NGB Kits

Multiple wraparound cable seal kits are available using different mechanisms.
Standard cable glands PG16, 21 and 29 can be installed on NGB (two cable entrance for box).
Cold sealing components for multiple cables could be ordered.
Configuration for main cable entry (4x20 mm) and looped cables.
Drop cables can be managed with push through ports (12x10 mm or 24x6 mm).
Wraparound pigtail seal can be used for easy re-entry without disturbing existing circuits.
Strength member of reinforced cables are fixed inside the box with the appropriate and dedicated kits.

The kit can beinstalled on all NGB boxes.
*You can customize the NGB also with CableEntries listed on page 77*
