

# FOSC-400G

# Fiber Optic Closure with Multi-out Gel Seals

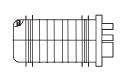

The FOSC-400G is a single-ended, environmentally sealed enclosure for fiber management in the outside plant network.

FOSC-400G closures have the same splice capacity as FOSC-400 closures and feature the same reliable and easy-to-use dome-to-base clamping system. The major difference between the closures is that the FOSC-400G's cable sealing terminations are done by using multi-out gel-sealing technology instead of heat shrink. This allows up to 16 cables to be sealed in a single round port. It is easy to remove cables, and gel seals are completely re-usable.

### **Features**

- Single-ended design
- Available in 4 sizes
- Base and dome sealed with clamp and O-ring system
- 2 or 5 round cable ports
- Oval seals ordered separately
- FOSC splice trays hinged for access to any splice without disturbing other trays
- Compatible with most common cable types: e.g. loose tube, central core, slotted core, ribbon fiber
- Uncut or expressed loose tubes can be stored in storage baskets
- Closure can be used in aerial, pedestal and underground (up to 2 meters waterhead) environments
