

HEADLAMP MOLLE ATTACHMENT

PRODUCT DESCRIPTION

Optimal flexibility - The MOLLE clip can be attached in multiple ways and is compatible with most SILVA multifunctional headlamps. It snaps easily to your gear and lets you adjust the lamps angle both horizontally and vertically to optimize the position of your light beam.

SILVA ATTACHMENTS

We have developed a unique range of attachment possibilities for different needs.

With high demands on flexibility and comfort, SILVA headlamps are modular and can easily be shifted between your headband, helmet, jacket, backpack or bicycle handlebar by using the attachments in our range.

As part of the **SILVA Connection System**, our brackets alongside our wide battery range offer a lot of flexibility and enable easy adaption for several activities. With just a few snaps and clicks you can use the same headlamp for different activities.
