

The memory card is used for data security and for transferring switching programs between time switches. In connection with the programming set (programming software and adapter), it can also be used to carry out the transfer of switching programs between the PC and the time switches.

There are labelling options on the back of the memory card so that it is possible to distinguish between several memory cards.

Technical Data

Ambient temperature range	– Operation	- 5 °C ... 45 °C
	– Storage	-25 °C ... 55 °C
	– Transport	-25 °C ... 70 °C
Mounting	– Plugged onto the front of the time switch	
Dimensions	– 60 x 28 x 7 mm (H x W x D)	
Weight	– 0.01 kg
