CERTIFICATE OF
PRODUCT CARBON FOOTPRINT

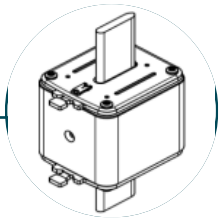
3,09
kg CO_2e

Company

SIBA GmbH

Title of Balance

PCF - NH3 gG 500V - 20 005 13.425-630A



Accounting period: 01.10.2022 bis 30.09.2023

Accounting subject: Scope 1 (gas, oil and company vehicles) and Scope 2 (electricity and district heating) are calculated by dividing the consumption by the kg of fuses delivered and then converting it to the individual product. Scope 3 (materials) is based on the material data sheet. The data sheet lists the weights and material compositions of all individual components. Due to the complexity, we limit ourselves to the most important fuse materials. Transportation, waste, etc. are included in the 10% safety surcharge. The balance sheet limit is between "cradle and factory gate" (cradle-to-gate).

Emissions & Description of the Balance Room

Balance standard: This certificate is to be understood as a self-declaration of the company. Depending on the self-selected system limit, the balance represents the sum of all direct and indirect greenhouse gas emissions of a company/site/process/product, expressed in CO2 equivalents (CO2e). The balance sheet is drawn up in accordance with the requirements for the quantitative determination and reporting of greenhouse gas emissions in accordance with the self-selected regulation or standard.
