleeves and accessories for concrete casting applications. Product colour coding helps customers to choose easier the right accessory size.

Flush mounted boxes

A wide variety of flush mounted junction and installation boxes, accompanied with accessories, helps installers work in an efficient and flexible way. The customer will find a suitable solution for any type of building or wall: brick or solid walls, various hollow or dry walls. Special solutions like for fire retardant walls or air tight and sound proof walls are also available (complying with relevant standards). The products are made of high quality halogen free plastic materials.

ABB Plug & Play

ABB Plug & Play is a concept that conveys convenience, efficiency, speed and time savings. Standard ABB products are re-configured to a customer's specification, ready for installation; Plug & Play.

A smart combination of boxes, wiring accessories and covers with plug & play connectors guarantees efficient, quick and highly reliable installation.

Through all the preparations in the design phase and the assembly of parts by ABB, the installation will be effortless and at lightning speed.

Digital Services

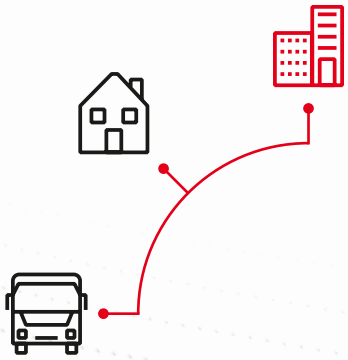
Powerful digital solutions in a single portfolio



Shaping the future of the digital world today requires fully automated solutions that can be networked with all other intelligent devices.

MyBuildings portal powered by ABB Ability™

Controlling and planning smart buildings is now easier than ever: ABB bundles its digital services for Smarter Home and Building in the MyBuildings portal (formerly my.abb-livingspace.com) under the ABB Ability™ umbrella. The online portal gives you access to many of ABB's tools and services that you can use for your individual needs. You have the option to configure KNX systems, fire alarm technology, door entry system or ABB-tacteo KNX as well as to extend system functionality with remote access or Amazon Alexa voice control. You can also connect your smart system to a mobile device.

Digital Services

Remote Access, Home Appliances Integration and Cloud-backup

ABB-free@home
MyBuildings enables you to check on your ABB-free@home system from anywhere in the world. You can check the status, control functions, and you get notifications in case of events that you can define. All you need is a MyBuildings portal Account and a remote access subscription.

ABB-Welcome
You can also open the door from anywhere in the world to let in the maid or the post delivery man. This way you wont miss a package one more time. All you need is the IP Gateway and a MyBuildings portal Account.

Integration of Home Appliances
The MyBuildings portal allows the easy integration of Smart-Home-capable devices from Miele and Home Connect in ABB-free@home easily. All supported devices appear in the free@home app and the ABB-free@home panel and the main functions can be directly controlled via the wall-mounted pushbuttons.

Digital Services

Configuration and Commissioning

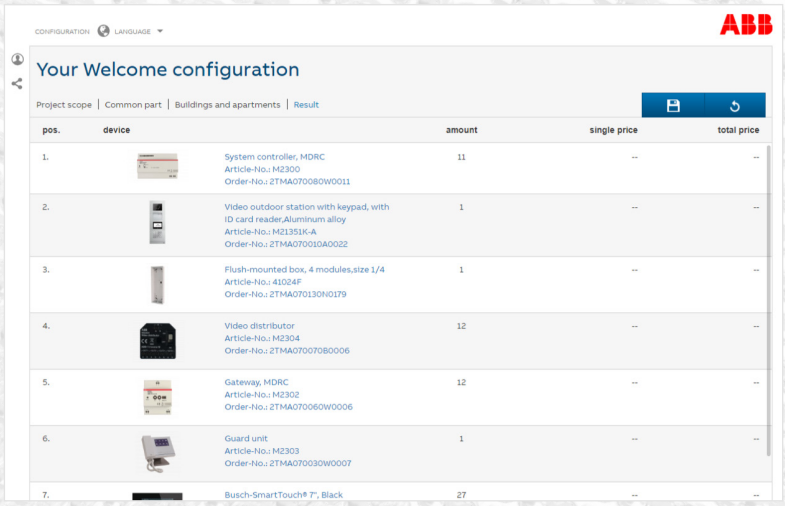

ABB-Welcome Configurator
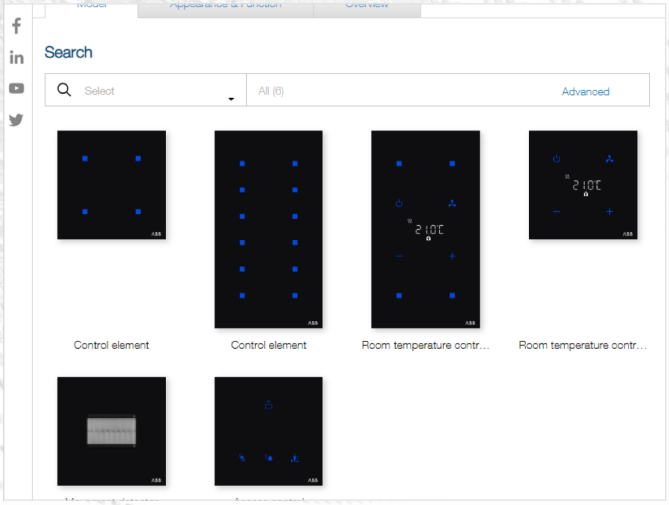
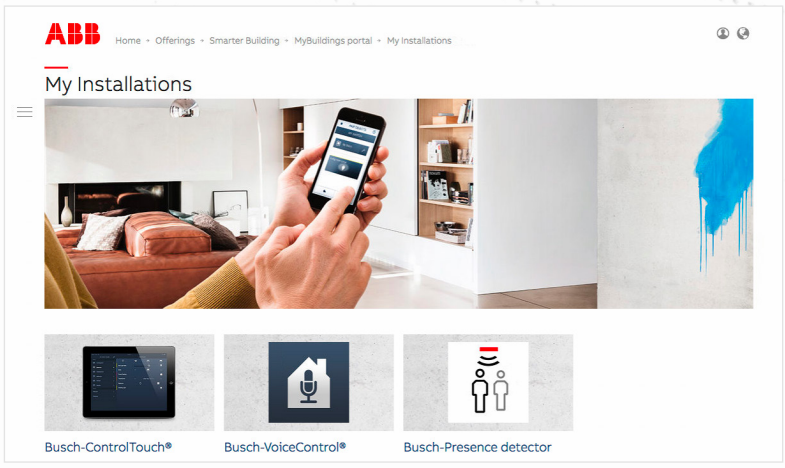
Planning a door entry system for a residential compound with hundreds of apartments does not have to be difficult. The ABB-Welcome Configurator applies all the planning rules for you. You just need to tell him what you want and need.

ABB-tacteo Configurator
You can configure your individual ABB-tacteo KNX Sensor with the ABB-tacteo configurator. The freedom of planning with KNX is now also reflected on your glass touch sensors on your wall – because every function and scene is unique.





Commissioning through the MyBuildings portal
Via MyBuildings portal you can easily and securely set up remote access for instance to your ABB Smart Home System, set up ABB-free@home Alexa voice control or start the Busch-ControlTouch commissioning.

Digital Services
Services

Remote Access and Notification
Sign up to the MyBuildings Portal to get secure Remote Access to your ABB smart home and smart building system. Check the status, control functions and receive notifications in case of events, which you can define. With a connected ABB-Welcome system see live streams from outdoor stations and open the door from anywhere in the world.

Cloud backup
The new presence detectors come with an App for easier commissioning. The MyBuildings portal allows you to save a backup of your settings so can always access certain configurations, even after change of phones or operating systems (e.g. from Android to iOS). MyBuildings portal makes it possible not only the transmission of the device profiles and data of the app to a new smartphone, but also to additional terminal devices.

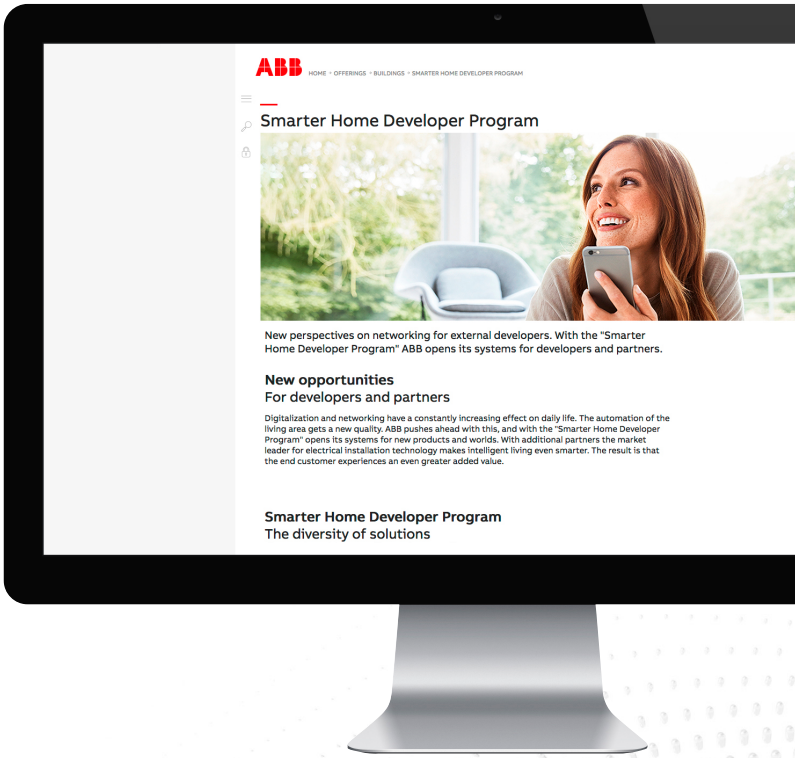
Notes

Digital Services
Smarter Home Developer Program

Living is becoming even smarter

ABB's cooperation with renowned partners offers extensive solutions and great added value.



Smarter Home Developer Program

To enable customers to choose from an even greater variety of products in the future, ABB has created the "Smarter Home Developer Program" for developers. The program combines ABB's core offering with solutions from external partners. This enables planners and electricians to equip smart residential buildings with a diverse range of components from different manufacturers and to operate them centrally using ABB products. As an interface for networking, ABB offers application programming interfaces (API).

- Easy and quick integration of your products and services with the ABB product and service portfolio
- Marketing visibility
- Access to households with integrated smart home solutions
- Opportunities to discuss joint offerings with ABB
- Global reach using the smart home portfolio of the two brands Busch-Jaeger and ABB

—
https://developer.eu.mybuildings.abb.com/

Digital Services

Smarter Home Developer Program

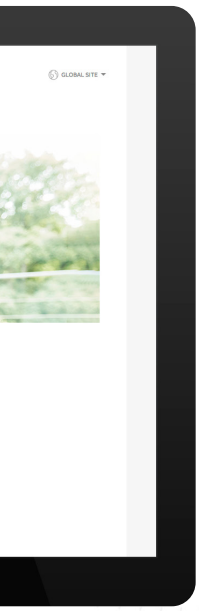


ABB-free@home® API
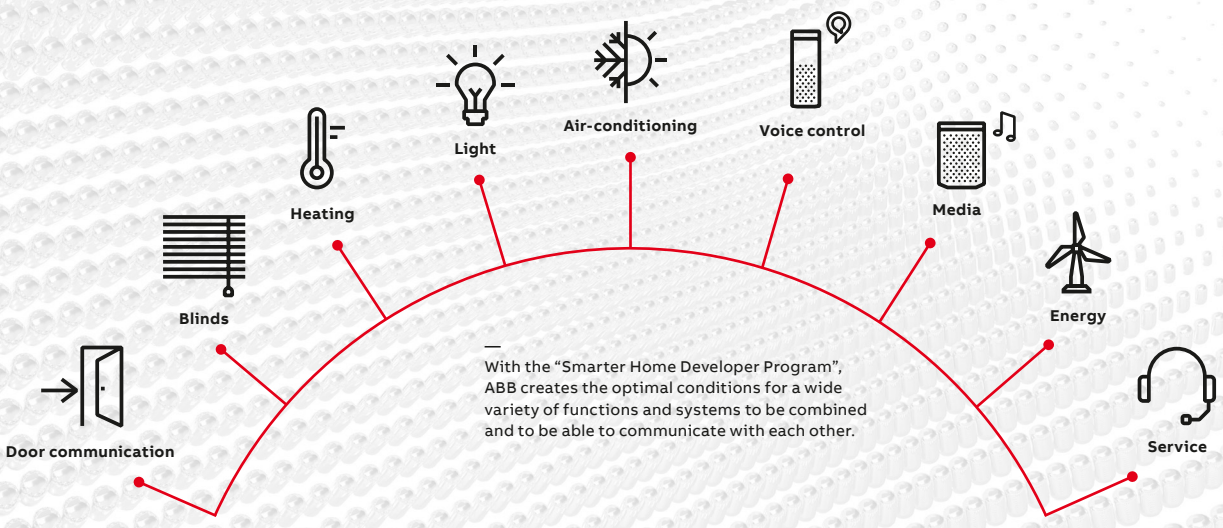
The API for ABB-free@home® allows manufacturers and service providers to integrate data from ABB's Smart Home system into their own program and vice versa.



With the "Smarter Home Developer Program", ABB creates the optimal conditions for a wide variety of functions and systems to be combined and to be able to communicate with each other.

ABB i-bus® KNX – Service & Support Tools

For a fast and intuitive self-support in your daily work

ABB provides a wide range of tools to enable an uncomplicated and time-saving support for many of your concerns. Below you can find some tools which helps you during configuration and commissioning of your i-bus® KNX installation.

ABB Building Planner
The ABB Building Planner is a digital planning tool that supports the planning process of projects with ABB products. It automatically ensures compliance with sustainability regulations and standards. After the completion of the planning phase, a bill of materials (BOM) is delivered, while additional information could be extracted, e.g., the required number of module widths in the distribution board.

Visit our website

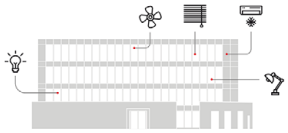

ABB i-bus® Tool
A professional service tool which supports system integrators during commissioning and service of KNX installations. For more information and to download the tool have a look on the linked website.

Visit our website

ABB Update Copy Convert
The ETS app Update Copy Convert provides a series of useful functions for ETS applications and device configuration (parameters and group addresses) in an ETS project.

The functions are:
- Update: Changes the application program to a later or earlier version while retaining current configurations.
- Convert: Transfers/adopts a configuration from an identical or compatible source device.
- Channel Copy: Copies a channel configuration to other channels on a multichannel device.
- Channel Exchange: Exchanges configurations between two channels on a multichannel device.
- Import/Export: Saves and reads device configurations as external files.

Download the app

Firmware Update 2.0
With this ETS app you are able to updating the firmware of your device directly via the KNX bus. The app can be used with the ETS5 or higher.

Download the app

SV/S 30.160.1.1

Power Supply, 160 mA, MDRC

KNX power supplies generate and monitor the KNX system voltage (SELV). The bus line is decoupled from the power supply by an integrated choke.
The voltage output is short-circuit and overload protected.
The two-color LED indicates device output status. With two-coloured status indicator and wide range input from 85...265 V AC, 50/60 Hz.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	4	SV/S 30.160.1.1	2CDG110144R0011		0.30	1

SV/S 30.320.1.1

Power Supply, 320 mA, MDRC

KNX power supplies generate and monitor the KNX system voltage (SELV). The bus line is decoupled from the power supply by an integrated choke.
The voltage output is short-circuit and overload protected.
The two-color LED indicates device output status.
With two-coloured status indicator and wide range input from 85...265 V AC, 50/60 Hz.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	4	SV/S 30.320.1.1	2CDG110166R0011		0.30	1

SV/S 30.640.3.1

Power Supply, 640 mA, MDRC

KNX power supplies generate and monitor the KNX system voltage (SELV). The bus line is decoupled from the power supply by an integrated choke. The voltage output is short-circuit and overload protected.
The two-color LED indicates device output status.
Device type SV/S 30.640.3.1 has an additional 30 V DC short-circuit and overload protected voltage output that can be used to power an additional bus line (in combination with a separate choke).
With two-coloured status indicator and wide range input from 85...265 V AC, 50/60 Hz.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

ABB i-bus® KNX
Power Supply

SV/S 30.320.2.1

Power Supply with Diagnostics, 320 mA, MDRC
Compact Power Supply with integrated choke. Quick diagnostics by LED display and ETS communication objects. Analysis of the operating state and the bus line possible by means of ABB i-bus® Tool.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	4	SV/S 30.320.2.1	2CDG110145R0011		0.26	1

SV/S 30.640.5.1

Power Supply with Diagnostics, 640 mA, MDRC
Compact Power Supply with integrated choke. Quick diagnostics by LED display and ETS communication objects. Analysis of the operating state and the bus line possible by means of ABB i-bus® Tool. Additional voltage output to supply an additional line in conjunction with an additional choke.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	4	SV/S 30.640.5.1	2CDG110146R0011		0.26	1

SU/S 30.640.2

Uninterruptible KNX Power Supply, 640 mA, MDRC
Uninterruptible power supply 640 mA with integrated choke for supplying an ABB i-bus® KNX bus line, short-circuit- and overload-proof. LEDs to indicate the status of the bus current, mains voltage, and battery voltage. Wide range input from 85…265 V AC, 50/60 Hz. The accumulator module AM/S 12.1 or up to 2 rechargeable batteries can be charged in normal operation by the voltage supply. The bus voltage is provided utilising the batteries in the event of a mains failure.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	8	SU/S 30.640.2	2CDG110275R0011		0.40	1

AM/S 12.1

Battery Module, 12 V DC, MDRC
With lead-gel battery for use in uninterruptible power supply SU/S 30.640.2 and for maintaining the bus voltage during a mains failure for 10 minutes (at full load). Connection is made via 4-core standard cable.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	8	AM/S 12.1	GHQ6310062R0111		0.81	1

KS/K 4.1

KS/K 2.1

Cable Sets

For connection of sealed lead gel batteries SAK7, SAK12 and SAK17 to the uninterruptible KNX power supply SU/S 30.640.2 or the uninterruptible power supply NTU/S 12.2000.1.
If only one battery is connected, the basic cable set KS/K 4.1 with integrated temperature sensor is to be used. In case two batteries are connected in parallel, the basic cable set KS/K 4.1 is to be used for the first battery and the extension cable set KS/K 2.1 is to used for the second battery. It is not permitted to connect more than two batteries in parallel.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
Basic	–	KS/K 4.1	GHQ6301910R0001		0.18	1
Extension	–	KS/K 2.1	GHQ6301910R0011		0.12	1

DR/S 4.1

Choke, MDRC

The device can be used together with a SV/S 30.640.5.1 or SV/S 30.640.3.1 to supply a second line. The device has a reset switch for isolating the bus voltage and resetting the bus devices connected to this line. Connection to ABB i-bus® via Bus Connection Terminal.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	2	DR/S 4.1	2CDG110029R0011		0.16	1

NTI/Z 28.30.1

Commissioning Power Supply, 28 V DC, 30 mA

For temporary power supply of KNX devices during commissioning. The Euroconnector and plug-in terminal provide faster connection and supply of devices with manual operation (e.g. FCC/S or SA/S).

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	NTI/Z 28.30.1	2CDG110096R0011		0.14	1

ABB i-bus® KNX
Power Supply

CP-D 24/2.5

Power Supply Units, MDRC

The supply units that can be used universally as auxiliary power supply in KNX installations or other SELV applications. The devices supply a regulated output voltage of 12 V DC or 24 V DC with a maximum output current of 0.42 A up to 4.2 A. The units are protected against overload, the output being able to sustain a continuous short circuit. LED indication of the status of the supply and output voltage. With a width between one to five modules only, the CP-D range power supplies are ideally suited for the installation in distribution panels. Optimised for world-wide applications: The CP-D power supplies can be supplied with a rated voltage of 100 – 240 V AC.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
12 V DC, 0.83 A	1	CP-D 12/0.83	1SVR427041R1000		0.07	1

NTU/S 12.2000.1

Uninterruptible Power Supply, 12 V DC, 2 A, MDRC

Delivers sufficient power for all types of demanding applications with a buffered output voltage of 12 V DC (SELV) and a maximum output current of 2 A. Operating malfunctions of the power supply are signalled via a changeover contact and can be sent for evaluation purposes. Up to two 12 V DC sealed lead-acid batteries (gel cell) can be connected in parallel with the power supply, in conjunction with the KS/K 4.1 and KS/K 2.1 cable sets, or the AM/S 12.1 battery module.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit

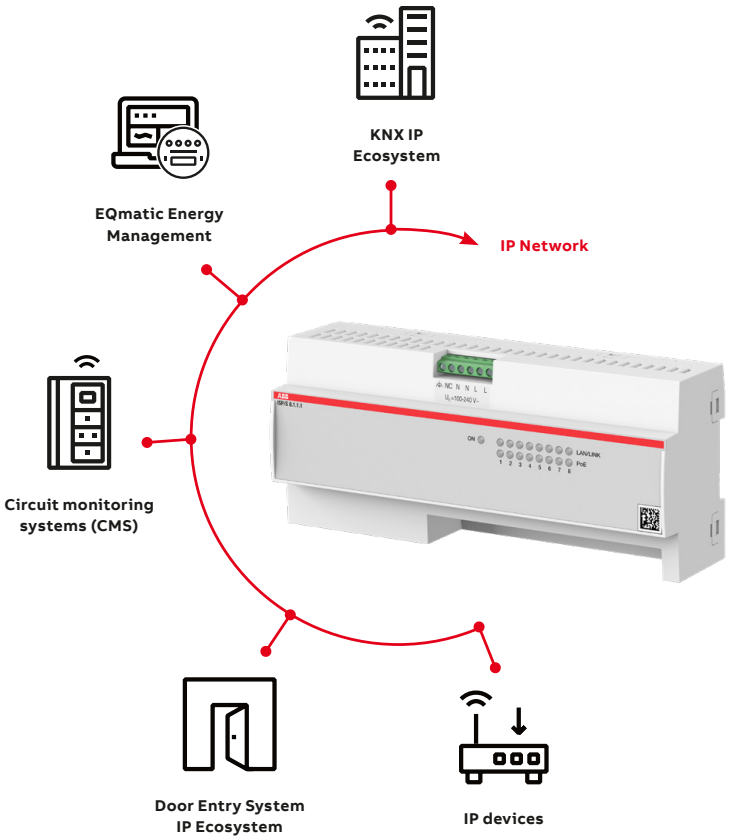
ABB IP switches for DIN-Rail installation
Simplifying IP connectivity inside your cabinet

The IP infrastructure plays an important role for the reliability and availability of all building functions.



The ABB IP switches are two industrial-grade, 8 Ports, Fast Ethernet, unmanaged switches (with and without PoE) designed for installation in electrical distribution boards and easy mounting on DIN-Rails.

The new ABB IP switches are suitable for all applications, segments and markets in which distribution boards with DIN-Rail devices requiring IP connectivity are used.

- **Special Design**
- **Easy Installation**
- **Compact Technology**

LK/S 4.3

Line Coupler Secure, MDRC **NEW**

The line coupler is used in larger installations to connect KNX lines or areas. The lines or areas are galvanically isolated from one another. Telegrams can be filtered to simultaneously reduce the telegram traffic between lines or areas. The device supports long frames (from > ETS5) and KNX Data Secure communication. KNX Data Secure telegrams are processed, filtered, forwarded, or blocked depending on settings. From ETS 6, the device can also be used as segment coupler to connect line segments with each other (incl. filter function). As Secure Proxy it connects KNX standard (not secured) with KNX data secure lines or line segments. Downwards compatible with LK/S 4.2.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	2	LK/S 4.3	2CDG110310R0011		0.1	1

LK/S 4.2

Line Coupler, MDRC **To be discontinued**

The line coupler is used in larger installations to connect KNX lines or areas. The lines or areas are galvanically isolated from one another. Telegrams can be filtered to simultaneously reduce the telegram traffic between lines or areas. With ETS 4 (V4.1.2 and higher) the complete group address range of the main groups 0...31 can be filtered. Within a line, the LK/S 4.2 can also be used as a line amplifier (repeater). The device supports long frames (from > ETS5) and KNX Data Secure communication. KNX Data Secure telegrams are processed, filtered, forwarded, or blocked depending on settings.

IPR/S 3.5.1

IP Router Secure, MDRC

Connects the KNX bus with the Ethernet network and encrypts communication on the IP backbone. The device uses the KNXnet/IP Secure protocol for communication (Routing and Tunneling). It can be used as a fast line and area coupler. The full filter table for main groups 0-31 is supported. KNX devices can be programmed via the LAN using ETS. For this and further clients 5 Secure Tunneling Servers are available. The IP address can be fixed or can be received from a DHCP server. Power supply via 12...30 V DC or PoE (IEEE 802.3af class 1). The KNX Standard Communication (Multicast) can be switched off. In this case, up to 10 IPR/S 3.5.1 can communicate using unicast communication. The device supports long frames (from > ETS5). KNX Data Secure telegrams are processed, filtered, forwarded or blocked depending on settings.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

ABB i-bus® KNX

System Infrastructure and Interfacing

IPR/S 3.1.1

IP Router, MDRC

Connects the KNX bus with the Ethernet network. The device uses the KNXnet/IP protocol for communication (Routing and Tunneling). It can be used as a fast line and area coupler. The full filter table for main groups 0-31 is supported. KNX devices can be programmed via the LAN using ETS. For this and further clients 5 Tunneling Servers are available. The IP address can be fixed or can be received from a DHCP server. Power supply via 12…30 V DC or PoE (IEEE 802.3af class 1). The KNX Standard Communication (Multicast) can be switched off. In this case, up to 10 IPR/S 3.1.1 can communicate using unicast communication.
The device supports Long Frames which allows faster download and download of KNX Secure devices.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	2	IPR/S 3.1.1	2CDG110175R0011		0.11	1

IPS/S 3.5.1

IP Interface Secure, MDRC

Connects the KNX bus with the Ethernet network and encrypts communication. The device uses the KNXnet/IP Secure protocol for communication (Tunneling). KNX devices can be programmed via the LAN using ETS. For this and further clients 5 Secure Tunneling Servers are available. The IP address can be fixed or can be received from a DHCP server. Power supply via 12…30 V DC or PoE (IEEE 802.3af class 1). The device supports long frames (from > ETS5). KNX Data Secure telegrams can be forwarded.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

IS/S 8.1.1

IP Switch, 8 Ports, Fast Ethernet, MDRC

The IP Switch is an industrial-grade, 8 Ports, Fast Ethernet (100 Mbit/s), unmanaged switch with plug-and-play capabilities, designed for installation in electrical distribution boards and small housings for rapid mounting on 35 mm DIN rails (to EN 60715).

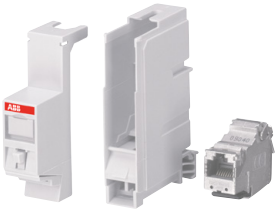
Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	8	IS/S 8.1.1	2CDG120082R0011		0.25	1

ISP/S 8.1.1.1

IP Switch PoE, 8 Ports, Fast Ethernet, 55 W, MDRC

The IP Switch PoE is an industrial-grade, 8 Ports, Fast Ethernet (100 Mbit/s), PoE (55 W), unmanaged switch with plug-and-play capabilities, designed for installation in electrical distribution boards and small housings for rapid mounting on 35 mm DIN rails (to EN 60715).

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	12	ISP/S 8.1.1.1	2CDG120083R0011		0.41	1



IPM/S 1.1

IP Patch Module, MDRC

The IP Patch Module consists of an RJ-45 module and a mounting adapter for rail mounting.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	1	IPM/S 1.1	2CDG120036R0011		0.1	1

USB/S 1.2

USB Interface, MDRC

Connects the KNX installation with PC software clients such as ETS or visualisations (programming, bus monitor, group monitor). The device supports Long Frames which allows faster download and download of KNX Secure devices.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	2	USB/S 1.2	2CDG110243R0011		0.08	1

LL/S 1.1

Optical Fibre Interface, MDRC

The device is used to couple two sections of an bus line using an optical fibre link. Ideal for bridging longer distances or to avoid having to implement lightning and overvoltage protection when laying cables between buildings. Two devices are needed to complete a transmission link.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	4	LL/S 1.1	GHQ6050053R0001		0.28	1

ABB i-bus® KNX

System Infrastructure and Interfacing

MG/S 11.100.1.1

Modbus RTU Client – KNX TP Gateway, 100 Points, MDRC

The Modbus KNX Gateway integrates Modbus RTU server devices with KNX installations at field level. The devices support standard KNX data point types (DPTs) and up to 100 data points. The device is put into operation with the ETS. An optional, free-of-charge ETS app (DCA) is available to facilitate the configuration, allowing to export, and import Modbus-KNX mapping in the form of templates. Modbus component templates are also be available for download from a database. Auxiliary voltage is not required.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	2	MG/S 11.100.1.1	2CDG120089R0011		0.82	1

ABB i-bus® KNX
Connection and Wiring

DSM/S 1.1

Diagnosis and Protection Module, MDRC

Enables quick diagnosis of the bus state and indicates telegram traffic via an LED. A bus fault is indicated by contacts. The DSM also suppresses transient overvoltages and interference voltage spikes on the bus and thus protects the connected devices.

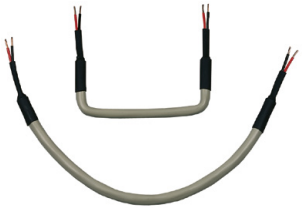
Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	2	DSM/S 1.1	2CDG110060R0011		0.11	1

SPD/S 1.1

Surge Protective Device

KNX surge protective devices are capable of discharging direct and indirect lightning strikes causing induced or conducted overvoltages between lines (differential) and lines to ground (common mode) and are safely kept well below the withstand voltages of the KNX system. They are installed between buildings or KNX zones to provide safe isolation from surges. End of life protection indication is provided from the pushbutton, simply depress the push-button and make sure green indicator illuminates. If no indication then replacement is required.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	2	SPD/S 1.1	7TCA085400R0448		0.1	1



VB/K ...

Wiring Jumpers

For the interconnection of devices with a bus connection terminal. The vertical and horizontal versions are matched to typical wiring applications.

ABB i-bus® KNX

Multifunction Room Automation –
Room Controller

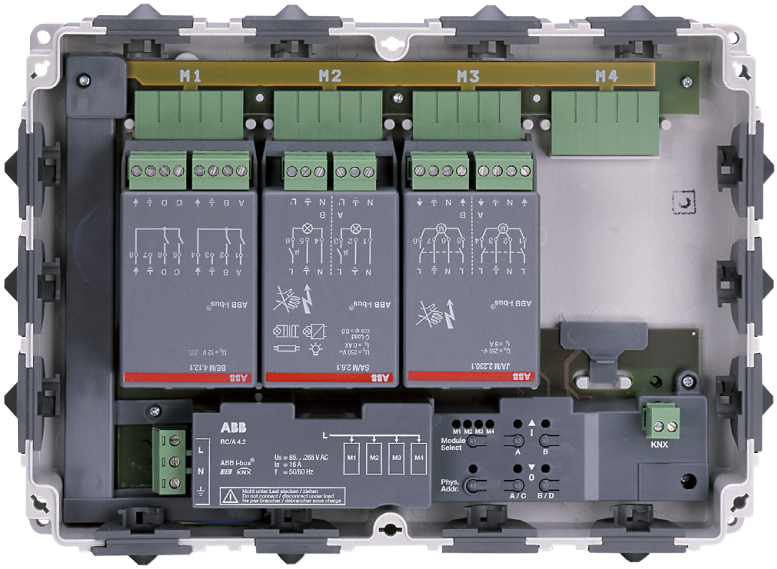

ABB i-bus® KNX

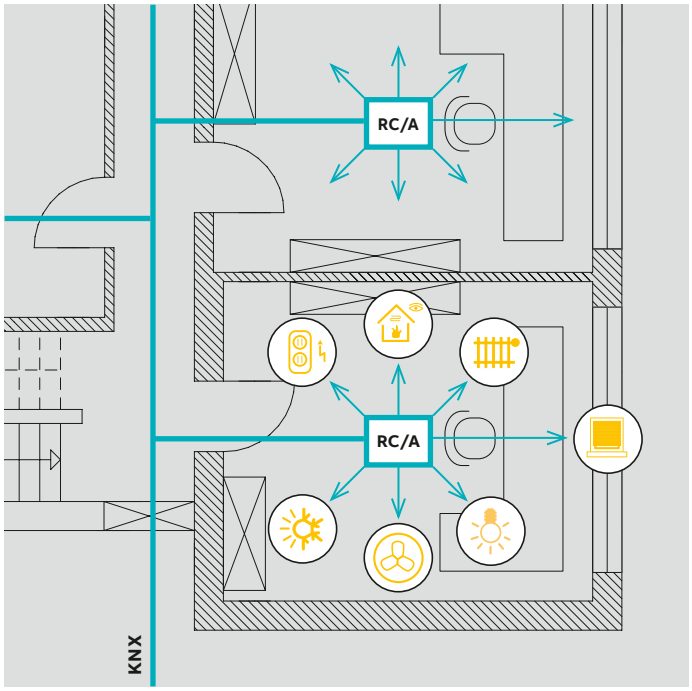
Multifunction Room Automation – Room Controller

The fundamental principle:
One device per room
A single Room Controller controls all the room functions.
This “one device per room” principle economically and flexibly provides KNX functionality: With 4 or 8 modules, which are simply inserted into the basis device, all loads in this room (lights, blinds, heating, etc.) can be controlled.

Economic security from the outset
The installation concept of the Room Controller, particularly the simple plug-in module concept, provides security and reliability.

- **When planning the infrastructure of a building:**
  - It can be undertaken without exact knowledge of the subsequent user demands.
- **During commissioning:**
  - When user demands have been determined, they are implemented by simple insertion of modules.
- **In operation in a building:**
  - Modifications to the room utilisation are easy to implement.
  - The changes to the cable routing are limited to the room concerned.



Improved fire protection included
The significant reduction in the wiring also considerably reduces the fire load and thus improves safety for persons and assets.

Save on energy and not on comfort
Each room is used differently. The different module assignments of the Room Controller can be configured accordingly.
Just three examples of special building functions that can be implemented with the device.

In the lighting sector
Constant lighting control is not the only conceivable solution.
A high level of comfort can be assured by the control of different light scenes.

Blinds and roller shutters
Not only do they provide pleasant shading, they also assist in responsible use of energy. Intelligent facade controls move the blinds to suit the position of the sun.

Heating/Ventilation/Air conditioning
The control of electrothermal valves on radiators is no problem for the “electronic switch actuator” module of the Room Controller. The ventilation can also be integrated into this automatic control.

ABB i-bus® KNX

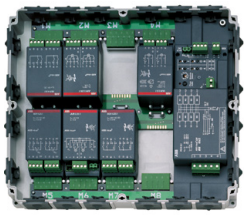
Multifunction Room Automation – Room Controller Basis Devices



Configuration example

Room Controller

The Room Controller controls all the functions in the room as a central device. Due to its modular design, it can be adapted flexibly to the required functionality.
On-site installation enables short assembly and commissioning times. A structured cable entry creates clarity and flexibility for changes in function – both during planning and operation.

Special features

- Height 50 mm: optimised for underfloor installation or suspended ceilings
- Room Controller counts as just one bus device
- Robust housing, IP 54 degree of protection
- Manual operation for immediate testing – even without bus voltage
- Comprehensive software functionality

RC/A 4.2

Room Controller, Basis Device for 4 Modules, SM

It accommodates up to 4 plug-in modules and controls their functions. The RC/A 4.2 communicates as a bus device. Any module type can be plugged into each module slot. A manual control for module function test is integrated.
Dimensions (H x W x D): 200 mm x 275 mm x 50 mm.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	RC/A 4.2	2CDG110104R0011		0.98	1

RC/A 8.2

Room Controller, Basis Device for 8 Modules, SM

It accommodates up to 8 plug-in modules and controls their functions. Any module type can be plugged into each module slot. The inserted module is automatically detected.
The manual operation facility enables an immediate function test even when bus voltage is not applied. Dimensions (H x W x D): 270 mm x 316 mm x 50 mm.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

ABB i-bus® KNX

Multifunction Room Automation – Room Controller Function Modules

BE/M 4.230.1

Binary Input Modules, 4-fold

Each of the modules provides 4 inputs. There are 3 module types available for the connection of 115/230 V, 12/24 V (AC or DC) or floating contacts to cover all demands.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
230 V	–	BE/M 4.230.1	2CDG110005R0011		0.13	1
12/24 V	–	BE/M 4.24.1	2CDG110006R0011		0.13	1
Contact Scanning	–	BE/M 4.12.1	2CDG110007R0011		0.13	1

SA/M 2.6.1

Switch Actuator Module, 2-fold, 6 A

For switching loads up to 16 A at a maximum continuous current of 6 A.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	SA/M 2.6.1	2CDG110002R0011		0.17	1

SA/M 2.16.1

Switch Actuator Module, 2-fold, 16 A

Switches up to 16 A with two floating relay contacts. The feeding voltage is independent from the Room Controller Basis Device. It must thus be applied directly to the module.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	SA/M 2.16.1	2CDG110100R0011		0.16	1

JA/M 2.230.1

Shutter Actuator Modules, 2-fold

For controlling two independent blind or shutter drives. There are two module types available for 115/230 V AC or 24 V DC drives.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
230 V AC	–	JA/M 2.230.1	2CDG110003R0011		0.17	1
24 V DC	–	JA/M 2.24.1	2CDG110004R0011		0.17	1

SD/M 2.6.2

Switch/Dim Actuator Module, 2-fold, 6 AX

It enables the switching and dimming of two groups of luminaries in conjunction with electronic ballasts via a 1...10 V control voltage.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	SD/M 2.6.2	2CDG110107R0011		0.17	1

LR/M 1.6.2

Light Controller Module, 1-fold, 6 AX

Enables the switching and dimming of one group of luminaires via a 1...10 V control voltage. The device can be used for constant lighting control in connection with a Light Sensor LF/U 2.1.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	LR/M 1.6.2	2CDG110108R0011		0.13	1

ES/M 2.230.1

Electronic Switch Actuator Module, 2-fold

With 2 overload-proof outputs for noiseless control of heating systems and chilled ceilings via thermoelectric valve drives. Two module types for voltages from 115/230 V or 24 V (AC or DC) are available.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
115/230 V	–	ES/M 2.230.1	2CDG110013R0011		0.15	1
24 V	–	ES/M 2.24.1	2CDG110014R0011		0.15	1

RM/S 3.1

RM/S 4.1

Room Master

The Room Master is a KNX device with a combination of inputs and outputs. The quantities, technical data and the functions of these inputs and outputs are compiled, so that overall control of all the functions in rooms of a live-in character or apartments, are implemented via a device. Typical areas of application of the Room Master are hotel rooms, hospital rooms as well as apartments in institutions for residential care or in student residential homes. The Room Master with its compact design covers all the basic requirements for Lighting control, Heating/Air conditioning, Shading control (shutters, blinds or curtains – with the RM/S 2.1) and Control of further loads via switched electrical sockets. Function extensions are possible at any time, e.g. devices for dimming via ABB i-bus® KNX.

Overview of the inputs and outputs

	RM/S 1.1	RM/S 2.1	RM/S 3.1	RM/S 4.1	Application possibilities
Binary inputs via contact scanning	8	18	12	8	For connection of switches or push-buttons (light on/off, shutter up/down,etc.) or sensors (window contacts, door contacts, water sensors, condensation water sensors, hotel card readers, etc.)
Outputs 20 A (16 AX)	1	3	4	–	Bathroom fan, switching of electrical sockets
Outputs 16 A (10 AX)	2	1	–	–	Auxiliary electrical heating of fan-coil units (at RM/S 1.1 and 2.1), lighting
Outputs 6 A	3	12	–	8	3-speed fan control (at RM/S 1.1 and 2.1), lighting
Outputs 0.5 A electronic	2	2	–	–	Valve control (heating, cooling) for max. 2 seperate valves
Outputs 6 A changeover contact	–	1	4 (config-urable as switch outputs too)	–	Blind or roller blind control

- RM/S 1.1 and RM/S 2.1 are preprogrammed ex factory
- RM/S 3.1 and RM/S 4.1 are programmable with predefined and tested example projects (ETS 4) for different fields of application (office, schools, hotel rooms, ...)
- Commissioning of the preprogrammed devices on the construction site without notebook and ETS programming. With the electrical connection all room functions are available.
- Optional functional extensions via integration into KNX networks with ETS software.

ABB i-bus® KNX
Inputs

Wide-range inputs and a streamlined range – The ABB i-bus® KNX Binary Inputs.

ABB i-bus® KNX Binary Inputs serve as an interface for operation of KNX systems via conventional push buttons and switches as well as for processing binary signals (signalling contacts).

These Binary Inputs with wide-range inputs are available with 4, 8, 10, 12 and 16 inputs.

In addition to the five devices with wide-range inputs, the ABB i-bus® KNX Binary Input product range is rounded off by three devices with 4, 10 and 16 inputs with scanning voltage.
On these types, a pulsed scanning voltage is provided for connection of floating contacts from the device.

All Binary Inputs feature **a high-quality membrane keypad for comfortable manual operation and display of the device functions.** Input states can be simulated at the device, so that the conventional push buttons, switches or floating contacts do not need to be connected for commissioning purposes. The device functions can be easily tested during commissioning in this way.

The Binary Inputs are powered via the KNX and do not require an additional power supply.

The software functionality of the Binary Inputs has also been extended. It is now possible to send **several switching telegrams with just a single push of a button.**
Especially useful, just as in the case of the Switch Actuators, it is also possible **to copy the channels of the device in the ETS.** The parameters and group addresses of a channel can be simply transferred to other channels in this way. Or it is possible to use the new templates for each application. Both options simplifies project engineering and helps reduce sources of errors and reducing commissioning time.

Application
- Operation of KNX systems via conventional push buttons and switches
- Processing of binary signals (signalling contacts)

Benefits
- Flexible application due to wide-range inputs
- Reduced commissioning time when using the templates or the copy function
- KNX Data Secure
- A wide range of functions
- Simplified complex functions

AE/S 4.1.1.3

Analogue Input

Used wherever analogue variables should be detected. The sophisticated housing concept of the surface mounted device and the screw terminals of the DIN-Rail device enable quick and clear wiring and improve the speed of connection of the sensors.
Comprehensive range of adjustment for many typical sensors (1 – 10 V, 0(4) – 20 mA, 0 – 1 V, PT 100, PT 1000,...) for detection of temperature, brightness, fill levels, etc.
For active sensors the auxiliary voltage is supplied by AE/S 4.1.1.3;
in case of AE/A 2.1 a separate auxiliary voltage supply is required.

ABB i-bus® KNX
Inputs

WZ/S 1.3.1.2

WES/A 4.1.1
with WB/Z 1.1.1

Weather Unit, MDRC and Weather Sensor, SM

It is used to detect and process weather data from weather sensor. It supplies data for twilight and brightness levels in 3 directions, rain, temperature, information on day/night, wind speed, date and time. An additional input for the connection of a PT 1000 sensor is provided. Four value memories which can store up to 24 values each are available. The Weather Unit WZ/S 1.3.1.2 can be operated either with the new Weather Sensor WES/A 4.1.1 or with the former sensors WES/A 3.1 or WES/A 2.1. The Weather Unit also provides the supply voltage for the connected sensor. The Weather Unit has to be supplied with a operating voltage of 85 to 265 V AC. The Weather Unit supports the ABB i-bus® Tool for advanced diagnosis and improved commissioning.
The Weather Sensor WES/A 4.1.1 detects twilight, brightness in four directions (only three available in combination with WZ/S 1.3.1.2), rain, temperature, day/night, wind speed and the date and time using a GPS module. An additional heating transformer is not required. The new Weather Sensor WES/A 4.1.1 can not be connected to the former Weather Unit WZ/S 1.1.

WS/S 4.1.1.2

Weather Station, 4-fold, MDRC

All common weather sensors for wind speed, wind direction, rain, amount of rain, brightness, light intensity, pyranometers, twilight, air pressure, humidity or temperature can be connected to the device. The power supply generates the 24 V DC voltage for external sensors (max. 300 mA). The device can be operated with 85 to 265 V AC, 50/60 Hz. The application software is configured for the detection of weather based data and enables quick sensor programming. The Weather Station supports the ABB i-bus® Tool for advanced diagnosis and improved commissioning.

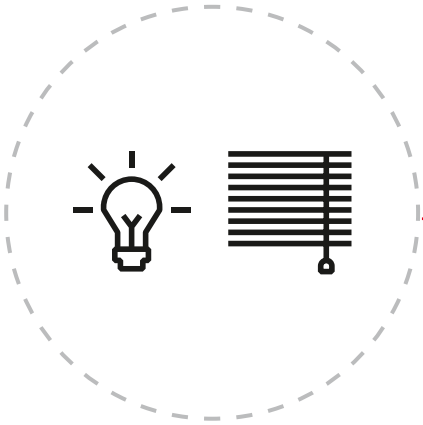
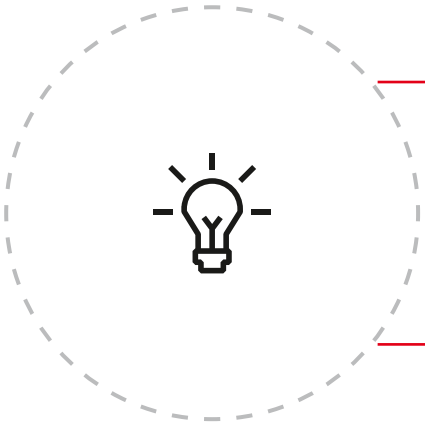
Outputs
Switch to a smarter tomorrow



Combi Switch Actuators
The 9 Combi devices are combining two applications: switching and shading. The products are ideally made for residential usage to offer greatest flexibility.



Standard Switch Actuators
These 12 devices are building the Standard when it comes to switching applications for commercial buildings. During the development we focused on providing a cost optimised selection of products, that matches the needs of commercial projects.

Professional Switch Actuators
The professional series includes 8 switch actuators made for high switching capacity. This portfolio has been developed to suit the high requirements of industry standards.

ABB i-bus® KNX

Outputs – Combi Switch Actuators

The following table provides an overview of the functions possible with the Switch Actuators and their application programs:

3) = The maximum peak inrush-current may not be exceeded.

ABB i-bus® KNX

Outputs – Combi Switch Actuators

SAH/S 8.6.7.1

Switch/Shutter Actuator, 6 A, MDRC

The compact 6 A combi switch actuator has 8, 16 or 24 independent switching relays. The outputs can be used individually via ABB i-bus® KNX for switching electrical loads or in pairs for controlling 230 V AC roller shutter or blind drives (no electromechanically interlocking). The device features a manual operation, which can also be disabled. Via the manual operation the outputs can be operated manually and the switching or driving status is displayed. The device is powered by KNX and requires no additional power supply. Devices support the ABB i-bus® Tool for advanced diagnostics and improved commissioning.

ABB i-bus® KNX

Outputs – Standard Switch Actuators

SA/S 2.6.2.2

Switch Actuator, 6 A, MDRC

The switch actuator uses potential free contacts to switch 2, 4, 8 or 12 independent electrical loads via the ABB i-bus® KNX. The device features a manual operation and displaying of the switching state of the outputs. The 6 A device is especially suited to switch resistive, inductive or capacitive loads. The device is powered by KNX and requires no additional power supply. Devices support the ABB i-bus® Tool for advanced diagnostics and improved commissioning.

SA/S 8.10.2.2

Switch Actuator, 10 A, MDRC

The switch actuator uses potential free contacts to switch 2, 4, 8 or 12 independent electrical loads via the ABB i-bus® KNX. The device features a manual operation and displaying of the switching state of the outputs. The 10 A device is especially suited for loads with high surge currents e.g. flourescent lighting (AX) acc. EN 60669. The device is powered by KNX and requires no additional power supply. Devices support the ABB i-bus® Tool for advanced diagnostics and improved commissioning.

ABB i-bus® KNX

Outputs – Professional Switch Actuators

SA/S 4.16.5.2

Switch Actuator, 16 A, C-Load, MDRC

The switch actuator uses potential free contacts to switch 2, 4, 8 or 12 independent electrical loads via the ABB i-bus® KNX. The device features a manual operation and displaying of the switching state of the outputs. The 16/20 A, 16 A-AC3 (C-load) device is especially suited for loads with high surge currents e.g. flourescent lighting (AX) acc. EN 60669. Devices support the ABB i-bus® Tool for advanced diagnostics and improved commissioning.

SA/S 12.16.6.2

Switch Actuator, 16 A, C-Load with Energy Function, MDRC

The switch actuator uses potential free contacts to switch 2, 4, 8 or 12 independent electrical loads via ABB i-bus® KNX. The device has integrated energy functions. This includes independent load current measurement in each output and easy to use calculation of power and energy consumption for each output or groups of outputs. Via an integrated load shedding object an integration in a load control system can be easily realized. The device features a manual operation and displaying of the switching state of the outputs. The 16/20 A, 16 A-AC3 (C-load) device is especially suited for loads with high surge currents e.g. LED or fluorescent lighting (AX) acc. EN 60669. Devices support the ABB i-bus® Tool for advanced diagnostics and improved commissioning.

ABB i-bus® KNX
Outputs

SA/U 1.16.2

Switch Actuator, 1-fold, 16 A, FM

For switching 230 V~ consumers. Equipped with three extension inputs which depending on parameterization can act directly on the switching output or alternatively as binary inputs on the KNX bus. One Normally open contact, potential free. Rated voltage: 230 V~, +10 %/–10 %, 50 Hz. Max. switching current: 16 A; switching capacity: up to 2.500 W depending on the consumer. The bus can be connected via enclosed terminal block.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	SA/U 1.16.2	2CKA006151A0280		0.11	1

SAH/U 2.16.2

Switch/Shutter Actuator, 2/1-fold, FM

For controlling blind or awning motors or for switching two 230 V~ consumers. With 3 inputs and 1 change-over output – normally open contact, potential-bound –. Rated voltage: 230 V~, +10 %/–10 %, 50 Hz. Input polling voltage: 5 V. Output switching current per device: ∑ 16 A, switching capacity: up to 2.500 W depending on the consumer. The bus can be connected via enclosed terminal block.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

IO/S 4.6.1.1

I/O Actuator, 6 A, MDRC

For the control of loads in residential areas, typically in hotel rooms and apartments.
The I/O Actuators provide binary inputs for the connection of conventional push-buttons and outputs for switching loads. Inputs and outputs can be internally connected by ETS.
By integrating the devices into KNX networks further functions can be realised: e.g. central control or room based emergency calls to a control centre.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit

ABB i-bus® KNX

Outputs

AA/S 4.1.2

AA/A 2.1.2

Analogue Actuator

The Analogue Actuator converts KNX telegrams in voltage (0...10 V) or current (0(4)...20 mA) signals. These analogue output signals are used to influence regulatory processes.
For example, devices for heating, air conditioning or ventilation applications can be adjusted in their operation depending on the information, which are transmitted via the bus system.
This Analogue Actuator is available in a 4-fold DIN rail version and a 2-fold device with surface mounting housing. The AA/A only provides an analog voltage signal and requires the KNX as only supply voltage. The ABB i-bus® Tool is supported for advanced diagnosis and improved commissioning.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit

ABB i-bus® KNX
Shading Control

Modern building installation enables a high degree of functionality and simultaneously complies with increased security requirements.

Modern sun protection devices have a significant role in building automation:
- Anti-glare protection (e.g. PC workstations)
- Utilization of daylight by tracking the sun‘s position and directing available daylight
- Protecting furniture and carpets from fading
- Regulating the room temperature (overheating protection in summer; harvesting the available energy on cold days)
- Providing protection from people looking in from the outside
- Protection against intruders.

With the Blind/Roller Shutter Actuators (JRA/S), the complex requirements on a sustainable and energy efficient automatic sun protection control can be implemented in offices, residential and functional buildings via ABB i-bus® KNX.

The Blind/Roller Shutter Actuators are ideal for the control of drives in the area of sun protection:
- Blinds, exterior blinds, slat blinds and panel curtains
- Roller shutters, roller blinds, screens, vertical blinds
- Awnings, pleated blinds, pleated curtains, etc.

Optimum room air quality via automatic ventilation
The demands for the reduction of energy consumption often results in poor ventilation in today‘s heavily insulated buildings. The quality of the room air does not comply with the desired and required level.
Natural ventilation is often an effective and efficient method for exchanging the “used” room air and improving the air quality in the room. If the air quality in the room is monitored with sensors (temperature, humidity, CO_2 concentration), the ventilation flaps can be opened automatically and in good time ensuring that the air quality is kept in a comfortable range.

Blind/Roller Shutter Actuators are ideal for control of ventilation elements such as
- Ventilation flaps
- Roof hatches, skylights
- Windows, doors and gates

Automatic travel detection
Travel times for the connected drives can be easily determined during operation with the automatic travel detection feature. It saves time during setup. Furthermore, compensation of age and weather-related length changes to blinds or roller shutters is assured. It facilitates precise positioning of the blinds/shutter when using sun position-dependent control.

Template functionaity
This function allows parameter settings of an output to be copied or exchanged with other freely selectable outputs. Templates are useful particularly on projects, where all drives of a facade are controlled identically.
It shortens the setup process and reduces the possible sources of error with parameterization.

Integration in the room temperature control
The intelligent and networked blind and roller shutter control plays an important role in the energy efficient usage of a building. The level of sunlight in the room and heating up due to the sun‘s energy can be controlled in conjunction with the room climate control. The software function “overheat control” prevents unintentional overheating of a room. The blinds are closed in good time. The shutter control can be actively involved in the room temperature control.

JRA/S 2.230.2.2

Blind/Shutter Actuator, 230 V AC, manual operation, MDRC

For the control of independent 230 V AC motors via ABB i-bus® KNX. The devices are designed for positioning blinds, roller shutters, awnings and other shading products as well as for controlling doors, windows and ventilation flaps. Additional auxiliary voltage is not needed. To protect the motor, the output contacts are electromechanically locked against each other. Push buttons are located at the front of the device to control the outputs e.g., during commissioning. The current status of the output is displayed via LEDs if the output is selected. The devices support KNX Data Secure.

ABB i-bus® KNX
Shading Control

JRA/S 4.230.7.2

Blind/Shutter Actuator with 3 limit switch, travel detection and binary inputs, 4-fold, 230 V AC, manual operation, MDRC

For the control of independent 230 V AC motors via ABB i-bus® KNX. The devices are designed for positioning blinds, roller shutters, awnings and other shading products as well as for controlling doors, windows and ventilation flaps. Additional auxiliary voltage is not needed. The device can be used for blinds with working position/3-end-position-switches and features an additional down contact to control the respective motors. The travel times of the motor are detected automatically via current detection. Additionally the device has 2 binary inputs (contact scanning) per output, for the connection of conventional switches or push buttons to directly control the hanging. The device is pre-configured so that the respective inputs are directly assigned to the outputs. To protect the motor, the output contacts are electromechanically locked against each other. Push buttons are located at the front of the device to control the outputs e.g., during commissioning. The current status of the output is displayed via LEDs if the output is selected. The device supports KNX Data Secure.

Lighting Control
ABB i-bus® KNX DALI Gateways

Impressive lighting atmosphere, thanks to the DALI Gateways DG/S 1.64.5.1 and DG/S 2.64.5.1

A DALI Gateway serves as the interface between the KNX installation in the building and the digital DALI lighting control system, and therefore unites the two most important building automation standards.

ABBs DALI Gateway Premium devices enable maximum functionality and flexibility in lighting design thanks to the tunable white and color control function.

ABB i-bus® KNX

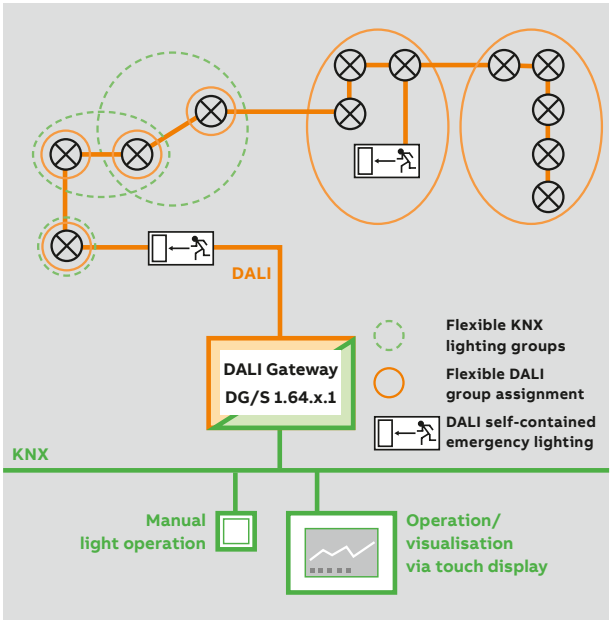
Lighting Control – DALI

The ABB DALI Gateways are used to interface between DALI (Digital Addressable Lighting Interface) and KNX installations. Four Gateways are available:
The basic versions DG/S 1.64.1.1 DALI Gateway (1-fold) and DG/S 2.64.1.1 DALI Gateway (2-fold) and on the other hand the premium versions DG/S 1.64.5.1 DALI Gateway (1-fold) and DG/S 2.64.5.1 DALI Gateway (2-fold). All incorporate the DALI power supply.

Both, basic and premium Gateways are certificated as Single-Master DALI-2 controller and supports DT1 self-contained emergency ligthing acc. EN 62386-202.
The DALI Gateways Premium supports DT8 color control acc. EN 62386-209. Other DALI data points like DT6 can controlled via standard DALI commands acc. EN 62386-102.

DALI Gateways DG/S 1.64.x.1
Flexibility by controlling light individually per device or in groups

The DG/S 1.64.1.1 DALI Gateway Basic (1-fold) or DG/S 1.64.5.1 DALI Gateway Premium (1-fold) can install up to 64 DALI devices both via 16 flexible DALI (orange lined group) and KNX lighting groups (green dotted lined group), each with one or more DALI participants. Control and Monitoring via KNX. Control and status feedback can also be carried out via Broadcast. 16 independent Lighting scenes are available.



DALI Gateways DG/S 2.64.x.1
Maximum flexibility combined with highest amount of DALI participants and groups, to meet all customer needs

The DG/S 2.64.1.1 DALI Gateway Basic (2-fold) or DG/S 2.64.5.1 DALI Gateway Premium (2-fold) can install up to 2 x 64 DALI devices both via 2 x 16 flexible DALI (orange lined group) and KNX lighting groups (green dotted lined group), each with one or more DALI participants. Control and monitoring via KNX. Control and status feedback can also be carried out via Broadcast. 2 x 16 independent Lighting scenes are available.

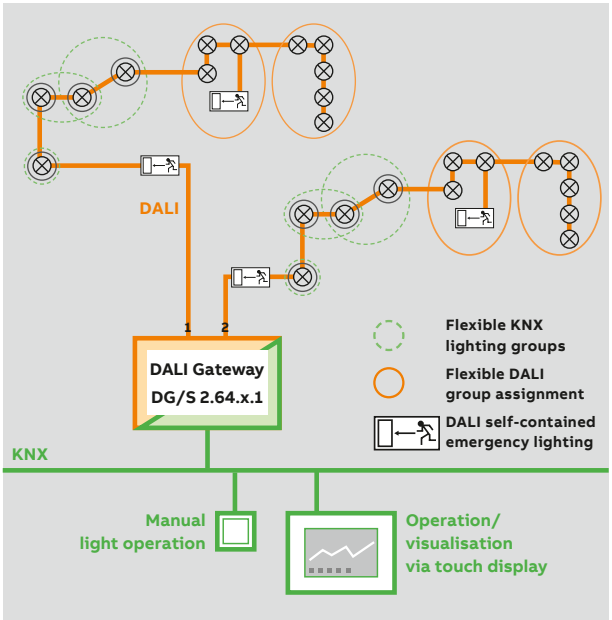


ABB i-bus® KNX
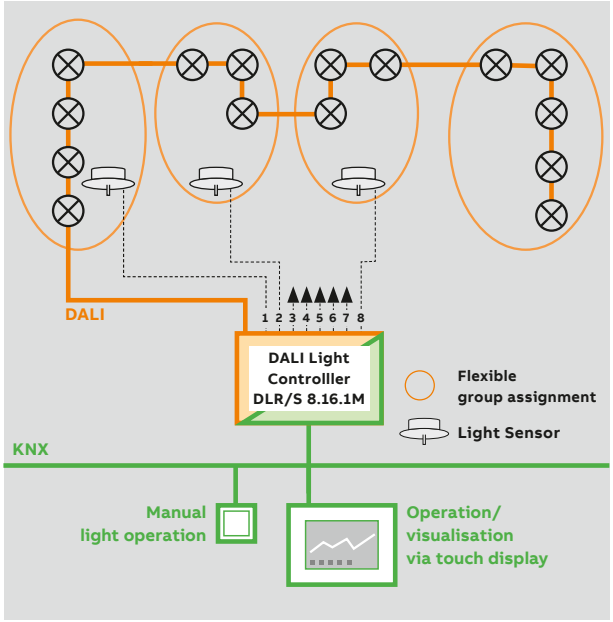
Lighting Control – DALI

DALI Light Controller DLR/S 8.16.1M
Energy through constant lighting control

Control via 16 lighting groups. Up to 8 lighting groups can be controlled with 8 Light Sensors. Master-slave, staircase light and Scene mode round off the functions.



DALI Light Controller DLR/A 4.8.1.1
Decentralized Constant Lighting Control

The DALI Light Controller DLR/A 4.8.1.1 is a surface mounting device for switching and dimming of 8 independent lighting groups. A maximum of 64 DALI devices can be connected. The device can be used for 4-fold constant lighting control in connection with 4 Light Sensors LF/U 2.1. Furthermore staircase lighting and master/slave functions are provided. Fault feedback messages, e.g. concerning ballast or lamp failures, can be programmed and activated via KNX. The compact surface-mounted housing allows the decentralized installation in the underfloor or in false ceilings – optimal for the use with Room Controller RC/A.

DALI Gateway DG/S 8.1
The proven technology

Lighting groups are formed via “rigid” hardware wiring.
Fast commissioning as no addressing is necessary.
No readdressing when a ballast is exchanged. 8 x 16 DALI devices.

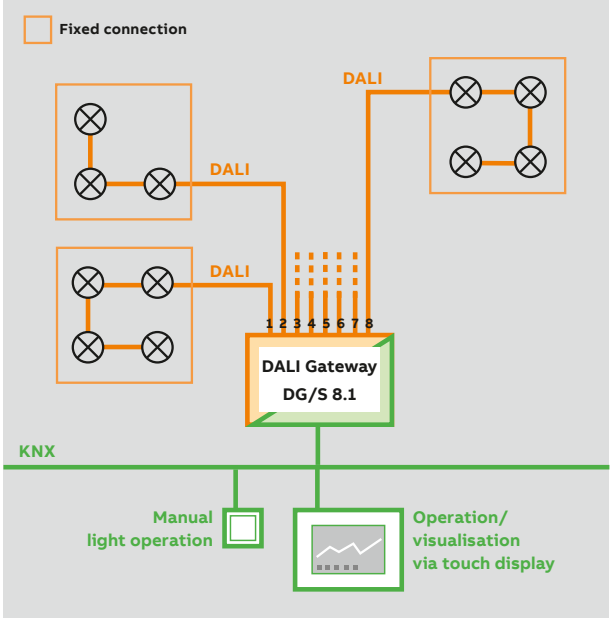


ABB i-bus® KNX

ABB i-bus® KNX

Lighting Control – DALI

DG/S 1.64.1.1

DALI Gateway, Basic, MDRC

Single-Master DALI Controller certificated acc. to DALI-2 (EN 62386). The device is used to control DALI or DALI-2 standard devices via ABB i-bus® KNX. One/Two DALI output(s) for up to 64/2x64 DALI participants. The DALI power supply is integrated. Control and status feedback is carried out via KNX per DALI participants (64/2 x 64), with lighting groups (16/2 x 16), together in broadcast or per scenes (16/2 x 16). Extensive fault and error messages are available. Slave-, staircase-, force-, block- and scene-function are integrated. Self-contained emergency converter, DT1 acc. EN 62386-202 will be supported. By means of KNX and emergency converter, different emergency tests (e.g., function and duration test) can be triggered. Other DALI devices e.g., DT6 can be controlled via standard DALI commands acc. to EN 62386-102.
For diagnostic use and individual change of the DALI address or group assignment a separate software tool (ABB i-bus® Tool) is available.

DG/S 1.64.5.1

DALI Gateway, Premium, MDRC

Single-Master DALI Controller certificated acc. to DALI-2 (EN 62386). The device is used to control DALI or DALI-2 devices via ABB i-bus® KNX. One/Two DALI output(s) for up to 64/2 x 64 DALI participants. DALI power supply is integrated. Control and status feedback is carried out via KNX per DALI participants (64/2 x 64), with lighting groups (16/2 x 16), together in broadcast or per scenes (16/2 x 16). DALI devices type DT1 (Self-contained emergency converter acc. EN 62386-202) and type DT8 (colour temperature Tc & RGB(W) acc. EN 62386-209) will be supported. Other DALI devices e.g., DT6 can be controlled via standard DALI commands acc. to EN 62386-102.
Extensive fault and error messages are available. Slave-, staircase-, force-, block- and scene-function are integrated. Colour can set and dim, HSV(W)-, Dim2Warm-, HCL-function, 4 sequencer per DALI output can be used. A standby switch-off in combination with a KNX switch actuator (e.g., SA/S) and the integration of the DALI Gateways into a load control system are possible. By means of KNX and DT1 converter different emergency tests (e.g., function and duration test) can be triggered, test results are transferred back to KNX.
For diagnostic use and individual change of the DALI address or group assignment a separate software tool (ABB i-bus® Tool) is available.

DG/S 8.1

DALI Gateway, 8-fold, MDRC

Single-Master DALI Controller DALI (EN 62386) trademarked. For controlling up to 128 standard DALI devices (DT0) acc. DALI or DALI-2. There are 8 separate, independent DALI outputs/channels available. Up to 16 DALI devices can be connected per channel. The DALI power supply is integrated in the gateway. The functions of switching, dimming, set values and fault indication for lamps and electronic ballasts are available for each output.
It is possible to set the lamp burn-in time and 16 light scenes. Commissioning is simplified as no addressing or commissioning of the DALI devices is necessary.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	6	DG/S 8.1	2CDG110025R0011		0.31	1

DLR/S 8.16.1M

DALI Light Controller, 8-fold, Manual Operation, MDRC

Single-Master DALI Controller DALI (EN 62386) trademarked. For switching and dimming of 16 independent lighting groups. A maximum of 64 standard DALI devices (DT0) acc. DALI or DALI-2 can be connected. The device can be used for 8-fold constant lighting control in connection with eight Light Sensors LF/U 2.1. Fault feedback messages can be programmed and activated via KNX. With comfortable manual operation and status display.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	6	DLR/S 8.16.1M	2CDG110101R0011		0.26	1

DLR/A 4.8.1.1

DALI Light Controller, 4-fold, SM

Single-Master DALI Controller DALI (EN 62386) trademarked. Surface mounting device for switching and dimming of 8 independent groups of luminaries. Up to 64 standard DALI participants (DT0) acc. DALI or DALI-2 can be connected to one DALI control line. When combined with the Light Sensor LF/U 2.1 the device can be used as a 4-fold light controller for constant light control. Additionally a staircase and master/slave function is integrated.
A great number of status feedback e.g. lamp and ballast fault can be transferred from DALI to KNX. With this functions the DALI light controller is a key factor in every energy efficient building automation. With his surface mounting housing it is possible to insert the device central in false ceiling or underfloor installation.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit

1) = For multiple element lamps or other types, the number of electronic ballasts must be determined using the peak inrush current of the electronic ballasts

LR/S 4.16.1

Light Controller, 1-10 V, MDRC

The device enables the switching and dimming of 2 or 4 independent lighting circuits in conjunction with electronic ballasts. In combination with the Light Sensor LF/U 2.1, the device can be used for constant lighting control. 2 or 4 Light Sensors can be connected to the controller for precise detection of the lighting conditions.

LF/U 2.1

Light Sensor, FM

Used for implementing constant lighting control applications in conjunction with light controllers LR/S, LR/M, DLR/S 8.16.1M or DLR/A 4.8.1.1. The scope of delivery includes different optical rods, the connection terminals and the cover for discrete fitting in a room.

	–	LF/U 2.1	2CDG110089R0011		0.07	1

SD/S 8.16.1

Switch/Dim Actuator, 16 A, MDRC

Used for switching and dimming of 2, 4 or 8 independent groups of luminaries with electronic ballasts with 1 – 10 V control interfaces. On each channel the power supply of the ballasts is switched by a floating load relay (16 A – AC1). Every output can be operated manually and features display of the switching state. The device can assume a range of applications thanks to the programming options.

ABB i-bus® KNX
Lighting Control

UD/S 4.210.2.1

LED Dimmer, 4-fold, 210 W/VA, MDRC

Multichannel universal dimming actuator optimised for dimming of retrofit LED lamps (LEDi). Also suitable for dimming of incandescent lamps, low-voltage halogen lamps with conventional or electronic transformers, 230 V incandescent halogen lamps and dimmable halogen energy-saving lamps. Automatic load detection (deactivatable). One separate N-terminal per channel. Channel bridging possible in order to increase the maximum load. Outputs can be switched in parallel as required. Minimum load: 2 W. Manual operation on the device is possible also without bus voltage or in unprogrammed state. One LED control button per channel (including status indication) for ON and OFF switching as well as for up and down dimming. Programming of the device is possible without connecting 230 V supply voltage. Comprehensive test and diagnostic functions via the i-bus® Tool. Fast parameterization in the ETS by means of copyable channel templates. With integrated bus coupler.
Rated power at 230 V ~:

- 230 V ~ incandescent and halogen lamps: 4 x 210 W/VA to 1 x 600 W/VA.
- Dimmable 230 V ~ LEDi: 4 x 210 W/VA to 1 x 600 W/VA in trailing edge mode, 4 x 80 W/VA to 1 x 200 W/VA in leading edge mode.
- Inductive L-transformers with LED/low-voltage halogen lamps: 4 x 210 W/VA to 1 x 600 W/VA.
- Electronic C-transformers with LED/low voltage halogen lamps: 4 x 210 W/VA to 1 x 600 W/VA.
- Electronic LC transformers with LED/low-voltage halogen lamps: 4 x 80 W/VA to 1 x 200 W/VA.

Recommendation: Always use bulbs of one type and manufacturer.

Multichannel universal dimming actuator optimised for dimming of retrofit LED lamps (LEDi). Also suitable for dimming of incandescent lamps, low-voltage halogen lamps with conventional or electronic transformers, 230 V incandescent halogen lamps and dimmable halogen energy-saving lamps. Automatic load detection (deactivatable). One separate N-terminal per channel. Channel bridging possible in order to increase the maximum load. Outputs can be switched in parallel in groups as required. Minimum load: 2 W. Manual operation on the device is possible also without bus voltage or in unprogrammed state. One LED control button per channel (including status indication) for ON and OFF switching as well as for up and down dimming. Programming of the device is possible without connecting 230 V supply voltage. Comprehensive test and diagnostic functions via the i-bus® Tool. Fast parameterization in the ETS by means of copyable channel templates. With integrated bus coupler.

Rated power at 230 V ~:

- 230 V ~ incandescent and halogen lamps: 2 x 315 W/VA to 1 x 500 W/VA.
- Dimmable 230 V ~ LEDi: 2 x 315 W/VA to 1 x 500 W/VA.in trailing edge mode,
- 2 x 120 W/VA to 1 x 200 W/VA in leading edge mode.
- Inductive L-transformers with LED/low-voltage halogen lamps: 2 x 315 W/VA to 1 x 500 W/VA.
- Electronic C-transformers with LED/low voltage halogen lamps: 2 x 315 W/VA to 1 x 500 W/VA.
- Electronic LC transformers with LED/low-voltage halogen lamps: 2 x 120 W/VA to 1 x 200 W/VA.

Recommendation: Always use bulbs of one type and manufacturer.

UD/S 4.315.2.1

LED Dimmer, 4-fold, 315 W/VA, MDRC

Multichannel universal dimming actuator optimised for dimming retrofit LED lamps (LEDi). Also suitable for dimming incandescent lamps, low-voltage halogen lights with conventional or electronic transformers, 230 V halogen lamps and dimmable energy-saving halogen lamps. Automatic load detection (can be deactivated). Separate N-connection per channel. Parallel connection of the outputs possible to increase the output power. Outputs can be connected in parallel in groups. Minimum load: 2 W. Manual operation on device also possible without bus voltage or in an unprogrammed status. Programming of the device also possible without applied 230 V supply voltage. Extensive test and diagnosis functions for the i-bus® Tool. Fast parameter setting in ETS using copyable channel templates. With integrated bus coupler.

Nominal power at 230 V~ mains voltage:

- 230 V~ incandescent and halogen lamps: 4 x 315 W/VA to 2 x 500 W/VA in trailing edge control, 4 x 120 W/VA to 2 x 200 W/VA in leading edge control.
- Dimmable 230 V~ LEDi: 4 x 315 W/VA to 2 x 500 W/VA in trailing edge control, 4 x 120 W/VA to 2 x 200 W/VA in leading edge control.
- Inductive L-transformers with LED/low-voltage halogen lamp: 4 x 315 W/VA to 2 x 500 W/VA. Electronic C-transformers with LED/low-voltage halogen lamp: 4 x 315 W/VA to 2 x 500 W/VA.
- Electronic LC-transformers with LED/low-voltage halogen lamp: 4 x 120 W/VA to 2 x 200 W/VA.

Recommendation: Always use bulbs of one type and manufacturer.

UD/S 6.315.2.1

LED Dimmer, 6-fold, 315 W/VA, MDRC

Multichannel universal dimming actuator optimised for dimming of retrofit LED lamps (LEDi). Also suitable for dimming of incandescent lamps, low-voltage halogen lamps with conventional or electronic transformers, 230 V incandescent halogen lamps and dimmable halogen energy-saving lamps. Automatic load detection (deactivatable). One separate N-terminal per channel. Channel bridging possible in order to increase the maximum load. Outputs can be switched in parallel in groups as required. Minimum load: 2 W. Manual operation on the device is possible also without bus voltage or in unprogrammed state. One LED control button per channel (including status indication) for ON and OFF switching as well as for up and down dimming. Programming of the device is possible without connecting 230 V supply voltage. Comprehensive test and diagnostic functions via the i-bus® Tool. Fast parameterization in the ETS by means of copyable channel templates. With integrated bus coupler.

Rated power at 230 V ~:

- 230 V ~ incandescent and halogen lamps: 6 x 315 W/VA, 2 x 700 W/VA to 3 x 500 W/VA.
- Dimmable 230 V ~ LEDi: 6 x 315 W/VA, 2 x 700 W/VA to 3 x 500 W/VA in trailing edge mode,
- 6 x 120 W/VA, 2 x 250 W/VA to 3 x 300 W/VA in leading edge mode.
- Inductive L-transformers with LED/low-voltage halogen lamps: 6 x 315 W/VA, 2 x 700 W/VA to 3 x 500 W/VA.
- Electronic C-transformers with LED/low voltage halogen lamps: 6 x 315 W/VA, 2 x 700 W/VA to 3 x 500 W/VA.
- Electronic LC transformers with LED/low-voltage halogen lamps: 6 x 120 W/VA, 2 x 250 W/VA to 3 x 300 W/VA.

Recommendation: Always use bulbs of one type and manufacturer.

HS/S 4.2.1

Outside Light Sensor Interface, MDRC

The device is used for the connection and evaluation of up to 3 Outside Light Sensors LFO/A 1.1. The Outside Light Sensors can be analysed individually or combined. Amongst others 10 logical switching channels for the evaluation of threshold values are provided. Threshold values can be adjusted directly on the device. The device can be used as a twilight switch (1 ... 100 lx) or as a light value switch (100 ... 100.000 lx). One Outside Light Sensor LFO/A 1.1 is supplied with the device.

Movement Detector HF KNX, Basic **NEW**

Detection range (for mounting height 2.5 m, 3 m and 4 m): circular. Ø: max. 10 m, max. 12 m and max. 10 m. 5,8 GHz HF technology. With 2 channels and integrated brightness, temperature and humidity sensor. Detectors application with 2 power off stages. Detectors application with integrated monitoring function. Constant light switch with up to two independent channels. Constant light switch with max. 2 outputs for brightness-dependent switching of two light bands in the area. With integrated KNX bus coupler. Suitable for false ceilings (Hole size: Ø 68 mm), surface mounting installation in combination with PMA/A1.xx-88x or in British Standard (PMA/K2.1-88x) or VDE flush-mounted box (PMA/K1.xx.-88x).
The devices support KNX Data Secure.

ABB i-bus® KNX

Movement and Presence Detection

PMB/U1.1-916

ABB Presence detector BasicLINE KNX Standard **NEW**

Detection range (for mounting height 2.5 m, 3 m and 4 m): 360° (circular).
Sitting persons Ø: 4.5 m/6.0 m/–.
Frontal walking Ø: 2.5 m/4.0 m/5.0 m.
Lateral walking Ø: 8.0 m/10.0 m/12.0 m.
Sensitivity of the watchdog adjustable via ETS-parameter.
Operating modes: Automatic, Semi-automatic.
For switching on/off light bands depending on the room brightness.
Regulation in response to the movement possible.
Using the device as presence and/or movement detector.
2 channels for detector application, 1 channel for constant light control and 1 channel for HVAC.
Integrated brightness sensor.
Integrated temperature sensor.
Brightness range: 10 - 3.000 Lux.
Brightness adjustment via KNX communication objects.
Two-stage switch-off with delay time and reduced brightness.
The KNX programming LED can be activated for the walk-test function via KNX.
With integrated KNX bus coupler and power supply via KNX bus.
Easy Master-Slave operation of several presence detectors possible.
Mounting height: 2 m - 4 m.
Suitable for false ceilings with a board thickness from 9 to 25 mm in combination with a spring clip.
Hole size: Ø 68 mm.
Suitable for surface mounting installations in combination with the surface-mounted box 6884-500.
Cannot be installed in British Standard box.
Dimensions: (H x D): 45 mm * 105 mm.
Visible height: 23.5 mm.
Mounting depth: 21.5 mm.
Mounting depth (including spring clip): 48.0 mm * 65.0 mm.
Temperature range (device): –20 °C – +45 °C.
Storage temperature range: –20 °C – +70 °C.
Protection class (device): IP 20 (IP54 in combination with 6884-500).
The devices support KNX Data Secure.
Available from November 2025

PMB/U2.1-916

ABB Presence detector BasicLINE KNX Corridor **NEW**

Detection range (for mounting height 2.5 m, 3 m and 4 m):
Sitting persons Ø: –/–/–.
Frontal walking Ø: 12.0 x 2.5 m/16.0 x 3.0 m/16.0 x 3.0 m.
Lateral walking Ø: 32.0 x 2.5 m/40.0 x 5.0 m/40.0 x 5.0 m.
Sensitivity of the watchdog adjustable via ETS-parameter.
Operating modes: Automatic, Semi-automatic.
For switching on/off light bands depending on the room brightness.
Regulation in response to the movement possible.
Using the device as presence and/or movement detector.
2 channels for detector application, 1 channel for constant light control and 1 channel for HVAC.
Integrated brightness sensor.
Integrated temperature sensor.
Brightness range: 10 - 3.000 Lux.
Brightness adjustment via KNX communication objects.
Two-stage switch-off with delay time and reduced brightness.
The KNX programming LED can be activated for the walk-test function via KNX.
With integrated KNX bus coupler and power supply via KNX bus.
Easy Master-Slave operation of several presence detectors possible.
Mounting height: 2 m - 4 m.
Suitable for false ceilings with a board thickness from 9 to 25 mm in combination with a spring clip.
Hole size: Ø 68 mm.
Suitable for surface mounting installations in combination with the surface-mounted box 6884-500.
Cannot be installed in British Standard box.
Dimensions: (H x D): 60.0 mm * 105 mm.
Visible height: 38.0 mm.
Mounting depth: 21.5 mm.
Mounting depth (including spring clip): 48.0 mm * 65.0 mm.
Temperature range (device): –20 °C – +45 °C.
Storage temperature range: –20 °C – +70 °C.
Protection class (device): IP 20 (IP54 in combination with 6884-500).
The devices support KNX Data Secure.

ABB i-bus® KNX

Movement and Presence Detection

6131/20-24-500

Presence Detector, Mini, Basic, 8 Meter, FM
Presence detector with 4 individual PIR sensors (single switch-off) and
2 independent channels. Detection range (for mounting height 2.5 m, 3 m and 4 m): 360° (circular). Seated persons Ø: 5 m, 6.5 m and 9 m. Walking persons Ø: 6.5 m, 8 m and 10.5 m.
Sensitivity of the watchdog adjustable via ETS-parameter.
Operating modes: Automatic, Automatic switch-off/switch-on (depending on detector application). For switching on/off light bands depending on the room brightness.
Regulation in response to the movement possible.
Using the device as presence and/or movement detector.
2 channels for detector application with integrated monitoring function or up to 2 channels for constant light switch application (max. 2 outputs for brightness dependent switching of two light bands in the area).
Integrated brightness sensor.
Weighting of up to 2 external brightness values and the internal brightness sensor possible.
Brightness range: 1 – 1.000 Lux.
Brightness adjustment via KNX communication objects.
Two-stage switch-off with delay time and reduced brightness.
The KNX programming button is accessible without demounting the detector.
The KNX programming LED can be activated for the walk-test function via KNX.
With integrated KNX bus coupler and power supply via KNX bus.
Scene control via KNX.
Easy Master-Slave operation of several presence detectors possible.
Firmware update via ETS and KNX Firmware Update App.
Mounting height: 2 m - 4 m.
Suitable for false ceilings with a board thickness from 9 to 25 mm in combination with a spring clip.
Hole size: Ø 68 mm.
Suitable for surface mounting installations in combination with the surface-mounted box 6131/29-xxx(-500).
Cannot be installed in British Standard or VDE flush-mounted box.
Recommendation: Installation housing from Kaiser HaloX-O (Art.no. 1281-00) with corresponding cover plates (1281-01 or 1281-61 for fair faced concrete) or IBTronic H120-68 from Spelsberg (Art.no. 97600501).
Dimensions (L x W x D): 80 mm x 80 mm x 45 mm.
Visible height: 16 mm.
Mounting depth: 29 mm.
Temperature range (device): –5 °C – +45 °C.
Storage temperature range: –25 °C – +55 °C.
Transport temperature range: –25 °C – +70 °C.
Protection class (device): IP 20.

6131/21-24-500

Presence Detector, Mini, Premium, 8 Meter, FM
Presence detector with 4 individual PIR sensors (single switch-off) and 4 independent channels. Detection range (for mounting height 2.5 m, 3 m and 4 m): 360° (circular).
Seated persons Ø: 5 m, 6.5 m and 9 m. Walking persons Ø: 6.5 m, 8 m and 10.5 m.
Sensitivity of the watchdog adjustable via ETS-parameter.
Operating modes: Automatic, Automatic switch-off/switch-on (depending on detector application). For dimming/control the brightness to a defined value in the detection area.
4 channels for detector application with integrated monitoring function
or up to 4 channels for constant light switch application (max. 2 outputs for brightness dependent switching of two light bands in the area)
or up to 2 channels for constant light control (max. 2 outputs for dimming daylight control/ control of two rooflights in the room)
or up to 1 channel for HVAC functions for controlling heating and/or cooling systems and ventilation systems in the detection area. Integrated brightness sensor.
Weighting of up to 2 external brightness values and the internal brightness sensor possible.
Brightness range: 1 – 1.000 Lux. Brightness adjustment via KNX communication objects.
Two-stage switch-off with delay time and reduced brightness.
Incl. 5 logic functions (logic gates, gates, delay and staircase lighting).
Integrated object room temperature controller with temperature sensor.
The KNX programming button is accessible without demounting the detector.
The KNX programming LED can be activated for the walk-test function via KNX.
With integrated KNX bus coupler and power supply via KNX bus. Scene control via KNX.
Easy Master-Slave operation of several presence detectors possible.
Firmware update via ETS and KNX Firmware Update App.
Integrated IR receiver for activation of the KNX programming mode via the IR remote control 6010-25(-500) (phased-out) and 10 freely programmable IR channels (blue and/or white function buttons). Alternatively via a teachable IR remote control with RC5 code.
Mounting height: 2 m - 4 m.
Suitable for false ceilings with a board thickness from 9 to 25 mm in combination with a spring clip.
Hole size: Ø 68 mm.
Suitable for surface mounting installations in combination with the surface-mounted box 6131/29-xxx(-500).
Cannot be installed in British Standard or VDE flush-mounted box.
Recommendation: Installation housing from Kaiser HaloX-O (Art.no. 1281-00) with corresponding cover plates (1281-01 or 1281-61 for fair faced concrete) or IBTronic H120-68 from Spelsberg (Art.no. 97600501).
Dimensions (L x W x D): 80 mm x 80 mm x 45 mm.
Visible height: 16 mm.
Mounting depth: 29 mm.
Temperature range (device): –5 °C – +45 °C.
Storage temperature range: –25 °C – +55 °C.
Transport temperature range: –25 °C – +70 °C.
Protection class (device): IP 20.

ABB i-bus® KNX

Movement and Presence Detection

6131/40-24-500

Movement Detector, Sky, white, FM
Movement detector with 4 individual PIR sensors (single switch-off) and 2 independent channels. Detection range (for mounting height 6 m and 12 m): 360° (circular).
Walking persons Ø: 18 m, 24 m.
Sensitivity of the watchdog adjustable via ETS-parameter.
Operating modes: Automatic, Automatic switch-off/switch-on (depending on detector application).
For switching on/off light bands depending on the room brightness.
Regulation in response to the movement possible.
Using the device as presence and/or movement detector.
2 channels for detector application with integrated monitoring function
or up to 2 channels for constant light switch application (max. 2 outputs for brightness dependent switching of two light bands in the area).
Integrated brightness sensor.
Weighting of up to 2 external brightness values and the internal brightness sensor possible.
Brightness range: 1 – 1.000 Lux.
Brightness adjustment via KNX communcation objects.
Two-stage switch-off with delay time and reduced brigthness.
The KNX programming button is accessable without demounting the detector.
The KNX programming LED can be activated for the walk-test function via KNX.
With integrated KNX bus coupler and power supply via KNX bus.
Scene control via KNX.
Easy Master-Slave operation of several presence detectors possible.
Firmware update via ETS and KNX Firmware Update App.
Integrated IR receiver for activation of the KNX programming mode via the IR remote control 6010-25(-500) (phased-out). Alternatively via a teachable IR remote control with RC5 code.
Mounting height: 4 to 12 m.
Suitable for false ceilings with a board thickness from 9 to 25 mm in combination with a spring clip.
Hole size: Ø 68 mm.
Suitable for surface mounting installations in combination with the surface-mounted box 6131/29-xxx(-500) or intermediate ring for VDE flush-mounted box 6131/39-xxx(-500).
Cannot be installed in British Standard or VDE flush-mounted box.

6131/50-24-500

Movement Detector, Corridor, Basic, FM
Movement detector with 2 sensor groups and 2 PIR sensors each (groups single switch-off) and max. 2 independent channels. Detection range: rectangular.
For mounting height 2.5 m: frontal approach max. 18 m x 2.5 m (per side max. 9 m x 2.5 m). Lateral movement max. 24 m x 2.5 m (per side max. 12 m x 2.5 m).
For mounting height 3 m as well as 4 m: frontal approach max. 20 m x 3 m (per side max. 10 m x 3 m). Lateral movement max. 30 m x 3 m (per side max. 15 m x 3 m).
Sensitivity of the watchdog adjustable via ETS-parameter.
Operating modes: Automatic, Automatic switch-off/switch-on (depending on detector application).
For switching on/off light bands depending on the room brightness.
Regulation in response to the movement possible.
Using the device as presence and/or movement detector.
2 channels for detector application with integrated monitoring function
or up to 2 channels for constant light switch application (max. 2 outputs for brightness dependent switching of two light bands in the area).
Integrated brightness sensor.
Weighting of up to 2 external brightness values and the internal brightness sensor possible.

ABB i-bus® KNX

Movement and Presence Detection

6131/51-24-500

Movement Detector, Corridor, Premium, FM
Movement detector with 2 sensor groups and 2 PIR sensors each (groups single switch-off) and max. 4 independent channels. Detection range: rectangular.
For mounting height 2.5 m: frontal approach max. 18 m x 2.5 m (per side max. 9 m x 2.5 m). Lateral movement max. 24 m x 2.5 m (per side max. 12 m x 2.5 m).
For mounting height 3 m as well as 4 m: frontal approach max. 20 m x 3 m (per side max. 10 m x 3 m). Lateral movement max. 30 m x 3 m (per side max. 15 m x 3 m).
Sensitivity of the watchdog adjustable via ETS-parameter.
Operating modes: Automatic, Automatic switch-off/switch-on (depending on detector application).
For dimming/control the brightness to a defined value in the detection area.
4 channels for detector application with integrated monitoring function
or up to 4 channels for constant light switch application (max. 2 outputs for brightness dependent switching of two light bands in the area)
or up to 2 channels for constant light control (max. 2 outputs for dimming daylight control/ control of two rooflights in the room)
or up to 1 channel for HVAC functions for controlling heating and/or cooling systems and ventilation systems in the detection area. Integrated brightness sensor.
Weighting of up to 2 external brightness values and the internal brightness sensor possible.
Brightness range: 1 – 1.000 Lux. Brightness adjustment via KNX communcation objects.
Two-stage switch-off with delay time and reduced brigthness.
Incl. 5 logic functions (logic gates, gates, delay and staircase lighting).
Integrated object room temperature controller with temperature sensor.
The KNX programming button is accessable without demounting the detector.
The KNX programming LED can be activated for the walk-test function via KNX.
With integrated KNX bus coupler and power supply via KNX bus.
Scene control via KNX. Easy Master-Slave operation of several presence detectors possible.
Firmware update via ETS and KNX Firmware Update App.
Integrated IR receiver for activation of the KNX programming mode via the IR remote control 6010-25(-500) (phased-out) and 10 freely programmable IR channels (blue and/or white function buttons). Alternatively via a teachable IR remote control with RC5 code.
Mounting height: 2 m - 4 m.
Suitable for false ceilings with a board thickness from 9 to 25 mm in combination with a spring clip. Hole size: Ø 68 mm.
Suitable for surface mounting installations in combination with the surface-mounted box 6131/39-xxx(-500).
Cannot be installed in British Standard or VDE flush-mounted box.
Recommendation: Installation housing from Kaiser HaloX-O (Art.no. 1281-00) with corresponding cover plates (1281-01 or 1281-61 for fair faced concrete) or IBTronic H120-68 from Spelsberg (Art.no. 97600501).
Dimensions (L x W x D): 91 mm x 91 mm x 49 mm.
Visible height: 27 mm.
Mounting depth: 22 mm.
Temperature range (device): –5 °C – +45 °C.
Storage temperature range: –25 °C – +55 °C.
Transport temperature range: –25 °C – +70 °C.
Protection class (device): IP 20.

ABB i-bus® KNX

Movement and Presence Detection

BM/A4.1-135

Busch-Watchdog PRO 280° KNX **NEW**

4 channel KNX movement detector for indoor and outdoor area. For automatic switching of ABB-i-bus KNX® actuators dependent on movement and brightness.
With 1 twilight/brightness channel with 3 switching thresholds.
With 1 temperature channel with three switching thresholds.
Remote operation via the Bluetooth and smartphone/tablet app.
Up to 10 KNX functions controllable via app. Programmable status RGB LED (5 functions).
With high-quality lens for optimum detection. Level balancing of the device +/–30°.
Horizonatal orientation of the optical system +90°/–60°. Vertical orientation of the optical system +30°/–30°. With ground and rear-field detection. Additional possibility for switch-on via push-button object. The bus can be connected via enclosed terminal block.
Optional: ABB-free@home® app for commissioning of basic and add-on parameters: Switch-off time, Brightness Threshold, Continuously on and Continuously off. Programming only under connected bus voltage. With integrated dismounting protection. Individual adjustment of detection range via enclosed protective foil which can be cut to size.
With brightness-independent test mode for evaluating the detection zone.
Switch-off delay: 10 sec to 18 hours.
Adjustment of parameters via App: Switch-on brightness, Switch-off delay, permanent on, permanent off. Measurement of outdoor temperature and ambient brightness level at the device. Native ETS application required.
With automatic range stabilization. With automatic interference suppression.
With automatic dazzle-proofing. With 4 movement channels.
Surveillance density: 106 sectors with 424 switching segments.
Detection area: frontal: 16 m, lateral: 16 m.
Installation height: 2.5 m.
Twilight limiting values: 1 – 1.000 Lux.
Brightness limiting values: 1.000 – 80.000.
Sensor angle: 280°. Number of PIR: 4.
Bus voltage: 24 V.
With integrated KNX bus coupler.
No additional power supply necessary.
Power consumption: 0.3 W.
Current: 12 mA.
Protection class device: IP 55.
Temperature range device: –25 °C – +55 °C.
Storage temperature device: –25 °C – +70 °C.
Dimensions (H x W x D): 124 mm x 110 mm x 158 mm.
The devices support KNX Data Secure.

6851/DR-135-500

Busch-Watchdog PRO Design Frame **NEW**

Design frame for square and cubic design. For combination with all devices of Busch-Watchdog® PRO series. After wall mounted installation of the detector, the design frame could be putted over the Watchdog.
The design frame is fixed via Snap-On mechanism. Optional accessories. Retrofit installation possible.

Efficient climate control in one system

Product range for HVAC automation

Heating, ventilation, and air-conditioning automation – ClimaECO brings HVAC applications together in one holistic solution portfolio based on the standardized KNX system.

—
When it comes to HVAC you often have to deal with several systems. ABB ClimaECO offers one solution for everything.

HVAC control in one single system
ClimaECO is the holistic heating, ventilation, and air-conditioning (HVAC) automation solution for commercial buildings based on the proven ABB i-bus® KNX system. A solution that seamlessly integrates room automation, central HVAC functions, and management and automation into one system – a significant step towards increasing energy efficiency and reducing operational costs. ClimaECO – making your building more economical, sustainable, and comfortable.

HVAC automation from the room level to the management level

HVAC –
multiple functions

Heating, ventilation, and air-conditioning technology is made up of various systems that are now integrated into one system.

KNX –
a standardized system

With the proven ABB i-bus® KNX system it is possible to automate all HVAC applications and combine them into a single solution.

HVAC –
levels

ClimaECO combines the three different levels of HVAC automation, ranging from management level to central HVAC systems (generation and distribution) to room automation (energy consumption).

ClimaECO –
a holistic solution

ClimaECO bundles all functions and solutions for HVAC automation into a single integrated system. This saves you time and effort with planning, integration, and maintenance, while significantly increasing energy efficiency in buildings.

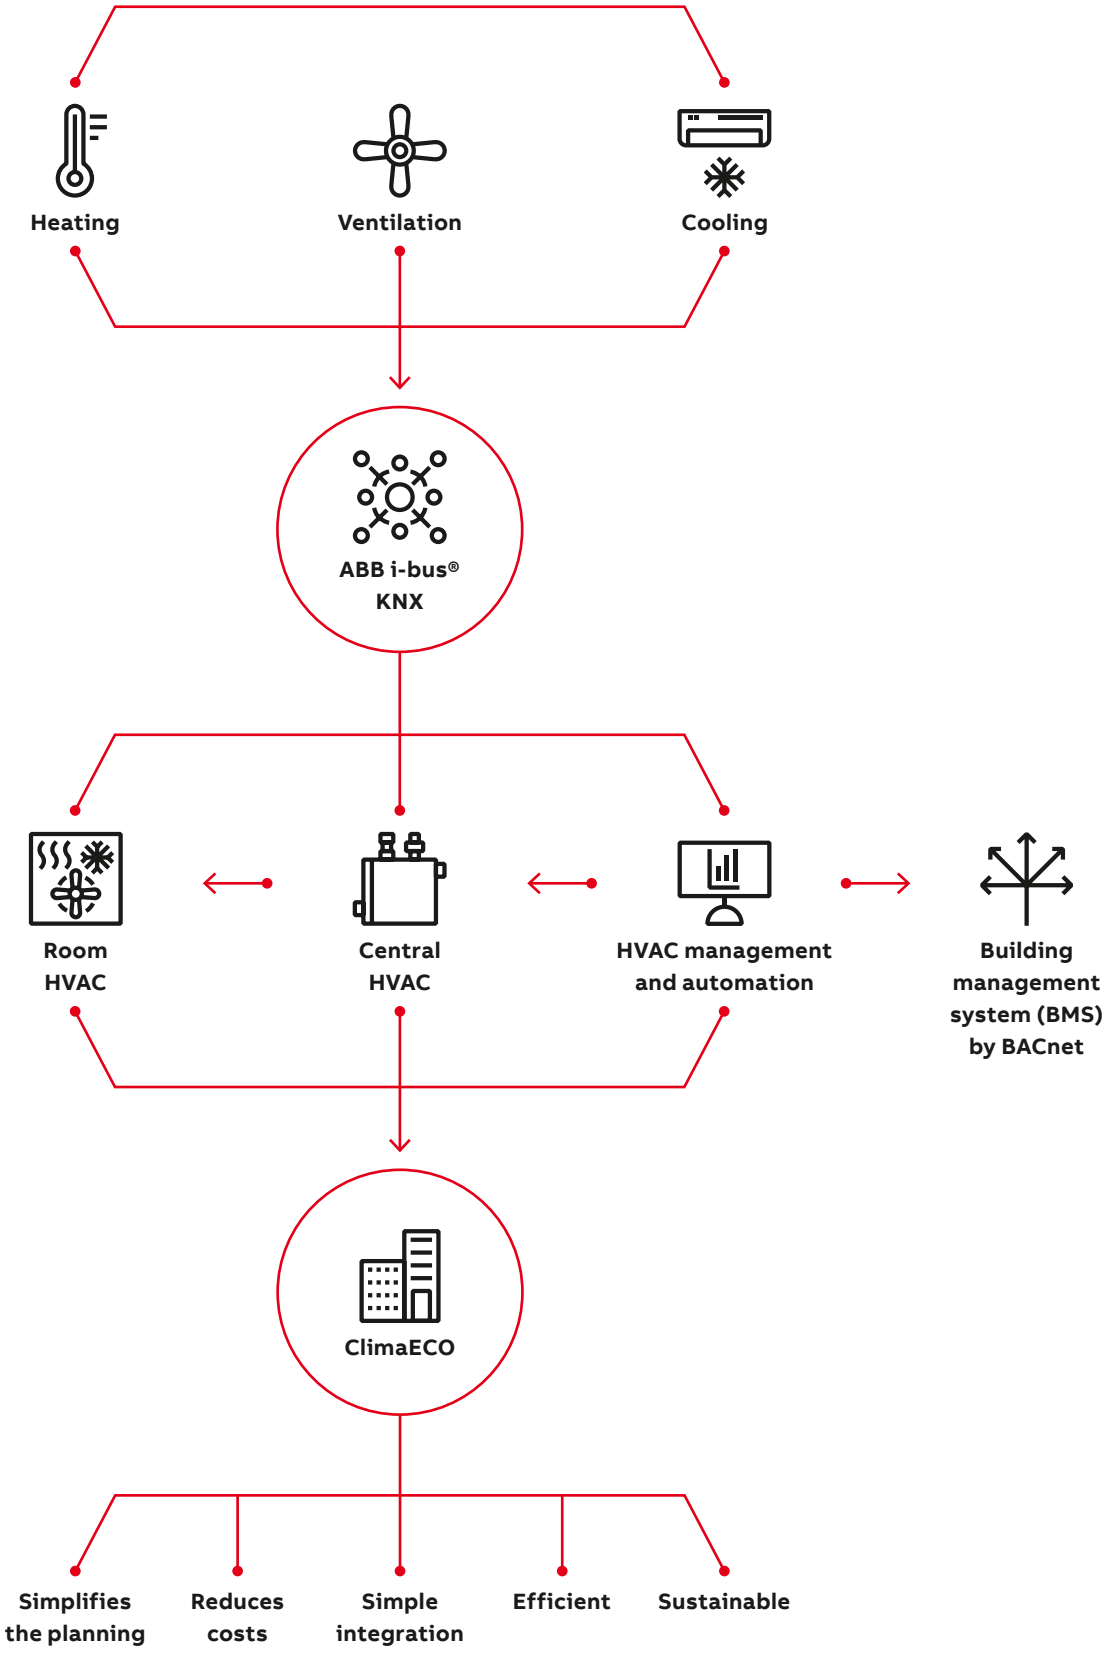

ABB i-bus® KNX

Heating, Ventilation and Air Conditioning – Influencing Variables on Room Climate

Influencing Variables on Room Temperature

Internal and external factors have an effect on the thermal conditions in a room or a building. As an external factor the solar radiation is important for the indoor temperature – particularly with regard to modern architecture with glass fronts. Besides this, the room temperature is strongly affected by the exchange of thermal energy through windows and walls as well as the loss of thermal energy through open doors and windows.

Depending on the intensity, all this interactions influence also the energy efficiency of a building and have therefore to be optimised.
Internal thermal inputs from lighting, devices or persons have also an influence on the room climate. By planning a heating, ventilation or air conditioning system all this internal and external factors have to be considered.

Influencing Variables on Air Quality

The indoor climate in living and working areas has a scientifically proven impact on health, job performance and well-being of people. A suitable indicator for determination of the room air quality is the CO_2 concentration. In addition the values for room temperature and air humidity must be controlled to meet the requirements for a comfortable room climate.

Studies have shown, that high CO_2 concentration in the air influences the well-being as well as the performance and learning ability of people. Besides the normal CO_2 concentration in the air, human respiration is an important factor increasing the CO_2 concentration in a room. Therefore it is important to measure the CO_2 concentration in rooms where many persons are present (schools, conference rooms, open-plan offices). Monitoring of thresholds enables fans to be switched via ABB i-bus® KNX allowing automatic control of the CO_2 concentration and sufficient supply of fresh air.

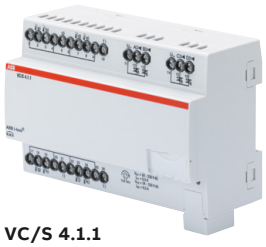
1) from version 1.1



VC/S 4.1.1

Valve Drive Controller, 4-fold, MDRC

For the control of heating and cooling applications in the room, such as radiator, floor heating or cooling ceiling. The device has 4 channels each for the independent control of a heating or cooling application. Each channel has an electronic valve output for the control of a thermoelectric valve drive, as well as 3 inputs to detect and monitor the room status (use for window contact, dew point sensor, level sensor or temperature sensor). Also it is possible to connect one analog room control unit (SAR/A or SAF/A) to the inputs of each channel. Each channel has its own integrated room temperature controller for the control of the room temperature, which can be used directly to control the outputs of the device. The VC/S 4.2.1 features an easy to use manual operation.
Both devices support the ABB i-bus® Tool for advanced diagnosis and improved commissioning.

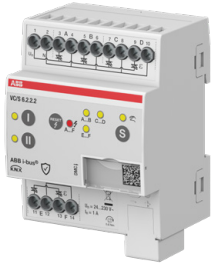
	8	VC/S 4.1.1	2CDG110216R0011		0.27	1
Manual Operation	8	VC/S 4.2.1	2CDG110217R0011		0.275	1



VC/S 6.2.2.2

Valve Drive Controller, Manual Operation, MDRC **NEW**

For the control of heating and cooling applications within a room, such as radiators, floor heating, or cooling ceilings. Each device features multiple channels, each equipped with its own electronic valve output for controlling thermoelectric valve drives (e.g., TSA/K) operating at 24...230 V AC. The outputs are protected against short circuits and overload.
Control of the valve outputs can be achieved through either an internal or an external room temperature controller. Push buttons are located at the front of the device to control the outputs, e.g., during commissioning. The current status of the output is displayed via LEDs if the output is selected. The devices support KNX Data Secure.
Available from November 2025

VAA/S 6.230.2.1

Valve Drive Actuator, 230 V, MDRC **To be discontinued**

For controlling thermoelectric valve drives (e.g. TSA/K) in heating/cooling systems at 24...230 V AC. The outputs are protected against short circuits and overload and can be switched on or off via manual push buttons during commissioning.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit

ABB i-bus® KNX

Heating, Ventilation and Air Conditioning

VAA/A 6.24.2

Floor heating Controller, 6-fold, SM

For the control of up to twelve thermoelectric 24 V DC or analog 0-10 V valve drives (two per channel). With integrated power supply for the valve drives. The device has an integrated relay output to switch the heating circuit pump in dependence of the control value of the valve outputs. The valve outputs can be controlled by the internal or an external room temperature controller. The device is suitable for the installation in the (floor) heating distribution system.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	VAA/A 6.24.2	2CDG120061R0011		0.5	1

ER/U 1.1

Electronic Relay, 1-fold, FM

To be discontinued

The device is used in combination with the universal interface US/U 12.2 and a room thermostat to control the temperature in individual rooms. The thermal valve drives of the radiator valves are operated both noisefree and with a low rate of wear.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit

ST/K 1.2

Electromotor Valve Drive

The Electromotor Valve Drive KNX ST/K 1.2 provides precise control for heating and cooling valves, ensuring secure communication through KNX Data Secure. It is equipped with an integrated temperature sensor and an integrated room temperature controller. It delivers a high actuating force of up to 220 N and a maximum valve stroke of 8 mm. It features 2 universal binary inputs, supporting connection options such as window contacts, presence detectors, and push-buttons. The second input also supports external temperature sensors. Additionally, the drive includes automatic valve adaptation and is compatible with a wide range of valve adapters, making it universally applicable. 2 adapters for the most common valves (M30x1.5 and Danfoss RA -VA 10 & VA 100-) are supplied.
The Bus Coupler is integrated. The device can be used in the heating circuit distributor.
The actual valve position can be indicated by 5 LEDs.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	ST/K 1.2	2CDG120092R0011		0.02	1

TSA/K 230.2

Thermoelectric Valve Drives

For opening and closing valves in heating, ventilation and air-conditioning systems.
Both variants (230 V and 24 V) feature a plug-in connection cable (1 m) and a splash-proof housing. The mounting on the valve is easily implemented using the Valve Adapter VA/Z xx.1.

SUG/U 1.1

Split Unit Gateway, FM

The Split Unit Gateway forms the interface between the KNX system and many manufacturers' air conditioners, so-called split units. The device converts the KNX telegrams into infrared commands and transmits them to the split unit. The transmitter of the supplied cable is bonded directly onto the split unit's receiver. The split unit then no longer receives the commands from a remote control. Instead, it can be operated via any KNX sensors or via a visual display system. The device is put into operation with the ETS, and a free ETS app is available to select the split unit model. Auxiliary voltage is not required.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit

FCC/S 1.1.1.1

Fan Coil Controller, 2 x PWM, 3-stage, MDRC

For the control of fan coil units. Via two electronic outputs, two thermoelectric or one motor-driven valve drive can be controlled for heating and cooling. For the fan control the devices features three relay outputs. A relay output switches an additional load of up to 16 A, such as auxiliary heating. Over 4 inputs the room status can be detected and monitored (Use for window contact, dew point sensor, level sensor or temperature sensor). Also it is possible to connect one analog room control unit (SAR/A or SAF/A) to the inputs of the device.
The device has an integrated room temperature controller for the control of the room temperature, which can be used directly to control the outputs of the device. The FCC/S 1.1.2.1 features an easy to use manual operation.
Both devices support the ABB i-bus® Tool for advanced diagnosis and improved commissioning.

CAR/U 4.1.1.1-71

Room Temperature Controller Fan Coil, 2/4 pipe, On/Off, FM

ABB Caldion® Room Temperature Controller for fan coil units with 2 pipe, 2 pipe with electric heater or 4 pipe system, Flush Mounted, BS standard. Available for standalone function or as KNX device with integrated bus coupling unit. Build in temperature sensor, 2 x binary input for window, dewpoint, condensate alarm. Integrated actuator output control for on/off valve and 3 x fan speed control. Dedicated capacitive touch RTC control button for intuitive control, mode operation and frameless design with large display.
For British standard installation only.

ABB i-bus® KNX

Heating, Ventilation and Air Conditioning

FCL/S 2.6.1.1

Blower Actuator, 6 A, MDRC

Controls one blower or fan with up to three fan speeds via step or changeover control. Furthermore a additional equipment like a damper or valve can be switched by one floating output. The fan speed can be directly choosen, increased and decreased as well as controlled by the control value of a external closed-loop controller.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

6138/11-84-500

Room Thermostat Fan Coil with Display, SM

Sends control values for the room to the Fan Coil Actuators or devices with the respective outputs (e.g. Room Master). The intuitive control operation allows each user to individually set the room temperature and the fan speed. The large LC display can display the actual and target temperatures, the current operating mode as well as the fan speeds. With integrated Bus Coupler.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit

LGS/A 1.2

Air Quality Sensor with Room Temperature Controller, SM

For the control and measuring of the room air quality and temperature. Accurately measures the $C0_2$ concentration (390…10.000 ppm), humidity (0...100 %) and temperature (0…+50 °C) in a room and sends the values on the bus. By using the integrated thresholds the measured values can be monitored. With the integrated controller it is possible to control the room temperature and HVAC actuators. With integrated Bus Coupler.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	LGS/A 1.2	2CDG120059R0011		0.06	1

AC/S 1.1.1

Application Controller, MDRC

The AC/S Application Controller has predefined Automation Modules for a holistic HVAC Automation Solution from Central HVAC to Room Automation. For example Schedule, Set Point Calculation, Heat Curve Calculation, Data Logging and Device Monitoring. Furthermore own Automation Modules can be created by a graphical Logic Editor. By a web based User Interface the whole system can be monitored and managed.
The AC/S 1.2.1 has additional a built in bidirectional KNX-BACnet/IP Gateway (Server) for data exchange with superordinate Building Management Systems.
The Engineering is done completely by the ETS. An additional external Software is not required. The device has a KNX TP port.

HCC/S 2.1.2.1

Heating/Cooling Circuit Controller, 2-fold, 0-10 V, MDRC

For the control of heating or cooling circuits. The device has 2 channels, each with an analog output to control the mixing valve (0…10 V) of a heating or cooling circuit as well as a relay output (5 A) to switch the pump of the circuit. Via 3 binary inputs it is possible to monitor the status of the pump (via potential free contacts) and integrate these feedback into the control of the pump. The flow and return flow temperature are measured and used for the calculation of the control value for the valve output in the integrated controller. The set point temperature is received via the KNX bus. By bundling both channels of the device it is also possible to use it for double pump systems.

MPG/S 8.1.1

KNX/MP-Bus Controller, MDRC NEW

The KNX/MP-Bus Controller allows the integration of Belimo MP-Bus devices into the KNX bus. Depending on the type of the MP-Bus devices connected to the controller up to 8 or up to 16 MP-Bus devices can be connected. The addressing of the MP-Bus devices can be done via a free-of-charge DCA or as well via the known Belimo tools. The device allows the easy control and dispalying of all relevant data points of the MP-Bus devices, such as control value, forced override, relative position, actual position etc. as well as the sensor integration of the MP-Bus devices.
Available Q1/2026

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit

ABB i-bus® KNX

Heating, Ventilation and Air Conditioning

BCI/S 1.1.1

Boiler/Chiller Interface, 1-fold, MDRC

As interface between the KNX system and a heat generator or chiller. Via an analog output (0…10 V) the set point or set point adjustment temperature can be transmitted to the heat generator/chiller. The set point itself is received via KNX. Via two binary inputs the device can monitor the status of the heat generator/chiller (via potential free contacts) and send it on the KNX bus. A relay output (5 A) is included to switch or enable/disable the heat generator/chiller. With an additional relay output (5 A) the pump of the heat generator/chiller can be switched on and off. Via 3 binary inputs it is possible to monitor the status of the pump (via potential free contacts) and integrate these feedback into the control of the pump.
The device supports the ABB i-bus® Tool for advanced diagnosis and improved commissioning.

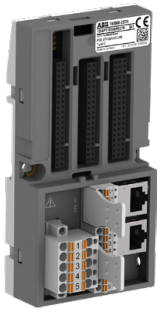
PM5630-2ETH



TB5600-2ETH

AC500 Programmable Logic Controller PM5630

Powerful freely programmable KNX Building Automation Controller with flexible expandable In- and Output Modules. Automation programs based on the globally standardized IEC 61131 programming languages can be executed. Both the graphical and textual programming languages are supported. The programming software ABB Automation Builder based on the established Codesys software enables the easy creation and reuse of automation programs as well as the integration of software libraries. The ABB Automation Builder is integrated with the ETS through an ETS app.
Up to 1000 KNX group objects can be used in the automation program. The KNX relevant settings such as physical address, linking of the controller group objects with group addresses and the KNX sending conditions are set in the ETS and can also be changed at any time without ABB Automation Builder.
The building automation controller has two Ethernet network interfaces. The use is flexible adjustable. In addition to KNXnet/IP communication, these can also be used for other protocols and functions. Among other things, for Modbus TCP and a web server with a freely customizable web interface for display and operation of the system.
The controller has a built-in display, an RS-232/485 interface for i. a. Modbus. The internal clock and data variables can be buffered by a battery. The internal memory of 8 MB can be extended by the memory card slot.
For a complete product the CPU module PM5630-2ETH as well as the Terminal Base TB5600-2ETH are required. To be able to connect the PLC with KNX the KNX Runtime License is required additionally.

Analog Input/Output Module, 4 Analog Inputs/2 Analog Outputs U/I
Extension module for the BAC/S Building Automation Controller KNX with 4 analog inputs and 2 analog outputs. The inputs and outputs support voltage signals from 0 V ... + 10 V, 0 V ... + 5 V, - 2.5 V ... + 2.5 V and -5 V ... + 5 V as well as current signals of 0 mA ... 20 mA and 4 mA ... 20 mA. Connection of the cables via pluggable spring terminals.
Terminals (9 + 11 springs) must be ordered additionally.

AI562

Analog Input Module, 2 Analog Inputs

Extension module for the BAC/S Building Automation Controller KNX with 2 analog inputs for temperature sensors. Temperature sensors of type Pt100, Pt1000, Ni100, Ni1000 and 150 Ohm, 300 Ohm are supported. Connection of the cables via pluggable spring terminals. Terminals (11 springs) must be ordered additionally.

LM/S 1.1

Logic Module, MDRC

Used to solve a varied range of project-specific control tasks and can implement 3 functions simultaneously. The following functions are available for selection: logic gate, filter, time delay, multiplier, min/max value detector, temperature comparator, toggle values, threshold detection, format converter, scenes, increment/decrement values, staircase lighting.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	2	LM/S 1.1	GHQ6310080R0111		0.1	1

ABL/S 2.1

Application Unit Logic, MDRC

Allows the compilation of complex logical functions by simply combining different logic elements and gates using a graphical user interface as an ETS plug-in and does not require additional software. 50 logical elements, 50 gates, 30 timer modules and 10 comparators are available.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	2	ABL/S 2.1	2CDG110073R0011		0.12	1

ABZ/S 2.1

Application Unit Time, MDRC

It provides a yearly time clock program with 15 daily routines (800 switching events), a weekly schedule and allowance for 100 special days. Additionally, the unit can control up to 300 participants in 30 macro groups, that can be triggered using a single command. In this way, each time controlled switching event can cause a series of actions. The switching times can be modified with the free PZM software without using ETS. PZM Software and additional information on www.abb.com/knx.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	2	ABZ/S 2.1	2CDG110072R0011		0.12	1

ABA/S 1.2.1

Logic Controller, MDRC

The device provides extensive logic functions. The logic is defined via a graphic editor integrated in the ETS. Up to 3000 logic gates are possible.
The generated logic can be tested by a simulation function. User-defined function blocks can be created and saved for taking them over into other projects.
The device requires an auxiliary voltage, either 24 V DC or Power over Ethernet (PoE).
If timer functions are used the date and time has to be provided via KNX/TP.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit

ABB i-bus® KNX

Automation, Logic and Time Control

FW/S 8.2.1

Radio Time Switch, 8 Channels, MDRC

The Radio Time Switch sends current time and date on the bus. The time can be optionally received via a DCF or GPS antenna. Furthermore the device can be used to easily adjust the time programs.
The device provides 8 channels. Every channel supplies an independent daily, time and/or yearly program. Additionally, special programs (e.g. for vacation or public holiday days) are possible.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	3	FW/S 8.2.1	2CDG120039R0011		0.33	1

FAD/A 1.1

DCF Antenna for Radio Time Switch, SM

For the connection to the Radio Tme Switch FW/S 8.2.1. The time signal from the DCF 77 transmitter can be received within a radius of approx. 1.000 km around Frankfurt.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	FAD/A 1.1	2CDG120040R0011		0.17	1

FAG/A 1.2

GPS Antenna for Radio Time Switch, SM

For the connection to the Radio Time Switch FW/S 8.2.1. The device receives time and date via GPS signal which is available worldwide.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	FAG/A 1.2	2CDG120070R0011		0.09	1

PS/E 2.2

Programming Set OBELISK top2 for Radio Time Switch

The programming set contains a memory card PK/E 2.1 for transferring switching programms to the Radio Time Switch and a USB programming adapter for the memory card.
The newest version of the software Obelisk top2 for the creation of switching programs for the Radio Time Switch FW/S 8.2.1 can be downloaded on our website.

	–	PK/E 2.1	2CDG120043R0011		0.02	1

TR/A 1.1

Time Receiver GPS, SM

For the reception and processing of the GPS signal, as well as for brightness and temperature measurement. The sensor measures the brightness and outside temperature and sends them on the KNX bus. Likewise the time, date and geographical coordinates are send to the KNX bus. Additionally the sunrise and sunset times are also send to the bus. With integrated Bus Coupler.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

ABB RoomTouch®

As individual as your home

ABB RoomTouch® 4"

- 12 control elements
- KNX Data Secure
- Up to 12 status information can be shown (e.g. fault/alarm messages)
- Haptic feedback (vibration)
- Integrated proximity and brightness sensor and room temperature controller
- Anti-glare mode for use in dark, complementing the day and night mode
- Flexible visualization (1-4 functions per page)
- Integrated binary input and external temperature sensor input
- Commissioning via ETS5/6 and DCA tool

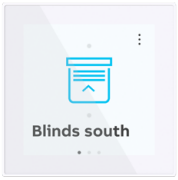
ABB RoomTouch® 5"

- Up to 30 control elements
- Separate fault and alarm messages
- Up to 20 status information can be shown (e.g. fault/alarm messages)
- Acoustic and haptic feedback
- Integrated proximity and brightness sensor and room temperature controller
- Anti-glare mode for use in dark, complementing the day and night mode
- Flexible visualization (1-5 functions per page)
- Integrated binary input and external temperature sensor input
- Metal frame and glass display
- Commissioning via ETS5/6 and DCA tool

ABB i-bus® KNX

Visualisation, Display and Signalling

RT/U12.86.1-825



RT/U12.86.1-811

ABB RoomTouch® 4", FM
Freely programmable Touch panel up to 12-fold featuring a 4-inch IPS screen with 480*480 resolution that offers home control and monitoring of the free@home, or KNX system.
Control, observe and manage your entire installation on one device: Switching - Dimming - Slider - Blind - RGBW control element - Step switch - Scene switch - Display element - Audio control element. With scene function, logic functions, presence simulation and time programs. The devices support KNX Data Secure.

KNX and free@home functions:
- 12 control elements are displayed on a maximum of 12 pages
- 12 fault and alarm messages
- 10 logic functions
- 10 weekly timers
- 10 scene actuators
- 1 integrated temperature controller (RTC)
- Page display with a maximum of 4 touch surfaces on one page
- Primary function 18 fault and alarm messages
- Integrated temperature sensor
- Haptic feedback
- Proximity sensor
- Brightness sensor
- 1 binary input or external temperature sensor input (PT1000/6226/T).

External power supply needed: 20-32 V DC (SELV)
Number of bus subscribers: 1
Optional Removal protection: TZE/U.0.xx.CK

Display size: 10.16 cm (4")
Display resolution: 420*420
Display screen: IPS display
Dimensions (L x W x D): 86 mm x 86 mm x 11 mm
Display surface: glass black (-825), glass white (-811)
Frame color: black matt (-885), white matt (-884)

Class of temperature controller 1 Contribution to space heating energy efficiency 1.0 %.

ABB i-bus® KNX

Visualisation, Display and Signalling

RT/U 30.0.1-811

ABB RoomTouch® 5", FM

Freely programmable KNX touch display as a control, notification and operation center for your room. For the display and operation of the following KNX standard functions: switching, dimming, slider, blind, RGBW LED control, step switch, RTC, scene switch, display element, audio control and Split Unit control. With scene and logic functions and time programs.
Displays alerts and malfunctions. Programmable with up to max 30 functions.
External power supply: 20 – 32 V DC (SELV). The freely programmable touch display (5") comes with a HD resolution of 720 x 1280 and a view angle of 160°.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit

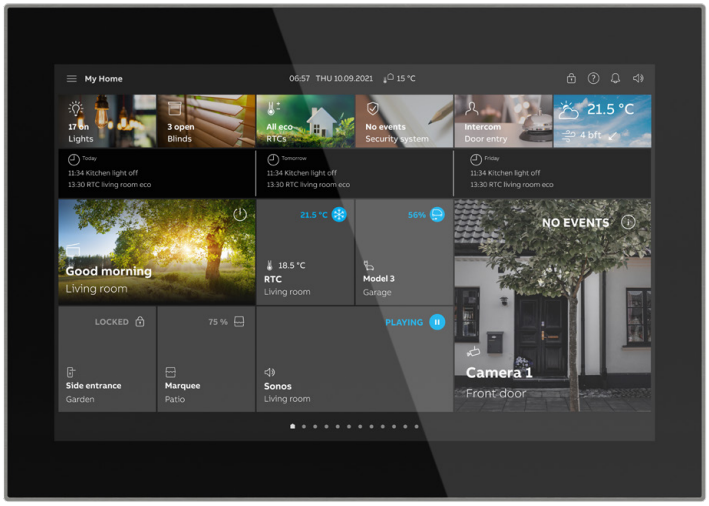
ABB SmartTouch® 10"
Elegant central control for smart buildings

Freely programmable Touch panel featuring a 10-inch IPS screen with 1280 x 800 resolution that combines smart home and building automation and door communication in one device for residential applications, hotels, and commercial buildings. ABB SmartTouch® 10" offers home control and monitoring of the ABB-free@home®, or ABB i-bus® KNX system and the fully integrated functions of ABB-Welcome.



—
01

Control, observe and manage your entire installation on one device: Switching – Dimming – Slider – Blind – RGBW control element – Step switch – Scene switch – Display element – Audio control element – RTC control element – VRV control element and display different values such as energy consumption and production. With scene function, logic functions, presence simulation and time programs. ABB SmartTouch® 10" can also be used as an end device for communication with the ABB-Welcome outdoor stations, and as part of the ABB-Welcome door communication system.

Functions:

- ABB i-bus® KNX: A total of 450 control elements are displayed on a maximum of 25 pages.
- ABB-free@home®: Twisted pair connection provides a single dashboard page with a maximum of 18 controls. Alternatively, for additional control, connection via wi-fi delivers the same amount of control and features as the ABB-free@home® App Next.
- 80 fault and alarm messages
- 30 logic functions
- 40 timers
- presence simulation for 20 participants
- 10 scene actuators (in total 100 scenes are possible to store)
- 3 object RTCs
- Equipped with a hearing loop for coupling the audio signal into hearing aids
- A single page can have up to 18 touch surfaces

Specifications:

- External power supply: 20-32 V DC (SELV) or via the ABB-Welcome system controller.
- Display size: 25.4 cm (10"): Display resolution: 1280 x 800: Display screen: IPS display
- Dimensions (L x W x D): 180.2 mm x 254.6 mm x 17.5 mm
- Flush or Surface mounted. Can also be mounted on a desktop stand.
- The flat design slim real metal frame sits almost flush with the wall (14 mm) and is available in 4 colors (stainless steel, graphite, gold and rose gold) and black or white glass.

KNX APP-Control Server

Smartphones, tablets and smartwatches or PCs turn into a practical remote control, thanks to the KNX APP-Control Server. It connects the KNX installation with the IP network and controls all KNX functions in the building.

New features:

- Smart Energy Management
- Remote programming and access
- Modbus TCP and BACnet IP integration
- KNX offline telegram recorder
- Userfriendly and modern UI

Device features worth mentioning:

- External access the the KNX system
- Easy creation of individual scenes
- Integrated weekly timer (with astro function)
- Integrated logic editor
- Recording and display of diagrams
- Sonos and Philips Hue connection
- Connection of IP cameras with MJPEG protocol possible
- Integrated rights and user management
- Alarm messages via e-mail and/or push notification

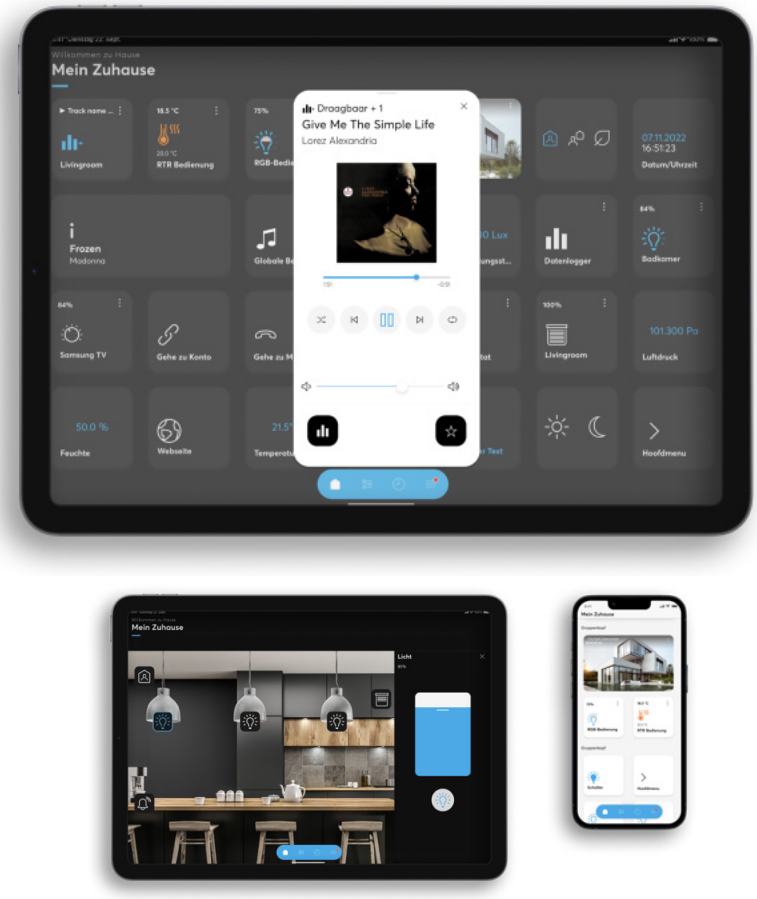

ABB i-bus® KNX

Visualisation, Display and Signalling

CT/S 2.1

KNX APP-Control Server, MDRC

Visualisation server for mobile devices (iOS and Android) and Windows computers. Not only for visualise and control your complete KNX installation but also:

- Sonos Bridge with a complete integration of the Sonos API (Works with Sonos)
- Can be used as a Bridge between KNX and Philips Hue
- Visualisation of your IP camera's, with support of pan, till and zoom
- Unlimited time programs and scenes and they can be edited by the end user
- Integrate Webpages into your design for maybe weather information or traffic information
- Alarm messages can be sent as email or as a push notification (including a snapshot of an IP camera) but can also be heard on your Sonos System (NEW)
- Can be used as a UPnP bridge, so you can control e.g. your UPnP enabled Receiver via KNX
- Statistics and charts support with 5 period types (hour, day, week, month, year)
- Unrestricted personal profiles with an unlimited number of pages and controls
- Easy to use presence simulation, that can be edit by the end customer and with no limitation of participants
- Visualisation functions: dimmer, RGB(W) control, switch, blind and shutter, heating/cooling, air conditioning, scenes, button row (max. 6 buttons), IP camera, status display, value transmitter, Sonos control, and UPnP control
- Has a flexible and unrestricted Script Editor for more complex logical functions based on LUA
- Automatic cloud backups including scenes, time programs and presence simulation data
- Complete commissioning is online and live. You can do it from everywhere and you don't need to drive to the customer
- First commissioning with Wizard support
- Loading the software into the device can be done without Internet
- Device has a direct KNX interface or can communicate via an IP Interface via the bus
- Visualisation as a list view and/or with background pictures with round, rectangle or transparent controls
- Secured remote access via our Cloud solution (For this function, you pay a monthly fee)
- Functional extensions and updates via firmware and software updates.

Security:
This device supports extensive security options to protect your installation and privacy. All communication between the app your installation and our cloud is encrypted and always based on the highest possible standards. The communication between the different parts always requires a username and password. The end user can also protect pages with a pin code, Touch ID or Face ID. Additionally end users can set up local users with access rights to shield certain parts of the home installation or allow them access only to specific parts.
External power supply: 10 – 36 V DC (SELV)
Control element: freely programmable touch surfaces
Bus voltage: 24 V
Protection class (Device): IP 20
Temperature range (Device): 0 °C to +70 °C
Dimensions (L x W x D): 90 mm x 72 mm x 60 mm

Busch-VoiceControl®
Control completely by voice

The building of the future recognises the needs of its users. It reacts individually – automatically and without being asked to do so.

—
01 Busch-VoiceControl®

—
01

- Approved solution for the systems Google Assistant, Amazone Alexa, Apple HomeKit
- Integration of lighting, heating and blind control systems
- All voice commands can be used simultaneously
- Control up to 150 functions
- HomeKit certification allows control of the KNX system from other Home-Kit devices, such as the iPad, iPhone and Apple TV

ABB i-bus® KNX

Visualisation, Display and Signalling

VCO/S 150.2

Busch-VoiceControl® 2, MDRC

A certified voice control gateway for the combination of a KNX system with a voice control system. Acts as a gateway and guarantees that you can operate the KNX components in a house and query their status using Apple, Amazon and Google devices. This component makes it possible to operate the lighting, blind or room temperature controller using simple voice control. Up to 150 functions can be used. Busch-VoiceControl® is an official certified HomeKit accessory. Complete web-based commissioning. Compatible with ABB i-bus® KNX. External power supply: 10-36 V DC (SELV).

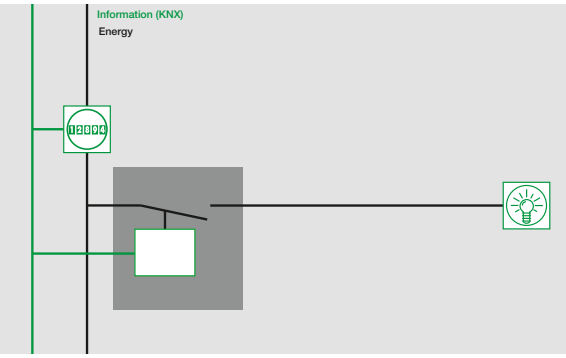
ABB i-bus® KNX

Energy Management

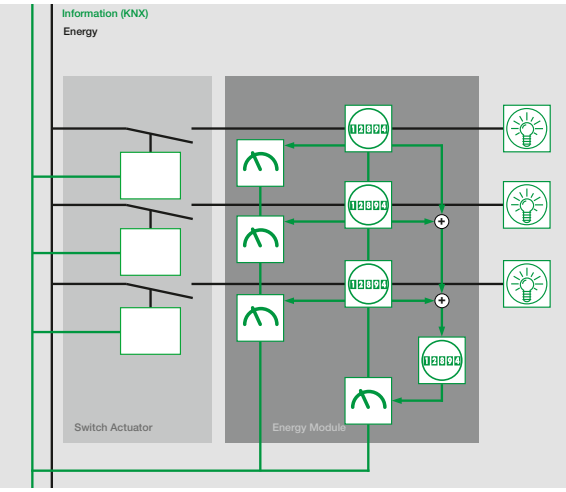
ABB offers various solutions for decentral energy measurement on the basis of the KNX standard.

Version 1



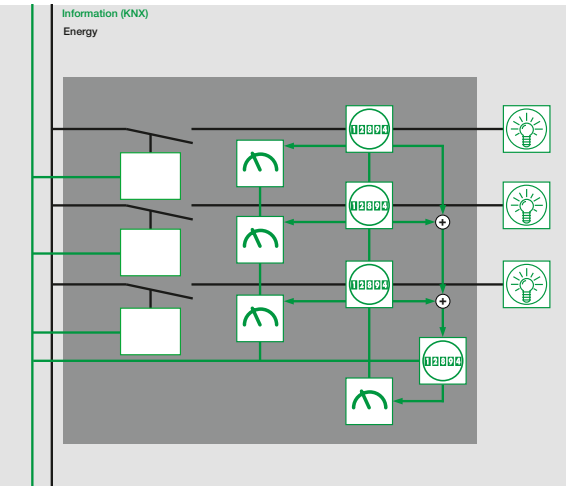
Electronic energy meters make the current energy values available on the KNX bus system in conjunction with a KNX interface. The measured data can be intermediately stored, evaluated and visualized from here.

Version 2



The Energy Module can record the energy consumption for the individual devices. It is used particularly when upgrading existing KNX systems and wherever energy measurement is required without switch functions. It facilitates a detailed and transparent insight into the energy consumption of a building. The current meter values can be sent and evaluated.

Version 3



The Energy Actuator facilitates control of the connected consumer loads via the ABB i-bus® KNX. For each of the three switch channels, the individual consumption can be measured in the same way as for the Energy Module. For every channel, the proven functionality of the ABB i-bus® KNX Switch Actuators are available.

ABB i-bus® KNX
Energy Management

SE/S 3.16.1

Energy Actuator, 3-fold, 16/20 AX, MDRC

Records the energy consumption of the connected electrical loads in the load circuit. Various electrical variables can be monitored and load peaks can be limited by simple load control. The 3 output channels can be manually operated and display the current switching state. The Energy Actuator can switch resistive, inductive and capacitive loads The switching capacity corresponds to the SA/Sx.16.6.2.

EM/S 3.16.1

Energy Module, 3-fold, 16/20 AX, MDRC

Measures energy consumption and various electrical parameters in the terminal current. Active power, Current, Voltage and Frequency can be monitored via threshold values and peak loads can be limited through a simple load control. The measured values are provided via ABB i-bus® KNX.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	4	EM/S 3.16.1	2CDG110148R0011		0.2	1

ZS/S 1.1

Meter Interface Module, MDRC

It records consumption and measured values of the electrical energy consumption meters. Using an infra-red interface, the ABB energy meter types of the A- and B-series are incorporated. The information and data which is read can be used, for example, for cost centre accounting, energy optimisation, monitoring of installations and visualisation.

The following values are available (depending on the meter type):

Meter reading

Active energy	Tariff 1-4, total
Reactive energy	Tariff 1-4, total

Power values

Active power	L1, L2, L3, total
Reactive power	L1, L2, L3, total
Apparent power	L1, L2, L3, total
Phase angle power	L1, L2, L3, total
Power factor	L1, L2, L3, total

Instrument values

Voltages	L1-N, L2-N, L3-N, L1-L2, L2-L3, L1-L3
Currents	L1, L2, L3, N

QA/S 3.16.1

QA/S 3.64.1

Energy Analyzer, M-Bus, MDRC*

Compact and web-based stand-alone devices for energy management applications.
For monitoring, logging, displaying and analyzing consumption data of up to 16 or 64 electricity, gas, water or heat meters via M-Bus. Automatic detection for ABB EQ meters (A/B-Series). Access to the device via web browser. The user interface provides graphical analysis functions, e.g. dashboard, historical data, instantaneous values, benchmark functions, cost allocation according to consumer groups and more. For further processing data can be exported cyclically (e.g. every month) via E-mail or upload to FTP server.
Several data sharing options (e.g. Modbus TCP, Rest API) allow the communication with other systems.
* Pure M-Bus Master, no data routing from M-Bus to KNX

ABB i-bus® KNX
Safety and Monitoring

SMB/S 1.1

Fault Monitoring Unit, MDRC

It is used to detect and manage up to 100 fault messages which are processed within the unit and can be forwarded to a display unit. Furthermore, an optical and an acoustic collective status signal is provided. Messages can be acknowledged and data losses can be reported.
The devices support message formats to DIN 19 235: messages with continuous lighting, new value messages with simple flashing light, initial value messages with simple acknowledgement, motor messages. Current values can be centrally scanned.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	2	SMB/S 1.1	GHQ6310085R0111		0.12	1

EUB/S 1.1

EIB Monitoring Unit, MDRC

Monitors up to 100 bus devices in KNX systems, which can be divided into 5 groups. The devices are monitored to ensure their presence and minimum functionality (send and receive). Monitoring can be undertaken based on the physical address or the group address. A total of four different monitoring modes are available. No additional power supply required, the device is powered from KNX bus.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	2	EUB/S 1.1	2CDG110066R0011		0.12	1

BDB/S 1.1

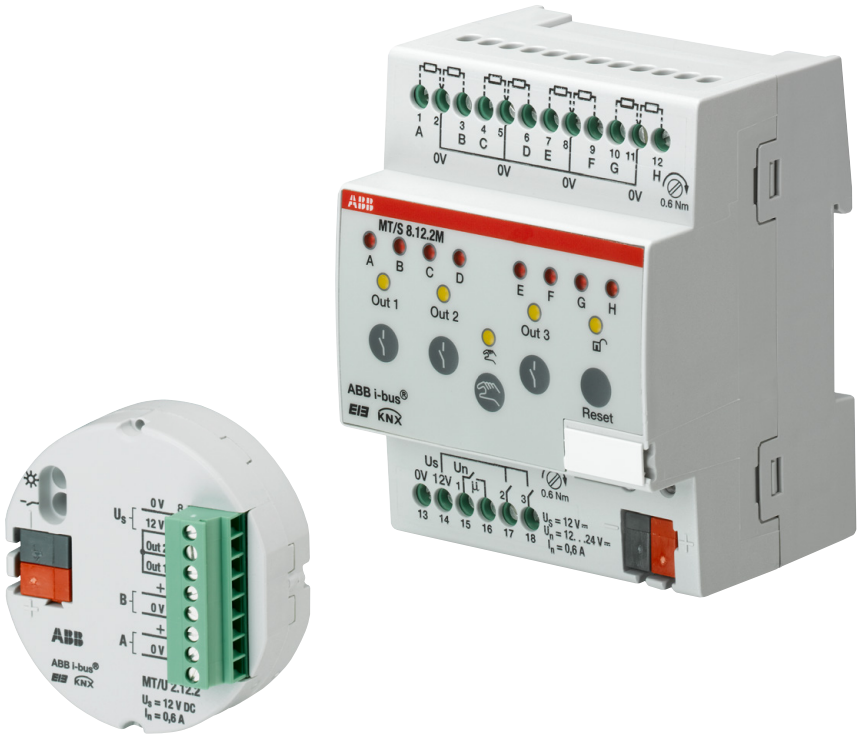
Data Logging Unit, MDRC

It detects local operation cycles and operating hours to plan the maintenance or durability evaluation of the devices. For each of the 35 channels to be monitored, limit values can be set and a message sent if this limit is exceeded. The logging of operating hours can be predetermined for the total or remaining time. These values can be modified via communication objects. No additional power supply required, the device is powered from KNX bus.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	2	BDB/S 1.1	2CDG110067R0011		0.12	1

ABB i-bus® KNX

Security – Alarm System KNX



The compact solution for security applications – the Security Terminals
The Security Terminal provides a compact security solution for KNX applications for detection and signalling of intrusion, personal attack and technical hazards. They are used as the interface between the security technology sensors and KNX.

Depending on the configuration, the devices feature 2, 4 or 8 inputs – so-called detector circuits or zones. They are used for monitoring connected passive detectors (e.g. magnetic contacts, glass break sensors, etc.) to the ABB i-bus® KNX as well as for connection of floating contacts in applications with enhanced security requirements.

Through the connection of security technology and KNX, the detectors employed can, in addition to the security functions, also be used for heating control (e.g. window contact signal for control of the heating valve) or lighting control (e.g. central switch off of the lighting when the alarm logic is set).

The Security Terminals can be used as autonomous systems with the integrated alarm logic, in conjunction with the Security Module SCM/S or with an Intrusion Alarm Panel.

The application program offers several functions for security applications, such as

- Direct and delayed setting
- Internal setting with occupancy and external setting when absent
- Setting of the connected detector types
- Reset input and setting input
- Detector monitoring
- Zones (detector circuits) can be switched off
- Different types of alarms
- Setting for freely programmable relay outputs, e.g. for direct control of signalling devices.

SCM/S 1.1

Security Module, MDRC

The module provides the necessary logic functions to link the various KNX devices (e.g. zone terminals) to a security system. Up to 64 different zones can be evaluated via communication objects. Arming, operation and display are also implemented using communication objects. The device has a freely programmable relay output for connection of a signal encoder. An uninterruptable KNX power supply with battery back-up is recommended for security function buffering on mains failure.

MC-C 1.1

Rolling Door Reed Contact

The Rolling Door Reed Contact Set is mounted mainly on rolling, sliding, and tilting doors.
The contact housing is mounted on the ground (a flat support surface is required).
Only screws made of anti-magnetic material may be used for mounting.
Due to the weatherproof and mechanically stable design of the contact housing, the circuit is mostly protected against damage when rubber-tired vehicles drive over it.
The 4-wire cable is protected by a plastic-coated metal hose.

	–	WRK/W	2CDG250003R0011		0.03	1

TD-C 1.1

Gas Detector with Relay Contact

The Gas Detector is used for monitoring gas leakage of domestic and commercial rooms. It detects gases like propane, methane and butane as well als acetylene, city gas and natural gas. The detector can be connected to ABB intrusion and fire alarm control panels, as well as ABB i-bus® binary inputs via a potential-free relay contact. Suitable as a stand-alone device. An external power supply with 12-24 V DC is required.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	TD-C 1.1	2CDG220023R0011		0.167	1

SWM 4

Water Detector for Detector Groups

A resin-encapsulated water detector with gold-plated Termipoint pins, detects water ingress, e.g., pipe fractures, ingress of groundwater and sewage, water damage caused by washing machines and dishwashers etc. before the damage becomes too expensive.
For operation directly on detector circuits of intrusion alarm panels or security terminals.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	SWM 4	GHQ4030001R0004		0.16	1

SWM 4/RN

Water Detector with Relay, 12 V

Features a potential free changeover contact output, an LED parallel output and a LED display. The detector resets itself automatically when the affected area dries out. The device draws its power from an external 10 ... 23 V DC voltage source.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	SWM4/RN	GHQ4030001R0012		0.23	1

6833/01-84-500

Busch-Smoke Alarm® ProfessionalLine

For early detection of smouldering fires and open fires with smoke development indoors according to the photooptical measurement principle (Tyndall). With installed Lithium battery. Battery life min. 10 years. With test button and muting. Can be networked with up to 12 detectors using the radio module. Can be networked via 2-wire twisted pair cable with up to 12 detectors. Acoustic alarm: installed horn (85 dBA). Cyclic functional test. Including attachment material – VdS certified. Conform to EN 14604 studio white.

PEONIA®

All in one for smarter life

PEONIA® is a highly smart panel integrated with lighting, temperature, electric doors and windows, air conditioning, floor heating, scene and proximity sensors.
All these functions make your life smarter and easier than ever.

reddot award 2019
winner

A unique proximity sensor system that can automatically activate the background lights and scenario mode when you are close to the panel. In addition, the in-built sensor can monitor the temperature. Additional information like PM 2.5, VOC and humidity receive from the KNX bus can be displayed. This information can be displayed on the screen directly. When the air quality is bad, the sensor will open the window and air condition system automatically. This brings convenience and comfort to your daily life.

ABB i-bus® KNX

User Operation – Design Ranges – PEONIA®

PEBR/U2.0.1-201

PEONIA® Control Element, 2/4-fold with Room Temperature Controller, FM
With integrated bus coupling unit and temperature sensor. Proximity sensor, device locking and energy saving function Switch contact left/right. Replaceable rocker without icon.
Push button function: switching/dimming/blind/value sending/step-type switch/ lightscene/ fan function.
With base-load operation.
The controller is a constant room temperature controller for ventilator convectors (fan-coil) in 2 and 4 pipe system and conventional heating and cooling systems.
The fan stage can be switched manually or automatic mode.
Delicated capactive touch RTC control button with vibration feedback, Single/Master/Slave configuration.
LCD display: Setpoint/actual temperature, Fan speed, Operating state, Operating mode.
Configurable: time, PM2.5, CO_2, Humidity, VOC, temperature, Dynamic animation for dimming, blind, scene.
Individual programmable LED per rocker. Top and bottom ambient LED strip.
LED colour: red/green/yellow/blue/red-orange/violet/white.
Temperature range (device): –5 °C to +45 °C. Dimensions (L x W): 86 mm x 86 mm.
For British standard installation only.

Yurika

Versatile, Ingenious in one

The ABB Yurika control element portfolio is a solution built on the open KNX standard, perfectly suited for residential, commercial and hospitality environments.
With a people-oriented design experience in mind, the control element looks simple yet is assembled with a combination of LCD screen with physical push buttons to give the user an intuitive operating experience. The control element can be used for various control functions such as lighting, air conditioning, floor heating, electric doors, blinds, and scenes, etc. At the same time, the flexible configuration and display of digital labels furthermore provide good features that can benefit customers in terms of cost and operation.

ABB i-bus® KNX

User Operation – Design Ranges – Yurika

YUB/U1.0.1-001

Control Element, 1/2-fold, FM

Frameless design with integrated bus coupling unit. Switching rockers on left/right with device locking and energy saving function. Push button function: switching/dimming/blind/value sending/step-type switch/light scene. LCD display Individual configurable: digital labelling and status/orientation illumination. LCD display labelling colour: red/green/blue/orange/white.

Dimensions (L x W): 86 mm x 86 mm. For British standard installation only.

YUBR/U4.0.1-001

Room Temperature Controller with 2/4-fold Control Element, FM

Frameless design with integrated bus coupling unit. Switching rockers on left/right with device locking and energy saving function. Push button function: switching/dimming/blind/value sending/step-type switch/light scene. LCD display Individual configurable: digital labelling and status/orientation illumination. With base-load operation. The controller is a room temperature controller suitable for ventilator convectors (fan-coil) in 2 and 4 pipe system heating and cooling systems, Variable Refrigerant Flow system (VRF/VRV), Floor heating system and Fresh air system. Fan stage adjustable from the controller. Deliciated RTC control button for easy access, can operate in Single/Master/Slave configuration. LCD display RTC: Setpoint/actual temperature, Fan speed, Operating state, Operating mode. LCD Sub display configurable: time, PM2.5, CO_2, Humidity, VOC, temperature. LCD display labelling colour: red/green/blue/orange/white. Temperature range (device): –5 °C to +45 °C. Dimensions (L x W): 86 mm x 86 mm. For British standard installation only.

Notes

ABB tacteo®
A smart sensor for everything

The extra-flat KNX sensor fits into any environment

Flat and theft-proof
The frameless and extra-flat KNX sensor with a diameter of 9.5 mm sits almost flush with the wall and blends harmoniously into any wall design. Peace of mind is provided by the optional removal guard, which protects the KNX sensor from theft.

Secure access control for the hospitality industry

Hotel access control
The ABB tacteo® KNX range offers secure access control for the hospitality industry. It is particularly practical that the sensor performs all of a hotel's management tasks, which can be controlled from a central point such as the reception desk.

The capacitive glass sensors react without contact

Intuitive operation
The capacitive KNX glass sensors react without any touch or contact. When moving your hand towards the sensor, the status lighting switches on automatically. On the other hand, touching the sensor with the entire palm of your hand triggers a preprogrammed function – such as "switching on the light". With a tap of the finger the desired function can be activated. Easy operation is also ensured by the tried-and-tested colour control concept.

ABB i-bus® KNX

User Operation – Design Ranges – ABB tacteo®

Touch Control Element with Bus Coupler, FM

Freely configurable multifunction control element. The icons and/or texts are configured by means of a web configuration tool. With integrated KNX bus coupler. With integrated temperature sensor and proximity function. Push switch function: switching / dimming / blind / sending values / scenes etc. Support of KNX functions through innovative colour concept (yellow=lighting, blue=blind, orange=RTC, magenta=scene and white=neutral/no function assigned) or standard illumination red/green. The bus connection is provided via the enclosed bus terminal.

TBR/U4.7.1-CG

TBR/U4.8.1-CG

Touch Control Element with Room Temperature Controller and Bus Coupler, 4-fold, FM

Freely configurable multifunction control element. The icons and/or texts are configured by means of a web configuration tool. Support of KNX functions through innovative colour concept (yellow=lighting, blue=blind, orange=RTC, magenta=scene and white=neutral/no function assigned) or standard illumination red/green. Rocker switch left/right (switching/dimming/blind/value sender/light scenes/fan function). The controller is a constant room temperature controller for ventilator convectors (fan coils) in 2-pipe and 4-pipe systems and conventional heating or cooling systems. The fan stage can be switched manually or in automatic mode. Class of temperature controller 1. Contribution to space heating energy efficiency 1.0 %. With integrated KNX bus coupler.

TZE/U.0.1.CK

Removal protection for Control Elements

Prevents the disassembly of ABB Tenton® and Busch tacteo® control elements, room temperature controllers, external room sensors and movement detectors.
The tool with the mounted removal protection is disassembled using mounting tool TZW/U.x.x-CK.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	TZE/U.0.1.CK	2CKA006300A1633			

TZE/U.0.2.CK

Removal protection for access control devices for squared, horizontal and room number glass versions

Prevents the disassembly of ABB tacteo® card holders, card readers and external room sensors with/without card readers and room numbers.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	TZE/U.0.2.CK	2CSY245271S3601			

TZE/U.0.3.CK

Removal protection for access control devices for vertical glass versions

Prevents the dismantling of ABB tacteo® card holders, card readers and external room sensors with/without card readers and room numbers.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

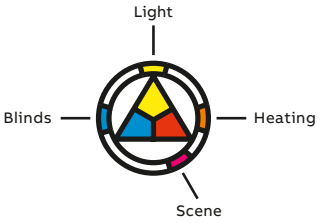
ABB i-bus® KNX

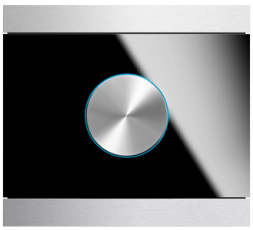
User Operation – Design Ranges – Busch-priOn®

Busch-priOn® allows you to control and monitor functions for the entire room. Light, scenes, timer, blind control unit, heating control unit – all functions are controlled simply and intuitively via a rotary dial, and freely programmable functions can be called up via the rocker switches.
Busch-priOn® is a non-fixed, modular concept.



Colours that make life easier.
A consistent colour coding concept and durable LED technology make Busch-priOn® extremely easy to operate. The dial lights up in the colours of the coding system, thus providing feedback on the function currently selected. Yellow stands for lighting, blue for the blind control unit, magenta for light scenes and orange for the heating control unit. These colours are also found on the rocker switches of the control element panels.

01

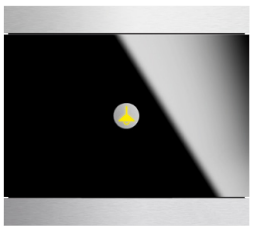


The rotary control element is equipped with a freely programmable button which can be pressed and turned. It can be used to switch and dim individual lamps, but also to switch on whole groups of lamps with one press of a button and vary their brightness continuously via the dial.

Function
Dimming | Blinds | Value | Light scenes | Logic functions | Time functions

Features
Illuminated dial | Colour coding concept | Anti-theft protection | Day/night operation

02



The single control element is equipped with a freely programmable “large” operating button. It can be assigned to one topic and can carry out a maximum of two commands.

Function
Switching | Dimming | Blinds | Value | Buttons | Light scenes | Logic functions | Time functions

Features
Illuminated rocker switch | Colour coding concept | Freely programmable control button | Anti-theft protection | Replaceable labelling symbol (Fig. shows Lighting labelling symbol)

03

The triple control element is equipped with 3 freely programmable control buttons. Each can be assigned to one topic and can carry out a maximum of two commands.

Function
Switching | Dimming | Blinds | Value | Buttons | Light scenes | Logic functions | Time functions

Features
Illuminated rocker switches | Colour coding concept | Freely programmable control buttons | Anti-theft protection | Replaceable labelling symbol (Fig. shows labelling symbols Lighting, Blinds and Scene)

reddot design award
best of the best 2008

Busch-priOn® received special commendment in the category “best of the best,” winning the “red dot award: communication design 2008” for its interface design.

01 Rotary control element
02 1 gang control element
03 3 gang control element

01

A single-line display with integrated room temperature controller has been designed for the Busch-priOn® 3 gang control element, technically reduced to the basics and optically elegant. It is particularly easy to read due to the monochromatic design for white on black information. The room temperature controller, information function like time and date, up to 17 freely programmable text displays, IR sensor and proximity sensor have been integrated into the display. The design of the display is available in the colour and material “glass black” only.

02

Busch-priOn® is ideal in combination with the carat® switch series, which has surfaces in the same design.

03

The Busch-priOn® flush-mounted movement sensor can be used individually or with other Busch-priOn® modules. Practical because users thus do not have to look for the light switch and are greeted with light when first entering a dark room.

6351/08-825-500

Top End Strip with Display, Room Thermostat, IR Receiver and Proximity Sensor, Busch-priOn®

Top end strip for installation on 1 gang to 3 gang support frame (6346/10-101, 6346/11-101 and 6346/12-101). With integrated IR receiver for control using the Busch remote control 6010-25 or 6020-.../6121... and integrated proximity function. For heating and cooling (PI, PWM or 2-point). For control of up to 5-level ventilation actuators. With manual adjustment of fan levels. Master/slave configuration. With base-load operation. Display of up to 17 functions as text and/or icon. Only in connection with 1 gang rotary control element (6341-xxx-101) and 3 gang control element (6342-xxx-101) possible. Incl. 10 logic channels (light scene actuator, sequence actuator, logic gates, etc.). Detection range: frontal: 0.5 m, lateral: 0.5 m. Detection angle: 100°. Mounting height: 1.1 m. Protection class (Device): IP 20. Temperature range (Device): –5 °C to +45 °C.
Dimensions (L x W x D): 33.4 mm x 106.6 mm x 15.5 mm

ABB i-bus® KNX

User Operation – Design Ranges – ABB Tenton®

Living and working with a feeling of well-being.
And here the air in the room is one of the most important factors. Because the body takes an ideal temperature for granted and therefore easily reacts to changes. Heated or air-conditioned rooms can be optimally adjusted – to a consistently pleasant ambience.

The KNX ABB Tenton® for stand-alone applications.
The ABB Tenton® with display is a room temperature controller for ventilator convectors or conventional systems for heating and cooling. This option offers complete air-conditioning for rooms. The temperature can be adjusted precisely for personal comfort. The fan speeds can be selected by push buttons. Even very large rooms can be heated or cooled to a comfortable temperature quickly – with additional air-conditioning units. The KNX ABB Tenton® can be operated individually. The bus coupler is integrated into the control element.

Function
- Temperature sensor
- RTC setting
- Illuminated display
- Fan Coil operation for heating and cooling

Features
- Very easy to operate with large, clear display
- Complete air conditioning
- Fan speeds can be manually selected
- Integrated bus coupler
- Surface-mounted, independent switching program
- Available in four modern colours

ABB i-bus® KNX

User Operation – Design Ranges – ABB Tenton®

SBS/U6.0.1-84

Control Element with RTC Slave Unit, 6-fold

Freely configurable multifunction control element. Room Thermostat slave with max. 6 gang control. With labelling field. Transparent labelling sheet with standard symbols included in delivery. Support of KNX functions through innovative colour concept (yellow=lighting, blue=blind, orange=RTC, magenta=scene and white=neutral/no function assigned) or standard illumination red/green. Rocker switch left/right (switching/dimming/blind/value sender/light scenes/fan function). With integrated temperature sensor. With actual value temperature display. With display of set-value temperature. The bus can be connected via enclosed terminal block.

SBC/U6.0.1-84

RTC with CO_2/Humidity Sensor and Control Element

Control element with room temperature controller function and CO_2/moisture/air pressure sensor. With integrated KNX bus coupler. With labelling field. Support of KNX functions through innovative colour concept (yellow=lighting, blue=blind, orange=RTC, magenta=scene and white=neutral/no function assigned) or standard illumination red/green. Push switch function: switching / dimming / blind / sending values / scenes etc. For activating heating, ventilation and fan coil actuators. Master/slave configuration. With base-load operation. The fan stage can be switched manually or in automatic mode. Class of temperature controller 1.

ABB Trevion®

A touch of perfection

Design and functionality have never been so in sync! ABB Trevion®'s display and control elements match many of our switch design ranges. With its innovative swipe - and rotation functions, animated light guide, and customizable display and control elements, it adds a touch of perfection to any home! **solutions.abb/trevion**

Let's write the future. Together.

ABB i-bus® KNX

User Operation – Design Ranges – ABB Trevion® Busch-balance® SI

SD/U12.55.1-825

Touch Display 2.4", 55 x 55 mm, FM
Freely programmable touch panel 1 – up to 12-fold featuring a 2.4-inch IPS screen with 240*240 resolution that offers home control and monitoring of the free@home, or KNX system. Control, observe and manage your entire installation on one device: Switching - Dimming - Slider - Blind - RGBW control element - Step switch - Scene switch - Display element - Audio control element. With scene function, logic functions, presence simulation and time programs. The device supports KNX Data Secure.

KNX functions:
- A total 12 control elements are displayed on a maximum of 12 pages
- 12 fault and alarm messages
- 10 logic functions
- 10 weekly timers
- 10 scene actuators
- 1 integrated temperature controller (RTC)
- Page display with a maximum of 4 touch surfaces on one page
- Primary function
- Integrated temperature sensor
- Haptic feedback
- Proximity sensor
- Brightness sensor
- 1 binary input or external temperature sensor input (PT1000/6226/T)

External power supply needed: 20-32 V DC (SELV)
Number of bus subscribers: 1
Optional Removal protection: TZE/U.0.xx.CK

Display size: 6.10 cm (2.4")
Display resolution: 240*240
Display screen: IPS display
Dimensions (L x W x D): 55 mm x 55 mm x 32 mm
Display surface: glass black (-825)

Class of temperature controller 1 Contribution to space heating energy efficiency 1.0 %.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

KK/U4.55.1

Control Element, 55 x 55 mm
Freely configurable multifunction keypad 1- up to 4-fold with acoustic feedback. Communication over separat bus coupler unit (BA/U1.0.1). Operation via tapping or swiping of the parametrized functions, e.g., switching, dimming, blind / shutter control, scene.
The device supports KNX Data Secure.

- Primary function
- Integrated temperature sensor
- Buzzer for acoustic feedback
- Support of functions/status through innovative RGB light guide concept
- Day/night mode
- Orientation light
- Alarm function supported over light guide and acoustic feedback, e.g. 5 logic channels for KNX
- Light scene actuator
- Logic gates, etc.
- Sequencer
- Staircase function

Optional Removal protection: CSE/U0.1.xx.CK
Number of bus subscribers: 1

ABB i-bus® KNX

User Operation – Design Ranges – ABB Trevion® Busch-art linear®/ALBA®Touch

SD/U12.70.1-4015

Touch Display 2.4", 70 x 70 mm, FM
Freely programmable touch panel 1 – up to 12-fold featuring a 2.4-inch IPS screen with 240*240 resolution that offers home control and monitoring of the free@home, or KNX system. Control, observe and manage your entire installation on one device: Switching - Dimming - Slider - Blind - RGBW control element - Step switch - Scene switch - Display element - Audio control element. With scene function, logic functions, presence simulation and time programs. The device supports KNX Data Secure.

KNX functions:
- A total 12 control elements are displayed on a maximum of 12 pages.
- 18 fault and alarm messages
- 10 logic functions
- 10 weekly timers
- 10 scene actuators
- 1 integrated temperature controller (RTC)
- Page display with a maximum of 4touch surfaces on one page
- Primary function
- Integrated temperature sensor
- Haptic feedback
- Proximity sensor
- Brightness sensor
- 1 binary input or external temperature sensor input (PT1000/6226/T)

External power supply needed: 20-32 V DC (SELV)
Number of bus subscribers: 1
Optional Removal protection: TZE/U.0.xx.CK

Display size: 6.10 cm (2.4")
Display resolution: 240*240
Display screen: IPS display
Dimensions (L x W x D): 69.5 mm x 69.5 mm x 32 mm
Display surface: glass black (-825)

Class of temperature controller 1 Contribution to space heating energy efficiency 1.0 %.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

ABB i-bus® KNX

User Operation – Design Ranges – ABB Trevion® Busch-art linear®/ALBA®Touch

KK/U4.70.1

Control Element, 70 x 70 mm
Freely configurable multifunction keypad 1- up to 4-fold with acoustic feedback. Communication over separat bus coupler unit (BA/U1.0.1). Operation via tapping or swiping of the parametrized functions, e.g., switching, dimming, blind/shutter control, scene.
The device supports KNX Data Secure.

- Primary function
- Integrated temperature sensor
- Buzzer for acoustic feedback
- Support of functions/status through innovative RGB light guide concept
- Day/night mode
- Orientation light
- Alarm function supported over light guide and acoustic feedback, e.g. 5 logic channels for KNX
- Light scene actuator
- Logic gates, etc.
- Sequencer
- Staircase function

Optional Removal protection: CSE/U0.1.xx.CK
Number of bus subscribers: 1

User Operation – Design Ranges – saga touch™

SD/U12.55.1-825

Touch Display 2.4", 55 x 55 mm, FM
Freely programmable touch panel 1 – up to 12-fold featuring a 2.4-inch IPS screen with 240*240 resolution that offers home control and monitoring of the free@home, or KNX system. Control, observe and manage your entire installation on one device: Switching Dimming Slider Blind RGBW control element Step switch Scene switch Display element Audio control element. With scene function, logic functions, presence simulation and time programs. The device supports KNX Data Secure.

KNX functions:
- A total 12 control elements are displayed on a maximum of 12 pages.
- 12 fault and alarm messages
- 10 logic functions
- 10 weekly timers
- 10 scene actuators
- 1 integrated temperature controller (RTC)
- Page display with a maximum of 4 touch surfaces on one page
- Primary function
- Integrated temperature sensor
- Haptic feedback
- Proximity sensor
- Brightness sensor
- 1 binary input or external temperature sensor input (PT1000/6226/T).

External power supply needed: 20-32 V DC (SELV)
Number of bus subscribers: 1
Optional Removal protection: TZE/U.0.xx.CK

Display size: 6.10 cm (2.4")
Display resolution: 240*240
Display screen: IPS display
Dimensions (L x W x D): 55 mm x 55 mm x 32 mm
Display surface: glass black (-825)

Class of temperature controller 1 Contribution to space heating energy efficiency 1.0 %.

ABB i-bus® KNX

User Operation – Design Ranges – saga touch™

KK/U4.55.1

Control Element, 55 x 55 mm
Freely configurable multifunction keypad 1- up to 4-fold with acoustic feedback. Communication over separat bus coupler unit (BA/U1.0.1). Operation via tapping or swiping of the parametrized functions, e.g., switching, dimming, blind/shutter control, scene.
The device supports KNX Data Secure.

- Primary function
- Integrated temperature sensor
- Buzzer for acoustic feedback
- Support of functions/status through innovative RGB light guide concept
- Day/night mode
- Orientation light
- Alarm function supported over light guide and acoustic feedback, e.g. 5 logic channels for KNX
- Light scene actuator
- Logic gates, etc.
- Sequencer
- Staircase function

Optional Removal protection: CSE/U0.1.xx.CK
Number of bus subscribers: 1

ABB i-bus® KNX

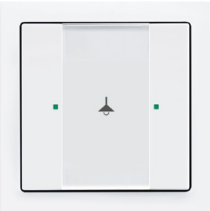
User Operation – Design Ranges – Standard Control Elements

The standard control elements are available as 1/2 gang, 2/4 gang or 4/8 gang models. Every switch rocker has two LEDs, which display the status of the connected loads. The separate switch rockers are freely programmable and are suitable for switching and dimming, and also for operating blinds and as a light scene extension unit.

They can also be used in commercial applications. Anti-theft protection has also been integrated – an important factor for installations in public areas.

Customised text. Pictograms can be applied to push buttons for easier orientation. A clear text template with standard symbols is included for every sensor. The self-explanatory pictograms are available for the complete range of building control technology and if necessary can be easily replaced. If the appropriate symbol is not included, the push buttons can be labelled as desired. The related bus-coupler unit is included in delivery.

01



Function
Switching | Dimming | Blinds | Push-button | Value transmitter | Light scene extension unit

Features
Labellable switch rockers | Anti-theft protection | Freely programmable switches | Status/orientation light (red/green/OFF)

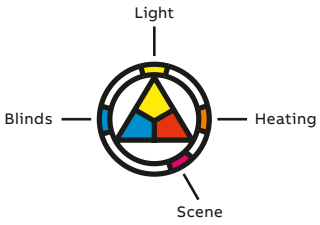
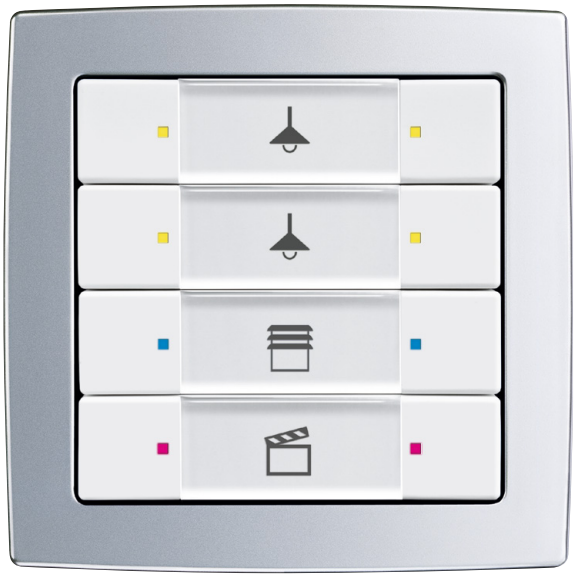
ABB i-bus® KNX

User Operation – Design Ranges – Multifunction Control Elements

The multifunction control elements with LED colour code concept meet the highest demands for comfort and technology. They each come with two RGB LEDs per rocker switch, which conform to a consistent colour concept. This makes the function obvious at a glance, and the surfaces can be additionally fitted with pictograms. Each side of a rocker switch can be occupied with its own function – each for calling up one light scene, for instance. This turns a 4 gang control element into an 8 gang control element.





01	Multifunction control element 1/2 gang
02	Multifunction control element 2/4 gang
03	Multifunction control element 4/8 gang
04	Multifunction control element 2/4 gang, integrated room thermostat
05	Multifunction control element 3/6 gang with IR reception
06	FM movement detector standard
07	FM movement detector comfort

01

Function
Switching | Dimming | Blinds | Push-button | Value transmitter | Light scene extension unit | Step-type | Multiple operation | Logic function (including light scenes)

Features
Labellable switch rockers | Anti-theft protection | Freely programmable switches | LED colour code concept

02

Function
Switching | Dimming | Blinds | Push-button | Value transmitter | Light scene extension unit | Step-type | Multiple operation | Logic function (including light scenes)

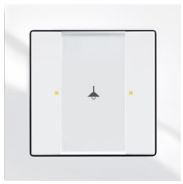
Features
Labellable switch rockers | Anti-theft protection | Freely programmable switches | LED colour code concept

03

Function
Switching | Dimming | Blinds | Push-button | Value transmitter | Light scene extension unit | Step-type | Multiple operation | Logic function (including light scenes)

Features
Labellable switch rockers | Anti-theft protection | Freely programmable switches | LED colour code concept

Wide range. Different shapes, colours and materials fulfil every requirement. KNX control elements are available in the carat®, pure stainless steel, solo®, Busch-axcent® and future® linear programmes. The complete range of conventional switches from these series is available, so there are no limits to the options for combining KNX components.



04

ABB i-bus® KNX

User Operation – Design Ranges – Multifunction Control Elements

Control Element, Multi-function/colour concept
For BCU 6120/12-101-500 or 6120/13-500. With labelling field. Support of KNX functions through innovative colour concept or standard illumination red/green. Push switch function: switching/dimming/blind/sending values/scenes etc. Transparent labelling sheet with standard symbols included in delivery. Incl. 10 logic channels (light scene actuator, sequence actuator, logic gates, etc.). Display elements: Two LED per rocker via separate communication object for status (Red/Green/OFF) or orientation light.

User Operation – Design Ranges – Movement Detectors

64765-81-500

Busch-Comfortswitch® flex Control Element Movement sensor with LED Orientation light **NEW**

Control element with movement detector. For switching lighting systems that depend on brightness and movement. With select lens, prevents detection of smaller animal. Push switch function possible at all times. With notice LED when manual operation is necessary. Extension of the detection range by main unit/extension unit combination. Control element: 2 controllers for setting the brightness switching threshold and switch-off delay. Additional activation/deactivation option via push-button input on the flush-mounted insert. Adjustable operating mode: automatic mode, automatic (motion-controlled) switch-on and switch-off. Adjustable operating mode: semiautomatic, manual switch-on, automatic (timer and movement-controlled) switch-off. Adjustable operating mode: automatic mode, automatic switch-on, manual switch-off. With continuous light/continuous Off function. Adjusting elements on rear side. Surveillance density: 9 sectors with 28 switching segments. Switch off delay: 1 to 10 min., adjustable.

Busch-Watchdog 180 flex Multi sensor with select lens Movement sensor white **NEW**
Movement detector with measurement of ambient light. For automatic switching of devices dependent on motion and brightness. Push switch function possible at all times.
For detection down to the floor. For detection in stairwells. With 4 detection levels.
Multi-lens: suitable also for mounting heights of 2.20 m. Extension of the detection range by means of master/slave combination. With continuous light/continuous Off function.
With brightness-independent test mode for evaluating the detection zone. With detection display in test mode. Surveillance density: 54 sectors with 224 switching segments.
Switch-off delay: approx. 10 sec - 30 min or short-time pulse 1 sec adjustable.

ABB i-bus® KNX

User Operation – Design Ranges – Room Thermostats

6128/28-884-500

Room Thermostat with Display and 2/4-fold Switch Sensor, FM
For ABB i-bus® KNX bus coupler 6120/12-101-500, 6120/13-500. Support of KNX functions through innovative colour concept (yellow = lighting, blue = blind, orange = RTC, magenta = scene and white = neutral/no function assigned) or standard illumination red/green. Rocker switch left/right (switching/dimming/blind/value sender/light scenes/fan function). Master/slave configuration. With base-load operation. The controller is a constant room temperature controller for ventilator convectors (fan coils) in 2-pipe and 4-pipe systems and conventional heating or cooling systems. The fan stage can be switched manually or in automatic mode. Transparent labelling sheet with standard symbols included in delivery. Incl. 10 logic channels (light scene actuator, sequence actuator, logic gates, etc.). Control element: Switch contacts left/right, also for selecting setpoint and mode of operation Display elements: LCD showing operation mode and temperature. Protection class (Device): IP 20. Temperature range (Device): –5 °C to +45 °C. Dimensions (L x W x D): 63 mm x 63 mm.

ABB i-bus® KNX

User Operation – Design Ranges – Push Button Coupling Unit

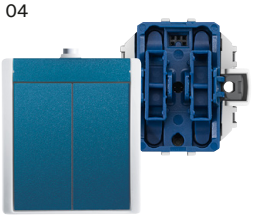
The push-button coupling unit with a centre position offers maximum flexibility. Installed in a flush-mounted wall box, it accepts switch rockers from conventional switch ranges* like a completely standard flush-mounted insert. Covers from all conventional ranges can now be used for KNX. This offers maximum freedom in the selection of the switch range and makes retrofitting easier.

01

02

03

04



Features

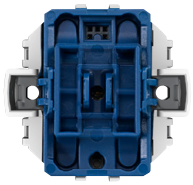
Easy mounting and uncomplicated commissioning
All flush-mounted switch ranges* can be used for the ABB i-bus® KNX
Affordable solution for renovations
Status/orientation light (red/green/OFF)
(only with 1 gang push-button/switches)
Integration in surface-mounted water protected units

01	Push-button coupler 2 gang with integrated bus coupler
02	Push-button coupler 4 gang with integrated bus coupler
03	Push-button coupler 2 gang for ocean with integrated bus coupler
04	Push-button coupler 4 gang for ocean with integrated bus coupler

Design without limits. The push-button coupling unit includes the complete range* of switches for KNX. Switch rockers from all switch ranges can now be converted to KNX push buttons, which not only switch on and off but also dim or show the status with an LED (6108/01 and 6108/04 only). 1 gang and 2 gang models for single and 2 gang switch rockers are available.

KNX – water protected
The push-button coupling unit also allows special products to be used for KNX. Special models for water-protected installation allow covers from, for example, the ocean® surface-mounted range to be used. This means that KNX sensors can also be safely installed in a cellar, outside on a patio or in commercial applications.
Temperature range: –25 °C to +45 °C.

*except impuls, basic55® and All Weather 44 Busch-Jaeger switch ranges only available for selected markets. For further information please contact your local ABB office.



6108/06-AP-500

Push-button coupler 2 gang with integrated bus coupler

For contacting conventional 1 gang rocker switches. With middle position. For inserting in the ocean surface-mounted housing. Enclosed mounting plate for the following ranges: Busch-Duro 2000 SI/SI Linear, Reflex SI/SI Linear, future® linear, alpha, solo®, Busch-axcent®, carat® and pure stainless steel. The bus can be connected via enclosed terminal block.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
1/2-fold	–	6108/06-AP-500	2CKA006133A0225		0.1	1

ABB i-bus® KNX

User Operation – Design Ranges

6109/05-500

Room Temperature Controller with 5 gang Universal Input, FM

Room temperature controller without “local control” and without internal temperature sensor. With universal input with: - max. of 5 binary inputs - 4 binary inputs and 1 analogue input for activating sensors with external power supply 1-10 V/0-10 V - 2 binary inputs and 1 analogue input for activating sensors with external power supply 1-10 V/0-10 V and an external temperature sensor PT1000 / T6226. Master/slave configuration. With base-load operation. The bus can be connected via enclosed terminal block. Class of temperature controller 1. Contribution to space heating energy efficiency 1.0 %.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

ABB i-bus® KNX

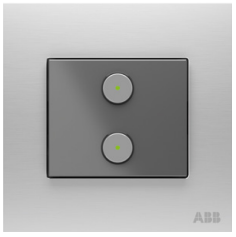
User Operation – Design Ranges – Millenium

The Millenium collection is the first metal range to incorage the KNX system, the most intelligent way of managing spaces and optimizing performance in terms of energy savings. Millenium is based on a combinable concept which creates a very comprehensive range, suitable for any types of needs. This makes it the ideal collection for all types of homes, hotels, offices and shops.

01	Switch Sensor 2 gang KNX
02	Switch Sensor 4 gang KNX
03	Switch Sensor 6 gang KNX
04	Switch Sensor 6 gang KNX with IR
05	Busch watchdog 180° KNX
06	Room Thermostat KNX

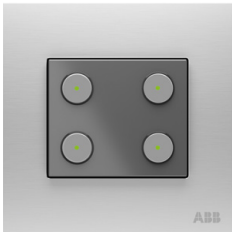
01



Function
Switching | Dimming | Blinds | Sending values | Scenes etc.

Features
Incl. 10 logic channels (light scene actuator | sequence actuator | logic gates, etc.)
Control element: Switch contacts
Display elements: LED to indicate the function

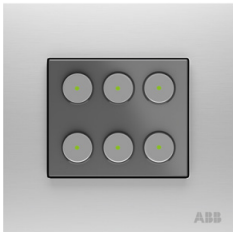
02



Function
Switching | Dimming | Blinds | Sending values | Scenes etc.

Features
Incl. 10 logic channels (light scene actuator | sequence actuator | logic gates, etc.)
Control element: Switch contacts
Display elements: LED to indicate the function

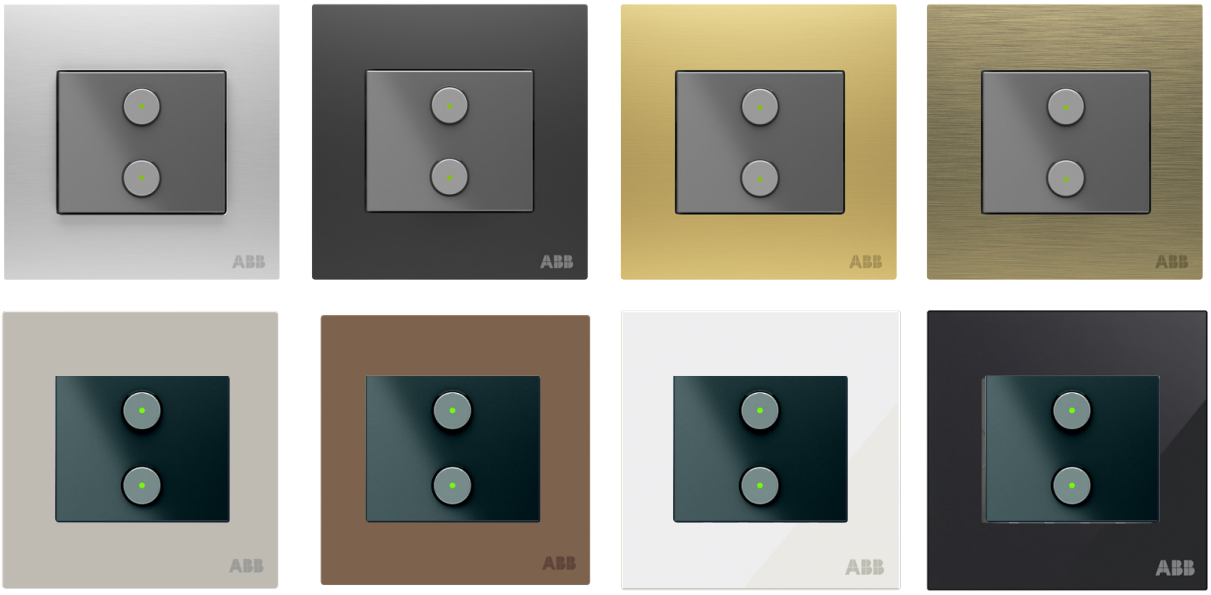
03



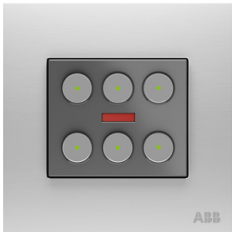
Function
Switching | Dimming | Blinds | Sending values | Scenes etc.

Features
Incl. 10 logic channels (light scene actuator | sequence actuator | logic gates, etc.)
Control element: Switch contacts
Display elements: LED to indicate the function

Wide range. Millenium range offers special mounting plates for KNX sensors to reduce the height and improve the aesthetics for ultra slim design. The KNX sensors allow to replace the buttons with desired symbols in order to adjust the sensors to specific design and needs like light, blind, scene, RTC or fan coil. Millenium offers a wide and elegant choice of finishes in stainless steel material: from the Brush Stainless Steel, to the soft touch given by the Silk Black, and the luxury of the sophisticated gold finishes, Matt Gold and Antique Gold. Moreover, the range is now extended with two glass colors: White and Black glass to cater the luxury segment.



04



Function
Switching | Dimming | Blinds | Sending values | Scenes etc. | 6 gang sensor with IR.

Features
Incl. 10 logic channels (light scene actuator | sequence actuator | logic gates, etc.)
Control element: Switch contacts
Display elements: LED to indicate the function

05

Function
Movement sensor with up to four channels.
Detection range: frontal: 6 m, lateral: 6 m
Detection angle: 180°
Brightness limit value:
5 Lux - 150 Lux
Mounting height: 1.1 m

06

Function
Control element with room thermostat function for triggering the heating, ventilation and fan-coil actuators. The controller is a thermostat for Fan Coil units in 2- and 4-pipe systems and conventional heating or cooling systems. The fan stage can be switched manually or in automatic mode.

Features
Incl. 10 logic channels (light scene actuator | sequence actuator | logic gates, etc.)

Switch contacts for operating mode selection and dial for setpoint or fan speed adjustment.
Display elements: LCD showing operation modes.
Protection class (Device): IP 20
Temperature range (Device): –5 °C to +45 °C

The Millenium range is only available in the following countries: China, Dubai, India, Kuweit, Oman, Qatar, Saudi Arabia, Singapore, UAE and UK.
Frames and special mounting plates for KNX sensores have to ordered by:
ABB, S.A.
Low Voltage Products-Niessen, Oiartzun / Spain
www.abb.es/niessen

AMD5053

Special metal mounting plate for KNX sensors

Allows reduction height of KNX sensors to 1 mm. Only for following items: AMD72053-AN, AMD74053-AN, AMD76053-AN, AMD76153-AN.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
Special metal mounting plate for KNX sensors 1 gang	–	AMD5053	2CLA627190N1001		0.032	1

Notes

ABB i-bus® KNX

User Operation – Design Ranges – Zenit

01	Switch Sensor 2 gang KNX
02	Switch Sensor 4 gang KNX
03	Switch Sensor 6 gang KNX
04	Switch Sensor 6 gang KNX with IR
05	Busch watchdog 180° KNX
06	Room Thermostat KNX

01

Function
Switching | Dimming | Blinds | Sending values | Scenes etc.

Features
Incl. 10 logic channels (light scene actuator | sequence actuator | logic gates, etc.)
Control element: Switch contacts
Display elements: LED to indicate the function

02

Function
Switching | Dimming | Blinds | Sending values | Scenes etc.

Features
Incl. 10 logic channels (light scene actuator | sequence actuator | logic gates, etc.)
Control element: Switch contacts
Display elements: LED to indicate the function

03

Function
Switching | Dimming | Blinds | Sending values | Scenes etc.

Features
Incl. 10 logic channels (light scene actuator | sequence actuator | logic gates, etc.)
Control element: Switch contacts
Display elements: LED to indicate the function

Zenit is based on a combinable concept which creates a very comprehensive range, suitable for any type of needs. Optimizing comfort, safety and efficiency of homes and buildings: Providing with complete comfort solutions to satisfy all type of needs and projects. Ensuring safety and protection of persons and goods. Saving energy by using only the amount of energy required.

Zenit offers two different mounting plates for KNX sensors corresponding to different market standards: VDE and NEMA.

04

Function
Switching | Dimming | Blinds | Sending values | Scenes etc. | 6 gang sensor with IR.

Features
Incl. 10 logic channels (light scene actuator | sequence actuator | logic gates, etc.)
Control element: Switch contacts
Display elements: LED to indicate the function

05

Function
Movement sensor with up to four channels.
Detection range: frontal: 6 m, lateral: 6 m
Detection angle: 180°
Brightness limit value: 5 Lux - 150 Lux
Mounting height: 1.1 m

06

Function
Control element with room thermostat function for triggering the heating, ventilation and fan-coil actuators. The controller is a thermostat for Fan Coil units in 2- and 4-pipe systems and conventional heating or cooling systems. The fan stage can be switched manually or in automatic mode.

Features
Incl. 10 logic channels (light scene actuator | sequence actuator | logic gates, etc.)
Switch contacts for operating mode selection and dial for setpoint or fan speed adjustment.
Display elements: LCD showing operation modes.
Protection class (Device): IP 20
Temperature range (Device): –5 °C to +45 °C

The Zenit VDE range is only available in the following countries:
Spain, Portugal, Russia, France
The Zenit NEMA range is only available in the following countries:
Latin America, Australia, Thailand, Vietnam.
Sensors, frames and special mounting plates for KNX sensores have to ordered by:
ABB, S.A.
Low Voltage Products-Niessen, Oiartzun / Spain
www.abb.es/niessen

ABB i-bus® KNX

User Operation – Design Ranges – Zenit

6125/98-509

1/2-fold sensor

Push switch function: switching / dimming / blind / sending values / scenes etc.
Incl. 10 logic channels (light scene actuator, sequence actuator, logic gates, etc.).
Control element: Switch contacts. Display elements: LED to indicate the function.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit

ABB i-bus® KNX

User Operation – Design Ranges – Zenit

RB/U 1.1

KNX sensor/blind actuator, 1/1 gang, 2M
Push switch function: switching, dimming, blind or scene.
Display elements: LED to indicate the function.
Outputs: 1x change-over contacts/potential-bound
Rated current: 8 A.
To be installed with N2221, N2221.1, N2221.3, N2221.5, N2221.8, N2221.9 or N22 customized rockers.

MATRIX-2 Series

MATRIX-2 Series

Ideal for smaller facilities, the MATRIX-2 Series Control Engine is an embedded building automation network controller designed to provide flexible area control applications to a building energy management system. Interacts seamlessly with protocols such as BACnet MS/TP, Unitron, AAM PUP and Modbus.

Description	Order details	
	Type code	Order code
MATRIX-2 ACE (ASPECT Control Engine) with embedded ASPECT runtime engine and web UI, includes 2 EIA-485 ports, configurable for 9.6 to 115.2 kbps, capable of supporting a 1 device (either MS/TP or TCP/IP) or 750 points. Support for 2 RS-485 protocols (BACnet MS/TP, Modbus RTU, AAM PUP or Teletrol TSC), and a maximum of 64 MS/TP devices per port. One RJ-45 10/100 MB Ethernet port with TCP/IP support for FT/Net, BACnet/IP, Modbus TCP and Cylon UC32.netK. Field upgrade-able to support a maximum of 2,500 points and 128 devices as a combination of either TCP/IP or MS/TP connections.	MAT-11	2CQG100106R1021
MATRIX-2 ACE (ASPECT Control Engine) with embedded ASPECT runtime engine and web UI, includes 2 EIA-485 ports, configurable for 9.6 to 115.2 kbps, capable of supporting upto a total of 16 devices (either MS/TP or TCP/IP) or 750 points. Support for 2 RS-485 protocols (BACnet MS/TP, Modbus RTU, AAM PUP or Teletrol TSC), and a maximum of 64 MS/TP devices per port. One RJ-45 10/100 MB Ethernet port with TCP/IP support for FT/Net, BACnet/IP, Modbus TCP and Cylon UC32.netK. Field upgradeable to support a maximum of 2,500 points and 128 devices as a combination of either TCP/IP or MS/TP connections.	MAT-216	2CQG100102R1021
MATRIX-2 ACE (ASPECT Control Engine) with embedded ASPECT runtime engine and web UI, includes 2 EIA-485 ports, configurable for 9.6 to 115.2 kbps, capable of supporting upto a total of 32 devices (either MS/TP or TCP/IP) or 1,250 points. Support for 2 RS-485 protocols (BACnet MS/TP, Modbus RTU, AAM PUP or Teletrol TSC), and a maximum of 64 MS/TP devices per port. One RJ-45 10/100 MB Ethernet port with TCP/IP support for FT/Net, BACnet/IP, Modbus TCP and Cylon UC32.netK. Field upgradeable to support a maximum of 2,500 points and 128 devices as a combination of either TCP/IP or MS/TP connections.	MAT-232	2CQG100103R1021
MATRIX-2 ACE (ASPECT Control Engine) with embedded ASPECT runtime engine and web UI, includes 2 EIA-485 ports, configurable for 9.6 to 115.2 kbps, capable of supporting upto a total of 64 devices (either MS/TP or TCP/IP) or 1,750 points. Support for 2 RS-485 protocols (BACnet MS/TP, Modbus RTU, AAM PUP or Teletrol TSC), and a maximum of 64 MS/TP devices per port. One RJ-45 10/100 MB Ethernet port with TCP/IP support for FT/Net, BACnet/IP, Modbus TCP and Cylon UC32.netK. Field upgradeable to support a maximum of 2,500 points and 128 devices as a combination of either TCP/IP or MS/TP connections.	MAT-264	2CQG100104R1021
MATRIX-2 ACE (ASPECT Control Engine) with embedded ASPECT runtime engine and web UI, includes 2 EIA-485 ports, configurable for 9.6 to 115.2 kbps, capable of supporting upto a total of 96 devices (either MS/TP or TCP/IP) or 2,000 points. Support for 2 RS-485 protocols (BACnet MS/TP, Modbus RTU, AAM PUP or Teletrol TSC), and a maximum of 64 MS/TP devices per port. One RJ-45 10/100 MB Ethernet port with TCP/IP support for FT/Net, BACnet/IP, Modbus TCP and Cylon UC32.netK. Field upgradeable to support a maximum of 2,500 points and 128 devices as a combination of either TCP/IP or MS/TP connections.	MAT-296	2CQG100105R1021
License file to upgrade any MATRIX-2 ACE (ASPECT Control Engine). Adds support for an additional 8 devices or 250 points. Multiple MAT-LP-8 may be purchased to reach a maximum of 2,500 points and 128 devices as a combination of either TCP/IP or MS/TP connections.	MAT-LP-8	2CQG100101R1021
Charge for field upgrades or moving a licence to a different device when there is no associated hardware or software purchased.	MAT-LIC-CHG	2CQG103703S3021

NEXUS-3 Series

NEXUS-3 Series

The NEXUS-3 is an IoT (Internet of Things) embedded ASPECT® Control Engine designed to provide flexible site control applications for medium to large scale building automation systems.

Description	Order details	
	Type code	Order code
NEXUS ACE (ASPECT Control Engine) with embedded ASPECT runtime engine and web UI, includes 2 RS-485 ports, configurable for 9.6 to 115.2 kbps, capable of supporting up to a total of 64 devices (either MS/TP or TCP/IP) or 4,000 points. Support for 2 RS-485 protocols (BACnet MS/TP, Modbus RTU, or AAM PUP). One RJ-45 10/100/1000 MB Ethernet port with TCP/IP support for FT/Net, BACnet/IP, Modbus TCP and Cylon UC.32 Net. Field upgrade-able to support a maximum of 10,000 points and 128 devices as a combination of either TCP/IP or MS/TP connections.	NEXUS-3-264	2CQG100111R2021
NEXUS ACE (ASPECT Control Engine) with embedded ASPECT runtime engine and web UI, includes 2 RS-485 ports, configurable for 9.6 to 115.2 kbps, capable of supporting up to a total of 128 devices (either MS/TP or TCP/IP) or 8,000 points. Support for 2 RS-485 protocols (BACnet MS/TP, Modbus RTU, or AAM PUP). One RJ-45 10/100/1000 MB Ethernet port with TCP/IP support for FT/Net, BACnet/IP, Modbus TCP and Cylon UC.32 Net. Field upgrade-able to support a maximum of 10,000 points and 128 devices as a combination of either TCP/IP or MS/TP connections.	NEXUS-3-2128	2CQG100110R2021
License file to upgrade NEXUS-264 ACE (ASPECT Control Engine). Adds support for an additional 16 devices or 1,000 points. Multiple NEX-LP-16 may be purchased to reach a maximum of 10,000 points and 128 devices as a combination of either TCP/IP or MS/TP connections.	NEX-LP-16	2CQG100101R2021
Charge for field upgrades or moving a licence to a different device when there is no associated hardware or software purchased.	NEX-LIC-CHG	2CQG103702S3021

ABB Cylon®

ASPECT® Control Engines (ACE) & Supervisor

ASPECT-Enterprise

ASPECT-Enterprise

ASPECT-Enterprise is a server-based variant that provides all of the powerful features of ASPECT, but is installed on specified server hardware. As this solution is hosted by the end-user, it requires no proprietary hardware, but requires the purchase of ASPECT-Enterprise software. This allows the ease of on-site installations and fewer restrictions on requirements. In addition, it integrates with popular Internet programs to allow end- users more freedom. With ASPECT, your PC, tablet, or smart device can integrate with your building easily and efficiently.

Whether the platform is a server running VMware®, a standard server box or complex rack-mountable network appliance, ASPECT-Enterprise provides the capability, security, and the specification to meet the requirements of almost any project at an affordable price.

Description	Order details	
	Type code	Order code
ASPECT-Enterprise software with support for 2 FT/Net connections (ASPECT Control Engines) or 15,000 points. Runs on VMWare. Field upgrade-able to support a maximum of 256 TCP/IP connections or 100,000 points.	ASP-ENT-2	2CQG103202S3021
ASPECT-Enterprise software with support for 12 FT/Net connections (ASPECT Control Engines) or 25,000 points. Runs on VMWare. Field upgrade-able to support a maximum of 256 TCP/IP connections or 100,000 points.	ASP-ENT-12	2CQG103201S3021
ASPECT-Enterprise software with support for 96 FT/Net connections (ASPECT Control Engines) or 50,000 points. Runs on VMWare. Field upgrade-able to support a maximum of 256 TCP/IP connections or 100,000 points.	ASP-ENT-96	2CQG103204S3021
ASPECT-Enterprise software with support for 256 FT/Net connections (ASPECT Control Engines) or 100,000 points. Runs on VMWare. Field upgrade-able to support a maximum of 256 TCP/IP connections or 100,000 points.	ASP-ENT-256	2CQG103203S3021

ABB Cylon®
ASPECT® Engineering

ASPECT®-Studio

ASPECT-Studio

ASPECT-Studio provides a graphical programming tool experience like no other for configuring ASPECT applications. Acting as an integrated development environment for ASPECT products, ASPECT-Studio contains a complete library of logical and graphical “widgets” representing the common tools that are used to engineer sophisticated control strategies for a complete control system and graphical user interface solution.

Using this highly intuitive software environment, users create and define all necessary elements for a project – including network device and point programming, global control sequencing, historical trending, alarming, scheduling, as well as rich graphical user interface pages. Rapid engineering capabilities can be leveraged to minimize labor intensive steps. This includes mass editing options, import and export of networked devices and points, and the ability to create custom Device and Point templates.

As a project is created, you have the ability to evaluate your work through each step of the engineering phase using simulated data, as well as the ability to communicate with defined networks, devices and their associated points. Complete testing prior to the deployment of a project can also be performed using a local simulation of the ASPECT environment. At commissioning time, ASPECT-Studio reduces labor for technicians by automatically generating an HTML5 UI for all defined network devices, allowing smart phone and tablet users to gain access to the energy management system.

Description	Order details

ABB Cylon®

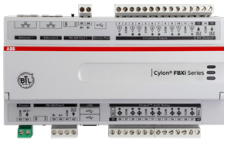
BACnet®/IP Main Plant Controllers



FBXi-8R8-(H)-X96

FBXi Series

The FBXi Series is a range of freely programmable BACnet Controllers with native BACnet/IP communications support. BTL listed (B-BC) with built in advanced cybersecurity technology and multi-protocol support, the FBXi series is ideally suited as integration platform for HVAC equipment and electrical systems including lighting control and metering applications. With support for up to sixteen FLX (Field Level eXpansion) series extension modules equipped with UniPut technology and dedicated FusionAir Sensor port, the FBXi series provides power and flexibility for complex plant applications. Local override function through HOA switches is available on the -H variants.
For medium sized plants, the -8R8 variants feature built-in 8 UniPuts™ with Relay and 8 Universal Inputs.

Description	Order details	
	Type code	Order code
BACnet/IP B-BC programmable controller for control and monitoring of small plant or HVAC equipment. Includes support for 32 Modbus (TCP or RTU) devices or 320 Modbus Points.	FBXi-X48	2CQG201018R1021
BACnet/IP B-BC programmable controller for control and monitoring of small plant or HVAC equipment. Includes support for 32 Modbus (TCP or RTU) devices or 320 Modbus Points.	FBXi-X256	2CQG201014R1021
16 I/O Point (expandable using FLX modules to 96 I/O) BACnet/IP B-BC programmable controller for control and monitoring of small plant or HVAC equipment. Controller features 8 UniPuts™ with Relay outputs (software configurable for AI, AO, DI or DO-R (Relay)) and 8 UI. Includes support for 450 Modbus Points.	FBXi-8R8-X96	2CQG201028R1011
16 I/O Point (expandable using FLX modules to 96 I/O) BACnet/IP B-BC programmable controller with HOA switches and potentiometers for control and monitoring of small plant or HVAC equipment. Controller features 8 UniPuts™ with Relay outputs (software configurable for AI, AO, DI or DO-R (Relay)) and 8 UI. Includes support 450 Modbus Points.	FBXi-8R8-H-X96	2CQG201029R1011

FBTi-6-7T7-1U1R

FBTi Series

The FBTi Series is a family of BACnet Unitary Controller with native BACnet/IP communications support. BTL listed as BACnet Building Controller (B-BC), they perfectly complement the FBVi (IP VAV controller) in the IP terminal unit controller range. Utilizing the patented UniPut technology, it provides reliable and cost effective control solutions for Fan Coil Units, Chilled Ceilings, Heat Pumps and Roof Top Units.
Dual IP ports with failsafe switchover connects the FBTi to any open BACnet network and also provides seamless integration to the ABB Cylon® system.

FBTi-6T1-1U1R

Description	Order details	
	Type code	Order code
16-Point BACnet IP/B-BC programmable controller for terminal applications such as heat pumps, roof top units, fan coils, chilled ceilings, and small air handling units. Controller features 7 UniPuts™ with triac outputs (software configured for AI, AO, DI or DO-T (Triac), 1 UniPut™ without triac output, 7 UI and 1 Digital (Relay) Output. Freely programmable.	FBTi-7T7-1U1R	2CQG201022R1011
9-Point BACnet IP/B-BC programmable controller for terminal applications such as fan coils, chilled ceilings and unit ventilation. Controller features 6 UniPuts™ with triac outputs (software configured for AI, AO, DI or DO-T (Triac), 1 UniPut™ without triac output, 1 UI and 1 Digital (Relay) Output. Freely programmable. ABB Cylon®

BACnet® Main Plant Controllers

CBX Series

CBX Series

The CBX Series is a freely programmable range of BACnet® Controllers with native MS/TP communications support. The controllers are BTL listed BACnet Advanced Application Controller (B-AAC) and are ideally suited for a wide range of applications for intelligent control of HVAC equipment, and electrical systems including lighting control and metering applications. The CBX-8R8 and CBX-8R8-H controllers support multi-protocol communications simultaneously including BACnet MS/TP and Modbus® RTU.
Part of Cylon's CB Line of BACnet field controllers, the CBX-8R8 controller features 8 UniPuts™ with Relay, 8 Universal Inputs, as well as support for up to three FLX (Field Level eXpansion) series extension modules providing up to 64 points of control, and a dedicated input for Cylon's CBT-STAT or UCU Room Display intelligent room sensors. The -H variant provides local override function through HOA switches. FLX I/O expansion modules are available in a variety of options to allow maximum flexibility in achieving the required point configuration.

Description	Order details	
	Type code	Order code
16- Point BACnet® B-AAC programmable controller for control and monitoring of HVAC equipment and plants. Controller features 8 UniPuts™ with Relay outputs (software configurable for AI, AO, DI or DO-R (Relay) and 8 UI. Includes support for 4 Modbus® RTU devices or 40 points.	CBX-8R8	2CQG201003R1021
16- Point BACnet® B-AAC programmable controller with HOA switches and potentiometers for control and monitoring of HVAC equipment and plants. ABB Cylon®

FLX Modules for FBXi and CBX Controllers

FLX

Field Level eXpansion (FLX) modules

The FLX (Field Level eXpansion) series of expansion modules are part of the FBXi and CBX controllers, delivering field expansion of up to 64 points of control.

Replace or Extend I/O Points Quickly and Easily FLX modules snap together without the need for the System Integrator to prepare special cabling, however, when necessary, a cable (FLX-RMC) can be used to extend the FLX modules' range to a total distance of 100 feet (30 meters) from the CBX controller.

Reduce Time On-Site Pre-configuration of FLX expansion modules via the FLX dip switch addressing facility; reduces on-site installation time, simplifies setup and system checks, and reduces the skill level requirement for a hardware upgrade or expansion.

Description	Order details	
	Type code	Order code
8-Point Field Level eXpansion (FLX) I/O module for CBX. Module features 4 UniPuts™ with Relay outputs and 4 UI. A maximum of three FLX modules may be added to a single CBX.	FLX-4R4	2CQG200704R1021
8-Point Field Level eXpansion (FLX) I/O module with HOA switches and potentiometers for CBX. Module features 4 UniPuts™ with Relay outputs and 4 UI. A maximum of three FLX modules may be added to a single CBX.	FLX-4R4-H	2CQG200705R1021
16-Point Field Level eXpansion (FLX) I/O module for CBX. Module features 8 UniPutsTM with Relay outputs (software configurable for AI, AO, DI or DO-R (Relay)) and 8 UI. A maximum of three FLX modules may be added to a single CBX.	FLX-8R8	2CQG200706R1021
16-Point Field Level eXpansion (FLX) I/O module with HOA switches and potentiometers for CBX-8R8. Module features 8 UniPutsTM with Relay outputs (software configurable for AI, AO, DI or DO-R (Relay)) and 8 UI. A maximum of three FLX modules may be added to a single CBX-8R8.	FLX-8R8-H	2CQG200707R1021
16-Point Field Level eXpansion (FLX) I/O module for CBX. Module features 16 Digital Inputs. A maximum of three FLX modules may be added to a single CBX.	FLX-16DI	2CQG200703R1021

Cylon Engineering Centre Programming software licence for BACnet Systems.	CEC-BAC	2CQG203406S3021
Additional licence for use of the Cylon Engineering Centre programming software. Only available once 1M4UC130 has been purchased.	CEC-BAC-ADD	2CQG203407S3021

ABB Cylon®
INTEGRA™ IT-8000 (EMEA & FE)

INTEGRA™ IT-8000 (EMEA & FE)

Part of the INTEGRA™ family, the IT-8000 is an embedded Internet of Things (IoT), BTL-listed BACnet® Building Controller (B-BC) that connects to ABB's Cylon BACnet field controllers. The IT-8000 is also capable of connection to and network management of a variety of diverse devices and subsystems using various protocols including, but not limited to, Modbus™ and LonWorks™.
When connected to an Ethernet or wireless LAN, the IT-8000 uses Internet connectivity and web-serving capability to provide integrated control, supervision, network management, scheduling, data logging, alarming, and rich graphical displays through a standard Web browser.

ABB Cylon®
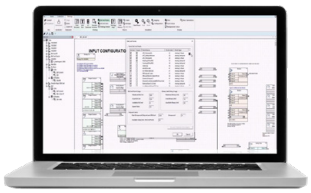
INTEGRA-Supervisor (EMEA & FE)



INTEGRA-Supervisor (EMEA & FE)

BTL-listed as an BACnet Advanced Operator Workstation (B-AWS) and BACnet Operator Workstation (B-OWS), the INTEGRA-Supervisor is an enterprise management server class software solution that connects multiple INTEGRA-based IT-8000 controllers, along with other IP-based controllers and field devices, to be networked together. It serves real-time graphical information to standard web-browser clients and provides server-level functions. These functions include centralized data logging/trending, archiving to external databases, alarming, dashboarding, system navigation, master scheduling, database management and integration with other enterprise software applications through an XML interface (oBIX standard). Additionally, the INTEGRA-Supervisor includes a comprehensive graphical engineering toolset for application development.

Description	Order details	
	Type code	Order code
DEMO VERSION of INTEGRA-Supervisor software for Windows OS. Includes all available drivers. License will renew annually with the receipt of annual support fee. NOTE: Demo Licenses for partner engineering and demo use only. Not for end user sales.	ITS-DEMO	2CQG150501S4061
INTEGRA-Supervisor CSV database driver. Requires ITS-XXX-SUP.	ITS-DR-CSV	2CQG150502S4061
INTEGRA-Supervisor MYSQL database driver. Requires ITS-XXX-SUP.	ITS-DR-MYSQL	2CQG150503S4061
INTEGRA-Supervisor Oracle 11G database driver. Requires ITS-XXX-SUP.	ITS-DR-ORCL	2CQG150505S4061
INTEGRA-Supervisor JSON Toolkit for Supervisor (SMA Required).	ITS-DR-JSON	2CQG150507S4061
INTEGRA-Supervisor software core with support for 0 Niagara network connections. Includes standard drivers. Requires ITS-000-SM0. Typically used to manage TCP/IP field devices (requires ITS-XXX-DIP).	ITS-000-SUP	2CQG153202S4061
Adds one additional Niagara connection to INTEGRA-Supervisor core ITS-000-SUP to ITS-100-SUP.	ITS-001-ADD	2CQG153203S4061
INTEGRA-Supervisor software core with support for 1 Niagara network connection. Includes standard drivers. Requires ITS-001-SM0.	ITS-001-SUP	2CQG153204S4061
INTEGRA-Supervisor software core with support for 10 Niagara network connections. Includes standard drivers. Requires ITS-010-SM0.	ITS-010-SUP	2CQG153209S4061
INTEGRA-Supervisor software core with support for 100 Niagara network connections. Includes standard drivers. Requires ITS-100-SM0.	ITS-100-SUP	2CQG153214S4061
INTEGRA-Supervisor upgrade to ITS-100-SUP from ITS-000-SUP to ITS-010-SUP. Will maintain any ITS-001-ADD that were added to original core (ITS-XXX-N4).	ITS-100-UPG	2CQG153215S4061
INTEGRA-Supervisor Alarm Console client. Support for Niagara alarm monitoring.	ITS-ALM-CNSL	2CQG153218S4061
INTEGRA-Supervisor upgrade from ITS-100-SUP to ITS-UNL-SUP.	ITS-UNL-UPG	2CQG153222S4061
INTEGRA-Supervisor software core with support for unlimited Niagara network connections. Includes standard drivers. Requires ITS-UNL-SM0.	ITS-UNL-SUP	2CQG153221S4061
INTEGRA-Supervisor Device Integration Pack license. Adds support for 500 points to INTEGRA-Supervisor core software (ITS-XXX-SUP). Standard drivers included. Requires ITS-XXX-SUP.	ITS-010-DIP-E	2CQG153232S4061

FA-T

ABB FusionAir Smart Sensor*

The ABB FusionAir Smart Sensor series provides a slim, compact, and visually appealing room control display with a high definition capacitive touch backlit LCD display for use with ABB's Cylon FLXeon and CB Line BACnet field controllers. The intelligent temperature and humidity sensor allow users to view and adjust selected parameters within the field controller to which it is connected. Other sensing options available for integration with the CXproHD control strategy are CO_2 sensing, and contacts for the addition of Passive Infra-Red (PIR) occupancy detection. The ABB FusionAir Smart Sensor display can be used to view control parameters and adjust HVAC, lighting and sunblind set points for the connected controller. The ABB FusionAir Smart Sensor can be installed as part of a multi-sensor application for larger spaces or multiple room connection. The system can also provide a Safe Indoor Environment against pandemic-causing viruses (such as Covid-19) through offering a patented* safe touch-free user interaction with the sensor which gives clear feedback of the safety status in a room.

ABB Cylon®

Displays & Smart Sensors

CBT-STAT

CBT-STAT

The CBT-STAT and CBT-STAT-H provide visually appealing room control display for use with Cylon's CB Line BACnet® field controllers. The intelligent temperature sensor CBT-STAT and the CBT-STAT-H with integrated humidity sensor allow users to view and adjust selected parameters within the field controller to which it is connected. Use of the CBT-STAT(-H) avoids the need for any special tools of software to fully configure and commission a VAV controller. The configuration and commissioning is password-protected to prevent unauthorized changes. Each CB Line field controller automatically detects the presence of the CBT-STAT, and selfconfigures to utilize the CBT-STAT as the control interface. In Engineering Mode, the display can be used as the setup and commissioning tool. The CBT-STAT can be used to setup the communications parameters, all the default settings and do complete balancing of the VAV box.

Emergency lighting
A head of safety

By choosing ABB as your emergency lighting partner, you'll be placing your projects, your systems, and essentially your people, in safe hands.

—
01

—
01 We support emergency lighting projects on all scales

When choosing a partner for emergency lighting, you need a supplier capable of delivering a solution whenever the need arises, whether you're planning a new build project, overseeing an installation, or considering renewal of a long-standing system.

We are a leading life safety solutions provider, delivering state-of-the-art systems and products into the emergency lighting marketplace.

We focus on supporting our customers at all points of the emergency lighting life-cycle, whether planning, installing, managing or renewing.

Years of experience
Supporting emergency lighting projects on all scales, backed by friendly service, technical expertise and our continual drive towards new product innovation makes us the number one choice for emergency lighting.

Construction engineers and installers are assured that orders can be easily placed, deliveries arrive promptly, and that any issues are resolved quickly to a satisfactory outcome.

Our products and services are specifically designed to provide the most effective protection and safety, in line with customer needs, relevant standards and industry regulations. These solutions start at the planning stage for emergency lighting systems, with advice on product selection and system requirements, through to delivery of certified technical drawings.

With project time-lines tight and budgets constrained, choosing the right partner for emergency lighting system design is imperative. We would like to help you in making the right start.

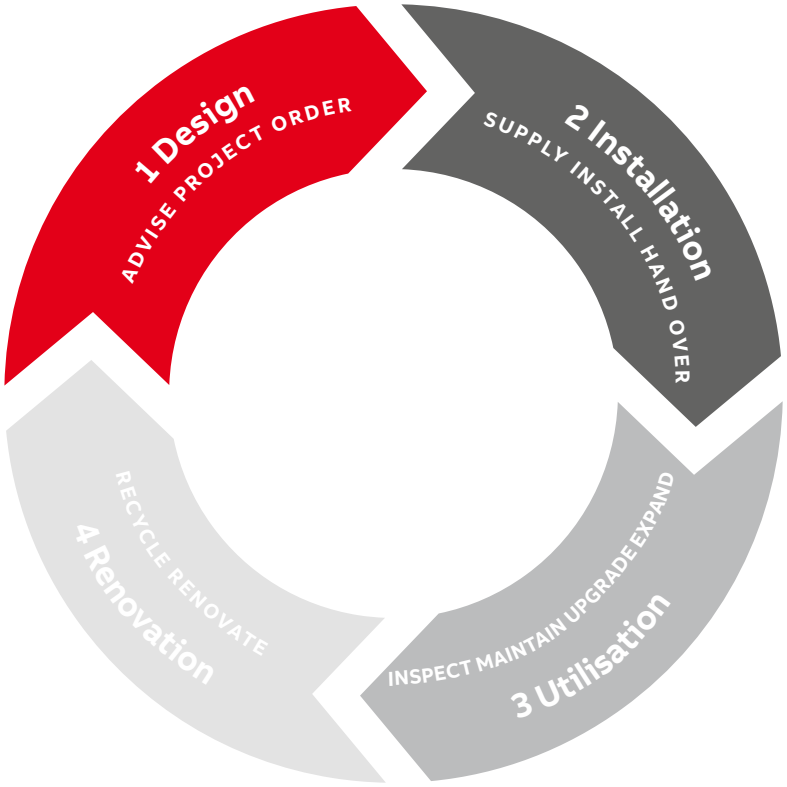
We work at the heart of this complex process, assisting designers, specifiers, and final customers with all manner of emergency lighting needs.

Efficient emergency lighting solutions
Life-cycle

The concept is clear and simple. Providing you a reliable, total solution for safe evacuation. The way in which we do this is what makes the difference.
We offer advantages to everybody involved throughout the life-cycle process. That way, you know that ABB is always the right choice, for both you and your customers.

Advice and information during the design phase
In the design phase, it is important for you to have all the information. If desired, we can provide you with that in the form of specific project advice, based on the most recent regulations, standards and safety requirements. We always offers you the necessary information in the most compact form, so that you quickly have an overview of all the available information.

Speed and materials during the installation phase
Speed and timing are essential during the installation phase, because the easy-to-install materials must be at the construction site at the right time. That is why luminaires are always in stock, or short lead time from the manufacturing facility. If you perform the installation yourself, clear assembly instructions, packaging instructions and a modular system give you a head start.



Support during the utilisation phase
During the utilisation phase, we can advise on your emergency lighting installation and make sure it is aligned with the latest standards. That way, you guarantee optimal safety at minimum utilisation costs, thanks to low energy consumption and easy-to-replace parts and, if necessary, the people who are working, shopping, relaxing or sleeping in the building can quickly and safely find their way out.

Altering and separating during the renovation phase
The new generation of emergency lighting products is ready for the renovation phase. We go further than the normal use of durable, environmentally-friendly, recyclable materials. The products are easy to disassemble and easy to dispose of separately in the legally required return and recycling flows. It is also easy to alter the new generation of luminaires using the individual modules.

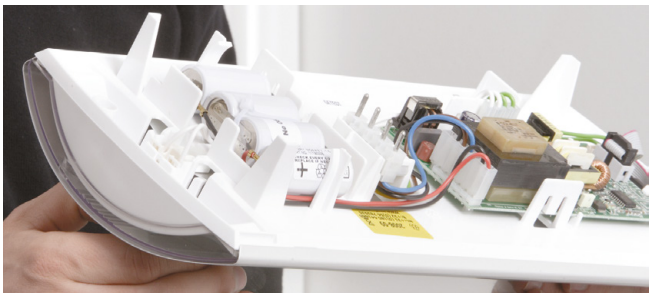
Emergency lighting process
With you every step

During building construction or refurbishment, the focus for emergency lighting shifts from planning and design, to delivery and installation.
We provide solutions that impact at all points of the emergency lighting life-cycle.

—
01 Easy-to-install product range

Easy-to-install product range
Many of our products are engineered to a modular design format, which promotes straightforward, cost-effective installation and maintenance.

Modular design enables First-Fix installation of the key wiring components with later connection of geartrays, diffusers and legends etc, for easy management and replacement of parts.



—
02 Certified technical design

Certified technical design
Central to emergency lighting is the technical design drawing. It defines luminaire positioning and spacing, drives the installation effort and provides the key control for commissioning and approval.

Our technical design team is on hand to advise and assist with design drawings for all types of emergency lighting system, to the latest relevant standards, with full certification for added confidence and peace of mind.

—
03 Project support

Project support
Our project engineers and internal sales support teams are available to provide guidance on products and project updates/delivery schedules etc. This catalogue makes for a great starting point when considering emergency lighting, but is only a small part of our service.

—
04 Project consultation

Project consultation
You can count on us to help with your emergency lighting planning. We offer expert assistance in emergency lighting scheme design, as well as clear, concise advice on product selection. Our dedicated team are able to assist you at your premises, and arrange for emergency lighting schemes to be prepared at our design office.

—
05

—
05 Easy-to-install product range

The purpose of an emergency lighting system is to protect and safeguard life. Once commissioned and in operation, the emergency lighting system must function correctly throughout its lifetime and therefore requires ongoing management, maintenance and testing.

Standards and legislation
The need for testing and servicing is enforced by legislation.

Any faults found need to be rectified as quickly as possible. For many building owners/occupiers, who have legal responsibility for these systems, maintenance, testing and access to replacement parts are of paramount importance. With this in mind, it's clear to see that maintaining the partnership with your emergency lighting supplier, even after commissioning, is highly important.

Our fully certified engineering team can provide, support and advice on maintenance and servicing of emergency lighting.

Maintenance & servicing
Our team of qualified and experienced service engineers are available to service emergency lighting systems and to ensure full working order.

System testing & upgrades
Owner/occupiers are legally obliged to test and maintain emergency lighting.

ABB manufactures a range of testing solutions for self-contained emergency lighting - self-test, NaveoPro wired, NaveoPro wireless, viaFlex and Emex test addressable testing - to accommodate all levels of testing requirement.

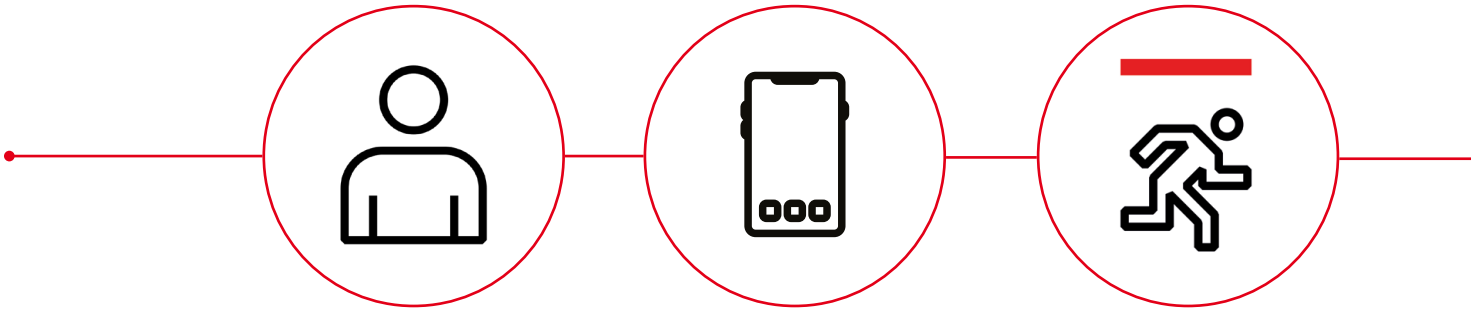
—
Emergency lighting device installed in a modern office

Monitoring and testing
Be prepared for an emergency

Emergency lighting installations must be monitored and tested regularly to ensure they can save lives of building occupants in the event an emergency occurs.



Through intelligent emergency lighting, ABB makes building safety more accessible than ever. With action needing to be taken in a moment's notice during an emergency, functional emergency lighting can mean the difference between getting out of a building safely or struggling to find the closest exit.

To assure safety of public facilities, code and regulation compliance ensures the functionality of emergency lighting, so devices automatically switch on during a power failure. This is implemented by International and North American organizations like the National Fire Protection Association (NFPA) and International Code Council (ICC) which release editions of their code that govern public health and safety.

These organizations establish mandates in which fixtures should be tested every month and year, each fixture is maintained, defective components are replaced, and devices are code compliant.

Nexus®Pro
Solution and benefits

Nexus®Pro is designed to enable building owners and managers to easily maintain and test emergency lighting, without the need to visually verify performance or disrupt the power supply.

With digital solutions, building owners now can have peace of mind knowing their buildings are safer than ever. All operations can be managed remotely, giving building owners and managers complete control wherever they are, whenever they need it most while preventing any human error in the process.

Cost effective
- Reduce labour costs for maintaining emergency lighting
- Saving on cost and labour on manual collection and recording of emergency lighting data
- 200 emergency lighting units on one gateway
- Reduce Monitoring costs by simply receiving notification once there is defective device

User friendly
- Monitor remotely anywhere at anytime
- Fast and easy testing with a smart device
- Interactive 2D floor plan layout showcasing emergency lighting positioning
- Software updates automatically applied
- Easily go from one building to many with our scalable system

Enhanced Safety and Protection
- Comply with Building and Life Safety Codes and other North American regulations
- Real-time self-monitoring and maintenance alerts if units stop functioning
- Holds all emergency lighting testing and maintenance data in a secure ABB cloud
- Ownership of maintenance data input, quick testing and device monthly and annual scheduling

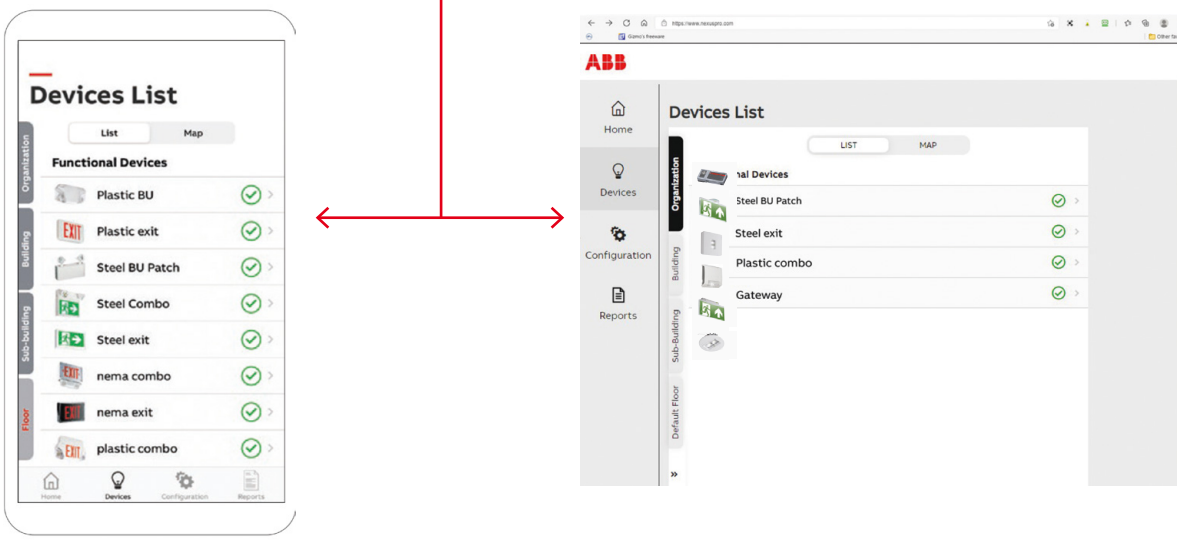
Improve installation efficiency
- Quick and flexible commissioning
- Ease of use due to app configuration
- Get diagnostics and part number recommendations during failures
- Reduce software and firmware upgrade time via remote Cloud operations

Set up
Easily install and add new devices through your smart device

Maintain
Defective devices are automatically detected and reported on your interface in addition to push notifications

Test
Run test instantly or program them to ensure that all your devices are working properly

Share
Easily share the results of tests with team members, maintenance staff and technicians



Nexus®Pro Gateway

A Gateway for each technology

Features

- IoT Gateway designed to deliver Bluetooth® Mesh connectivity
- Gateway can be connected wired or wirelessly to WiFi Routers
- Supports WiFi connections on both 2.4 GHz and 5 GHz frequency bands for added flexibility
- Communicates with up to 200 emergency units
- Supplied with a 24 VDC output
- Suitable for installation indoors in a secure location 0°C to 40°C (32°F to 104°F)
- ROHS compliant
- Gateway supplied with a Din-rail that can also be used for wall installation
- Comes standard with five (5) year warranty

Controller needed to find each devices and estabilish a path	RF network creation instantaneous
More expensive	Cheaper
Web Browser	Mobile and web app
Scheduled tests but not visually listed	Clear visibility on next programmed tests
Email and mobile daily, weekly or monthly	Notifications upon unit failure / malfunction
No layout upload available	2D floor plan with marked unit location
100 units per router	200 units per Gateway, with no gateway limit
Wired Ethernet	Supports Wifi on 2.4 GHz or 5GHz and Wired Ethernet
Intranet connection	Internet connection

DALI emergency lighting
Why use DALI with emergency lighting?

Regular system checks must be carried out to guarantee that any emergency lighting system is fully operational. Emergency lighting with DALI constantly monitors the system, storing reports of any failures or issues and ensuring that the system is 100 percent healthy for the maximum time possible. The health of building occupants is assured, and automatic monitoring reduces maintenance costs.

DALI emergency system key features:
- Central monitoring from touch screen panel
- Report logging software
- Functional and full duration tests
- Faults reported to central computer, reducing maintenance time and costs
- Fully addressable emergency system with central test to BS-EN and IEC standards
- Switching of maintained luminaires, individually or per group
- Scheduled tests can be programmed via the touch screen panel and automatic tests can be staggered minimising disruption to building users and still protecting every area in case of a real emergency
- Based on the international industry standard DALI protocol
- Utilises standard DALI bus wiring

Advantages of using DALI with emergency lighting

1. Proven DALI technology specific for emergency lighting

2. Our DALI solution is based on non-proprietary systems. As long as all components of a system are DALI compliant, they will be able to communicate with each other

3. Cost-effective solution with reduced maintenance costs after commissioning

4. With the addition of the ABB DALI gateway, we can connect our DALI luminaires with KNX systems and BMS

5. DALI (DiiA) Certified

DALI emergency lighting
Safety of emergency lighting

It has never been more important to ensure the safety of a building, because ensuring safety requires full knowledge that the emergency lighting is fully operational and healthy.
DALI emergency is an extension of the DALI protocol, allowing for monitoring of the status of emergency fittings from a touch screen. Proven DALI technology is specific for emergency lighting.

About DALI emergency
DALI - Digital Addressable Lighting Interface - is an open standard defined under EN62386. This standard ensures that all DALI-compatible emergency control systems work in synchronization and that the technology is available to multiple device manufacturers.
DALI emergency lighting is a cost effective monitored emergency system that often betters the traditional systems
As a standalone monitored emergency system DALI emergency can monitor lamp and battery status and advise whether the luminaires are working, faulty, charge levels and hours of use in either normal or emergency operation.

As DALI is a two-way communication protocol, the central control can send commands to the luminaire and they will send back information to the control system.
Its a mandatory requirement that building owners are taking steps to ensure that their emergency lighting installations are routinely tested, with detailed records maintained. The associated labour costs have resulted in the owners of many larger buildings or building complexes investing in automated centralised test systems.
This type of system has also become increasingly popular since changes to the fire regulations now place the legal responsibility for recording these testing procedures solely with the building owners.
The benefits of using DALI central test systems for emergency lighting applications are wide-ranging:
• Increased safety
• Reduced maintenance labour time
• Ongoing monitoring savings

DALI
What is DALI?

DALI (Digital Addressable Lighting Interface) is a data protocol and transport mechanism that was jointly developed and specified by several manufacturers of lighting equipment.

It is essentially a network connected by a pair of cables and powered by a power supply.
The common platform of DALI enables equipment from different manufacturers to be connected together. ABB's DALI is designed to work with all DALI-compliant equipment displaying the DALI logo.
Put simply, DALI (digital addressable lighting interface) is a two-way communication system that brings digital technology to lighting.

An international standard for communication, DALI allows individual ballasts to "talk" to the user and allows the user to "talk" back via DALI controllers.

DALI is a testing and control system that offers both flexibility and reliability.

Bus wiring
In terms of wiring a DALI system also includes the bus wires that are used to connect together the DALI terminals of the various devices in the system.
- Standard 2-core cable (1.5mm2)
- 5-core cable possible to enable power and data
- Polarity free & free wiring topology
- maximum 64 devices per subnet (Hub/Routers)
- maximum 300m cabling
- maximum 250mA device consumption

Control devices
Control devices can provide information to other control devices and can send commands to control gear. Input devices are a type or a part of a control device that provides some information. Application controllers are also a type or a part of a control device and are the decision makers in a DALI system – for example, they can send commands to control gear to modify the lighting or test an emergency lighting system.

Bus power supplies
At least one bus power supply must be present in a DALI system. This is necessary to allow both communications on the bus, as well as to power any bus-powered devices. The bus power supply does not need to be a separate unit – it could be part of another device such as an DALI control unit or a KNX DALI gateway.
ABB has 3 different power supply options.
The central control DALI Touch screen panel or the KNX DALI gateway. Only one power supply is needed in each network.

Control gear
Control gear usually contains the power control circuit to drive lamps, or some other type of output such as on/off switching.

DALI emergency lighting
Testing & monitoring

ABB DALI emergency lighting offers automatic test functions from either a central controller or from the luminaire itself. This ensures you will always know the status of your emergency fitting. Effective monitoring helps to ensure the safety of building occupants and give building owners the peace of mind they require.

—
01 DALI emergency lighting and control system - Normal
—
02 DALI emergency lighting and control system - Error detected

Automatic testing & monitoring
Automatic monitoring includes the status of battery charging and the status of the main power supply. Central testing includes the current battery charge condition, functional tests and duration tests. Test frequencies can be adjusted to meet the requirements of the building or the local regulations. Testing periods can vary from weekly to monthly in the case of function tests, or annually for duration tests.

Function test
A function test that simulates a mains failure and checks the operation of the emergency light from the battery supply. If there is a failure during a function test, the local indicator LED changes its status on the luminaire.

Duration test
A duration test simulates a power failure and checks the operation of the emergency light from the battery supply for the rated duration of the product. Duration tests can be one, three hours or more depending on the local regulations. If there is a failure during a duration test, the local indicator LED alerts you to a problem or, in the case of a system monitored from a central location, the emergency lighting DALI control unit (DCU) will alert by showing an error message. As with all central test systems that require annual duration testing, this is only started after the battery has had an initial uninterrupted 24 hour+ charge period.

Local testing
Function and duration tests are initiated by the emergency light fitting. It performs automatic testing according to the locally stored settings.

Central testing
Function and duration tests are initiated by the DALI control unit and displays results on the screen.

Switching
Maintained luminaires can be switched and grouped.

KNX Integration

Connection via DALI-KNX Gateway to KNX systems

- Central monitoring, testing and control via the KNX building automation through integration of DALI self-contained emergency lighting via the DALI-KNX Gateway
- Alternative to the DALI emergency lighting control unit - ELDCS (both can't be used together)
- DALI-KNX Gateways for 64 and 2x64 luminaires
- Can be combined with DALI luminaires for general lighting
- Additional software required for use

DALI-KNX Gateway with integration in building automation

Naveo®Pro Wired or Wireless
The emergency lighting inspection and maintenance solution

Naveo®Pro is designed to enable building owners and managers to easily maintain and test emergency lighting, without the need to visually verify performance or disrupt the power supply.

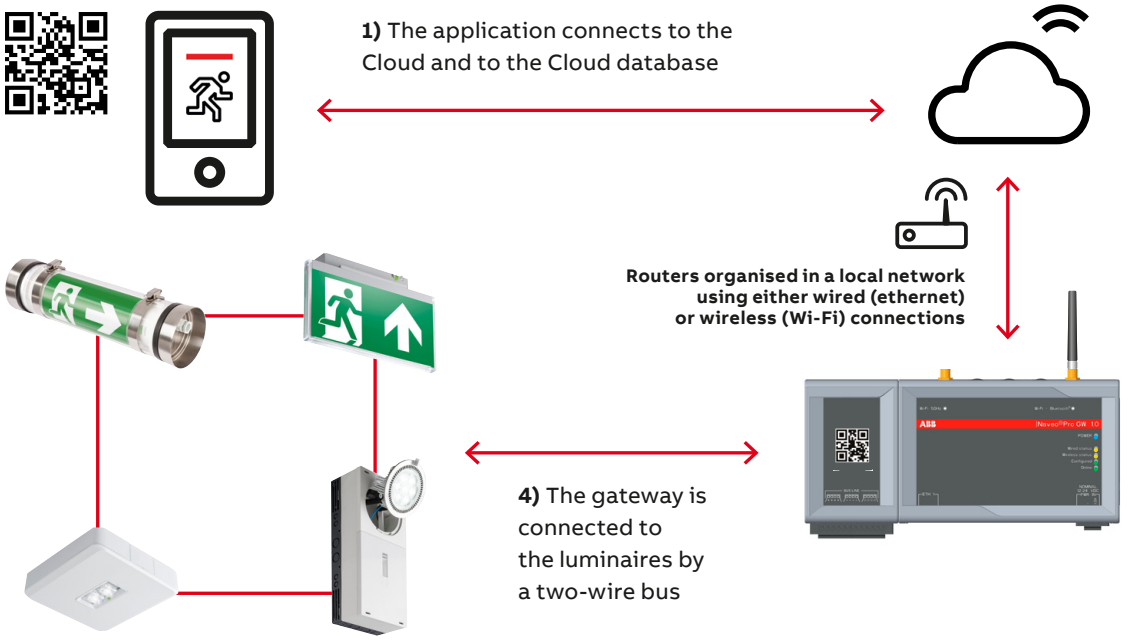
Naveo®Pro Wired

Reliable in critical conditions
The Naveo®Pro Wired solution allows up to 1000-meter distance between the gateway and the luminaires. This solution is highly recommended for large buildings with multiple levels or complex building structures because it allows the connection with the luminaires to be maintained and consistent.

Upgrade your current monitoring system
The Wired solution allows for the replacement of older systems with a modern mobile app compatible system that provide access to the building status 24/7. Benefit from the most up-to-date technological features, such as the highest level of cyber security, the ability to use floor plans, remote control via the app, and more.

Maintain your building' luminaires installation
Building data from existing luminaires connected to the previous Naveo® system can be easily transferred by using the DCP tool in the Naveo®Pro Web Browser interface.

Luminaires are commissioned to the gateway via **QR code**.



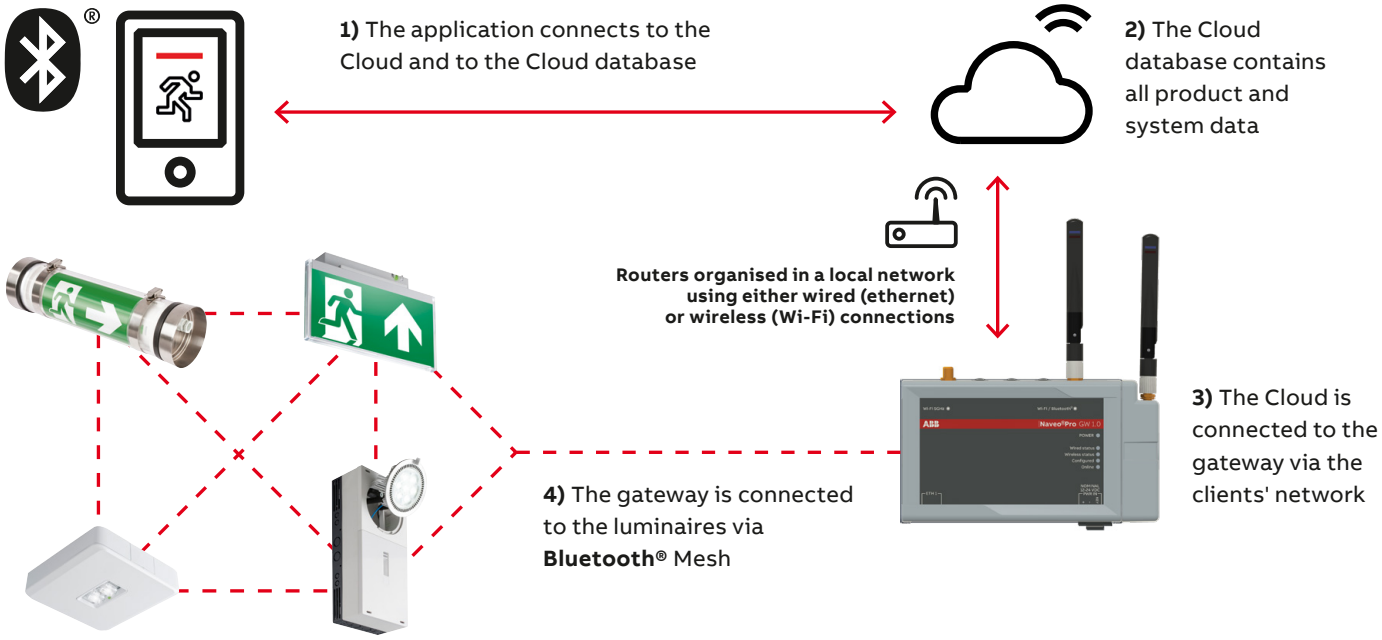
Naveo®Pro Wireless

Convert existing installation to innovative technology
The wireless solution allows for the easy and secure modernisation of buildings. It is recommended that buildings with a self-test system replace their emergency lighting system with Naveo®Pro wireless. This is straightfoward task as no additional cabling is required.

More flexibility to upgrade
Buildings can be easily modified in the future with our Wireless solution in the event of renovations, functional modifications, or extensions without the need for new cabling or expenses. Naveo®Pro Wireless will make maintenance, monitoring, and compliance easier.

A straightforward commissioning process
In buildings, the wireless solution is simple to install. Multiple luminaires are automatically and securely commissioned via Bluetooth®. The repeater's ability to extend the distance and/or signal strength ensures the connection between the luminaires is always maintained.

Luminaires are commissioned to the gateway via **Bluetooth®**.



Naveo®Pro
App and web browser interface

The Naveo®Pro software and gateway works seamlessly with ABB emergency lighting to create a connected lighting infrastructure that makes buildings safer than ever.

With digital solutions, building owners now can have peace of mind knowing their buildings are safer than ever. All operations can be managed remotely, giving building owners and managers complete control wherever they are, whenever they need it most.

The web interface and mobile application allow you to:

- ✔ Monitor your building's installation at any time, independent of your location
- ✔ Plan your inspection, installation and maintenance ahead based on the data you obtain from the system
- ✔ Simple and fast installation and programming of luminaires installed using a QR code or Bluetooth® - for mobile app only*
- ✔ Schedule function and duration test schedules and collect reports
- ✔ Upload your building maps and have status and precise location of each emergency lighting luminaire in your building
- ✔ Order via automatic material list
- ✔ Share test results or status information with others
- ✔ Connect to following third-party devices: fire alarm systems, Central Battery Systems and local alarms through digital inputs/outputs.

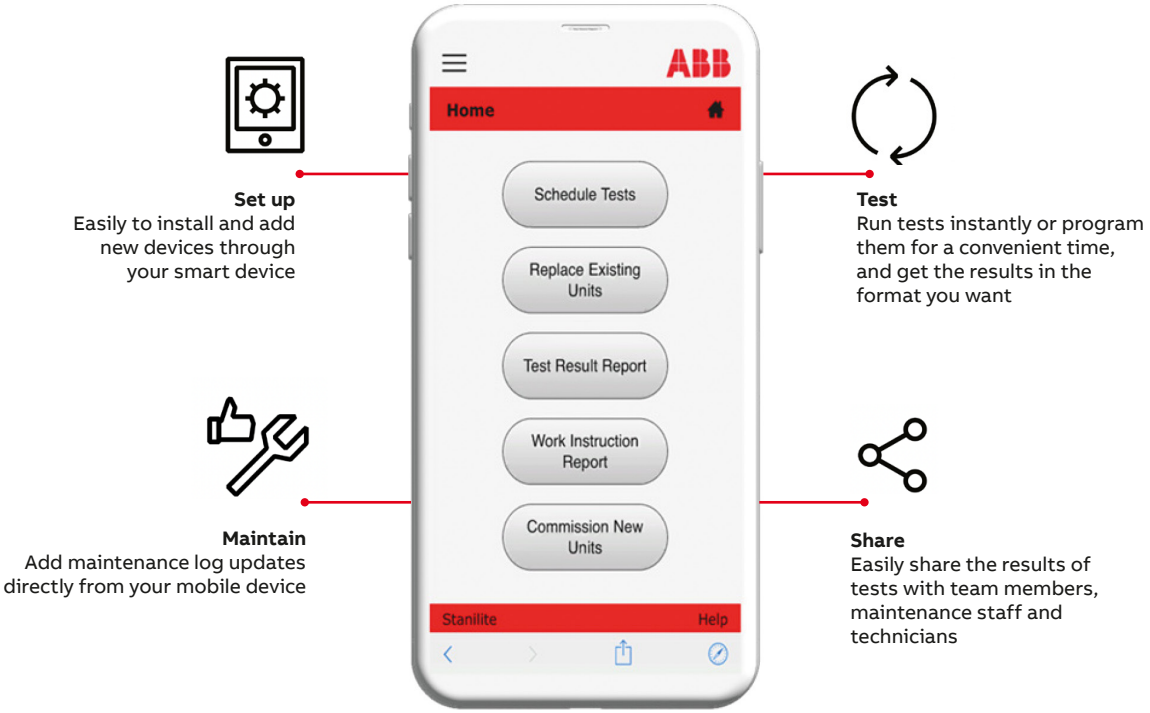
Stanilite Nexus®RF Infinity
Australia, New Zealand

ABB's Stanilite NexusRF Infinity offers the next quantum leap in monitored emergency and exit lighting



First-of-its-kind in monitored emergency and exit lighting

By harnessing the power of the mobile connectivity, Stanilite NexusRF Infinity unlocks and provides access to data and account management tools, allowing users to manage their emergency lighting system from anywhere, anytime.
For customers, this can reduce operating costs dramatically and will be one of the key elements for building owners and facility managers to reduce the total cost of ownership of safety systems in the future.
Another key element of NexusRF Infinity is the new commissioning method and interface which brings a 75% reduction of the commissioning time for installers and electrical contractors.
On top of this, functional and duration testing can be easily programmed with a mobile optimised web platform making compliance to Australian and New Zealand Standards a simple task.

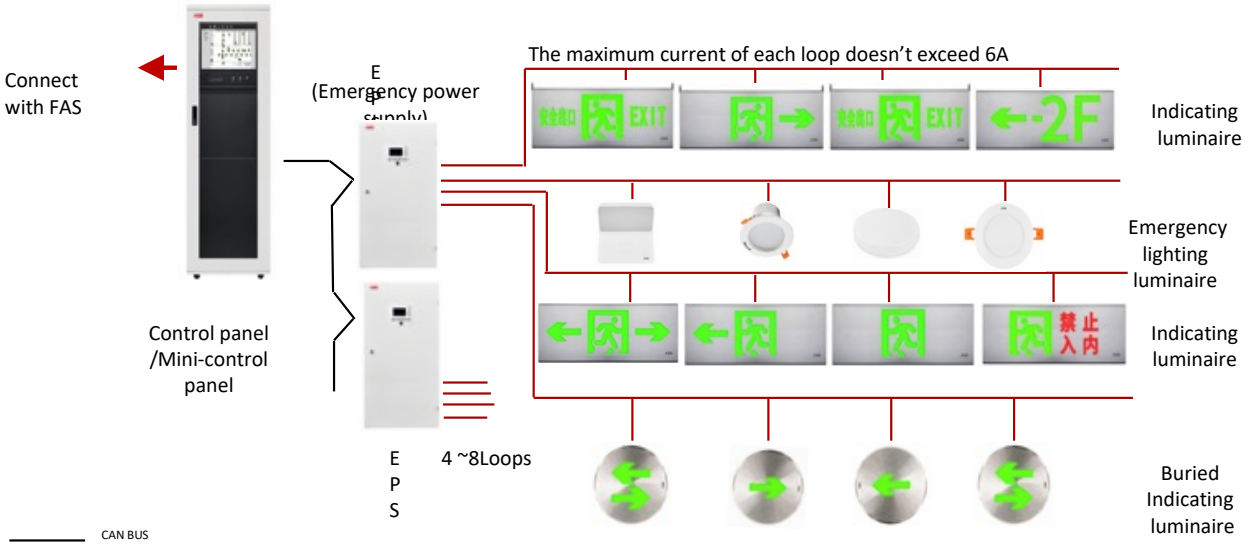
ABB CBS

CBS System



Centralized control centralized power system

ABB CBS

Indicating luminaire

Escape route signalization uses pictograms to show the direction to the exit. They have different geometries, dimensions and colors to comply to standards GB17945-2010.

Emergency lighting luminaire

Escape route lighting illuminates this route to the (emergency) exit so that people can escape safely in the event of an emergency.

Emergency power supply (EPS)

Provides secure power source in case of emergency to supply the evacuation systems. Normally located in the basement of the building or in centralized place dislocated in each floor.

System controller

The brain of the entire system, managing all the equipment, has the escape route algorithm.

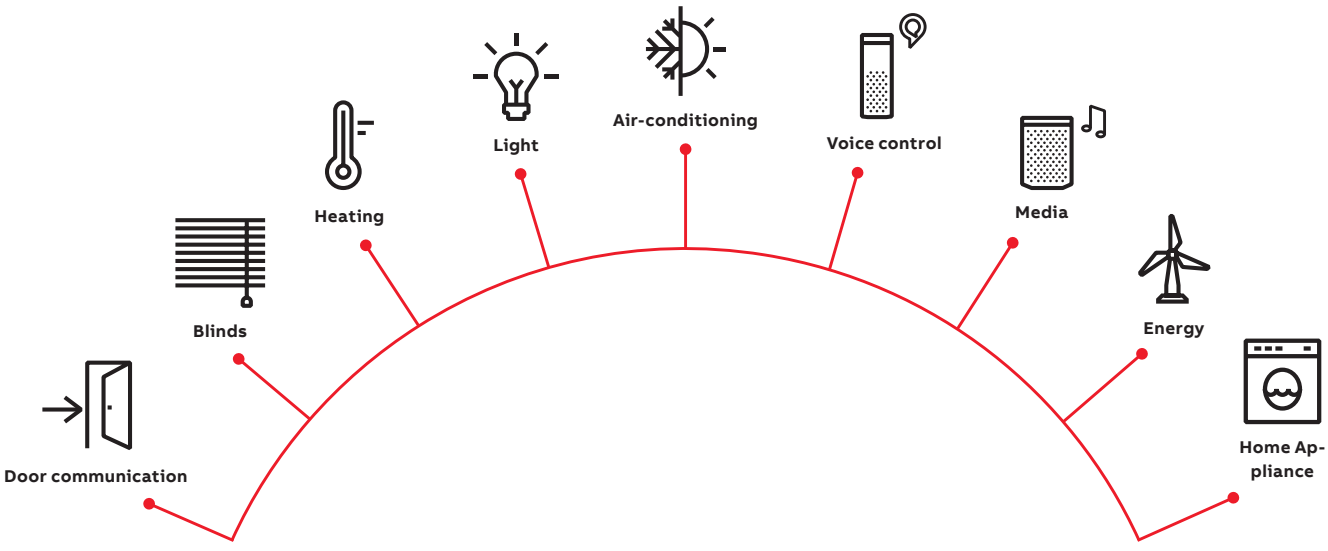
Free choice
Live as your heart desires

Smart. ABB-free@home® transforms the house or the apartment into an intelligent home. Whether blinds, lights, heating, air-conditioning or door communication – comfort, safety and efficiency can finally be remotely controlled. Via a switch on the wall, via voice control or with a smartphone, tablet or personal computer.

The pleasure of simplicity
ABB-free@home® makes daily life easier. You can manage blinds, lights, heating, air-conditioning and door communication using just one system. The smartphone becomes the remote control in the house. It allows you to raise the blinds and switch on the radio in the kitchen with the touch of a button while you are still in bed – or to deactivate all lights and devices via a switch when leaving the house. Very convenient. Extremely comfortable. Very energy efficient. The setting of these scenes is as easy as can be – to suit the mood or situation.



Open for new ideas
With ABB-free@home® everyone can determine for themselves how they want to use the smart living technologies. Both individual functions, such as heating or control of blinds, or a combination of different functions can be implemented. Over the course of time the system can also be flexibly extended, if one so desires. Freedom of choice at all times.

CONNECT MORE –

do more

The smooth integration of smart lighting solutions, sound systems, and modern household appliances into ABB-free@home® offers a variety of options for convenient use. All networked devices with their icons are displayed in the free@home app and the ABB-free@home® panel and can be controlled from there. All functions can also be directly controlled via the wall-mounted pushbuttons, which is possible only with free@home.

ABB-free@home® Integrations & Add-Ons enhance your ABB-free@home® experience with third-party integrations that bring added convenience and functionality to your smart home system. These collaborations ensure seamless control over various home aspects, all without additional gateways.

Lighting – LEDVANCE & Philips Hue: Manage extensive lighting options and create scenes effortlessly.

Sound – Bluesound, Sonos & Sonoro: Integrate superior sound systems for whole-home audio control.

Climate – Faber & CoolAutomation: Optimize climate control with innovative fireplaces and HVAC solutions.

Windows and blinds – Velux & Motion Blinds: Improve comfort with automated skylights and blinds.

Appliances – Home Connect & Miele:
Network top-tier appliances for enhanced smart home integration.

Home Connect Miele

Connect – SmartThings & Matter Bridge:
Achieve interoperability with various smart home devices.

SmartThings matter

EV Chargers:
Efficiently manage electric vehicle charging.

These integrations and addons elevate the capabilities of the ABB-free@home® system, creating a truly connected and intelligent home environment.

For more information refer to the applications section, pages 12 - 21.

INSTALLATION

Fast initial installation by the electrician. And easy and convenient operation and later adjustment by the user via app – even via remote control.

THE NEW FREEDOM

Limitless possibilities

One system, many extensions. Every home can be turned into a Smart Home. With its cabled or wireless sensors, actuators and control elements, ABB-free@home® is comprehensive and practical. Both for new as well as old buildings. Home automation knows no limits.

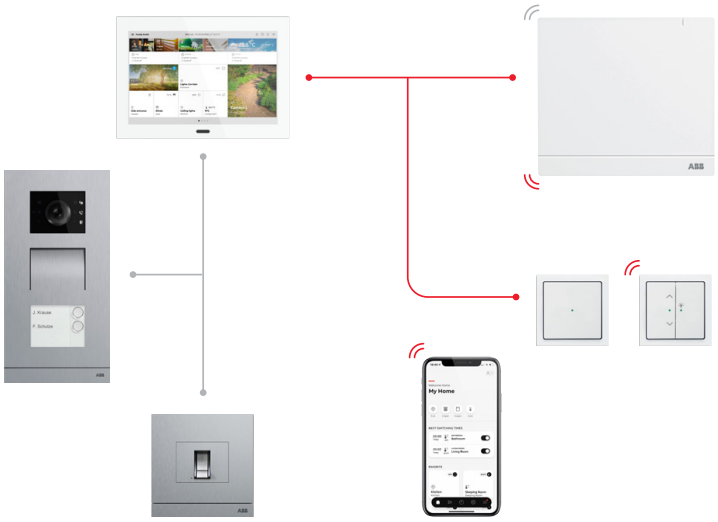
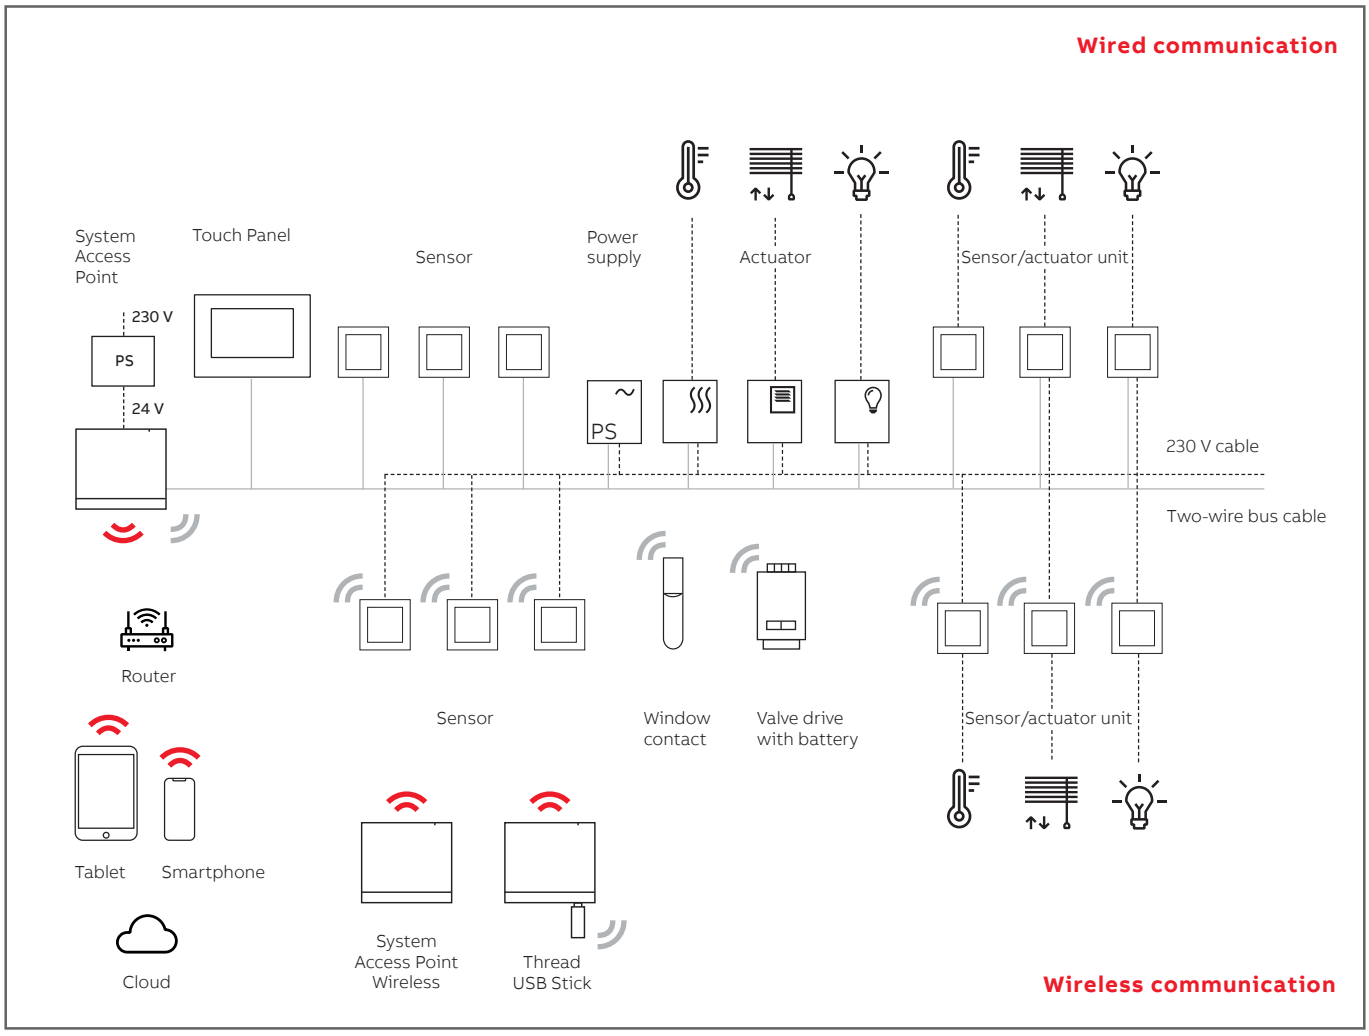
Whether its is about moving to a new place, building a new house or undergoing a home renovation, ABB-free@home® perfectly fits the requirements of smarter residential buildings, providing flexible combinations of wired and wireless solutions, to make homes more comfortable, valuable and smarter.

For future-proof new buildings
The wired solution is suitable especially for new constructions, where a complete and future-proof, extensible system can be installed. The System Access Point enables effortless connection to ABB-free@home® wired and wireless, Matter-enabled devices and ABB-Welcome door entry systems, both 2-wire and IP. And with our range of Smart Home panels everything is under control, from answering the door to having central monitoring of all the smart home functions, accessible also from remote through the ABB-free@home® Next App.





Smart Home Control, Made Simple
Whether you're renovating or upgrading, flexibility is essential – and that's exactly what the **System Access Point Wireless** delivers. Supporting up to 150 devices, it acts as the central hub of your smart home, enabling seamless control of lighting, blinds, climate, security, and more – all without invasive wiring. Dual-band Wi-Fi (2.4GHz & 5GHz) ensures a fast, stable connection, making it ideal for modernising homes while preserving walls and aesthetics.

With remote access via the **ABB-free@home® Next App**, you're always in control – from anywhere.

Prefer a more integrated solution? The **OneTouch panel** offers a sleek, all-in-one interface. Running the ABB-free@home® OS and Matter-certified, it connects directly to ABB-free@home® wireless or Matter-enabled devices, as well as ABB-Welcome door entry systems – no System Access Point required.

OneTouch also supports up to 150 devices and can optionally be linked to a wired system, offering centralised control of lighting, blinds, door answering, and preset scenes. Whether used alone or as part of a larger ecosystem, it's a stylish, intuitive way to manage your smart home.

Your ABB-free@home® components

01 System Access Point

02 System Access Point Wireless

01

02

System Access Point
The Core of ABB-free@home®

Connects your smart home via LAN or built-in WLAN. Pre-installed software enables easy setup, control, and customization, no extra tools needed. Save and restore settings anytime. Matter-certified for seamless integration with Matter-enabled devices.

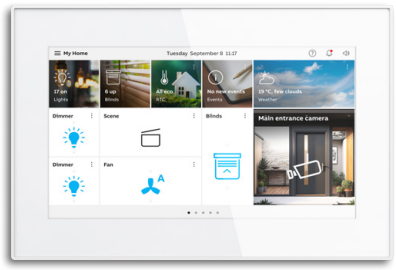
System Access Point Wireless Solution
Smart Control, No Invasive Rewiring

Ideal for retrofits, System Access Point Wireless offers full smart home control without invasive wiring. Dual-band Wi-Fi ensures stable performance. Matter-certified and compatible with ABB-free@home® wireless. Easy to install with flexible mounting, built-in diagnostics, and global power adapters.

03 Thread USB Stick

03 OneTouch

03



04

Thread USB Stick

The Thread USB Stick is a compact, powerful addition to your ABB-free@home® system, designed to enhance connectivity for renovations and retrofits with minimal effort. This plug-and-play device enables seamless integration of Thread-enabled and Matter-certified devices, expanding your smart home's capabilities without the need for additional wiring. Simply connect the Thread USB Stick to the compatible USB port on the System Access Point, and it establishes a reliable, low-power mesh network for devices like lights, sensors, and thermostats. Ideal for upgrading existing homes, its small form factor and easy setup make it a perfect solution for adding robust, wireless smart home functionality while maintaining your home's aesthetic integrity.

OneTouch

Running ABB-free@home® Operating System and being Matter-certified, OneTouch is both a control panel and hub for home automation and door communication, making it the most suitable and flexible touch panel for an evolving Smart Home installation. It enables direct to ABB door entry systems, ABB-free@home® wireless devices, and Matter-enabled devices*. It can also be connected to an ABB-free@home® wired system to control it.

matter

Matter

- Light (lamps and switches)
- Electricity (sockets and switches)
- Heating/air conditioning (thermostats and controllers)
- Shading (blinds, shutters)
- Sensors (movement and opening)

—
08 Power supply

The actuators and sensors
Actuators for switching, dimming and control are available for ABB-free@home®. The flush-mounted binary inputs also allow the integration of conventional switches and devices, such as window contacts, for example. Push-buttons, room temperature controllers and movement detectors are available as sensors.

Central distribution board with rail-mounting actuator
The installation of central rail-mounting actuators in the consumer unit makes the installation of the sensors even easier – as only the bus line is located in the flush-mounted box. With this method, the costs for each channel can be reduced.

Sensor/actuator unit for decentralised control
All in one. With the sensor/actuator unit, both the sensor and actuator are located in a single device to save space. The basic function of the unit is pre-configured, which makes programming the basic function unnecessary – but possible if required. The 230-volt line is wired as usual.

Sensor/actuator unit
The sensor/actuator unit combines a control element and, for example, a switch actuator in the single flush-mounted housing. It is installed in the same way as a flush-mounted switch. The device has already been pre-programmed: this means the light can be switched on directly after installation – without any programming. The sensor/actuator unit can, of course, be freely reconfigured via the user interface, just like all other sensors and actuators.

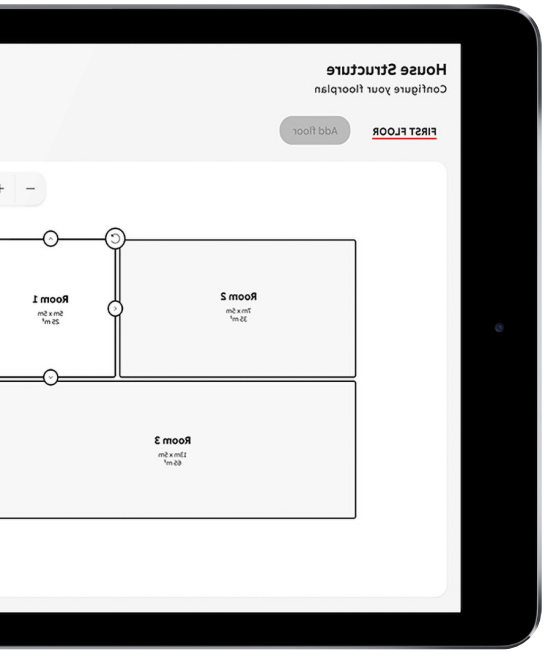
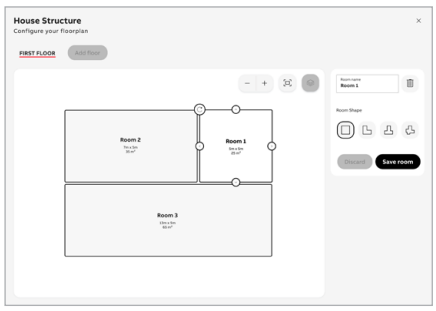
COMMISSIONING

So easy, anyone can do it

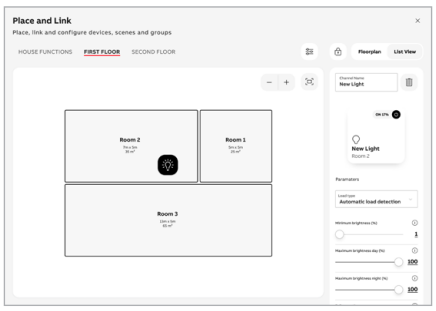
Intuitive operation. The ABB-free@home® app is easy to understand. To start with, all available devices in the rooms are activated in the display, allowing the favourite settings to be made immediately via drag-and-drop.



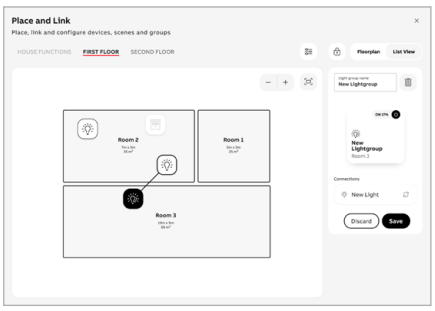
Easy to install – and even easier to operate
The ABB-free@home® app has been optimised for use in daily life. The wizard guides one through the system. The most important functions are clearly marked with self-explanatory icons. It makes no difference whether the components are connected in the two-wire bus or wirelessly. One has control over a uniform system. For maximum security, a personal password can be activated when logging in. This protects the home automation system against unauthorized access and tampering.



The house
First the electrician sets up the floor plan with its floors and rooms.

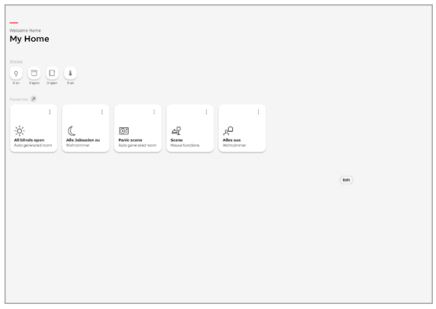


Assigning
Then the sensors in the app are integrated in the floor plan and assigned in the system.

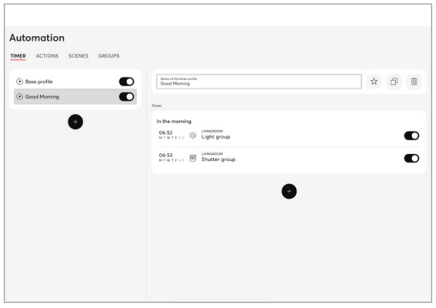


Combining
And finally, the elements can be combined according to individual preferences and requirements.

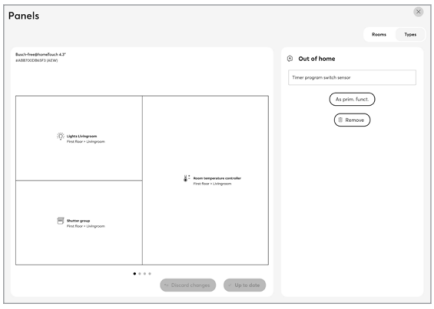
Simple and time-saving
The electrician performs the initial configuration of the system via app. Operation is particularly fast and saves on costly billable hours.



Scene control
The user can easily combine the switches and devices available in each room to create personal scenes. The lighting scene for an evening on the sofa, for example.



Time control
Roller blinds can be automatically moved and lights can be switched at any time or dependent on sunrise or sundown.



Panel setting
The most important functions can be controlled from a central location in the house and easily changed later at any time.

PROSERVICE PORTAL

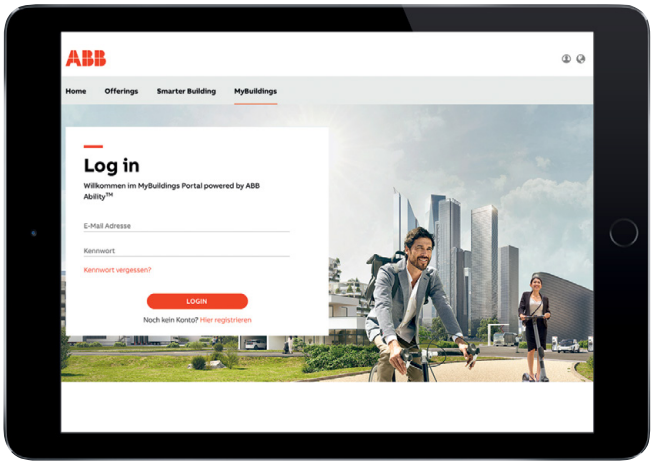
Professional installers digital services

If you require assistance or maintenance support, this can be done virtually by your installer, without the need of an on-site visit.
The ProService portal offers a digital support possibility at any time.

Service and Support virtually for your ABB-free@home® system.
This grants lots of benefits to free@home users:

Remote maintenance
If you require assistance, the installer can access the ABB-free@home® system via the ProService portal to make the adjustments and changes. Also firmware updates can be done virtually.

Full Transparency
The system promotes trust and transparency by giving the home owner complete visibility of any access or work on their system. The log shows the homeowner detailed information what has been changed: person, time and duration as well as any changes to the system – and the owners are able to revoke access rights at any time.



Full control by home owner
The home owner is able to grant access to the installer for a maximum of 24 hours. Secure end-to-end encryption connects the Installer Portal to the customer's System Access Point.

Efficient response
Faster and more efficient response time when you require support from an installer. No travel time is required and no need to schedule an on-site appointment.

It’s easy for the installer

Registration
Registration to the ProService portal works easily in the MyBuildings portal with the use of your ABB MyBuildings portal access data.

Creating employees
You authorize your employees via an invitation e-mail to use the ProService portal. As the owner of the account you can now see all your registered employees and assign them to individual customers.

Remote maintenance
After the customer has authorized the 24-hour time window for access, the installer can then access the ABB-free@home® system via the ProService portal and make adjustments and changes.

Creating customers
You invite your customers to use the remote maintenance service also via e-mail. You can then support your customers via the ProService portal.

ABB-free@home®
System devices

System Access Point 3.0
For commissioning and remote control of the ABB-free@home® system.
Support for up to 150 free@home participants (independent of whether wireless or wired).
With integrated free@home wireless antenna. With integrated free@home bus connection.
Easy to mount thanks to the external power adapter (included in the scope of delivery).
Optional supply via the yellow/white twisted pair of the bus line (24 V).
Allows the execution of astro and time programs. Commissioning and remote control is executed via the web interface or app. No additional commissioning software is required. Easy commissioning with WLAN ad-hoc mode. Connection to the home network via WLAN client mode or via CAT cable. Suitable as table device. Suitable for wall mounting. 2 x USB ports for future extension of functions. 2.4 GHz and 5 GHz WLAN. 1 GHz dual core processor.
512 MB working storage. Scope of delivery: Mounting plate, power adapter, screws and dowels
The bus connection is provided via the enclosed bus terminal. Display elements: LED for status display. Bus voltage: 24 V. Rated voltage: 230 V~. Rated frequency: 50 Hz / 60 Hz.
Protection class (device): IP 20. Temperature range (device): -5 °C - 45 °C. Storage temperature range: -20 °C - 70 °C. Dimensions: (L x W x D): 107 mm x 109 mm x 30 mm. Programming via the web interface of the System Access Point. Additional information about commissioning and operation is contained in the system manual and the online operating manual of the current Online-Catalogue. A bus power supply is required for the operation of free@home wired devices. When operating with more than 64 participants, an additional bus power supply is required.

Rated voltage: 230 V~

ABB RoomTouch® 4”
Freely programmable Touch panel 1 – up to 12 fold featuring a 4-inch IPS screen with 480*480 resolu-tion that offers home control and monitoring of the free@home, or KNX system. Control, observe and manage your entire installation on one device: Switching - Dimming - Slider - Blind - RGBW control element - Step switch - Scene switch - Display element - Audio control element. With scene function, logic functions, presence simulation and time programs.

KNX and free@home functions:
• A total 12 control elements are displayed on a maximum of 12 pages.
• 12 fault and alarm messages
• 10 logic functions
• 10 weekly timers
• 10 scene actuators
• 1 Integrated temperature controller (RTC)
• Page display with a maximum of 4touch surfaces on one page
• Primary function 18 fault and alarm messages
• Integrated temperature sensor.
• Haptic feedback
• proximity sensor
• brightness sensor
• 1 binary input or external temperature sensor input (PT1000 / 6226/T).

External power supply needed: 20-32 VDC (SELV)
Number of bus subscribers: 1
Optional Removal protection: TZE/U.0.xx.CK

Display size: 10,16cm (4”)
Display resolution: 420*420
Display screen: IPS display
Dimensions (L x W x D): (86mm x 86mm x 11mm)
Display surface: glass black (-825), glass white (-811)
Frame color: black matt (-885), white matt (-884)

Class of temperature controller 1 Contribution to space heating energy efficiency 1,0%.

ABB-free@home®

User Operation – Design Ranges – ABB Trevion® future® linear/solo®/carat®/pure stainless steel/Busch-axcent®/Dynasty®

SD/U12.63.1-825

Touch Display 2.4", 63 x 63 mm, FM **NEW**

Freely programmable touch panel 1 – up to 12-fold featuring a 2.4-inch IPS screen with 240*240 resolution that offers home control and monitoring of the free@home, or KNX system. Control, observe and manage your entire installation on one device: Switching - Dimming - Slider - Blind - RGBW control element - Step switch - Scene switch - Display element - Audio control element. With scene function, logic functions, presence simulation and time programs.

Functions:
- A total 12 control elements are displayed on a maximum of 12 pages.
- 12 fault and alarm messages
- 10 logic functions
- 10 weekly timers
- 10 scene actuators
- 1 integrated temperature controller (RTC)
- Page display with a maximum of 4 touch surfaces on one page
- Primary function
- Integrated temperature sensor
- Haptic feedback
- Proximity sensor
- Brightness sensor
- 1 binary input or external temperature sensor input (PT1000 / 6226/T)

External power supply needed: 20-32 V DC (SELV)
Number of bus subscribers: 1
Optional Removal protection: TZE/U.0.xx.CK

Display size: 6.10 cm (2.4")
Display resolution: 240*240
Display screen: IPS display
Dimensions (L x W x D): (63 mm x 63 mm x 32 mm)
Display surface: glass black (-825)

Class of temperature controller 1 Contribution to space heating energy efficiency 1,0 %.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

User Operation – Design Ranges – ABB Trevion® future® linear/solo®/carat®/pure stainless steel/Busch-axcent®/Dynasty®

KK/U4.63.1

Control Element, 63 x 63 mm

NEW

Freely configurable multifunction keypad 1- up to 4-fold with acoustic feedback. Communication over separat bus coupler unit (BAU-F-0.1). Operation via tapping or swiping of the parametrized functions, e.g., switching, dimming, blind/shutter control, scene.

- Primary function
- Integrated temperature sensor
- Buzzer for acoustic feedback
- Support of functions/status through innovative RGB light guide concept
- Day/night mode
- Orientation light
- Alarm function supported over light guide and acoustic feedback, e.g. 5 logic channels for KNX
- Light scene actuator
- Logic gates, etc.
- Sequencer
- Staircase function

Optional Removal protection: CSE/U0.1.xx.CK
Number of bus subscribers: 1

Touch Display 2.4", 70 x 70 mm, FM **NEW**

Freely programmable touch panel 1 – up to 12-fold featuring a 2.4-inch IPS screen with 240*240 resolution that offers home control and monitoring of the free@home, or KNX system. Control, observe and manage your entire installation on one device: Switching - Dimming - Slider - Blind - RGBW control element - Step switch - Scene switch - Display element - Audio control element. With scene function, logic functions, presence simulation and time programs.

Functions:
- A total 12 control elements are displayed on a maximum of 12 pages.
- 18 fault and alarm messages
- 10 logic functions
- 10 weekly timers
- 10 scene actuators
- 1 integrated temperature controller (RTC)
- Page display with a maximum of 4touch surfaces on one page
- Primary function
- Integrated temperature sensor
- Haptic feedback
- Proximity sensor
- Brightness sensor
- 1 binary input or external temperature sensor input (PT1000 / 6226/T)

External power supply needed: 20-32 V DC (SELV)
Number of bus subscribers: 1
Optional Removal protection: TZE/U.0.xx.CK

Display size: 6.10 cm (2.4")
Display resolution: 240*240
Display screen: IPS display
Dimensions (L x W x D): (69.5 mm x 69.5 mm x 32 mm)
Display surface: glass black (-825)

Class of temperature controller 1 Contribution to space heating energy efficiency 1,0 %.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

ABB-free@home®

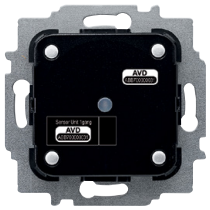
Sensor unit



Sensor unit, 1gang [1) 2)]

For transmitting switching, push-button, dimming and blind commands to an ABB-free@home® actuator.
Only to be used in combination with ABB-free@home® 1gang rockers.
The bus can be connected via enclosed terminal block.
Control element: Switch contacts top/bottom
Display elements: LED as light for orientation or display of the switching state
Bus voltage: 24 V
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 23 mm
Mounting depth: 9 mm

ABB-free@home®

Room Themosta

Room thermostat [1) 2)]

Heating/cooling operation.
Control element with room temperature controller function for controlling commercially available actuating drives in connection with HA-M-0.6.1, HA-M-0.12.1, FCA-M-2.3.1.
With display of set-value temperature.
Only to be used in combination with ABB-free@home® room temperature controller cover plates CP-RTC-xxx.
The bus can be connected via enclosed terminal block.
Control element: Floating rocker for the selection of set values and operating modes
Display elements: LCD showing operation modes
Bus voltage: 24 V
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 30 mm
Mounting depth: 14 mm

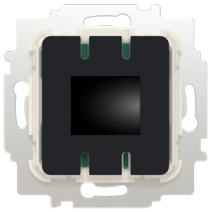
ABB-free@home®

Room Themosta



Room temperature controller with 16A switch actuator wireless NEW

Use as a stand-alone controller or within the eco System of ABB free@home®
Heating/cooling operation. RTC control element with room temperature controller function.
6-button touch operation for local operating. Additional functions such as temperature adjustment and timer can be set via ABB free@home Next App.
With temperature display target value. With integrated switching actuator, e.g. for controlling thermoelectric actuators in heating/cooling systems or electric underfloor heating. RTR function is also available without prior programming (preconfigured).
The integrated RTR can optionally be equipped with a remote sensor in conjunction with temperature sensor 6226/T. 3-wire connection technology (neutral conductor required).
Programming/settings via the ABB-free@home® app next
Device access via app is via Bluetooth or wireless
Communication with the free@home system is wireless.
Matching central disc: 1794 MDRT-xxx
Additional Remote Temperature Sensor: 6226/T
Control valves in the “normally closed” : TSA/K230.2.
Rated Voltage: 230 V AC
Rated Frequency: 50Hz
Output Voltage: 230 V AC
Rated Current: 16A (Relay)
Ambient Air Temperature: Operation -5 ... +45 °C
Protection class: IP20
Mounting depth: 29 mm
Dimensions: (L x W x D): 71 mm x 71 mm x 40 mm

Color	Order details		Price 1 piece	Weight 1 piece	Pack unit
	Type code	Order code		kg	pc.

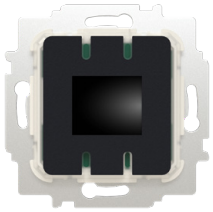
ABB-free@home®

Room Themosta



Room temperature controller / Sensor unit wireless **NEW**

Sensor Unit with integrated RTR usable within the free@home® eco system Heating/cooling mode. RTC control element with room temperature controller function.
6-button touch control for local operating. Additional functions such as temperature adjustment and timer can be set via app. With temperature display of set-point temperature RTR function is also available without prior programming (preconfigured).
The integrated RTR can optionally be equipped with a remote sensor in conjunction with temperature sensor 6226/T. 3-wire connection technology (neutral conductor required).
Programming/settings via the Busch-free@home® app next.
Device access via app is via Bluetooth or wireless Communication with the free@home system is wireless.
Matching central plate: 1794 MDRT-xxx
Additional Remote Temperature Sensor: 6226/T
Control valves in the “normally closed” : no
Rated Voltage: 230 V AC
Rated Frequency: 50Hz
Output Voltage: no
Rated Current: no
Ambient Air Temperature: Operation -5 ... +45 °C

ABB-free@home®

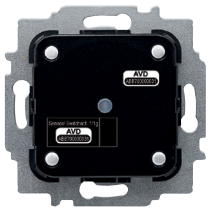
Sensor / Switch Actuator



Switch actuator sensor, 1/1gang [1) 2)]
For switching 127 V~/230 V~ consumers.
With integrated switch actuator.
Switching function is available also without prior programming (pre-configured).
Configuration can be changed later via the web interface (groups, scenes, etc.).
Only to be used in combination with ABB-free@home® 1gang rockers.
The bus can be connected via enclosed terminal block.
When installing in the flush-mounted box, a spatial division between the bus cable and 127 V/230 V installation cable is to be adhered to! If this minimum distance is not possible, use electronic boxes or insulating tubes.
Control element: Switch contacts top/bottom
Display elements: LED as light for orientation or display of the switching state
Bus voltage: 24 V
Outputs: 1x Normally open contact, potential free
Suitable for: ohmic
Rated current: 10 A
Output voltage: 230 V~
Rated power: 2300 W
Suitable for: capacitive
Rated current: 10 AX
Rated power: 2300 VA
Suitable for: inductive
Rated current: 10 AX
Rated power: 2300 VA
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 45 mm
Mounting depth: 32 mm

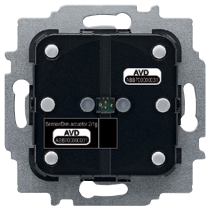
1) Programming only with bus voltage applied via the web interface of the System Access Point.
2) Additional information about commissioning and operation is contained in the system manual and the online operating manual of the current e-catalogue.

ABB-free@home®

Sensor / Switch Actuator



Switch actuator sensor, 2/1gang [1) 2)]
For switching 127 V~/230 V~ consumers.
With integrated switch actuator.
Switching function is available also without prior programming (left sensor channel is pre-configured).
Configuration can be changed later via the web interface (groups, scenes, etc.).
The right sensor channel for programming additional functions (groups, scenes, etc.).
Only to be used in combination with ABB-free@home® 2gang rockers.
The bus can be connected via enclosed terminal block.
When installing in the flush-mounted box, a spatial division between the bus cable and 127 V/230 V installation cable is to be adhered to! If this minimum distance is not possible, use electronic boxes or insulating tubes.
Control element: Switch contacts top/bottom
Display elements: LED as light for orientation or display of the switching state

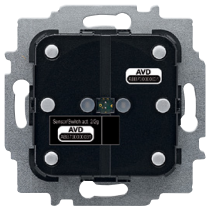
1) Programming only with bus voltage applied via the web interface of the System Access Point.
2) Additional information about commissioning and operation is contained in the system manual and the online operating manual of the current e-catalogue.

ABB-free@home®

Sensor / Switch Actuator



Switch actuator sensor, 2/2gang [1) 2)]

For switching 127 V~/230 V~ consumers.
With integrated 2gang switch actuator.
Switching function is available also without prior programming (both sensor channels are pre-configured). Configuration can be changed later via the web interface (groups, scenes, etc.). Only to be used in combination with ABB-free@home® 2gang rockers.
The bus can be connected via enclosed terminal block.
When installing in the flush-mounted box, a spatial division between the bus cable and 127 V/230 V installation cable is to be adhered to! If this minimum distance is not possible, use electronic boxes or insulating tubes.
Control element: Switch contacts top/bottom
Display elements: LED as light for orientation or display of the switching state
Bus voltage: 24 V
Outputs: 2x Normally open contact, potential free
Suitable for: ohmic
Rated current: 5 A
Output voltage: 230 V~
Rated power: 1380 W
Suitable for: capacitive
Rated current: 4 AX
Rated power: 920 VA
Suitable for: inductive
Rated current: 4 AX
Rated power: 920 VA
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 45 mm
Mounting depth: 32 mm

	Bbn 4011395	Order details		Price 1 piece	Weight 1 piece	Pack unit

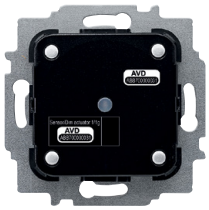
1) Programming only with bus voltage applied via the web interface of the System Access Point.
2) Additional information about commissioning and operation is contained in the system manual and the online operating manual of the current e-catalogue.

ABB-free@home®

Sensor / Dimming Actuator



Dimming actuator sensor, 1/1gang [1) 2) 3)]
For dimming 230 V~ loads.
With integrated universal dimming actuator for controlling LEDs, incandescent lamps, 230 V halogen lamps, low-voltage halogen lamps with conventional or electronic transformers, and dimmable energy-saving halogen lamps.
For dimmable Retrofit-LEDs (LEDi).
Dimming function is available also without prior programming (pre-configured).
Configuration can be changed later via the web interface (groups, scenes, etc.).
Only to be used in combination with ABB-free@home® 1gang rockers.
The bus can be connected via enclosed terminal block.
When installing in the flush-mounted box, a spatial division between the bus cable and 230 V installation cable is to be adhered to! If this minimum distance is not possible, use electronic boxes or insulating tubes.
Control element: Switch contacts top/bottom
Display elements: LED as light for orientation or display of the switching state
Bus voltage: 24 V
Outputs: 1x dimming channel
Suitable for: 230 V incandescent lamps and low-voltage halogen lamps with conventional transformers or electronic transformer.
Rated power: 10 - 180 W/VA
Suitable for: LEDi and energy-saving bulbs; typical
Rated power: 2 - 80 W/VA
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 45 mm
Mounting depth: 32 mm

	Bbn 4011395	Order details		Price 1 piece	Weight 1 piece	Pack unit

ABB-free@home®

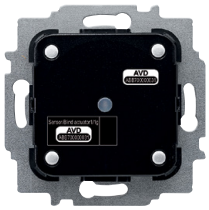
Sensor / Blinds Actuator



Blind actuator sensor, 1/1gang [1) 2)]
For controlling blind or awning motors.
With integrated blind actuator.
Blind function is available also without prior programming (pre-configured).
Configuration can be changed later via the web interface (groups, scenes, etc.).
Only to be used in combination with ABB-free@home® 1gang rockers.
The bus can be connected via enclosed terminal block.
When installing in the flush-mounted box, a spatial division between the bus cable and 127 V/230 V installation cable is to be adhered to! If this minimum distance is not possible, use electronic boxes or insulating tubes.
Control element: Switch contacts top/bottom
Display elements: LED as light for orientation or display of the switching state
Bus voltage: 24 V
Outputs: 1x Change-over contacts/normally open contact, potential-bound
Suitable for: Operation mode Blind
Rated current: 4 A
Output voltage: 230 V~
Rated power: 920 VA
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 45 mm
Mounting depth: 32 mm

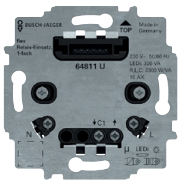
Inserts



Relay insert flex, 1gang [1)]

3 wire connection (neutral conductor required).
For switching lighting systems.
Operation in 1gang 2way installations via push switch-unit for combination with flush-mounted units. Operation also possible via conventional push buttons (2020 US, 2021/6 UK).
Without control cover.
For control element flex, 1gang, wireless, 62711-WL.
For control element flex, 2gang, wireless, 62721-WL.
For Busch-Comfort switch flex control element 64765-... .
For Busch-Watchdog 180 flex sensors 6476x-... .
For Busch-Watchdog 180 flex sensors, wireless, 6276x-...-WL.
Combinable with extension insert, 64891 U.
Rated voltage: 230 V~, +10 % / -10 %
Rated frequency: 50 Hz
Inputs: 1. Outputs: 1x Normally open contact, potential-bound
Suitable for: 230 V- LEDi, typical.
Rated power: 300 VA.
Suitable for: 230 V incandescent lamps/230 V halogen lamps.
Rated power: 2300 W.
Suitable for: Low voltage halogen lamps that are operated via transformers.
Rated power: 2300 VA.
Temperature range (Device): -25 °C to 55 °C.
Dimensions: (L x W x D): 71 mm x 71 mm x 30 mm.
Mounting depth: 25 mm

[1)] Only in conjunction with standard flush-mounting boxes according to DIN 49073, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete)

Inserts

LED dimmer insert flex, 1gang 1) 2) 3) 4) 5) 6) FM, LED, 3-240 VA
2-wire connection (neutral conductor not required).
Neutral conductor optionally connectable (recommended for the connection of low loads < 10 W/VA).
Touch dimmer for switching lighting systems.
Operation in 1gang 2way installations via push switch-unit for combination with flush-mounted units.
Operation also possible via conventional push buttons (2020 US, 2021/6 UK).
Optimised for dimming of retrofit LED lamps (LEDi). For dimmable Retrofit-LEDs (LEDi).
For dimmable Retrofit-LEDs (LEDi) with conventional or electronic transformers.
For incandescent lamps, 230 V tungsten halogen lamps, low-voltage halogen lamps with conventional or electronic transformers and dimmable energy-saving halogen lamps.
Mix operaton of LEDi with conventional loads possible.
With manually adjustable operating mode: trailing / leading edge control.
With adjustable minimum brightness.
With light-level memory and minimum brightness memory.
Low-noise level by MOSFET transistors.
With electronic short-circuit protection.
With electronic overload protection.
Without control cover.
For control element flex, 1gang, 64711.
For control element flex, 2gang, 64721.
For control element flex, 1gang, wireless, 62711-WL.
For control element flex, 2gang, wireless, 62721-WL.
For Busch-Watchdog 180 flex sensors, wireless, 6276x-...-WL.
Rated power: 3-240 VA (LEDi).
Rated voltage: 230 V~, +10 % / -10 %.
Rated frequency: 50 Hz. Inputs: 1.
Outputs: 1x dimming channel.
Suitable for: 230 V LEDi, typical (leading edge control).
Rated power: 3 - 100 VA.
Suitable for: 230 V LEDi, typical (trailing edge control).
Rated power: 3 - 240 W.
Suitable for: 230 V incandescent lamps, 230 V halogen lamps and low-voltage halogen lamps with conventional transformers or Busch Electronic Transformer.
Rated power: 10 - 240 VA.
Temperature range (Device): -5 °C to 45 °C.
Dimensions: (L x W x D): 71 mm x 71 mm x 30 mm.
Mounting depth: 25 mmIEC 60669-2-1, British Standard EN 60669-2-1

[1] In the case of conventional transformers, take ~20% transformer loss into account.
[2] In case of electronic transformers, 5 % transformer losses.
[3] Only in conjunction with standard flush-mounting boxes according to DIN 49073, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete)
[4] Recommendation: Please use loads and types of one producer.
[5] The dimmer interface is not standardised, it is the responsibility of the lamp manufacturers to list compatible products in their manufacturing information. Different installation situations can lead to different results. To clear up the problem, for example, it is recommended to carry out a local test of the selected lamps and dimmers. Please consult the lamp manufacturer for the LED dimmer recommended.
[6] A liability on the part of Buscah-Jaeger for the compatibility of the allocated lamps and dimmers is therefore excluded.

ABB-free@home®

Inserts

e-contact insert flex, 1gang 1) 2)
2-wire connection (neutral conductor not required)
Neutral conductor optionally connectable (recommended for the connection of low loads < 10 W/VA).
For switching lighting systems.
Operation in 1gang 2way installations via push switch-unit for combination with flush-mounted units.
Operation also possible via conventional push buttons (2020 US, 2021/6 UK).
Without control cover.
For control element flex, 1gang, wireless, 62711-WL.
For control element flex, 2gang, wireless, 62721-WL.
For Busch-Watchdog 180 flex sensors 6476x-... .
For Busch-Watchdog 180 flex sensors, wireless, 6276x-...-WL.
Combinable with extension insert, 64891 U.
Rated voltage: 230 V~, +10 % / -10 %
Rated frequency: 50 Hz
Inputs: 1
Outputs: 1x Normally open contact, potential-bound
Suitable for: 230 V- LEDi, typical.
Rated power: 3 - 240 VA
Suitable for: 230 V incandescent lamps/230 V halogen lamps
Rated power: 10 - 240 W
Suitable for: Low voltage halogen lamps that are operated via transformers.
Rated power: 3 - 240 VA
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 30 mm
Mounting depth: 25 mm

[1] Use only dimmable high-voltage LEDs.
[2] Only in conjunction with standard flush-mounting boxes according to DIN 49073, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete)

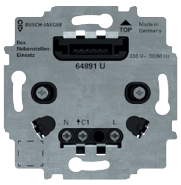
ABB-free@home®

Inserts



Extension insert flex 1)
3 wire connection (neutral conductor required).
For the extension of the Busch-Comfort switch or presence detector installations.
For group control of flex inserts via extension unit communication.
Operation in 1gang 2way installations via push switch-unit for combination with flush-mounted units.
Without control cover.
For control element flex, 1gang, wireless, 62711-WL.
For control element flex, 2gang, wireless, 62721-WL.
For Busch-Watchdog 180 flex sensors 6476x-... .
For Busch-Watchdog 180 flex sensors, wireless, 6276x-...-WL.
Combinable with all flex inserts.
Rated voltage: 230 V~, +10 % / -10 %
Rated frequency: 50 Hz
Control/Signal outputs: 1, electronic output, potential-bound
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 30 mm
Mounting depth: 25 mm

[1] Only in conjunction with standard flush-mounting boxes according to DIN 49073, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete)

ABB-free@home®

Movement detectors wireless

Busch-Watchdog 180 flex, comfort sensor, wireless with select-lens
For automatic switching of devices dependent on motion and brightness. Push switch function possible at all times. In combination with dimmer insert flex: dimming function of lighting and selectable light value storage. With time-controlled basic illumination function. With time-controlled night anti-glare function. With enabling of pre-warning of switch-off for stairwell operation. Compatible with all flexTronic inserts. Works with free@home.
Remote operation via the Bluetooth and smartphone/tablet app. Programming via Bluetooth with the ABB-free@home® app or via the web interface of the System Access Point.
Extension of the detection range by means of master/slave combination. Additional activation option via push-button input on the flush-mounted insert. Timer with Astro function. Automatic switchover from summer time to winter time (switch-off function). With continuous light/continuous Off function. With brightness-independent test mode for evaluating the detection zone. With detection display in test mode.
Surveillance density: 14 sectors with 56 switching segments.
Switch-off delay: approx. 10 sec - 30 min or short-time pulse 1 sec adjustable. For relay insert flex, 1gang, 64811 U-500. For e-contact insert flex, 1gang, 64814 U-500. For relay insert flex, 2gang, 64821 U-500. For LED touch dimmer insert flex, 1gang, 64851 U-500. For extension insert flex, 64891 U-500. Mounting height: 22 mm. Temperature range (device): -5 °C - 45 °C Storage temperature range: -25 °C - 70 °C. Detection range: frontal: 12 m, lateral: 12 m, at mounting height: 1.1 m. Brightness limit value: 5 Lux - Up to daytime operation. Detection angle: 180°. Dimensions: (L x W x D): 55 mm x 55 mm x 35 m. Mounting height: 0.8 m - 1.2 m
Please order the respective flush-mounted insert separately. The range specifications refer only to an ambient temperature of 21°C. RAL colour number: Similar 9010

ABB-free@home®

Movement detectors wireless

Busch-Watchdog PRO 280° Wireless
Wireless movement detector for detecting thermal motion.
With integrated switch actuator.
With high-quality lens for optimum detection.
Level balancing of the device +/- 30°.
Additional possibility for switch-on via normally open push-button switch.
Potentiometer for the adjustment of standard parameters: Switch-on brightness, Switch-off delay, Testmode and short-term impulse.
Measurement of outdoor temperature and ambient brightness level at the device.
Optional: ABB-free@home® Next app for commissioning of basic and add-on parameters or via the web interface of the System Access Point.
Remote operation via the Bluetooth and smartphone/tablet app.
With integrated dismounting protection.
Individual adjustment of detection range via enclosed protective foil which can be cut to size.
With brightness-independent test mode for evaluating the detection zone.
Switch-off delay: 10 sec to 30 min or short-time pulse 1 sec adjustable.
Adjustment of standard parameters via app: Switch-on brightness, Switch-off delay, Testmode and short-term impulse.
Adjustment of add-on parameters via app: Detection sensitivity, PIR switch-off, takeover of the measured brightness level, permanent on, permanent off.
Switch-off delay also programmable via app.
With optical indicator for detection and operation mode.
With automatic range stabilization.
With automatic interference suppression.
With automatic dazzle-proofing.
Surveillance density: 106 sectors with 424 switching segments.
Brightness limiting values: lux range 0.5–1000.

ABB-free@home®

Movement detectors wireless

Busch-Watchdog PRO 280° free@home
4 Channel free@home wired movement detector for indoor and outdoor area.
For automatic switching of free@home actuators dependent on movement and brightness.
With a twilight / brightness sensor. With a temperature sensor.
With high-quality lens for optimum detection. Level balancing of the device +/- 30°.
Horizonatal orientation of the optical system +90°/- 60°.
Vertical orientation of the optical system +30°/- 30°. With ground and rear-field detection.
The bus can be connected via enclosed terminal blocks.
ABB-free@home® Next app for commissioning of basic and add-on parameters.
Programming only under connected bus voltage.
With integrated dismounting protection.
Individual adjustment of detection range via enclosed protective foil which can be cut to size.
With brightness-independent test mode for evaluating the detection zone.
Adjustment of parameters via App: Switch-on brightness, Switch-off delay, permanent on, permanent off, detection area.
Measurement of outdoor temperature and ambient brightness level at the device.
With automatic range stabilization.
With automatic interference suppression.
With automatic dazzle-proofing.
With 4 movement channels.
Surveillance density: 106sectors with 424 switching segments.
Detection area: frontal: 16 m, lateral: 16 m
Installation height: 2,5 m
Twilight limiting values: 1 - 1.000Lux
Brightness limiting values: 1.000 - 80.000
Sensor angle: 280°
Number of PIR: 4
Bus voltage: 24 V
No additional power supply necessary.
Power consumption: 0,3 W
Current: 12mA
Protection class device: IP 55
Temperature range device: -25°C - 55°C
Storage temperature device: -25°C - 70°C
Dimensions (H x W x D): 124mm x 110mm x 158mm

Sets wireless

Blind flex, Set, WL

Blind insert with tapping control element, 2gang, wireless. For the manual and automatic control of roller blinds, blinds, awnings. Timer with Astro function. For saving and calling up scenes and groups via the right rocker. Remote operation via the Bluetooth and smartphone/tablet app.
Consisting of flex blind insert, 64831 U-500.
Consisting of control element flex, 2gang, wireless, 62721-WL-500
Consisting of rocker, 2gang left with >Blind< icon 6232-20-84-500
Consisting of rockers, 2gang right with >Scene< icon 6233-22-84-500
Cover frame design future® linear 1721-184K.
Control element: Switch contacts top/bottom
Display elements: LED (switch-off function / brightness adjustable) for status display.
Rated voltage: 230 V~, +10 % / -10 %. Rated frequency: 50 Hz
Temperature range (device): -5 °C - 45 °C. Storage temperature range: -20 °C - 70 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 30 mm. Mounting depth: 25 mm
Only in conjunction with standard flush-mounting boxes according to DIN 49073, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete)

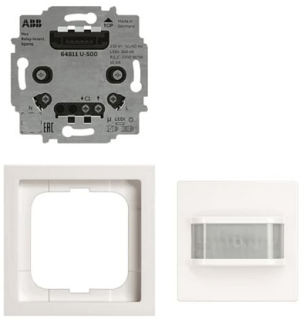
Sets wireless



Busch-Watchdog 180 flex, wireless. Complete set with Comfort sensor select lens and relay insert

Consisting of Busch-Watchdog 180 flex comfort sensor with select lens, 62762-84-WL-500. Consisting of relay insert flex, 1gang, 64811 U-500. Consisting of future® linear cover frames, 1gang 1721-184K. Rated voltage: 230 V~, +10 % / -10 %. Rated frequency: 50 Hz
Power dissipation: 0.3 W. Outputs: 1 Normally open contact, potential-bound
suitable for: 230 V- LEDi, typical. Rated output: 300 VA. Suitable for: 230 V incandescent lamps/230 V halogen lamps. Rated output: 2300 W. Suitable for: Fluorescent lamps
Rated output: 2300 VA. Rated current: 10 AX, cos ϕ0.9. Temperature range (device): -5 °C - 45 °C
Storage temperature range: -25 °C - 70 °C. Detection range: frontal: 12 m, lateral: 12 m, at mounting height: 1.1 m. Brightness limit value: 5 Lux - Up to daytime operation
Detection angle: 180 °. Dimensions: (L x W x D): 81 mm x 81 mm x 48 mm
Mounting depth: 25 mm. Mounting height: 0.8 m - 1.2 m. The range specifications refer only to an ambient temperature of 21°C. Only in conjunction with standard flush-mounting boxes according to DIN 49073, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete). RAL colour number: Similar 9016

Zenit/Millenium

Sensor/Switch actuator 1/1gang
For switching 230 V~ devices. With integrated actuator. Switching function is available pre-configured. To be used with ABB-free@home® Zenit cover plates for 2 fold push buttons.
Outputs: 1× normally open contact, potential free
Suitable for: resistive
Rated current: 10 A
Rated power: 2300 W
Suitable for: capacitive
Rated current: 10 AX
Protection class of device: IP 20
Mounting depth: 31.5 mm
Dimensions (H × W × D): 44 mm x 44 mm x 40.9 mm

ABB-free@home®

Zenit/Millenium

Switch/dimmer, 1/2gang + 1 dimmer
For dimming 230 V~ loads. With integrated universal dimming actuator
for controlling different lamps. The dimming function is available pre-configured.
To be used with ABB-free@home® Zenit cover plates for 2 fold push buttons.
Outputs: 1× dimming channel
Suitable for: 230 V incandescent lamps and low-voltage halogen lamps with conventional transformers
or electronic transformers
Rated power: 10–180 W/VA
Suitable for: LEDi and energy-saving bulbs
Rated power: 2–80 W/VA
Protection class of device: IP 20

ABB-free@home®
Zenit/Millenium

Room temperature controller/heating actuator, wireless [1) 2)]
For ABB-free@home®
Heating/cooling operation.
Control element with room temperature controller function.
With display of set-value temperature.
With integrated switch actuator, e.g. for controlling thermoelectric actuating drives in heating/cooling systems or electric floor heating systems.
RTC function is available also without prior programming (preconfigured).
In connection with temperature sensor DP4-T-1 the integrated room temperature controller can be fitted with a remote sensor.
3 wire connection (neutral conductor required).
Only to be used in combination with ABB-free@home® room temperature controller cover plates CP-RTC-XXX. With fixing claws.
Control element: Floating rocker for the selection of set values and operating modes
Display elements: LCD showing operation modes
Rated voltage: 230 V~
Rated frequency: 50 Hz - 60 Hz
Outputs: 1x Normally open contact, potential-bound
Supply voltage: 230 V~
Suitable for: ohmic
Rated current: 16 A
Output voltage: 230 V~
Rated power: 3680 W
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 48 mm
Mounting depth: 32 mm

WIRELESS	Bbn 4011395	Order details		Price 1 piece	Weight 1 piece	Pack unit

ABB-free@home®

Zenit/Millenium

Switch 1/2gang, wireless

For sending switching, dimming and blind command to an ABB-free@home® actuator.
To be used with ABB-free@home® Zenit cover plates for 2 fold push buttons.
Control element: Switch contacts top/bottom
Display elements: LED for orientation or switch state display
Protection class of device: IP 20
Mounting depth: 14.1 mm
Dimensions (H × W × D): 44 mm x 44 mm x 23.5 mm

ABB-free@home®

Zenit/Millenium

Movement detector
With select lens for detection with animal access. For automatic switching of ABB-free@home® actuators dependent on movement and brightness.
To be used with ABB-free@home® Zenit cover plates for movement detector.
Detection range: frontal 6 m, lateral 3 m
Detection angle: 180°
Brightness limit value: 1 – 500 lux
Protection class of device: IP 20
Mounting depth: 14.1 mm
Dimensions (H × W × D): 44 mm x 44 mm x 29.6 mm

Movement detector + 1 actuator
With select lens for detection with animal access. Including an integrated actuator for switching 230 V~ devices. To be used with ABB-free@home® Zenit cover plates for movement detector.
Outputs: 1× normally open contact, potential free
Suitable for: resistive
Rated current: 10 A
Rated power: 2300 W
Suitable for: capacitive
Rated current: 10 AX
Detection range: frontal 6 m, lateral 3 m
Detection angle: 180°
Brightness limit value: 1 – 500 lux
Protection class of device: IP 20
Mounting depth: 31.5 mm
Dimensions (H × W × D): 44 mm x 44 mm x 47 mm

DIN-Rail

Power Supply, 640 mA, MDRC
Power supply with integrated choke.
Fast diagnosis due to LED display for operational readiness and errors.
The bus can be connected via enclosed terminal block.
Display elements: Operational load/overload LED
Rated voltage: 127 - 230 V~, +10 % / -15 %
Secondary: 30 V, +2 V / --2 V
Rated frequency: 50 Hz/60 Hz
Outputs: 1
Rated current: 640 mA
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 90 mm x 72 mm x 64 mm
Module width: 4 MW

	Bbn 4016779	Order details		Price 1 piece	Weight 1 piece	Pack unit

ABB-free@home®

DIN-Rail

Switch Actuator, 4-fold, 16 A, MDRC
For switching 4 independent 127 V~/230 V~ loads. Each contact has a manual operation function independent of auxiliary voltage for additionally displaying the contact setting. The bus can be con-nected via enclosed terminal block.
Outputs: 4
Maximum switching current: 16A
Maximum switching power: 2500 W
Mounting type: DIN rail
Number of inputs: Analog (0 ... 10 V / 4 ... 20 mA) Analog, 0 No unit
Number of LEDs: 1
Rated current: 16 A
Output voltage: 230 V AC
Protection class (Device): IP20
Dimensions: (L x W x D): (90 mm x 70 mm x 63.5 mm)
Module width: 4 MW

	Bbn 4053546	Order details		Price 1 piece	Weight 1 piece	Pack unit

ABB-free@home®

DIN-Rail

Switch Actuator, 8-fold 16 A, MDRC

For switching 8 independent 127 V~/230 V~ loads. Each contact has a manual operation function independent of auxiliary voltage for additionally displaying the contact setting. The bus can be con-nected via enclosed terminal block.
Outputs: 8
Maximum switching current: 16A
Maximum switching power: 2500 W
Mounting type: DIN rail
Number of inputs: Analog (0 ... 10 V / 4 ... 20 mA) Analog, 0 No unit
Number of LEDs: 1
Rated current: 16 A
Output voltage: 230 V AC
Protection class (Device): IP20
Dimensions: (L x W x D): (90 mm x 140 mm x 63.5 mm)
Module width: 8 MW

	Bbn 4053546	Order details		Price 1 piece	Weight 1 piece	Pack unit

	111316	SA-M-8.16.2.2	2CDG510026R0011			1

Switch Actuator, 12-fold 16 A, MDRC

For switching 12 independent 127 V~/230 V~ loads.
Each contact has a manual operation function independent of auxiliary voltage for addition-ally dis-playing the contact setting.
The bus can be connected via enclosed terminal block.
Outputs: 12
Maximum switching current: 16A
Maximum switching power: 2500 W
Mounting type: DIN rail
Number of inputs; Analog (0 ... 10 V / 4 ... 20 mA) Analog 0 No unit
Number of LEDs: 1
Rated current: 16 A
Output voltage: 230 V AC
Protection class (Device): IP20
Dimensions: (L x W x D): (90 mm x 210 mm x 63.5 mm)
Module width: 12 MW

ABB-free@home®

DIN-Rail

Switch Actuator, 8-fold, 6 A, MDRC

Combination device with 8 binary inputs and 8 switch actuators. Conventional push-buttons or auxiliary contacts can be connected to 8 channels. The information of the contact enquiry can be used for activating ABB-free@home® actuators or for recording status information.
The contact polling voltage is made available by the device itself.
Maximum cable length at a cable cross-section of 1.5 mm² < 100 m
For switching 8 independent 230 V~ loads.
Bus voltage: 24 V
Inputs: 8
Polling voltage: 32 V-
Outputs: 8 Normally open contact, potential free (for 1 fan)
Suitable for: AC1
Rated current: 6 A, cos ϕ 0.8
Output voltage: 230 V~
Suitable for: AC3
Rated current: 6 A, cos ϕ0.45
Output voltage: 230 V~
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 90 mm x 144 mm x 64.5 mm
Module width: 8 MW

	945561	SA-M-8.8.1	2CDG510007R0011			1

Heating Actuator, 6-fold, 230 V, MDRC

For controlling thermoelectric actuating drives in heating/cooling systems.
The outputs are protected against short-circuit and overload.
The bus can be connected via enclosed terminal block.
Bus voltage: 24 V
Outputs: 6
Suitable for: ohmic
Rated current: 160 mA
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 90 mm x 72 mm x 64 mm
Module width: 4 MW

	Bbn 4016779	Order details		Price 1 piece	Weight 1 piece	Pack unit

Fan Coil Actuator, PWM, MDRC
For controlling blower convectors.
Supports 2-pipe and 4-pipe system for heating and cooling.
The fan speed levels can be switched using a changeover or step switch function.
Three contacts for switching a three-stage fan.
Two contacts for activating the heating and cooling valves.
Supports 24V and 230V valves.
With two binary inputs for connecting dewpoint and condensation contacts.
The scanning voltage is provided by the device.
The bus connection is provided via the enclosed bus terminal.
Bus voltage: 24 V
Inputs: 2
Polling voltage: 10 V-
Outputs: 3 Normally open contact, potential free
Suitable for: AC3
Rated current: 6 A
Output voltage: 230 V~
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 90 mm x 108 mm x 64.5 mm
Module width: 6 MW

ABB-free@home®

DIN-Rail

Blind Actuator, 4-fold, 230 V, MDRC

For controlling 4 independent blind or roller shutter drives. The outputs are inversely blocked. The bus can be connected via enclosed terminal block.
Outputs: 4
Maximum switching current: 6A
Maximum switching power: 1200 W
Mounting type: DIN rail
Number of inputs; Analog (0 ... 10 V / 4 ... 20 mA) Analog 0 No unit
Number of LEDs: 1
Rated current: 6 A
Output voltage: 230 V AC
Protection class (Device): IP20
Dimensions: (L x W x D): (90 mm x 70 mm x 63.5 mm)
Module width: 4 MW

ABB-free@home®

DIN-Rail

Dim actuator 4 x 210 W, MDRC
Multichannel universal dimming actuator optimised for dimming retrofit LED lamps (LEDi).
Also suitable for dimming incandescent lamps, low-voltage halogen lights with conventional or electronic transformers, 230 V halogen lamps and dimmable energy-saving halogen lamps.
Automatic load detection (can be deactivated).
Separate N-connection per channel.
Parallel connection of the outputs possible to increase the output power.
Outputs can be connected in parallel in any configuration.
Minimum load: 2 W.
Manual operation on device also possible without bus voltage or in an unprogrammed status.
Programming of the device also possible without applied 230 V supply voltage.
With integrated bus coupler.
Nominal power at 230 V~ mains voltage:
230 V~ incandescent and halogen lamps: 4 x 210 W/VA to 1 x 600 W/VA.
Dimmable 230 V~ LEDi: 4 x 210 W/VA to 1 x 600 W/VA in trailing edge control, 4 x 80 W/VA to 1 x 200 W/VA in leading edge control.
Inductive L-transformers with LED/low-voltage halogen lamp: 4 x 210 W/VA to 1 x 600 W/VA.
Electronic C-transformers with LED/low-voltage halogen lamp: 4 x 210 W/VA to 1 x 600 W/VA.
Electronic LC-transformers with LED/low-voltage halogen lamp: 4 x 80 W/VA to 1 x 200 W/VA.
Control element: One LED button per channel (including a colour status indication) for switching ON and OFF, as well as dimming up and down.
Bus voltage: 24 V
Rated voltage: 110 - 230 V~, +10 % / -10 %
Rated frequency: 50 Hz - 60 Hz
Outputs: 4x dimming channel
Protection class (device): IP 20
Temperature range (device): -5 °C - 45 °C
Storage temperature range: -20 °C - 70 °C
Dimensions: (L x W x D): 90 mm x 108 mm x 64 mm
Module width: 6
Mounting depth: 68 mm
Programming only with bus voltage applied via the web interface of the System Access Point.
Additional information about commissioning and operation is contained in the system manual and the online operating manual of the current Online-Catalogue.
Recommendation: Always use lamps of the same type and manufacturer.

	Bbn 4011395	Order details		Price 1 piece	Weight 1 piece	Pack unit

ABB-free@home®

DIN-Rail

Dim actuator 4x315W, MDRC

Multichannel universal dimming actuator optimised for dimming retrofit LED lamps (LEDi). Also suitable for dimming incandescent lamps, low-voltage halogen lights with conventional or electronic transformers, 230 V halogen lamps and dimmable energy-saving halogen lamps. Automatic load detection (can be deactivated). Separate N-connection per channel. Parallel connection of the outputs possible to increase the output power. Outputs can be connected in parallel in groups. Minimum load: 2 W. Manual operation on device also possible without bus voltage or in an unprogrammed status. Programming of the device also possible without applied 230V supply voltage. Extensive test and diagnosis functions for the i-Bus tool. Fast parameter setting in ETS using copyable channel templates. With integrated bus coupler.
Nominal power at 230 V~ mains voltage: 230 V~ incandescent and halogen lamps: 4 x 315 W/VA to 2 x 500 W/VA in trailing edge control, 4 x 120 W/VA to 2 x 200 W/VA in leading edge control. Dimmable 230 V~ LEDi: 4 x 315 W/VA to 2 x 500 W/VA in trailing edge control, 4 x 120 W/VA to 2 x 200 W/VA in leading edge control. Inductive L-transformers with LED/low-voltage halogen lamp: 4 x 315 W/VA to 2 x 500 W/VA. Electronic C-transformers with LED/low-voltage halogen lamp: 4 x 315 W/VA to 2 x 500 W/VA. Electronic LC-transformers with LED/low-voltage halogen lamp: 4 x 120 W/VA to 2 x 200 W/VA.
Control element: One LED button per channel (including a colour status indication) for switching ON and OFF, as well as dimming up and down.
Bus voltage: 24 V
Rated voltage: 230 V~ +10 % / -10 %
Rated frequency: 50 Hz / 60 Hz
Outputs: 4 dimming channel
Protection class (device): IP 20
Temperature range (device): -5 °C - 45 °C
Storage temperature range: -20 °C - 70 °C
Dimensions: (L x W x D): 90 mm x 144 mm x 64 mm
Module width: X
Mounting depth: 68 mm
Programming only with bus voltage applied via the web interface of the System Access Point. For software and description please check the current Online-Catalogue. 1 MW ≙ 18 mm.
Recommendation: Always use lamps of the same type and manufacturer.

ABB-free@home®

DIN-Rail

DALI Gateway, MDRC

The device is used to interface between DALI and free@home installations and incorporates the DALI power supply. One DALI output for up to 16 DALI Slaves.
Bus voltage: 24 V
Rated voltage: 100 – 240 V ~
Rated frequency: 50 Hz, 60 Hz
DALI outputs: 1
Protection class (device): IP 20
Dimensions: (L x W x D): 90mm x 72 mm x 64 mm

	Bbn 4016779	Order details		Price 1 piece	Weight 1 piece	Pack unit
	EAN	Type code	Order code		kg	pc.
	067409	DG-M-1.16.1	2CDG510012R0011			1

Split Unit Gateway, FM

The device is used to interface between the free@home system and many manufacturers' air conditioners, so-called split units. The device converts the free@home telegrams into infrared commands and transmits them to the split unit. The transmitter of the supplied cable is bonded directly onto the split unit's receiver. The split unit then no longer receives the commands from a remote control. Instead, it can be operated via any free@home sensors. The model of the split unit can be selected during commissioning. Auxiliary voltage is not required.
Bus voltage: 24 V
Outputs: 1
Protection class (device): IP 20
Dimensions: (L x W x D): 39mm x 40 mm x 12 mm

	Bbn 4016779	Order details		Price 1 piece	Weight 1 piece	Pack unit
	EAN	Type code	Order code		kg	pc.
	945578	SUG-F-1.1	2CDG510005R0011			1

ABB-free@home®

DIN-Rail

Binary Input, FM
Conventional push-buttons or auxiliary contacts can be connected to 2 / 4 channels.
The information of the contact enquiry can be used for activating ABB-free@home® actuators or for recording status information. The contact polling voltage is made available from the binary input itself. Extension of the connecting cables possible by a maximum of 10 m.
Flush-mounted device for installation in a 60 mm device box or distribution box.
The bus can be connected via enclosed terminal block.
Bus voltage: 24 V
Inputs: 2 / 4
Polling voltage: 20 V-,
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 39 mm x 40 mm x 12 mm

ABB-free@home®

DIN-Rail

Binary Input, 230 V, MDRC

Detects AC/DC signals in the voltage range from 10...230 V. The binary inputs enable detection of independent input signals. Each channel can be connected with conventional push-buttons or auxiliary contacts. The information can be used to control free@home actuators or to indicate status information. The devices are powered via the free@home bus and do not require an additional power supply.

4 fold

Bus voltage: 24 V
Inputs: 4
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C

ABB-free@home®

DIN-Rail

Binary Input, Contact scanning, MDRC

Scans floating contacts with internally generated scanning voltage. No external Voltage needed. The binary inputs enable detection of independent input signals. Each channel can be connected with conventional push-buttons or auxiliary contacts. The information can be used to control free@home actuators or to indicate status information. The devices are powered via the free@home bus and do not require an additional power supply.

4 fold

Bus voltage: 24 V
Inputs: 4
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 90 mm x 36 mm x 63.5 mm
Module width: 2 MW

ABB-free@home®

Communicative and competent – The ABB partner close to you

Advice and assistance close to you. Your electrician will be happy to explain to you in detail the advantages of ABB-free@home® in a face-to-face discussion. This will allow home automation to be planned to suit your individual requirements.

The suitable electrician
The electrician familiar with ABB-free@home® can be found at www.abb.com/freeathome. Simply enter your postcode – and the firms in your region will be displayed.

Now scan the QR code to find out more about the advantages of ABB-free@home®.

Wireless solution
For quick and easy installation

The energy harvesting Smart Switch and the wireless flush-mounted actuators are ideal for renovations and new builds.

Flush-mounted actuators
The flush-mounted actuators for switching, dimming or controlling blinds can be easily installed in a deep installation box. They can be controlled by the Smart Switch or any other ABB wireless control element or by conventional push buttons directly connected to the extension input.

Program with the ABB-free@home® Next app
The programming and operation of the wireless actuators and the Smart Switch is carried out via the ABB-free@home® Next app. Here, the devices can be linked as desired and assigned to functions. The smartphone is connected with the devices via via Bluetooth or NFC (BT pills and NFC Smart Switch).

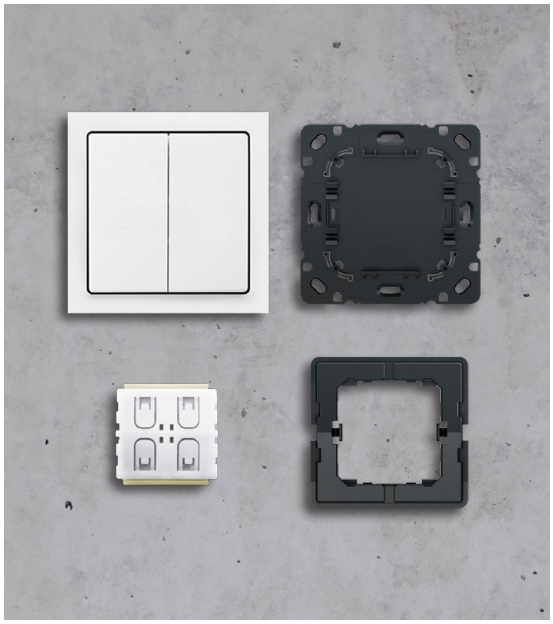

ABB-free@home® wireless actuators and Smart Switch

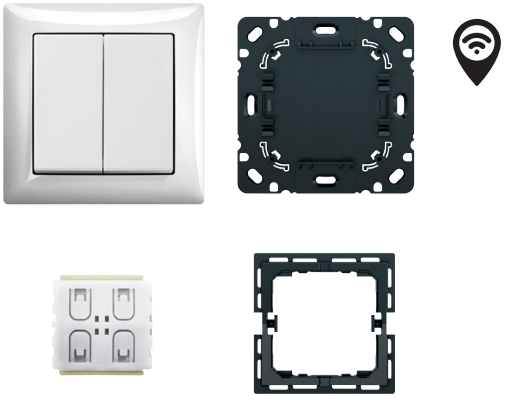
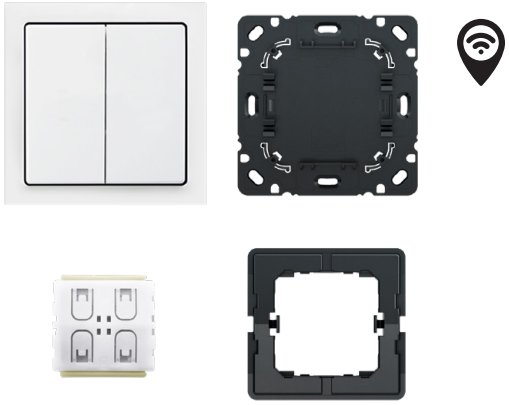
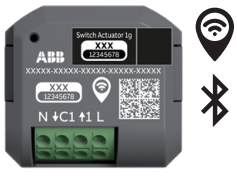


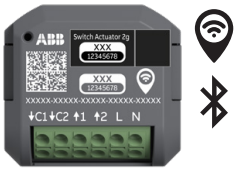
Smart Switch
Balance/Art linear
62721/01 U-WL-500



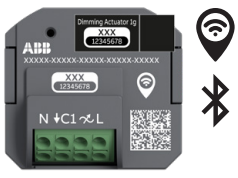
Smart Switch
Future/Solo
62721 U-WL-500



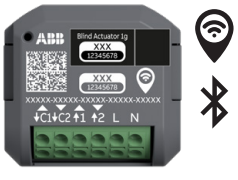
Switch Actuator 1gang, FM, WL
62811 U-WL-500



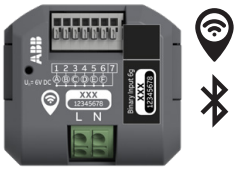
Switch Actuator 2gang, WL, 230V
62821 U-WL-500



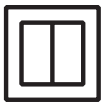
Dimming Actuator 1gang, FM, WL
62851 U-WL-500



Blind Actuator 1gang, FM, WL
62831 U-WL-500



Binary Input 6gang, WL, 230V
62870/6.0 U-WL-500



The buttons of the Smart Switch wireless can be assigned up to four functions. These can be scenes, individual actuators or any other function in ABB-free@home®. Long and short button presses for switching, dimming and blinds are therefore easy to implement.

ABB Smart Switch

Wireless and smart
Smart switch for wireless control of any ABB-free@home® function. The transmitter generates the required energy when actuated (energy harvesting) and therefore can be placed anywhere

Transmitting energy is generated when switching (Energy Harvesting)

Wireless flush mounted actuators

The wireless actuators can be used in device and room control, but also in combination with an extended system to control the entire home. It can also be controlled via the app using Bluetooth.

Parameters
Simple configuration via smartphone app

Timer
Integrated astro function/timer

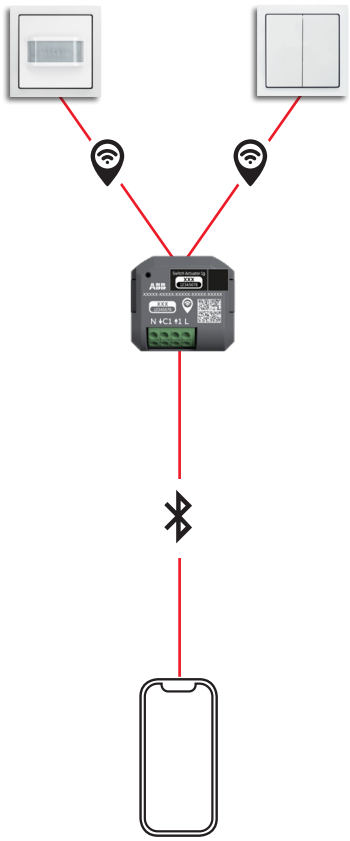
Device control via Bluetooth interface
Direct connection to smartphone

Room control via remote control
Via the ABB-free@home® Next app and myABB account

Complete home control via ABB-free@home® wireless
For connection to a free@home System Access Point

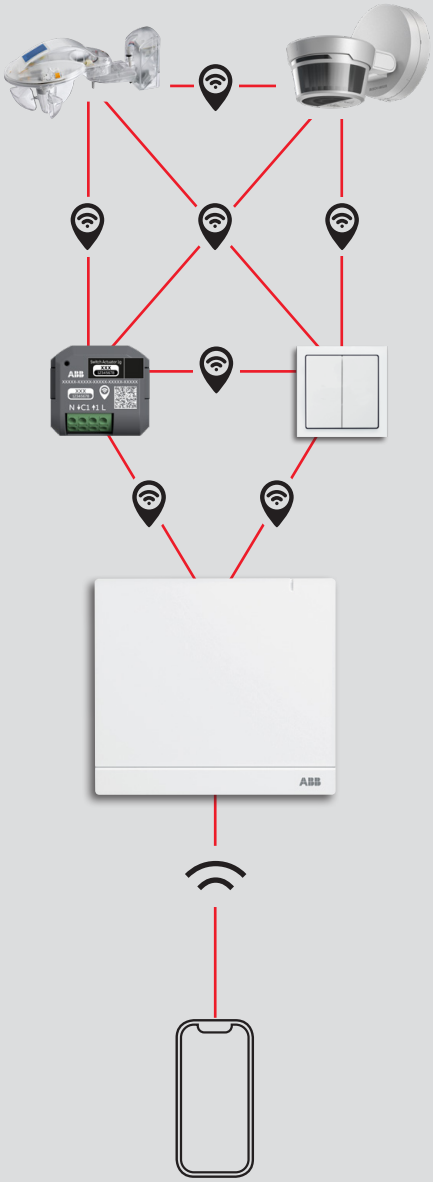
Device control

Standalone operation of actuactors. Local control and configuration of the corresponding insert via app using Bluetooth. Several actuactors can be compiled into one project in the app in order to simplify switching between devices



Room control

Networking of 32 devices via the ABB-free@home® wireless protocol. No System Access Point required. For wireless connection, myBuildings portal registration is required



Home control

Networking of devices via ABB-free@home® wireless protocol to the ABB-free@home® System Access Point. Full networkability with complete functionality such as voice control, external access, and much more, also in combination with wired devices.

ABB-free@home®

Flush mounted actuators wireless

Switch Actuator 1gang, WL, 230V NEW

Flush mounted actuator wireless for switching of lighting systems. Device control or networking of up to 32 devices (room control). Integration in ABB-free@home® wireless with System Access Point up to 150 devices. 3 wire connection (neutral conductor required). With plug clamps. With extension input. Operation also possible via conventional push buttons or switches. Remote operation via Bluetooth and smartphone/tablet app. Programming via Bluetooth with the ABB-free@home® Next App or the web interface of the System Access Point.

ABB-free@home®

Flush mounted actuators wireless

Dimming Actuator 1gang, WL, 230V NEW

Flush mounted actuator wireless for switching and dimming of lighting systems.
Device control or networking of up to 32 devices (room control).
Integration in ABB-free@home® wireless with System Access Point up to 150 devices.
2-wire connection (neutral conductor not required).
Neutral conductor optionally connectable (recommended for the connection of low loads < 3 W/VA). With plug clamps.
With extension input.
Operation also possible via conventional push buttons or switches.
Remote operation via Bluetooth and smartphone/tablet app.
Programming via Bluetooth with the ABB-free@home® Next App or the web interface of the System Access Point.
Optimised for dimming of retrofit LED lamps (LEDi).
For dimmable Retrofit-LEDs (LEDi).
For dimmable Retrofit-LEDs (LEDi) with conventional or electronic transformers.
For incandescent lamps, 230 V tungsten halogen lamps, low-voltage halogen lamps with conventional or electronic transformers and dimmable energy-saving halogen lamps.
Mix operaton of LEDi with conventional loads possible.
With manually adjustable operating mode: trailing / leading edge control.
With adjustable minimum brightness.
Low-noise level by MOSFET transistors.
With electronic short-circuit protection.
With electronic overload protection.

Binary Input 6gang, WL, 230V NEW

Flush mounted binary input wireless. Conventional push-buttons or auxiliary contacts can be connected to 6 channels. The information of the contact enquiry can be used for activating ABB-free@home® and flexTronics wireless. Inputs can also be configured as outputs to control status LEDs.
The contact polling voltage (6V DC) is made available from the binary input itself. Extension of the connecting cables possible by a maximum of 10 m.
networking of up to 32 devices (room control).
Integration in ABB-free@home® wireless with System Access Point up to 150 devices.
Programming via Bluetooth with the ABB-free@home® Next App or the web interface of the System Access Point.

ABB-free@home®

Smart Switches wireless

Smart Switch, WL
Smarter light-/blind switch for wireless control of ABB-flexTronics® wireless and ABB-free@home® devices.
Wall-mounted transmitter, 2/4 channels.
Device control or networking of up to 32 devices (room control).
Integration in ABB-free@home® wireless with System Access Point up to 150 devices.
At least one ABB-flexTronics® wireless device or an ABB-free@home® wireless device which serves as proxy device is required.
Programming with the ABB-free@home® Next App. Smartphone with NFC required.
Particularly environmentally friendly, sustainable and maintenance-free; Transmission energy is generat-ed when switching (energy harvesting).
Can be mounted freely in the room with the enclosed adhesive tape and fixing plate.
Including fixing plate for mounting on smooth walls or on switch boxes.

Combinable with the Busch-Jaeger switch range Busch-art linear®.

free@home window sensor, wireless [1) 2)]
For monitoring of the current window handle position.
The status can be visualized on the free@home panel and in the free@home app.
The window sensor is installed between the existing window handle and the window frame.
Existing window handle is used.
Suitable for window handle: 7 mm square fastener, 43 mm
attachment screw separation, lifter dia. 10 and 12 mm, max.
mounting plate size 34 x 77 mm (WxH). No wire laying required.
Mounting accessories (square extension, screws, adapter for cams) are included.
Battery included.
Low Battery notification via the free@home app.
Protection class (Device): IP 43
Temperature range (Device): -5 °C to 50 °C
Dimensions: (L x W x D): 168 mm x 38 mm x 13 mm

What is ABB-flexTronics®?

ABB-flexTronics® is a versatile solution designed for seamless integration with existing electrical systems, compatible with standard wall switches.

It allows users to control individual devices, such as lights or blinds, through wired connections. The system is designed for future scalability, enabling easy upgrades to ABB-flexTronics® wireless by simply replacing the conventional control element or motion detector with the wireless version – thanks to the insert that supports all wireless operation options. Whether you choose a wired or wireless setup, everything begins with the flexTronics insert. That is the flexibility of ABB-flexTronics®.

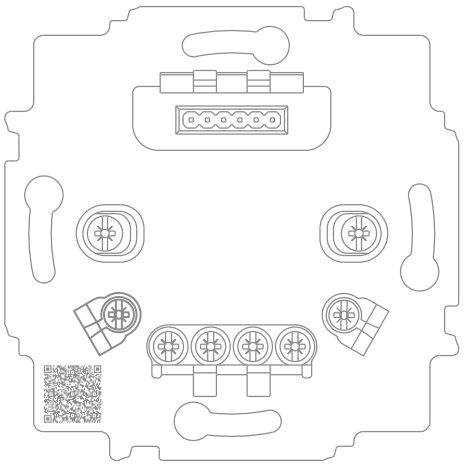

ABB-flexTronics®

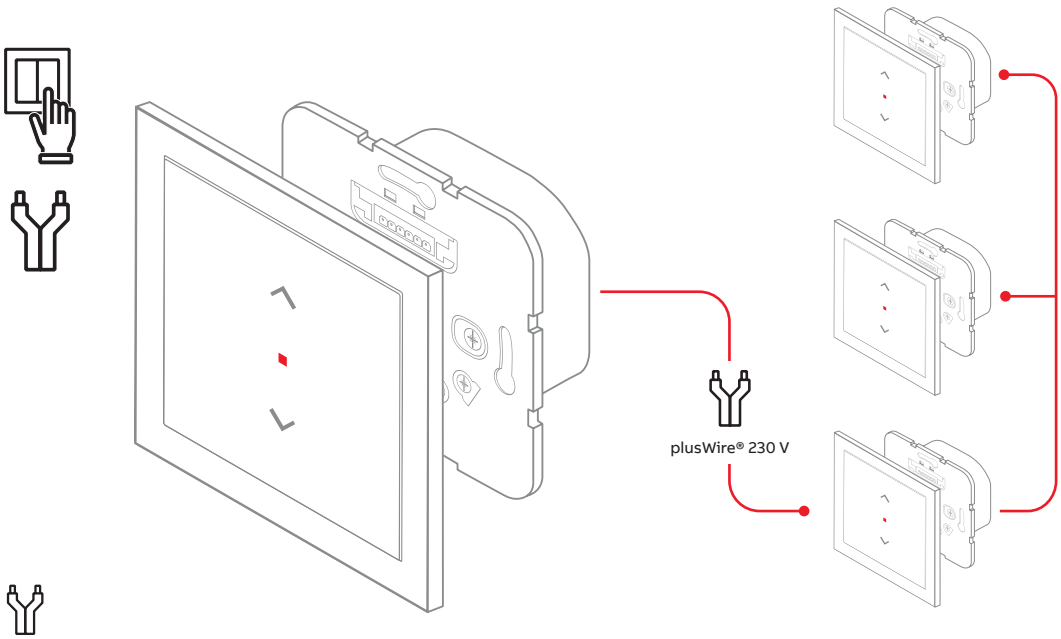
Conventional wired solution
Device control, single operation



Manual Bluetooth Wireless plusWire®

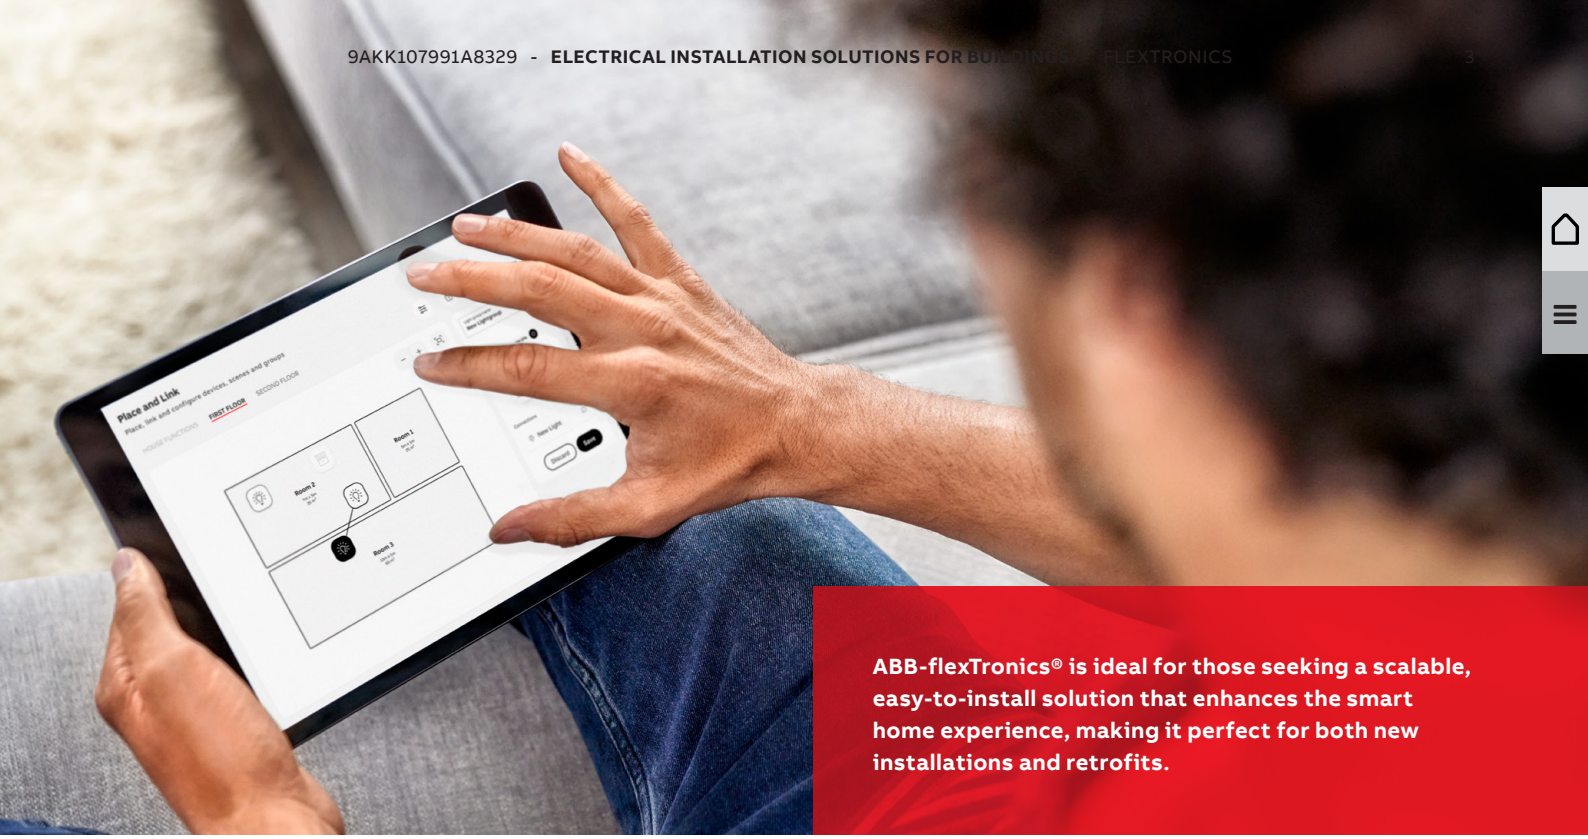


ABB-flexTronics® is ideal for those seeking a scalable, easy-to-install solution that enhances the smart home experience, making it perfect for both new installations and retrofits.

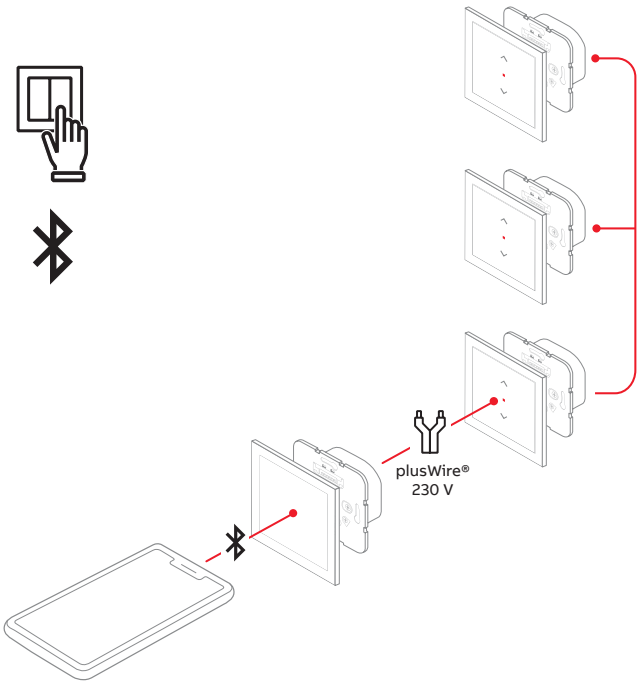
ABB-flexTronics® wireless

Wireless solution

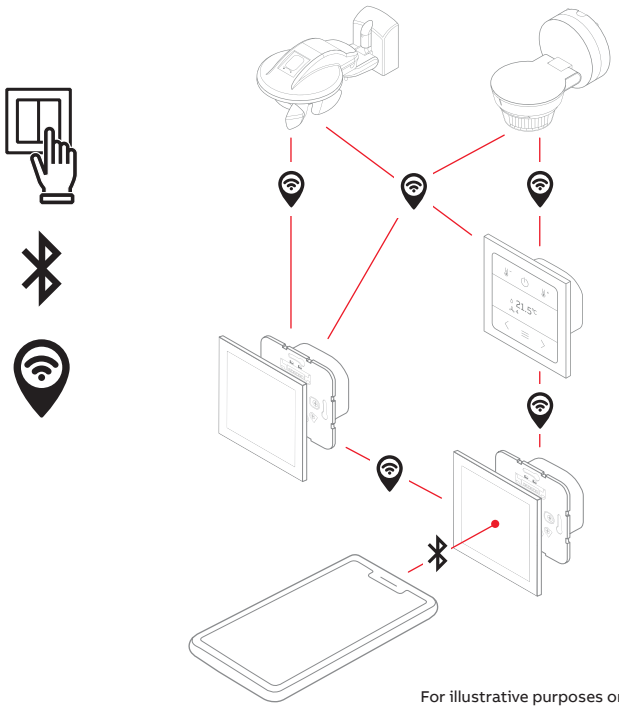
Device control and room control

App control + conventional control

Device control



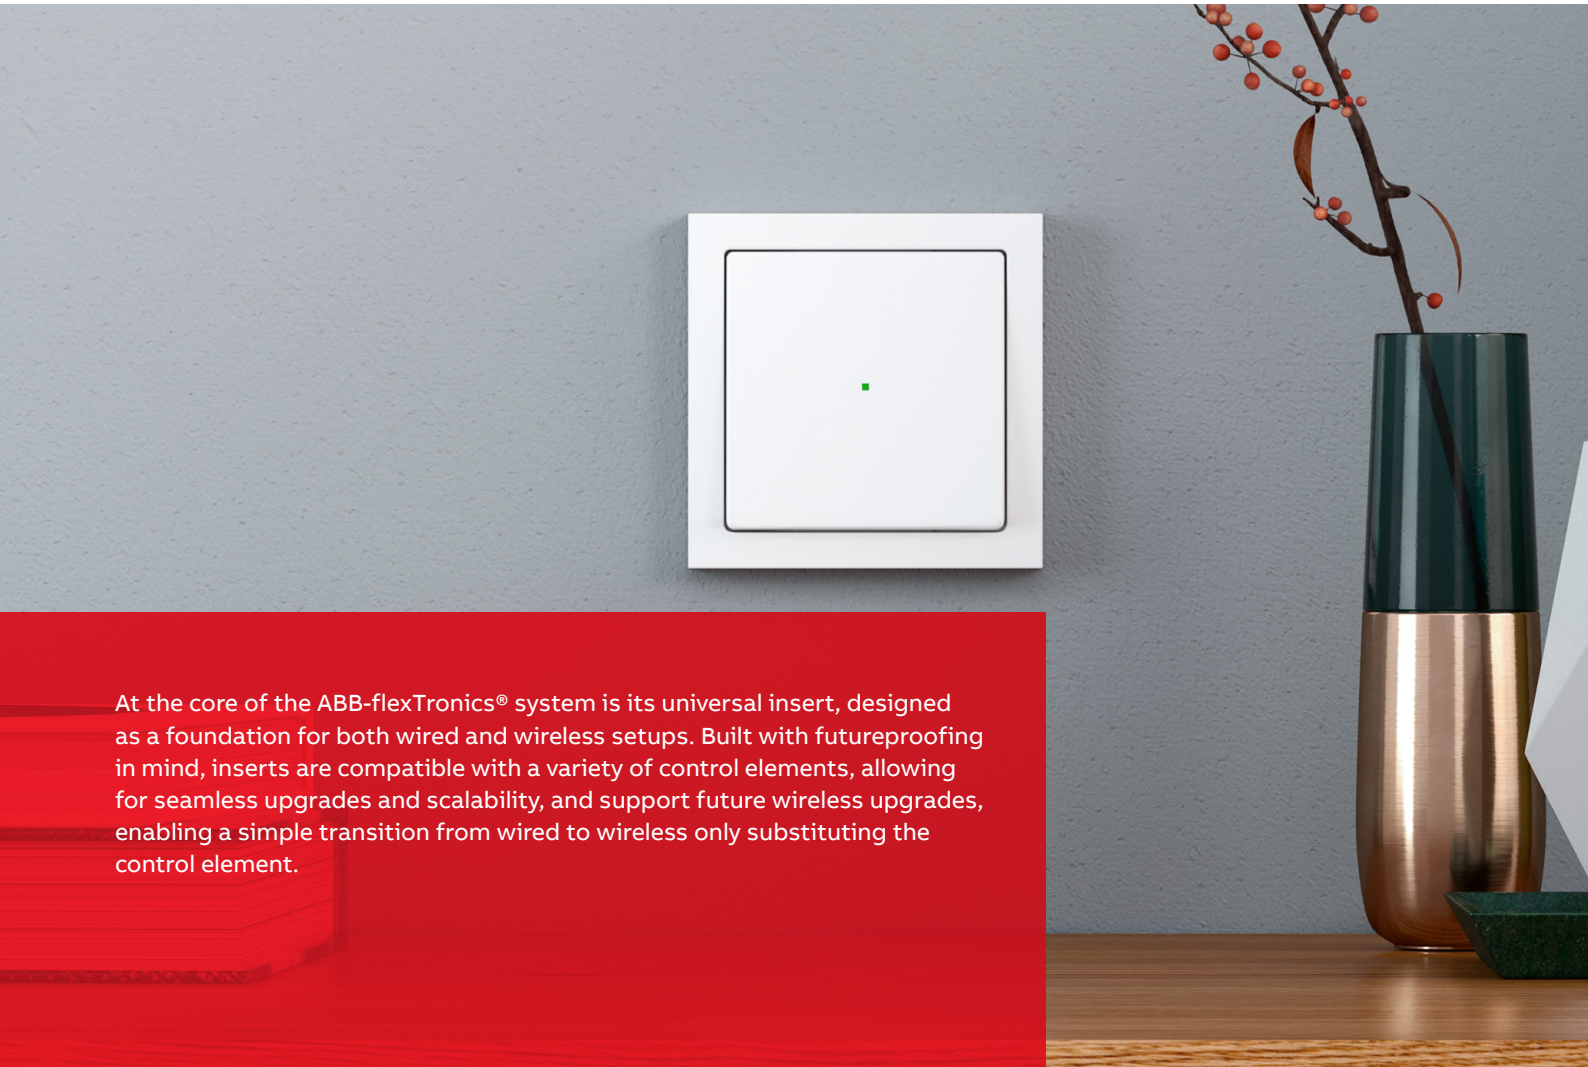
Room control



For illustrative purposes only

ABB-flexTronics® and ABB-flexTronics® wireless product features and functions

ABB-flexTronics® is a sophisticated, scalable solution designed for both wired and wireless control of home devices such as lights, blinds, room temperature and more. It is ideal for those looking to start with a simple setup and expand into a comprehensive smart home system.

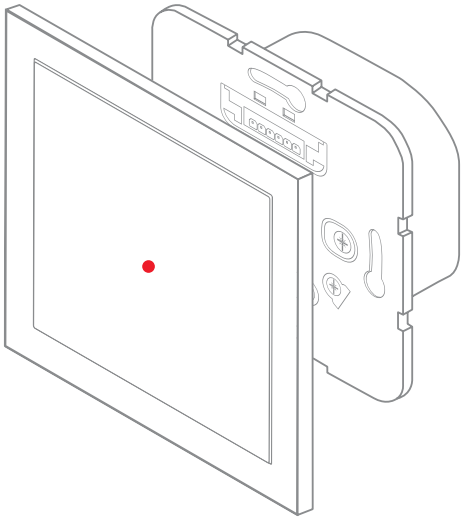


At the core of the ABB-flexTronics® system is its universal insert, designed as a foundation for both wired and wireless setups. Built with futureproofing in mind, inserts are compatible with a variety of control elements, allowing for seamless upgrades and scalability, and support future wireless upgrades, enabling a simple transition from wired to wireless only substituting the control element.

Device control, single operation

ABB-flexTronics® single operation device control
The wired setup is designed for simple, standalone operation, like conventional electrical systems. Allows for the direct control of individual devices like lights and blinds through wired connections. And with plusWire it is also possible to create groups of blinds/lights.

- **Stand-alone operation**
- **Familiar operation as with a conventional control element**
- **Additional features like value/position memory for rocker switches, presets, groups**



Blind control
ABB-flexTronics® blind inserts enable manual control of roller shutters, awnings, or Venetian blinds. The blinds can be fully opened, closed, or positioned at specific angles using a pushbutton.

Lighting control
Centralized switching and dimming of lights within a room is possible, with options to recall preset brightness levels or create specific lighting presets.

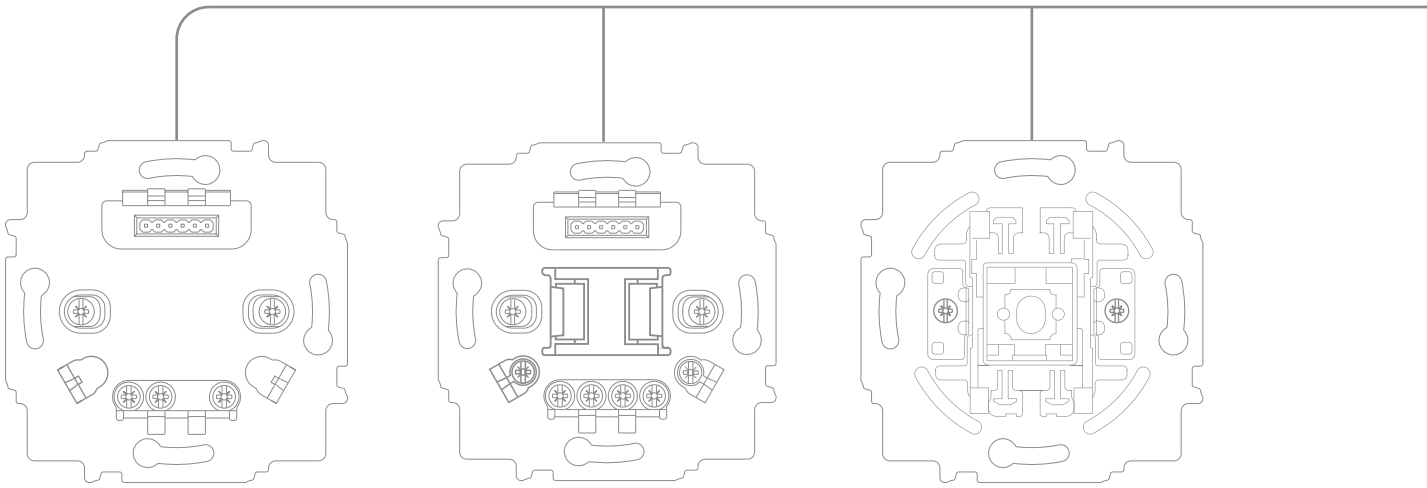
Motion and presence detectors
Integration with ABB-Watchdog® 180 flex motion sensors and presence detectors for automated control of lights and other devices based on movement and ambient light levels.

Room temperature control
The room temperature controller offers flexible heating and cooling, including ECO mode for energy savings. Control it locally or remotely via the app for easy temperature management.

The control elements from ABB-flexTronics® enable the classic control of light and blinds. Available in 1-gang and 2-gang rocker designs, these controls let you access preset brightness levels and blind positions and integrate seamlessly with motion and presence detectors.

plusWire®

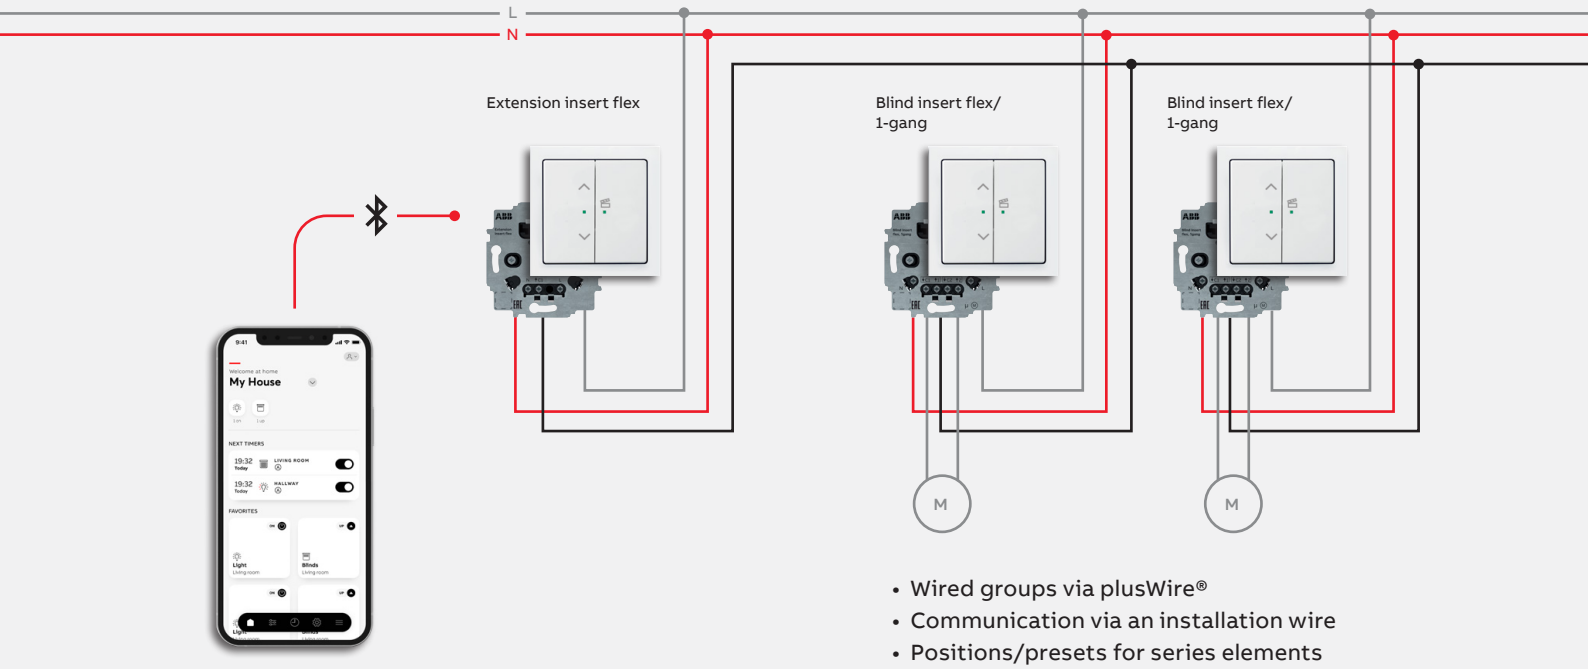
The modern extension operation for even more flexibility
plusWire® unites several flex inserts with each other via just one wire and is simply integrated into the installation cable; no separate cable is necessary. In contrast to a standard extension, additional information can be exchanged between the inserts, thus offering even more functionality and convenience.



–
plusWire® not only enables information to be exchanged between the new inserts. Conventional push-buttons can also be used as an extension via the same wire. During installation, conventional push-buttons and flex inserts can even be combined with each other.

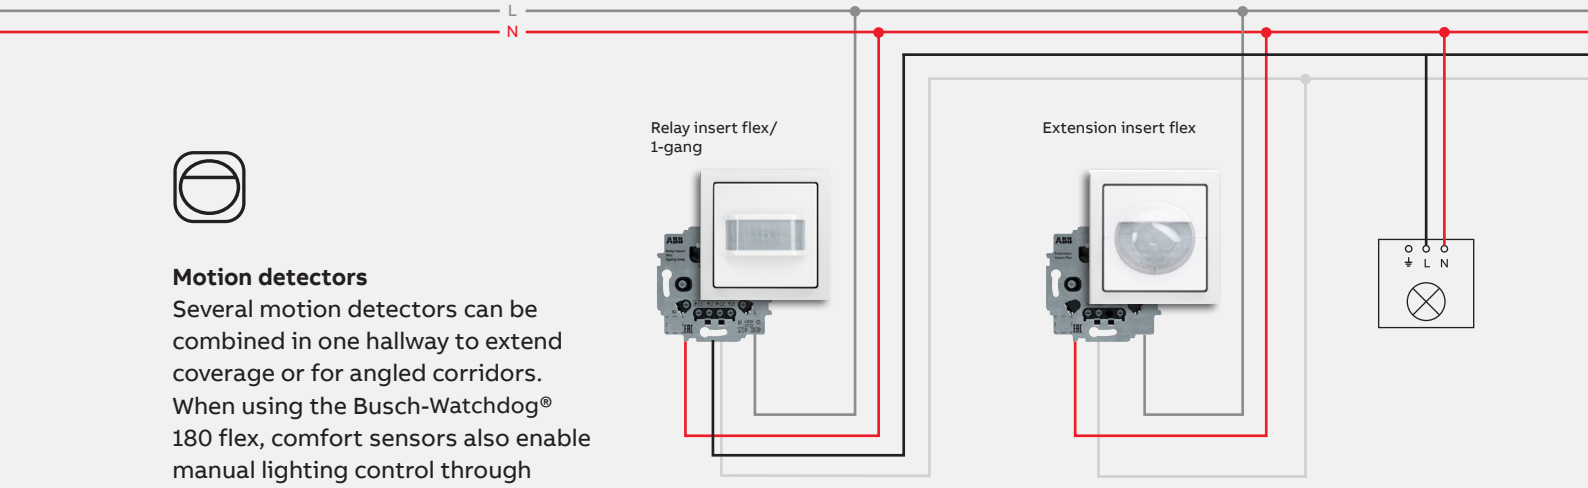
Information includes
- Short press: on
- Short press: off
- Short press: stop
- Long press: dim up/raise
- Long press: dim down/lower
- Brightness-independent switching
- Brightness-dependent switching
- Stay-on time expired

Central blind control
Intermediate solutions make the installation even more flexible. For instance, ‘only’ the central insert can be fitted with a flex wireless control element, enabling the entire group to be controlled remotely or operated via a timer.



- Wired groups via plusWire®
- Communication via an installation wire
- Positions/presets for series elements
- Decentralised stored positions called from the series element of the central insert

Motion detectors
Several motion detectors can be combined in one hallway to extend coverage or for angled corridors. When using the Busch-Watchdog® 180 flex, comfort sensors also enable manual lighting control through the ‘floating’ rocker. Defined on/off switching is possible above or below the detection lens.



–
The comfort sensor with multi-lens is ideal for use in stairwells

Wireless

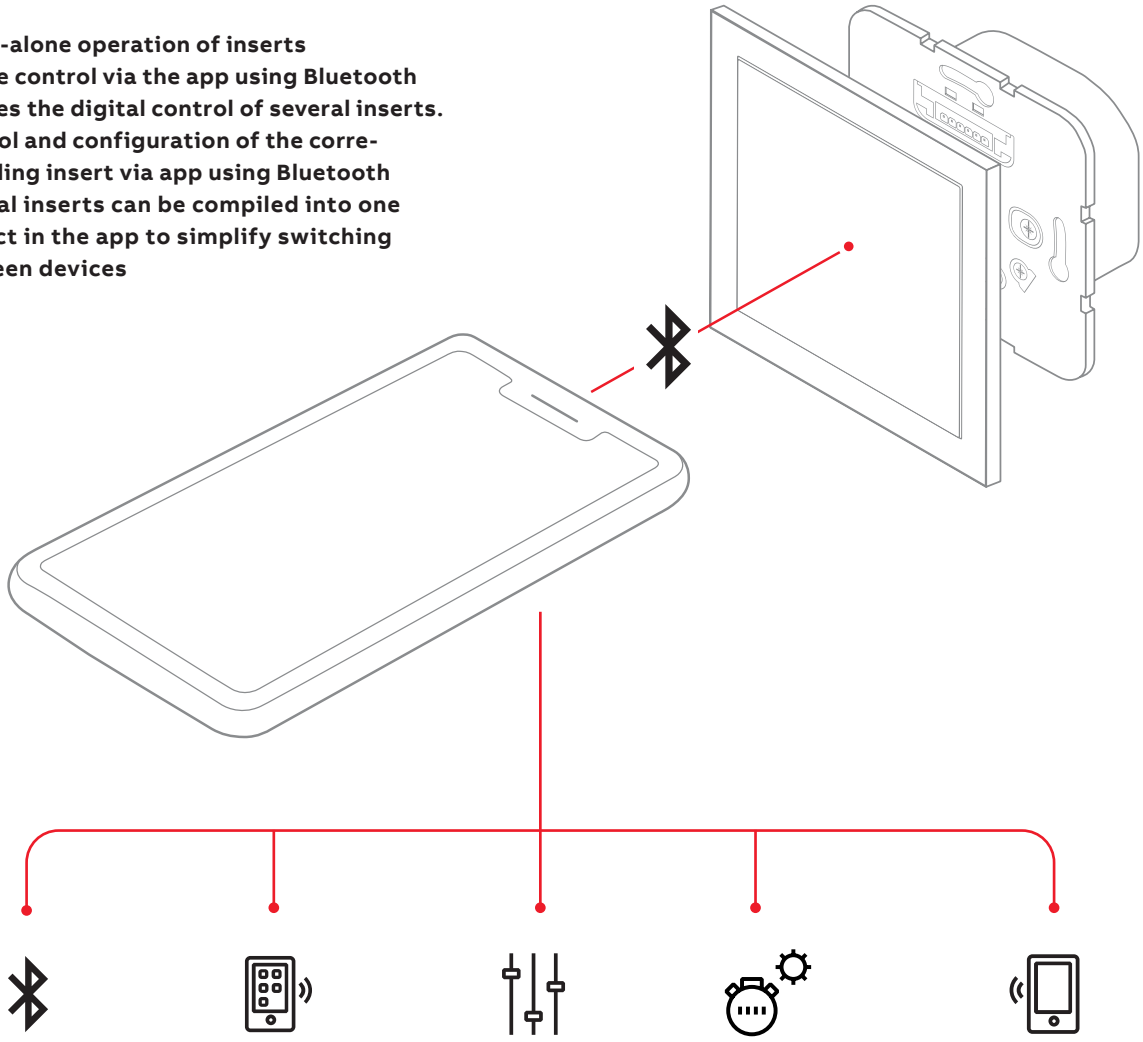
ABB-flexTronics® wireless

Step into the world of smart homes with wireless device control and enjoy the added flexibility to expand your system at any time by adding new components.

ABB-flexTronics® wireless
Device control

Start with ABB-flexTronics® wireless device control, or easily upgrade from ABB-flexTronics® single-operation device control by swapping out the control element. From there, you can manage devices via Bluetooth using the app, allowing for digital local remote control and configuration of multiple devices.

- **Stand-alone operation of inserts**
- **Device control via the app using Bluetooth enables the digital control of several inserts.**
- **Control and configuration of the corre-sponding insert via app using Bluetooth**
- **Several inserts can be compiled into one project in the app to simplify switching between devices**



Bluetooth connectivity
Direct connection to smartphones

Commissioning via App
Thanks to the ABB-free@home® Next app

Extended range of parameters
In addition to standard device's features

Embedded timer
Integrated astro function/timer

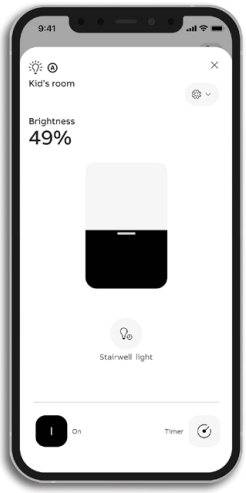
Local control via App
Control the device via smartphone while at home

Wireless

ABB-flexTronics® wireless
Device control

As powerful as the sum of its parts. When combined, our modules demonstrate what device control can offer.

From light control through blind management, all the way to motion and presence detectors, all functions are easy to configure, operate and compile in one project in the ABB-free@home® Next app. All that is required is a Bluetooth connection.

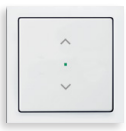


Lighting control
- On/off
- Timer
- Dimmer values/presets
- Stay-on times
- Astro function

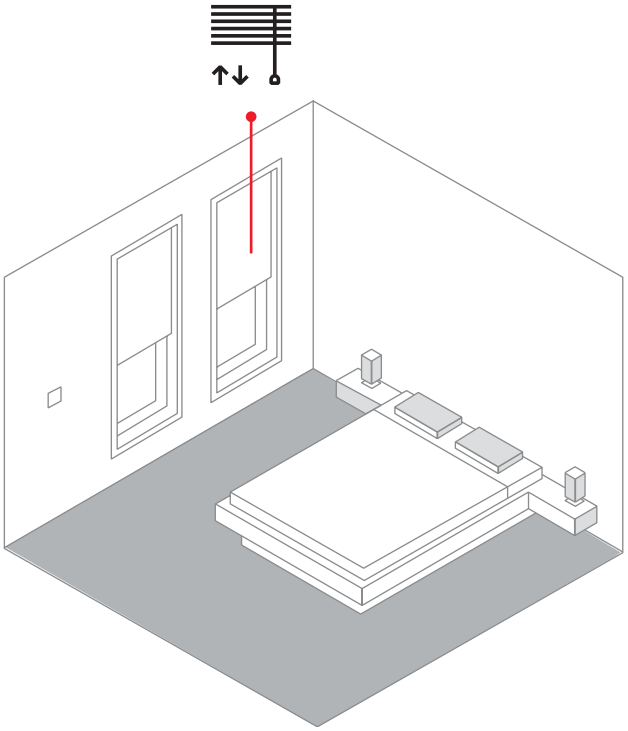
Blind control
- Up/down
- Timer
- Astro function
- Shading position
- Vacation function

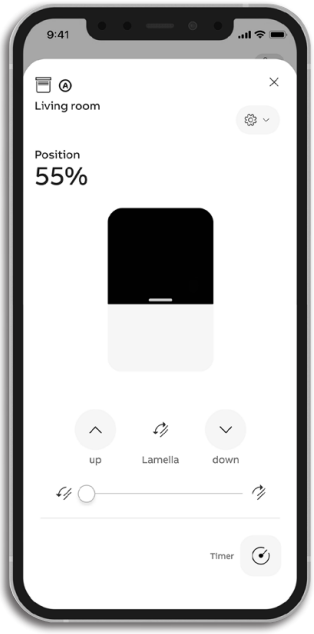
Motion detector
- Timer
- Stay-on times
- Astro function
- Set switching thresholds
- Disable manual operation

Room temperature control
- Temperature setting
- Time schedule
- ECO mode
- Astro function
- Automatic heating and cooling



Blind control





Practical and future-ready
All functions can be upgraded at any time simply by replacing the control element on the front. All inserts and elements are completely compatible.

To learn more about the wiring refer to page 14 plusWire®

Wireless

ABB-flexTronics® wireless
Device control

ABB-flexTronics® wireless offers a straightforward way to make your space smarter and more responsive to your needs.

Operate your system through traditional wall switches, the ABB-free@home® Next app (available for iOS and Android), or by grouping devices for collective control. Manage devices, set timers, and create automation rules, through the ABB-free@home® Next app.

Lighting Control

Switching and dimming
Control lights through switches or the app, with options for dimming, changing colors, or activating presets.

Timers and automation
Set schedules for lighting using an integrated timer or astro function, which adjusts based on sunrise and sunset times.

Blind Control

Automated shading
Control blinds through the app, with additional automation based on weather conditions or time of day. The astro function can adjust blinds according to daylight changes.

Weather integration
Blinds can be automatically adjusted in response to weather conditions when integrated with a weather station.

Lighting Control Applications

Garden lighting
Automate garden lights for both aesthetic and security purposes, with options for varied presets based on time, weather, or season.

Stair lighting
Energy-efficient lighting control for stairwells using motion sensors.

Children's room
Set up safe and soothing lighting scenarios, like dimming lights gradually for bedtime.

Bathroom lighting
Customizable lighting for different times of the day, synced with natural biorhythms using motion detectors and dimmers.

Temperature Control

Room Temperature Control
The room temperature controller offers versatile heating and cooling for fan-coils, underfloor heating, and conventional systems. With an energy-saving ECO mode, it ensures efficient comfort. Control settings locally or remotely via the app for easy temperature management.

Astro Function and Presets: Automate functions based on sunrise and sunset times, and use presets to quickly set the perfect atmosphere for any occasion, like a cozy movie night.

Everything off function: Create a preset scene where the networked devices in all rooms can be switched off at the same time. For example the lights in the entire house can be switched off at the touch of a single button.

ABB-flexTronics® wireless
Room control

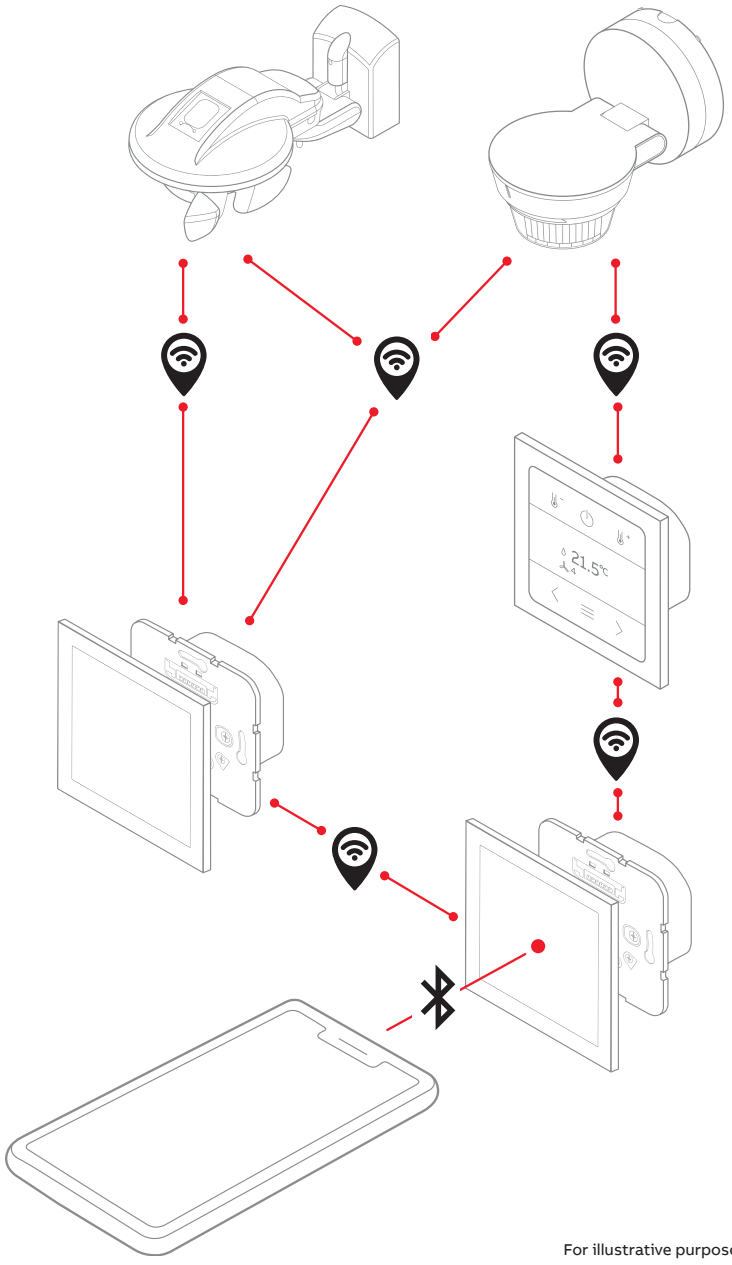
Networking is the keyword of the future.

The advantages are obvious: the functionality of our intelligent room control can be flexibly scaled via radio and/or plusWire®. Several devices can be connected to each other. For convenience and comfort that is virtually invisible but can be felt every single day.

Future-ready room control
Blind management, light control and motion detectors are connected with each other and can be controlled individually or together.

ABB-flexTronics® wireless simplifies smart room management with Bluetooth technology, allowing seamless control of lights, blinds, and sensors. Easily configure your system using the ABB-free@home® Next app, which provides a flexible solution for modern spaces without the need for extensive wiring.

Ideal for homeowners and professionals, this system enables device control from your smartphone, enhancing comfort and energy efficiency by automating lighting and shading based on occupancy and time of day. Expandable and compatible with the ABB-free@home® system, it's a future-proof choice for comprehensive home automation.



myABB registration and smartphone pairing is required.
All necessary device data is stored in the cloud.

For illustrative purposes only

Wireless

ABB-flexTronics® wireless
Room control

Wireless mesh network

The wireless system can be expanded to support up to 32 devices in a wireless mesh network, enhancing coverage and control capabilities across larger homes

Enhanced coverage

- **Extended range:** A mesh network allows devices to communicate with each other, relaying signals between them. This extends the coverage area beyond what a single router or device could achieve, making it ideal for large homes or properties.
- **Seamless connectivity:** Devices in different parts of the home can maintain stable connectivity without dead zones or weak signals.

Increased control capabilities

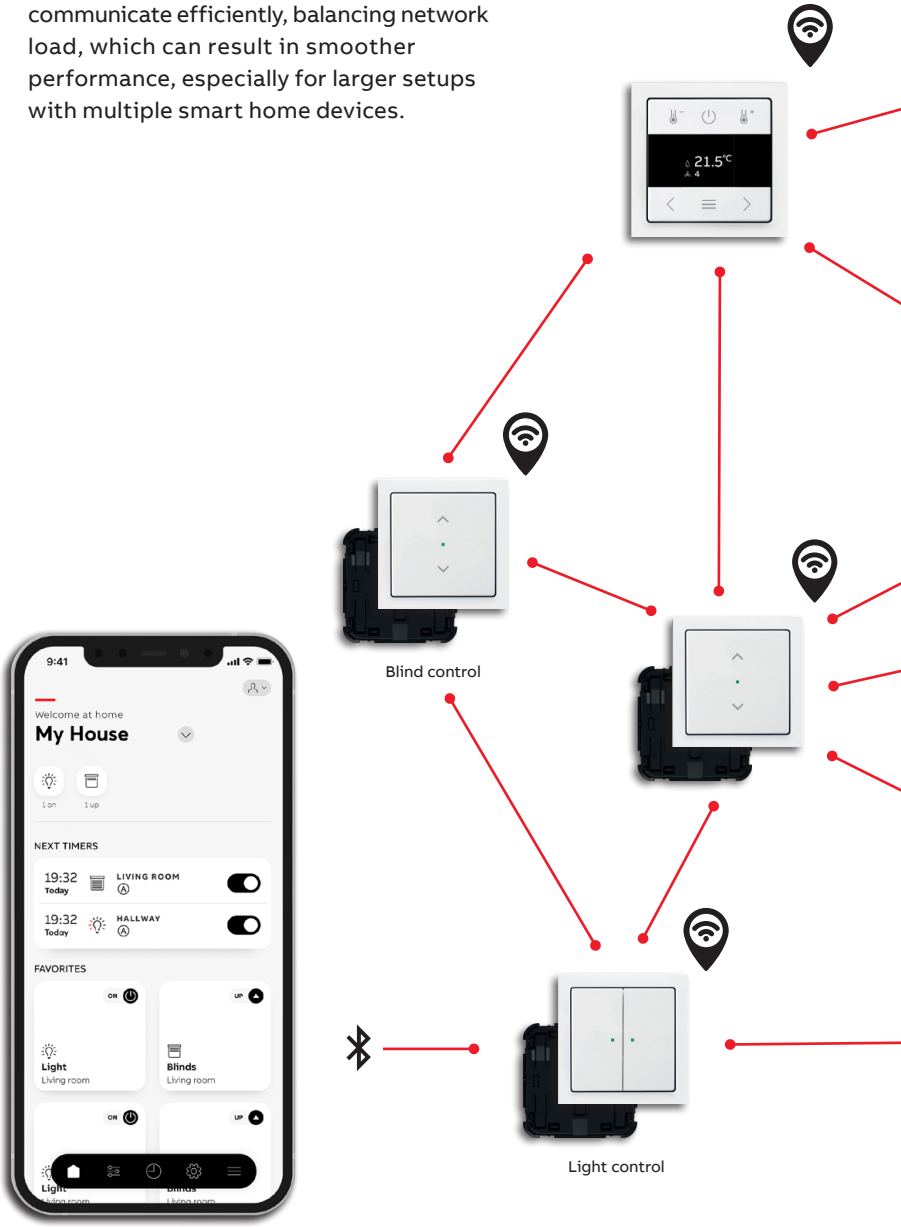
- **Centralized management:** Integrating devices like the ABB-flexTronics wireless, ABB-free@home wireless, Watchdog PRO, weather stations, and window contacts allows for unified control. This enables centralized automation and monitoring from a single system or interface.
- **Comprehensive automation:** With a variety of devices in the network, users can automate more complex tasks. For example, a weather station can adjust window contacts or a thermostat based on weather data, enhancing smart home automation.

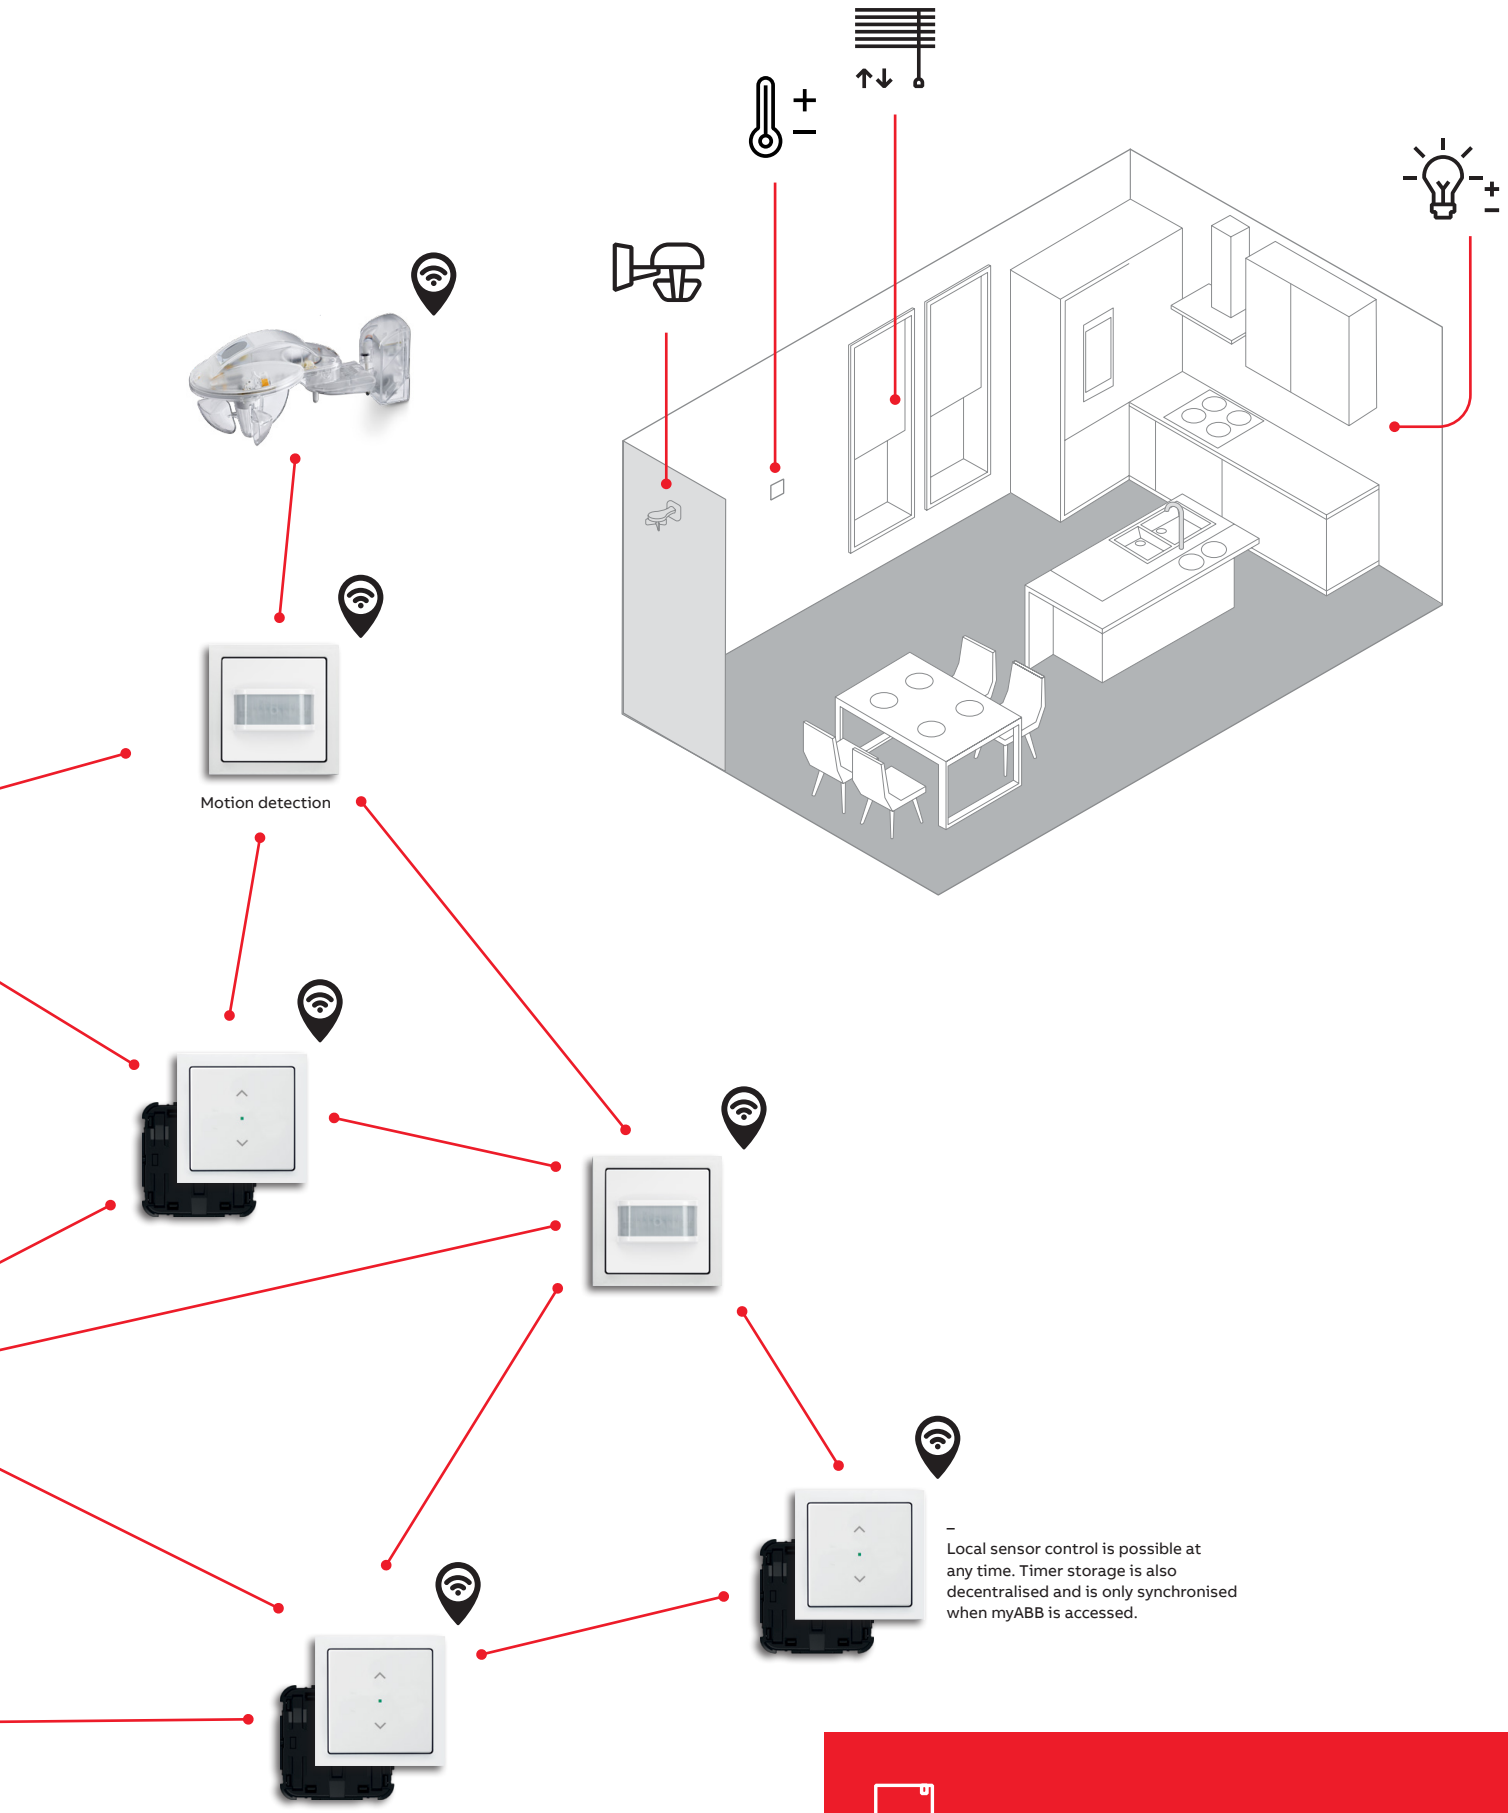
Scalability

- **Flexibility:** As new wireless devices are added (up to 32), users can continue expanding their home automation system without major infrastructure changes.
- **Future-proofing:** The ability to integrate various device types ensures the system is adaptable to future needs and technology advancements.

Improved reliability

- **Redundancy:** In a mesh network, if one device fails or experiences weak signal, other devices can route traffic through alternative paths, ensuring consistent performance.
- **Efficient communication:** Devices communicate efficiently, balancing network load, which can result in smoother performance, especially for larger setups with multiple smart home devices.





–
Local sensor control is possible at any time. Timer storage is also decentralised and is only synchronised when myABB is accessed.

Intelligent room control can be extended to the entire home with the addition of an ABB-free@home System Access Point.

Wireless solution
For quick and easy installation

The energy harvesting Smart Switch and the wireless flush-mounted actuators are ideal for renovations and new builds.

Flush-mounted actuators
The flush-mounted actuators for switching, dimming or controlling blinds can be easily installed in a deep installation box. They can be controlled by the Smart Switch or any other ABB wireless control element or by conventional push buttons directly connected to the extension input.

Program with the ABB-free@home® Next app
The programming and operation of the wireless actuators and the Smart Switch is carried out via the ABB-free@home® Next app. Here, the devices can be linked as desired and assigned to functions. The smartphone is connected with the devices via via Bluetooth or NFC (BT pills and NFC Smart Switch).

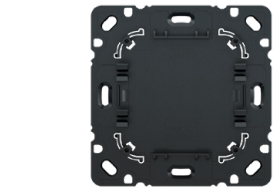
ABB Smart Switch

Wireless and smart
Smart switch for wireless control of any ABB-free@home® function. The transmitter generates the required energy when actuated (energy harvesting) and therefore can be placed anywhere



The buttons of the Smart Switch wireless can be assigned up to four functions. These can be scenes, individual actuators or any other function in ABB-free@home®. Long and short button presses for switching, dimming and blinds are therefore easy to implement.

Transmitting energy is generated when switching (Energy Harvesting)

Wireless flush mounted actuators

The wireless actuators can be used in device and room control, but also in combination with an extended system to control the entire home. It can also be controlled via the app using Bluetooth.

Parameters
Simple configuration via smartphone app

Timer
Integrated astro function/timer

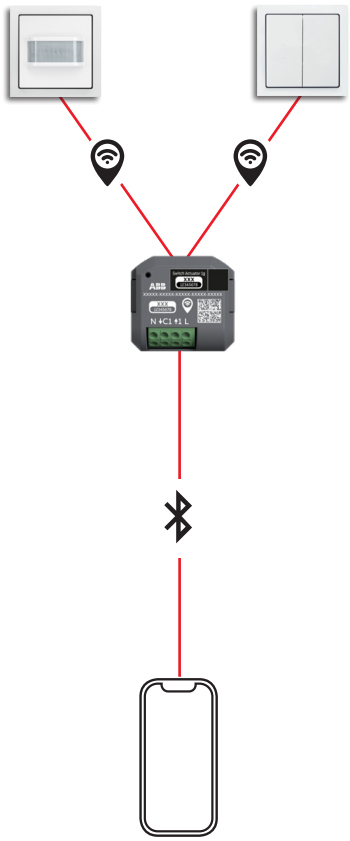
Complete home control via ABB-free@home® wireless
For connection to a free@home System Access Point

Room control via remote control
Via the ABB-free@home® Next app and myABB account

Device control via Bluetooth interface
Direct connection to smartphone

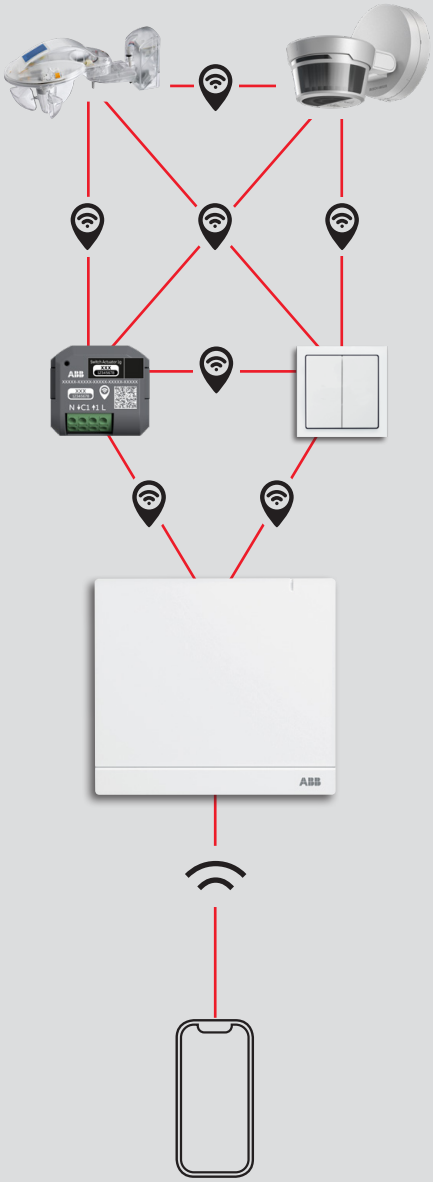
Device control

Standalone operation of actuactors. Local control and configuration of the corresponding insert via app using Bluetooth. Several actuactors can be compiled into one project in the app in order to simplify switching between devices



Room control

Networking of 32 devices via the ABB-free@home® wireless protocol. No System Access Point required. For wireless connection, myBuildings portal registration is required



Home control

Networking of devices via ABB-free@home® wireless protocol to the ABB-free@home® System Access Point. Full networkability with complete functionality such as voice control, external access, and much more, also in combination with wired devices.

ABB-flexTronics®

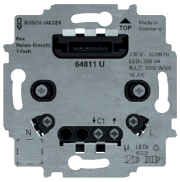
Inserts



Relay insert flex, 1gang [1)]

3 wire connection (neutral conductor required). 3 wire connection (neutral conductor required). For switching lighting systems. Operation in 1gang 2way installations via push switch unit for combination with flush-mounted units. Operation also possible via conventional push buttons (2020 US, 2021/6 UK). Without control cover.
For control element flex, 1gang, wireless, 62711-WL.
For control element flex, 2gang, wireless, 62721-WL.
For Busch-Comfort switch flex control element 64765-...-500 .
For Busch-Watchdog 180 flex sensors 6476x-...-500.
For Busch-Watchdog 180 flex sensors, wireless, 6276x-...-WL-500.
Combinable with extension insert, 64891 U.
Rated voltage: 230 V~. Rated frequency: 50 Hz
Inputs: 1. Outputs: 1x Normally open contact, potential bound.
Suitable for: 230 V- LEDi, typical, rated power: 300 VA.
Suitable for: 230 V incandescent lamps/230 V halogen lamps, rated power: 2300 W.
Suitable for: Low voltage halogen lamps that are operated via transformers,rated power: 2300 VA.
Temperature range (Device): -25 °C to 55 °C. Dimensions: (L x W x D): 71 mm x 71 mm x 30 mm
Mounting depth: 25 mm

[1)] Only in conjunction with standard flush-mounting boxes according to DIN 49073, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete)

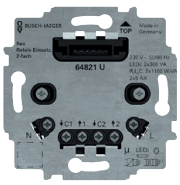
Relay insert flex, 1gang	64811 U-500	2CKA006800A3042	1



Relay insert flex, 2gang [1)]

3 wire connection (neutral conductor required). For switching lighting systems.
For switching two independent load circuits. For controlling light and ventilation systems.
Operation in 1gang 2way installations via push switch-unit for combination with flush-mounted units. Operation also possible via conventional push buttons (2020 US, 2021/6 UK). Without control cover. For control element flex, 1gang, wireless, 62711-WL. For control element flex, 2gang, wireless, 62721-WL. For Busch-Comfort switch flex control element 64765-... . For Busch-Watchdog 180 flex sensors 6476x-... . For Busch-Watchdog 180 flex sensors, wireless, 6276x-...-WL. Combinable with extension insert, 64891 U. Rated voltage: 230 V~, +10 % / -10 %. Rated frequency: 50 Hz. Inputs: 2. Outputs: 2x Normally open contact, potential-bound. Suitable for: 230 V- LEDi, typical. Rated power: 300 VA. Suitable for: 230 V incandescent lamps/230 V halogen lamps. Rated power: 1840 W
Suitable for: Low voltage halogen lamps that are operated via transformers.
Rated power: 1150 VA
Temperature range (Device): -25 °C to 55 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 30 mm
Mounting depth: 25 mm

[1)] Only in conjunction with standard flush-mounting boxes according to DIN 49073, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete)

ABB-flexTronics®
Inserts

LED dimmer insert flex, 1gang 1) 2) 3) 4) 5) 6) FM, LED, 3-240 VA
2-wire connection (neutral conductor not required).
Neutral conductor optionally connectable (recommended for the connection of low loads < 10 W/VA).
Touch dimmer for switching lighting systems.
Operation in 1gang 2way installations via push switch-unit for combination with flush-mounted units.
Operation also possible via conventional push buttons (2020 US, 2021/6 UK).
Optimised for dimming of retrofit LED lamps (LEDi). For dimmable Retrofit-LEDs (LEDi).
For dimmable Retrofit-LEDs (LEDi) with conventional or electronic transformers.
For incandescent lamps, 230 V tungsten halogen lamps, low-voltage halogen lamps with conventional or electronic transformers and dimmable energy-saving halogen lamps.
Mix operaton of LEDi with conventional loads possible.
With manually adjustable operating mode: trailing / leading edge control.
With adjustable minimum brightness.
With light-level memory and minimum brightness memory.
Low-noise level by MOSFET transistors.
With electronic short-circuit protection.
With electronic overload protection.
Without control cover.
For control element flex, 1gang, 64711.
For control element flex, 2gang, 64721.
For control element flex, 1gang, wireless, 62711-WL.
For control element flex, 2gang, wireless, 62721-WL.
For Busch-Watchdog 180 flex sensors, wireless, 6276x-...-WL.
Rated power: 3-240 VA (LEDi).
Rated voltage: 230 V~, +10 % / -10 %.
Rated frequency: 50 Hz. Inputs: 1.
Outputs: 1x dimming channel.
Suitable for: 230 V LEDi, typical (leading edge control).
Rated power: 3 - 100 VA.
Suitable for: 230 V LEDi, typical (trailing edge control).
Rated power: 3 - 240 W.
Suitable for: 230 V incandescent lamps, 230 V halogen lamps and low-voltage halogen lamps with conventional transformers or Busch Electronic Transformer.
Rated power: 10 - 240 VA.
Temperature range (Device): -5 °C to 45 °C.
Dimensions: (L x W x D): 71 mm x 71 mm x 30 mm.
Mounting depth: 25 mmIEC 60669-2-1, British Standard EN 60669-2-1

[1] In the case of conventional transformers, take ~20% transformer loss into account.
[2] In case of electronic transformers, 5 % transformer losses.
[3] Only in conjunction with standard flush-mounting boxes according to DIN 49073, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete)
[4] Recommendation: Please use loads and types of one producer.
[5] The dimmer interface is not standardised, it is the responsibility of the lamp manufacturers to list compatible products in their manufacturing information. Different installation situations can lead to different results. To clear up the problem, for example, it is recommended to carry out a local test of the selected lamps and dimmers. Please consult the lamp manufacturer for the LED dimmer recommended.
[6] A liability on the part of Buscah-Jaeger for the compatibility of the allocated lamps and dimmers is therefore excluded.

LED dimmer flex, Set, WL

For manual and automatic switching and dimming of lamps. For saving and calling up scenes and groups via the right rocker. Remote operation via the Bluetooth and smartphone/tablet app. Optimised for dimming of retrofit LED lamps (LEDi). Consisting of Flex touch dimmer insert, 64851 U-500. Consisting of control element flex, 2gang, wireless, 62721-WL-500. Consisting of rocker, 2gang left with >Dimmer< icon 6234-21-84-500. Consisting of rockers, 2gang right with >Scene< icon 6233-22-84-500. Consisting of future® linear cover frames, 1gang 1721-184K.
Control element:
Switch contacts top/bottom Display elements: LED (switch-off function / brightness adjustable) for status display. Rated voltage: 230 V~, +10 % / -10 %
Rated frequency: 50 Hz. Outputs: 1 dimming channel. Suitable for: 230 V LEDi, typical (leading edge control). Rated output: 3 - 100 VA.
Suitable for: 230 V LEDi, typical (trailing edge control). Rated output: 3 - 240 W. Temperature range (device): -5 °C - 45 °C. Storage temperature range: -20 °C - 70 °C
Dimensions: (L x W x D): 80 mm x 80 mm x 45 mm. Mounting depth: 25 mm
In the case of conventional transformers, take ~20% transformer loss into account.
In case of electronic transformers, 5 % transformer losses. Only in conjunction with standard flush-mounting boxes according to DIN 49073, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete). RAL colour number: Similar 9016
Recommendation: Please use loads and types of one producer.

KK/U4.55.1

Control Element, 55 x 55 mm

NEW

Freely configurable multifunction keypad 1- up to 4-fold with acoustic feedback. Communication over separat bus coupler unit (BAU-F-0.1). Operation via tapping or swiping of the parametrized functions, e.g., switching, dimming, blind / shutter control, scene.

- Primary function
- Integrated temperature sensor
- Buzzer for acoustic feedback
- Support of functions/status through innovative RGB light guide concept
- Day/night mode
- Orientation light
- Alarm function supported over light guide and acoustic feedback, e.g. 5 logic channels for KNX
- Light scene actuator
- Logic gates, etc.
- Sequencer
- Staircase function

Optional Removal protection: CSE/U0.1.xx.CK
Number of bus subscribers: 1

ABB-flexTronics®

Comfort switch

Busch-Comfort switch® flex Control Element Movement sensor with Orientation light
Movement detector push-button switch combination.
For switching lighting systems that depend on brightness and movement.
With select lens, prevents detection of smaller animal. Push switch function possible at all times.
With notice LED when manual operation is necessary.
Extension of the detection range by main unit/extension unit combination.
Control element: 2 controllers for setting the brightness switching threshold and switch-off delay.
Additional activation/deactivation option via push-button input on the flush-mounted insert.
Adjustable operating mode: automatic mode, automatic (motion-controlled) switch-on and switch-off.
Adjustable operating mode: semiautomatic, manual switch-on, automatic (timer and movement-controlled) switch-off.
Adjustable operating mode: automatic mode, automatic switch-on, manual switch-off. With continuous light/continuous Off function.
Adjusting elements on rear side.
Surveillance density: 9 sectors with 28 switching segments.
Switch off delay: 1 to 10 min., adjustable.
Compatible with all ABB flexTronics inserts.
For relay insert flex, 1gang, 64811 U-500.
For relay insert flex, 2gang, 64821 U-500.
For e-contact insert flex, 1gang, 64814 U-500.
For LED touch dimmer insert flex, 1gang, 64851 U-500.
For extension insert flex, 64891 U-500.
Display elements: LED for status display.
Control element: 2 controllers for setting the brightness switching threshold and switch-off delay.
Brightness limit value: 5 Lux - daytime operation.
Hight above the wall: 21 mm.
The detection range specifications refer to an ambient temperature of 21°C.

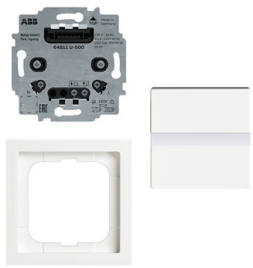
[3]) Surface painted.



Busch-Comfort switch flex [1]) [2]) Complete set with comfort switch sensor and relay insert
Ready-to-install movement detector push-button switch combination (set packaging).
Consisting of Busch-Comfort switch flex sensor, 64765-84-500.
Consisting of relay insert flex, 1gang, 64811 U-500.
Consisting of future® linear cover frames, 1gang 1721-184K-500.
Control element: 2 controllers for setting the brightness switching threshold and switch-off delay.
Display elements: LED for status display.
Rated voltage: 230 V~.
Rated frequency: 50 Hz.
Power dissipation: 0,3 W.
Outputs: 1x normally open contact, potential-bound.
Suitable for: 230 V- LEDi, typical, rated power: 300 VA.
Suitable for: 230 V incandescent lamps / 230 V halogen lamps, rated power: 2300 W.
Suitable for: Low voltage halogen lamps that are operated via transformers, rated power: 2300 VA.
Suitable for: Fluorescent lamps, Rated output: 2300 VA.
Rated current: 10 AX, cos ϕ0.9.
Detection range: frontal: 5 m, lateral: 3 m, at mounting height: 1.1 m.
Detection angle: 170°.
Brightness limit value: 5 Lux - daytime operation.
Operation mounting height: 0.8 m - 1.2 m.
Temperature range (Device): -5 °C to 45 °C.
Dimensions: (L x W x D): 85 mm x 85 mm x 46 mm.
Mounting depth: 25 mm.

[1]) The range specifications refer only to an ambient temperature of 21°C.
[2]) Only in conjunction with standard flush-mounting boxes according to DIN 49073, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete)

ABB-flexTronics®

Motion detectors

Busch-Watchdog 180 flex, basic sensor [1] [2]) with select-lens
Movement detector sensor with with measurement of ambient light.
For automatic switching of devices dependent on motion and brightness.
Compatible with all ABB-flexTronics® inserts. Adjusting elements on rear side.
Extension of the detection range by main unit/extension unit combination.
Additional activation/deactivation option via push-button input on the flush-mounted insert.
With detection display in test mode. Surveillance density: 14 sectors with 56 switching segments.
Switch-off delay: approx. 10 sec - 30 min or short-time pulse 1 sec adjustable.
For relay insert flex, 1gang, 64811 U-500.
For e-contact insert flex, 1gang, 64814 U-500.
For series relay insert flex, 2gang, 64821 U-500.
For LED touch dimmer insert flex, 1gang, 64851 U-500.
For extension insert flex, 64891 U-500. Hight above the wall: 22 mm.
Control element: 2 controllers for setting the brightness switching threshold and switch-off delay.
Detection range at mounting height 1.1 m: frontal: 12 m, lateral: 12 m.
Detection angle: 180°.
Brightness limit value: 5 Lux - 500 Lux, up to daytime operation.
Mounting height: 0.8 m - 1.2 m.
Temperature range (Device): -5 °C to 45 °C.
Dimensions: (L x W x D): 63 mm x 63 mm x 35 mm
The detection range specifications refer to an ambient temperature of 21°C.

studio white	**64764 UJ-84-500**	2CKA006800A3025	1

[1] The range specifications refer only to an ambient temperature of 21°C.
[2] Only in conjunction with standard flush-mounting boxes according to DIN 49073, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete)

ABB-flexTronics®

Presence detectors

ABB flexTronic presence detector, universal Sensor [1] [2] [3] 12 meters
Presence detector sensor with mixed light measurement.
For switching lighting systems that depend on brightness and movement.
Detection range at mounting height of 3 m: circular. Seated persons up to Ø 10 m, walking persons up to Ø 12 m.
Extension of the detection range by main unit/extension unit combination.
On wall / on ceiling height: 35 mm.
For semiautomatic and fully automatic operation.
Additional activation/deactivation possibility through pushbutton input.
With continuous light/duration-off function (8 hrs), IR service remote control necessary.
With teach-in function of the brightness switching threshold, IR service remote control required.
With brightness-independent test mode for evaluating the detection zone.
With detection LED at test mode.
Remote control possible via IR service remote control 6843.
Adjustment elements accessible on the front side.
Surveillance density: 72 sectors with 640 switching segments.
Switch-off delay: approx. 1 min. - 30 min. or short-time pulse.
Compatible with all Busch-flexTronics inserts.
For relay insert flex, 1gang, 64811 U-500.
For series relay insert flex, 2gang, 64821 U-500.
For e-contact insert flex, 1gang, 64814 U-500.
For LED touch dimmer insert flex, 1gang, 64851 U-500.
The detection range specifications refer to an ambient temperature of 21°C.

[1] The detection range with a central approach is reduced.
[2] The range specifications refer only to an ambient temperature of 21°C.
[3] Please order the respective flush-mounted insert separately.

ABB flexTronic presence detector flex set with universal sensor and relay insert
Modular presence detector with universal lens (set packaging).
Detection range at mounting height of 3 m: circular. Seated persons up to Ø 10 m, walking persons up to Ø 12 m.
Consisting of ABB presence detector flex universal sensor, 64753-24-500.
Consisting of relay insert flex, 1-way 64811 U-500.

ABB-flexTronics®

Presence detectors

ABB flexTronic presence detector, sky sensor
Presence detector sensor with mixed light measurement.
For switching lighting systems that depend on brightness and movement.
Detection range at mounting height 6 m: circular. Walking persons Ø: max. 18 m.
Detection range at mounting height 12 m: circular. Walking persons Ø: max. 24 m.
Extension of the detection range by main unit/extension unit combination.
On wall / on ceiling height: 35 mm.
For semiautomatic and fully automatic operation.
Additional activation/deactivation possibility through pushbutton input.
With brightness-independent test mode for evaluating the detection zone.
With detection LED at test mode.
Adjustment elements accessible on the front side.
Surveillance density: 72 sectors with 640 switching segments.
Switch-off delay: approx. 1 min. - 30 min. or short-time pulse.
Compatible with all Busch-flexTronics inserts.
For relay insert flex, 1gang, 64811 U-500.

ABB-flexTronics®

Presence detectors

ABB flexTronic presence detector, corridor sensor
Presence detector sensor with mixed light measurement.
For switching lighting systems that depend on brightness and movement.
Detection range at mounting height of 3 m: rectangular. Walking persons: crosswise to the detector 24 m x 3 m, frontal/lengthways to the detector 14 m x 3 m.
Extension of the detection range by main unit/extension unit combination.
On wall / on ceiling height: 39 mm.
For semiautomatic and fully automatic operation.
Additional activation/deactivation possibility through pushbutton input.
With continuous light/duration-off function (8 hrs), IR service remote control necessary.
With teach-in function of the brightness switching threshold, IR service remote control required.
With brightness-independent test mode for evaluating the detection zone.
With detection LED at test mode.
Remote control possible via IR service remote control 6843.
Adjustment elements accessible on the front side.
Surveillance density: 92 sectors with 368 switching segments.
Switch-off delay: approx. 1 min. - 30 min. or short-time pulse.
Compatible with all Busch-flexTronics inserts.
For relay insert flex, 1gang, 64811 U-500.
For series relay insert flex, 2gang, 64821 U-500.
For e-contact insert flex, 1gang, 64814 U-500.
For LED touch dimmer insert flex, 1gang, 64851 U-500.
The detection range specifications refer to an ambient temperature of 21°C.

ABB-flexTronics®

Presence detectors

Busch-Presence detector Universal, decor frame [1])
Paintable decor frame for individual design.
For presence detectors with Compact and Universal lens.
For ABB flexTronic presence detector sensors with universal and sky lens.
For latching onto the presence detector.
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 94 mm x 94 mm x 23 mm

Color	Order details		Pack unit
	Type code	Order code	pc.
studio white matt	**6889/30-24-500**	2CKA006800A2765	10

[1)] The decor frame included in the scope of delivery of the presence detector must be removed before mounting.

ABB-flexTronics® wireless

Motion detectors wireless

Busch-Watchdog 180 flex, comfort sensor, wireless with select-lens
For automatic switching of devices dependent on motion and brightness.
Push switch function possible at all times.
In combination with dimmer insert flex: dimming function of lighting and selectable light value storage.
With time-controlled basic illumination function.
With time-controlled night anti-glare function.
With enabling of pre-warning of switch-off for stairwell operation.
Compatible with all ABB-flexTronics® inserts.
Works with free@home wireless.
Remote operation via the Bluetooth and smartphone/tablet app.
Programming via Bluetooth with the ABB-free@home® Next app or via the web interface of the System Access Point.
Extension of the detection range by main unit/extension unit combination.
Additional activation option via pushbutton input on the flush-mounted insert.
Timer with Astro function.
Automatic switchover from summer time to winter time (switch-off function).
With continuous light/continuous Off function.
With brightness-independent test mode for evaluating the detection zone.
With detection LED at test mode.
Surveillance density: 14 sectors with 56 switching segments.
Switch-off delay: approx. 10 sec - 30 min or short-time pulse 1 sec adjustable.
For relay insert flex, 1gang, 64811 U-500.
For e-contact insert flex, 1gang, 64814 U-500.
For relay insert flex, 2gang, 64821 U-500.
For LED touch dimmer insert flex, 1gang, 64851 U-500.
For extension insert flex, 64891 U-500.
Hight above the wall: 22 mm.
Temperature range (device): -5 °C - 45 °C.
Detection range: frontal at mounting height1.1 m: 12 m, lateral: 12 m.
Brightness limit value: 5 Lux - up to daytime operation.
Detection angle: 180°.
Dimensions: (L x W x D): 55 mm x 55 mm x 35 m.
Mounting height: 0.8 m - 1.2 m.
The detection range specifications refer to an ambient temperature of 21°C.

Busch-Watchdog 180 flex, wireless. Complete set with Comfort sensor select lens and relay insert
Consisting of Busch-Watchdog 180 flex comfort sensor with select lens, 62762-84-WL-500.
Consisting of relay insert flex, 1gang, 64811 U-500.
Consisting of future® linear cover frame, 1gang 1721-184K-500.
Rated voltage: 230 V~
Rated frequency: 50 Hz. Inputs: 1
Outputs: 1x Normally open contact, potential-bound
Suitable for: 230 V- LEDi, typical., rated power: 300 VA.
Suitable for: 230 V incandescent lamps/230 V halogen lamps, rated power: 2300 W.
Suitable for: Low voltage halogen lamps that are operated via transformers, rated power: 2300 VA.
Detection range: frontal: 12 m, lateral: 12 m, Mounting height: 1.1 m.
Detection angle: 180°.
Brightness limit value: 5 Lux - 500 Lux, up to daytime operation.
Mounting height: 0.8 m - 1.2 m
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 80 mm x 80 mm x 48 mm

ABB-flexTronics® wireless

Motion detectors wireless

Busch-Watchdog 180 flex, comfort sensor, wireless with multi-lens
For automatic switching of devices dependent on motion and brightness.
Push switch function possible at all times.
For detection down to the floor. For detection in stairwells. With 4 detection levels.
In combination with dimmer insert flex: dimming function of lighting and selectable light value storage. With time-controlled basic illumination function.
With time-controlled night antiglare function.
With enabling of pre-warning of switch-off for stairwell operation.
Compatible with all ABB-flexTronics® inserts. Remote operation via the Bluetooth and smartphone/tablet app. Multi-lens: suitable also for mounting heights of 2.20 m.
Extension of the detection range by main unit/extension unit combination.
Additional activation option via push-button input on the flush-mounted insert.
Timer with Astro function.
Automatic switchover from summer time to winter time (switch-off function).
With continuous light/continuous Off function.
With brightness independent test mode for evaluating the detection zone.
With detection LED at test mode.
Surveillance density: 54 sectors with 224 switching segments.
Switch-off delay: approx. 10 sec - 30 min or short-time pulse 1 sec adjustable.
For relay insert flex, 1gang, 64811 U-500.
For e-contact insert flex, 1gang, 64814 U-500.
For relay insert flex, 2gang, 64821 U-500.
For LED touch dimmer insert flex, 1gang, 64851 U-500.
For extension insert flex, 64891 U-500.
Hight above the wall: 31 mm.
Temperature range (device): -5 °C - 45 °C.
Detection range at mounting height 1.1 m: frontal: 8 m, lateral: 7 m.
Detection range at mounting height: 2.2 m: frontal: 8 m, lateral: 8 m.
Brightness limit value: 5 Lux - up to daytime operation.
Detection angle: 180 °.
Dimensions: (L x W x D): 55 mm x 55 mm x 45 mm.
Mounting height: 0.8 m - 1.2 m, alternatively: 2.2 m.

ABB-flexTronics® wireless - compatible devices

Flush-mounted actuators and binary input

Dimming Actuator 1gang, WL, 230V NEW

Flush mounted actuator wireless for switching and dimming of lighting systems.
Device control or networking of up to 32 devices (room control).
Integration in ABB-free@home® wireless with System Access Point up to 150 devices. 2-wire connection (neutral conductor not required).
Neutral conductor optionally connectable (recommended for the connection of low loads < 3 W/VA). With plug clamps. With extension input.
Operation also possible via conventional push buttons or switches.
Remote operation via Bluetooth and smartphone/tablet app.
Programming via Bluetooth with the ABB-free@home® Next App or the web interface of the System Access Point.
Optimised for dimming of retrofit LED lamps (LEDi).
For dimmable Retrofit-LEDs (LEDi).
For dimmable Retrofit-LEDs (LEDi) with conventional or electronic transformers.
For incandescent lamps, 230 V tungsten halogen lamps, low-voltage halogen lamps with conventional or electronic transformers and dimmable energy-saving halogen lamps.
Mix operaton of LEDi with conventional loads possible.
With manually adjustable operating mode: trailing / leading edge control.
With adjustable minimum brightness.
Low-noise level by MOSFET transistors.
With electronic short-circuit protection.
With electronic overload protection.

Dimming Actuator 1gang, WL, 230V	62851 U-WL-500	2CKA006710A0038			1

Binary Input 6gang, WL, 230V NEW

Flush mounted binary input wireless. Conventional push-buttons or auxiliary contacts can be connected to 6 channels. The information of the contact enquiry can be used for activating ABB-free@home® and flexTronics wireless. Inputs can also be configured as outputs to control status LEDs.
The contact polling voltage (6V DC) is made available from the binary input itself. Extension of the connecting cables possible by a maximum of 10 m.
Operation in ABB-flexTronics® wireless networking of up to 32 devices (room control).
Integration in ABB-free@home® wireless with System Access Point up to 150 devices.
Programming via Bluetooth with the ABB-free@home® Next App or the web interface of the System Access Point.
