

kloss

Description

Concealed ceiling connection

Kloss is used to create neat, concealed connections to suspended ceilings and solid ceilings when installing cable trunking. It covers an area of 28 × 28 mm against the ceiling, hiding cut ceiling profiles or drilled holes for a clean finish.

The product is similar to other end caps and termination pieces.

Kloss is compatible with OptiLine 18 mini trunking and is suitable for suspended ceilings such as Rockfon and Ecophon, as well as plasterboard or concrete ceilings.

Available sizes

- 12x20 mm
- 18x20 mm
