# ible duct repair kit

The Filoform divisible duct repair kit is suitable for connecting and repairing subducts which contain a cable. Our divisible sealing system enables you to install it easily onto to existing installations.

By applying the locking keys onto the shells the silicon insert is compressed and creates a firm gas and watertight seal of 5 bar or higher and also creates a high strain relief on the ducts. After installing the repair kit it is suitable for blowing in new cables.

The divisible connectors can also be used as a gas block connector. Please contact our sales department for more information.
