

Microduct 10/6 mm

TWD 10/6 mm Primary Tube, Striped

Features

- Easy to branch out and splice
- Heavy-duty design
- 10/6 mm microducts
- Low friction ribbed inner surface for maximum installation lengths

Application

The thick-walled microducts have an inner low friction surface that enables installation of nano cables or fiber optic micro cables. The thick inner wall of the microducts allow for installation directly into the ground without the need for additional protection. The microducts are optimized for best performance in combination with the Hexatronic Raptor and Viper air-blown cabling systems.

Design

The microducts have an outer/inner diameter of 10/6 mm. All microducts have two colored stripes.

Product Information

Micro ducts are made of Polyethylene (HDPE)

All materials are halogen free.

Technical Information

Product Color	12 different colors are available: red, green, blue, yellow, white, grey, brown, violet, turquoise, black, orange and pink.
