Headlamp helmet bracket

PRODUCT DESCRIPTION

The bracket is easily attached to your helmet by using the pre-mounted adhesive tape and is designed to not affect the protective characteristics of the helmet. Once the bracket is in place, the headlamp can be slid in or out of the snap socket with just a click.

SILVA ATTACHMENTS

We have developed a unique range of attachment possibilities for different needs.

With high demands on flexibility and comfort, SILVA headlamps are modular and can easily be shifted between your headband, helmet, jacket, backpack or bicycle handlebar by using the attachments in our range.

As part of the **SILVA Connection System**, our brackets alongside our wide battery range offer a lot of flexibility and enable easy adaption for several activities. With just a few snaps and clicks you can use the same headlamp for different activities.

SPECIFICATION

Compatible with	Exceed Series, LR1300
Attachment	Helmet
Material	TBA
Dimensions	TBA
Weight	TBA

INCLUDED

Adhesive tape
