

- Intelligent, active antenna module for ROYAL Z+

ROYAL ZA+ is an intelligent antenna for the ROYAL Z+ fire alarm system. The antenna allows you to extend the total range of an installation by adding active antennas in favorable positions.

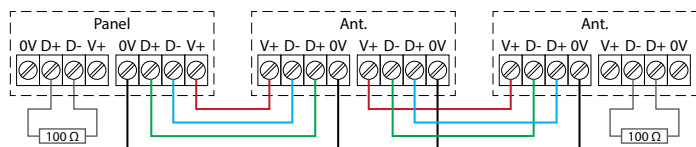

The antenna connects to a control or booster panel via RS 485.

Wireless devices will be able to communicate through the ROYAL ZA+ instead of directly with a panel.

Technical Specifications

Supply voltage	12 VDC
Panel communication	RS 485
Radio frequency band	868 MHz
Radio modulation	2-GFSK
Output Power (ERP)	< 25 mW (< 14 dBm)
Dimensions (H×B×D)	165,5 × 81,5 × 42 mm (excl. ant.)

Connections
