

Approved Replacement Hygiene Kits

The following list includes 3M™ PELTOR™ Hearing Protectors and approved hygiene kits. Some of the communication headsets are also approved with gel cushions, which can be seen in the column to the right. You can find discontinued product ID numbers in a separate table at the end of the document.

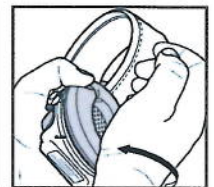

We recommend to change the hygiene kit when the cushions are damaged or at least once every six months. This helps to maintain attenuation, hygiene and comfort. To change, you need to remove the existing hygiene kit from your headset (see fig. A1). For X3, X4 and X5 earmuffs remove the grey spacer from existing earmuff to use with new hygiene kit (see fig. A2). Insert the new foam liner and attach cushions to the earmuff or headset cushions to the earmuff or headset (see fig. A3). Use only the approved hygiene kits as outlined below. Always follow and read User Instruction for the hearing protector.

A1. Remove cushions

A2. Grey spacer for X3, X4 and X5

A3. Attach cushions

Hearing Protectors / Earmuffs

Product	Product ID number	Hygiene Kit	Gel Cushions
