Declaration regarding the REACH – Regulation

This REACH declaration is issued under the sole responsibility of the manufacturer

ABB Industrial Solutions B.V.
Gipsweg 15 bus H
9940 Evergem
Belgium

The EC Regulation No 1907/2006 demands Registration, Evaluation, Authorisation and Restriction of Chemical substances (REACH).

This Regulation is based on the principle that manufacturers, importers and downstream users must ensure that they manufacture, place on the market and use substances that do not adversely affect human health or the environment. The purpose of the Regulation is, inter alia, to ensure a high level of protection of human health and the environment, including the promotion of alternative methods of assessing the risks of substances, and to ensure the free movement of substances within the internal market. The REACH regulation is always available to us in the currently valid version with the corresponding annexes and every change is checked for its relevance. The regulation is currently available in the corrigendum of 05.02.2009 (OJ L 36/84).

ABB Industrial Solutions B.V. supplies boxes and enclosures that are not substances or preparations in the sense of the regulation. Therefore, it is not necessary to prepare safety data sheets for our products according to this regulation. As a "downstream user" in terms of Article 3 (13) of the Regulation, we ensure that the substances and reparations we use are registered in accordance with the REACH Regulation, if applicable. According to the REACH regulation, our suppliers are also obliged to inform us about any chemicals that are listed as notifiable in the current list of potentially hazardous substances (SVHC - substances of Very High Concern). In order to increase your protection as a customer, ABB proactively and on its own initiative asks all its suppliers at regular intervals to provide information on the possible use of such chemicals.

Would you like an example?
On 27.06.2018 lead (CAS 7439-92-1) was added to the SVHC list as mutagen (Article 57c). Lead monoxide (CAS 1317-36-8) and Diboron trioxide (CAS 1303-86-2) can be used in the supply chain in electronic components, e.g. in SMD resistors. In accordance with our obligation under Article 33 of the REACH Regulation, we therefore inform our customers which of our products may contain lead, a substance listed in the SVHC list, as an alloying element (e.g. in brass) in concentrations of more than 0.1% to a maximum of 4% in individual components for manufacturing reasons.

The list of Substances of Very High Concern (SVHC) is available as of January 2025 (published on the ECHA website according to Article 59(10) of REACH). (see also: ECHA/NR/22/01).
Information on the SVHC substances reported to us by our suppliers is given in the annex to this letter. In addition, you can obtain up-to-date information on the subject of material compliance in the supply chain at any time on this page: https://new.abb.com/about/supplying/material-compliance.

The use of these substances in our products complies with the applicable legal regulations. When used as intended, there is no danger to health or the environment. Safety instructions are therefore not required.

Signed for and on behalf of ABB Industrial Solutions B.V.,

Evergem, May 2026.
